### POWER SYSTEM STABILITY AND EFFICIENCY
756-080: Lumped-Parameter Least Squares Estimation of Thermal Constants for Partially-Shaded Photovoltaic (PV) Modules

756-083: A Study of Over-Excitation Protection Algorithm using the 345kV Power System Modeling Data in Korea
Chul Won Park, Woo Hyeon Ban, and Yoon Sang Kim ................................................................. 120

756-088: Photovoltaic Hot-Spot Automated Diagnostics from Partial Noisy Sensor Data: A Physics based Approach using Splines and Stochastics
Shahar Ben-Menahem and Abraham K. Ishihara ................................................................. 126

ALTERNATIVE / RENEWABLE ENERGY

756-014: Temperature and Fuel-Flow-Rate Dependence of the Parameters of an Equivalent Circuit Model of DMFC Dynamic Response
Kshitiz Singh, Bill M. Diong, and Diego Estrada ................................................................. 139

756-016: Purity Measurement and Storage of Hydrogen for Fuel Cells
Akinlawon O. Amoo, Willem J. Bekker, and Hendrik C.vZ. Pienaar ............................................ 144

756-019: Design and Techno-Economical Optimization of Wind Turbine Generator System: Under Diverse Meteorological Conditions
Marangi S. Mbogho and Michael J. Saulo ................................................................. 150

756-040: Multi-Level Inverter Fed Induction Motor Base on PLL Technique Control
Vittaya Tipsuwanporn, Anuchit Charean, Arjin Numsonman, and Thirayut Sungsinchai .................. 157

756-043: Optimization of a Stand-Alone Generating System
Juan M. Ramirez and Victor M. Sanchez ................................................................. 163

756-084: Optimized Power Generation in Offshore Wind Parks
Julio de Oliveira Filho and Zoltan Papp ................................................................. 170

756-085: Reverse Water Gas Shift Reaction for Synthetic Fuel Production
Farhang Abdollahi, Fatma Handan Tezel, and Stephen Aplin .................................................... 178

Dan Liddell, Yoo Hsiu Yeh, Robert Getsla, Kevin Young, Chi-ping Yeh, Jacques Dolan, Daniel Nguyen, Shahar Ben-Menahem, Steve Yang, and Abraham K. Ishihara .................................................... 183

Junior M. Mabiza, Charles Mbohwa, and Musundwa Nemarumane ............................................ 192

POWER DISTRIBUTION / POWER MARKETING

756-008: A Stand-Alone Wind Energy System with Battery Storage
Chandrashekhar N. Bhende and Siva G. Malla ................................................................. 199

756-025: Multiproduct Pricing Revisited: Aligning Time Varying Tariffs to Procurement Costs or Load Profiles?
Lilia Filipova-Neumann ................................................................. 207

756-035: A Heuristic Model for Planning of Single Wire Earth Return Power Distribution Systems
Geoffrey Bakkabulindi, Mohammad R. Hesamzadeh, Mikael Amelin, Izrael P. Da Silva, and Eriabu Lugujjo ................................................................. 215

756-046: Theoretical Analysis to Determine the Solar Concentration Limit with Passive Cooling of Solar Cells
Ashwin Date, Abhijit Date, Lippong Tan, and Aliakbar Akbarzadeh ........................................... 223

756-051: Inventory Analysis of Biogas Utilization System in the Wastewater Treatment for the CDM
Takaaki Furubayashi and Toshihiko Nakata ................................................................. 231

756-058: Hydraulic based Wave Buoyancy Force Simulator
Prakash Persad and Aneil Ramkhalawan ................................................................. 239

756-077: Prospective Biomass Hybrid Power Plants with Thermosolar in Australia - A Study
Shaheen H. Chowdhury, Amanullah Maung Than Oo, and Md Fakhrul Islam .................................. 247

ANALYSIS MANAGEMENT AND MODELLING

756-026: Lagrange Relaxation based Unit Commitment for Thermal, Solar and Wind Power Generation
Jeremy Kosman, Aparna Viswanath, and Colin Coates ............................................................... 253

756-036: Gravitational and Barrier Effects in D-Dimensional Invasion Percolation Reservoir Models
Ken A. Hawick ................................................................. 259

756-038: Input Model Identifying Techniques for 48h Local Wind Power Forecast
Alexander Arnoldt and Peter Bretschneider ................................................................. 267
756-045: The Calculation of Current in the Portable Grounding Line  
Shuheng Dan, Xiangyu Li, Min Zhu, Jianwen Zhang, and Xinlong Tang ................................................................. 275

756-062: Power Transformer Risk Management based on Reliability Targets  
Rabah Medjoudj, Nadir Tighidet, and Djamil Aissani ................................................................. 281

756-066: A Visualization Method for Power Systems using Geographical Views and Thiessen Polygons  
Daniel L. Gomes Jr., Anselmo C. Paiva, Cláudio S. Baptista, Fábio L. Leite, and Rogério A.C. Fernandes ................................................................. 288

756-067: A Finite Element Method Formulation for Non-Uniform Heating of Photovoltaic Modules with Associated Validation Metrics  

756-063: The Relationship between the Sugar Production and Global Warming: A Life Cycle Assessment Perspective  
Takalani M. Nemarumane and Charles Mbohwa ............ 301

ADDITIONAL PAPERS

714-099: Economic Load Dispatch with Valve Point Loading using Gravitational Search Algorithm  
Shaik Affijulla and Sushil Chauhan ................................. 309

714-195: Voltage Instability Alleviation through FACTS Controllers  
Shaik Affijulla and Sushil Chauhan ................................. 315

714-130: Compression-Ignition Engine Performance and Emissions in Single and Dual Fuelling Modes with Sustainable Fuels  
Theodosios Korakianitis, Ashand M. Namasivayam, Roy J. Crookes, Shahid Imran, Balazs Ihracska, Alvaro Diez, and Nadeem A. Malik .................................................. 322

756-068: Central and Distributed MPPT Systems under Varying Weather Conditions  
Ansel Barchowsky, Jeffrey P. Parvin, Gregory F. Reed, Matthew J. Korytowski, and Brandon M. Grainger ......... 328
