Contents

Papers

Moving Sideways - Lateral Displays

Adaptive Level of Detail in Dynamic, Refreshable Tactile Graphics .................................................. 1
Vincent Levesque, Grégory Petit, Aude Dufresne, Vincent Hayward

LateralPaD: A Surface-Haptic Device That Produces Lateral Forces on A Bare Finger ...................................... 7
Xiaowei Dai, J. Edward Colgate, Michael A. Peshkin

Lateral-Force-Based 2.5-Dimensional Tactile Display for Touch Screen .................................................. 15
Satoshi Saga, Koichiro Deguchi

Exploring the Design Space of Programmable Friction for Scrolling Interactions ..................................... 23
Vincent Lévesque, Louise Oram, Karon MacLean

Surface Haptic Feature Attenuation due to Contact on Opposing Surface .............................................. 31
Steven G. Manuel, Roberta L. Klatsky, Michael A. Peshkin, J. Edward Colgate

Creating Touch - Innovative Haptic Interfaces

Recreating the Feel of the Human Chest in a CPR Manikin via Programmable Pneumatic Damping .................. 37
Andrew A. Stanley, Simon K. Healey, Matthew R. Maltese, Katherine J. Kuchenbecker

Design and Control of an Air-Jet Lump Display ....................................................................................... 45
James C. Gwilliam, Alperen Degirmenci, Matteo Bianchi, Allison M. Okamura

High-Fidelity Rendering of Virtual Objects with the ReHapticKnob – Novel Avenues in Robor-Assisted
Rehabilitation of Hand Function .................................................................................................................. 51
Jean-Claude Metzger, Olivier Lambercy, Roger Gassert

A Haptically Accurate Practice Carillon ........................................................................................................ 57
Joseph B. Brink, Ying (Jean) Zheng, John B. Morrell

Thermal Bilateral Control for Reproduction of Thermal Contact between Remote Places ......................... 65
Hideaksa Morimitsu, Seiichiro Katsura
A Three DoFs Wearable Tactile Display for Exploration and Manipulation of Virtual Objects
Francesco Chimello, Monica Malvezzi, Claudio Pacchierotti, Domenico Prattichizzo

Co-located 3D Graphic and Haptic Display using Electromagnetic Levitation
Peter Berkelman, Muneaki Miyasaka, Juaquin Anderson

Technology Fundamentals - Sensors, Actuators and Control

A High Bandwidth Low Inertia Motor for Haptic Rendering Based on Clutched Eddy Current Effects
Xinyi Ge, Shih-Kang Peng, Boyun Wang, Jonah Shapiro, Brent Gillespie, Curt Salisbury

On the Use of Postural Synergies to Improve Human Hand Pose Reconstruction
Matteo Bianchi, Paolo Salaris, Armando Turco, Nicola Carbonaro, Antonio Bicchi

Conductive Fur Sensing for a Gesture-Aware Furry Robot
Anna Flagg, Diane Tam, Karon MacLean, Robert Flagg

Wave Filter Bank for High Fidelity Passive Multirate Haptic Interaction with Slowly Updated Virtual Environments
Naser Yasrebi, Daniela Constantinescu

Parameter-Space Transparency Analysis of Teleoperation Systems
Thomas Schauf, Angelika Peer

Distributed Haptic Cooperation with Passive Multirate Wave Communications
Ramtin Rakhsha, Daniela Constantinescu

Multilateral Teleoperation Control over Time-Delayed Computer Networks using Wave Variables
Takahiro Kanno, Yasuyoshi Yokokohji

Delivering Touch - Force and Tactile Rendering

Volume Haptic Rendering with Dynamically Extracted Isosurface
Loic Corenthy, Jose San Martin, Miguel A. Otaduy, Marcos Garcia

Extending Haptic Augmented Reality: Modulating Stiffness during Two-Point Squeezing
Seokhee Jeon, Matthias Harders

Haptic Simulation of Refrigerator Door
Sungwhan Shin, In Lee, Hoin Lee, Gabjong Han, Kyungpyo Hong, Sungkoon Yim, Jongwon Lee, Youngjin Park, Byeong Ki Kang, Dae Ho Ryoo, Dae Whan Kim, Seunmoon Choi, Wan Kyun Chung

Conveying the Configuration of a Virtual Human Hand Using Vibrotactile Feedback
Andrew A. Nichols, Heidi M. Weeks, Netta Gurin, Allison M. Okamura

HAPI Bands: A Haptic Augmented Posture Interface
Michele F. Rotella, Kelleher Guerin, Xingchi He, Allison M. Okamura

Science Fundamentals - Perception, Cognition and Performance

Mental Rotation of Directional Tactile Stimuli
Brian T. Gleeson, William R. Provancher

The More They Move the Less They Know: Cutaneous Capture of Kinesthesia?
George H. Van Doorn, Jakob Hohwy, Mark A. Symmons, Jaqui Howell

Somatosensory Anticipation of Curvature in a Haptic Virtual Environment
Julian J. Trampe, Stephen Stephens, Martha Flanders

Co-Location of Force and Action Improves Identification of Force-Displacement Features
Jeremy D. Brown, R. Brent Gillespie, Duane Gardner, Emmanuel A. Gansallo

Comparison of Non-Volitional Postural Responses Induced by Two Types of Torso Based Vibrotactile Stimulations
Beom-Chan Lee, Bernard J. Martin, Kathleen H. Sienko
Training Effects of a Visual Aid on Haptic Sensitivity in a Needle Insertion Task
Emilio Loren Roth Monzon, Amine Chellali, Cedric Dumas, Caroline G.L. Cao

Maneuverability and Grasping Experiments in Teleoperation of Nonholonomic/Twin-Armed Robots
Pawel Malysz, Shahin Sirouspour

Fun and Useful - Novel Applications

Modifying an Identified Curved Surface Shape Using Pseudo-Haptic Effect
Yuki Ban, Takashi Kajinami, Takuo Narumi, Tomohiro Tanikawa, Michitaka Hirose

A Multisensory Illusion with Haptic Interaction to Treat Phantom Limb Pain
Mark W. Farrington, Gregory J. Gerling, Lynn R. Kohan, Sheryl L. Johnson

Haptic Modules for Training in Palpatory Diagnosis
Ernur Karadogan, Robert L. Williams II

Evaluation of Vibrotactile Pattern Design Using Vibrotactile Score
Jaebong Lee, Seungmoon Choi

Interpersonal Recognition Through Mediated Tactile Interaction
Loïc Deschamps, Gabrielle Le Bihan, Charles Lenay, Katia Rovira, John Stewart, Dominique Aubert

A Modular Sensor-Based System for the Rehabilitation and Assessment of Manipulation
Asif Hussain, Nicholas Roach, Sivakumar Balasubramanian, Etienne Burdet

Bi-Manual Skin Stretch Feedback Embedded within a Game Controller
Ashley L. Guinan, Rebecca L. Koslovei, Nathaniel A. Caswell, and William R. Provancher

Poster Papers: Haptic Science

Experimentally Driven Design of a Palpating Gripper with Minimally Invasive Surgery Considerations
Adam Spiers, Sarah Baillie, Tony Pipe, Raj Persad

Physically Co-Located Haptic Interaction with 3D Displays
Pontus Olsson, Fredrik Nysjo, Stefan Seipel, Ingrid Carlbom

Evaluation of Active Handrest Performance using Labyrinths with Adaptive Admittance Control and Virtual Fixtures
Mark A. Fehlberg, Raymond J. King, Andrew J. Doxon, William R. Provancher

Improvement of collaborative selection in 3D complex environments
Adrien Girard, Mehdi Ammi, Jean Simard, Malika Auvray

The Role of Visual-Haptic Discrepancy in Virtual Reality Environments
Michele Scandola, Lorenza Gasperotti, Marco Vicentini, Paolo Fiorini

Guidance Methods for Bimanual Timing Tasks
In Lee, Kyungpyo Hong, Seungmoon Choi

The Effects of Incongruent Feedback on Bimanual Task Performance
Joel R. Cooper, Matthew M. Wernke, Kyle B. Reed

Audio-Haptic intermodal coupling for comparative search tasks
Mehdi Ammi, Brian Katz

User Performance in Complex Bi-manual Haptic Manipulation with 3 DOFs vs. 6 DOFs
Rene Weller, Gabriel Zachmann

Feasible Wrench Space and its Estimation for Isometric Haptic Interaction
Timothy Edmunds, Reinhard Genner, Andrea d'Avella, Dinesh Pai

Contact Force Profiles Differ by Age During Tactile Letter Recognition with the Fingertip
Sabah Master, Francois Tremblay
Poster Papers: Technology

Haptic Rendering of Dense 3D Point Cloud Data ................................................................. 333
Sreeni K G, Subhasis Chaudhuri

Design and Validation of an Epidural Needle Insertion Simulator with Haptic Feedback for Training
Resident Anaesthesiologists ................................................................................................. 341
Vinodh Manoharan, Dennis van Gerwen, John van den Dobbelsteen, Jenny Dankelman

Handheld Haptic Interface with Visual Display for Touching Remote Objects ....................... 349
Hiroshi Yano, Toshiyuki Aoki, Hiroyo Iwata

Presentation of Thermal Sensation through Preliminary Adjustment of Adapting Skin Temperature ................................................................. 355
Shimon Akiyama, Kazunari Sato, Yasutoshi Makino, Takashi Maeno

Haptic Visualization of Bathymetric Data ........................................................................... 359
Tatiana V. Evreinova, Grigori Evteinov, Roope Raisamo

Design of a Forearm-Mounted Directional Skin Stretch Device ............................................ 365
Nathaniel Caswell, Ryan Yardley, Markus Montandon, William Provancher

Signal Processing Techniques for Haptic Data Compression in Teleoperation Systems ........... 371
Jae-young Lee, Shahram Payandeh

Constraint-Based Haptic Rendering of Point Data for Teleoperated Robot Grasping ............... 377
Adam Leeper, Sonny Chan, Kaijen Hsiao, Matei Ciocarlie, Kenneth Salisbury

Refined Methods for Creating Realistic Haptic Virtual Textures from Tool-Mediated Contact
Acceleration Data .............................................................................................................. 385
Heather Culbertson, Joseph Romano, Pablo Castillo, Max Mintz, Katherine Kuchenbecker

Tactile-Based Torque Illusion Controlled by Strain Distribution on Multi-finger Contact ...... 393
Lope Ben Porquís, Massahi Konyo, Saimah Tadokoro

Handwriting Transmission System Using Noncontact Tactile Display ................................ 399
Takayuki Hoshi

Paramatric Design of An Excitation Pattern for Smooth Vibrotactile Flow on Thin Plates ........ 403
Jeonggoo Kang, Kwangsoo Cho, Jeka Ryu

ActivePaD Surface Haptic Device ........................................................................................ 407
Joe Mullenbach, Dan Johnson, J. Edward Colgate, Michael Peshkin

On the Performance of Passivity-based Control of Haptic Displays Employing Levant’s Differentiator for Velocity Estimation ............................................................... 415
Vinay Chawda, Marcia O’Malley

Illusory Perception of Arm Movement Induced by Visuo-Proprioceptive Sensory Stimulation and Controlled by Motor Imagery ............................................................ 421
Daniele Leonardi, Antonio Frisoli, Massimiliano Solazzi, Massimo Bergamasco

Haptic Footstep Display ...................................................................................................... 425
Ravikrishnan Jayakumar, Subhransu Mishra, John Danenhoffer, Allison Okamura

An Adaptive System Model of Human Precision Grip .......................................................... 431
Erik Engeberg

Effect of Artificial Skin Ridges on Embedded Tactile Sensors ............................................... 439
John-John Cabibihan, Htun Lin Oo, Saba Salehi

TWuiST: A Discrete Tactile-Proprioceptive Display for Eye and Ear Free Output on Mobile Devices ................................................................. 443
Tony Morelli, Eelke Folmer

Haptic Interface with Hybrid Actuator for Virtual Needle Insertion and Tissue Cutting .......... 451
Berk Gonenc, Hakan Gurocak
Measuring Surface Wave Propagation During Vibrotactile Stimulation
Lynette Jones, Katherine Sofia

Haptic Actuator Design Parameters That Influence Affect and Attention
Ying (Jean) Zhong, John Morell

Mobile Implementation and User Evaluation of the Huggy Pajama System
James Teh, Zhenling Tsai, Jeffrey Koh, Adrian Cheok, Lai Sep Riang, Pan Yi, Lin Wei Liang

Shape Modeling of Soft Real Objects Using Force-Feedback Haptic Interface
Sunghoon Yim, Seungmoon Choi

Design of a Transparent Tactile Stimulator
Frederic Giraud, Michel Amberg, Betty Lemaire-Semail, Gery Castiez, Paolo Olivo, Nicolas Roussel

\( H_2 \) Controller Design of Networked Bilateral Teleoperation System with Markovian Time Delays
Xiaotao Liu, Daniela Constantinescu, Yang Shi

Haptic Object Recognition for Multi-Fingered Robot Hands
Stefan Escaida Navarro, Nicolas Gorges, Julian Schill, Tamim Asfour, Heinz Worn, Rudiger Dillmann

Experimental Evaluation of a Projection-Based Force Reflection Algorithm for Haptic Interfaces
Iliia Polushin, Mir Zayed Hasan, Amir Takhmar

Poster Papers: Applications

Composing Vibrotactile Music: A Multi-Sensory Experience with the Emoti-Chair
Anant Baijal, Julia Kim, Carmen Branje, Frank Russo, Deborah Fels

Human-Operated 3D Micro-Manipulator with Haptic Feedback
Andreas Schmid, Ramesh Yechangunja, Stefan Thalhammer, Mandayam Srinivasan

Haptics using a smart material for eyes free interaction in mobile devices
Hushui Wang, Dimothenis Kaleas, Roger Ruuspakka, Robert Tartz

HALO: Haptic Alerts for Low-hanging Obstacles in White Cane Navigation
Yunqing Wang, Eza Koch, Katherine Kuchenbecker

Online Re-Mesh and Multi-Rate Deformation Simulation by GPU for Haptic Interaction with Large Scale Elastic Objects
Kazuyoshi Tagawa, Yasuyuki Sasaki, Hiromi Tanaka

A Framework for Enhancing Video Viewing Experience with Haptic Effects of Motion
Fabien Danieau, Julien Fleureau, Audrey Cabec, Paul Kerbiriou, Philippe Guillotel, Nicolas Mollet, Marc Christie, Anatole Lecuyer

Lock Picking Simulation Using Visual and Bimanual Haptic Display
Karl Arthur, Andrew Doxon, Courtney Parsons, William Provancher

Application of Haptic Feedback to a Combat
Samuel McAmis, Kyle Reed

Using Publicly Known Passwords with Haptics and Biometrics User Verification
Andrea Kanneh, Valerie Stoute, Michael Smith

Evaluation of a Parallel Actuation Approach for MR-Compatible Haptics
Chembian Parthiban, Christopher Esser, Michael Zinn

Physical Mobile Interaction with Kinesthetic Feedback
Byung-Kil Han, Seung-Chan Kim, Soo-Chul Lim, Dongbum Pyo, Dong-Soo Kwon
