Volume II

TOPIC 2. INDOOR ENVIRONMENT

Effect of perceived control of environmental temperature on human thermal comfort
X. Zhou, Y. X. Zhu, Q. Ouyang, X. Zhang

Measure the effects of thermal discomfort on the performance of office work
L. Lan, P. Wargocki, Z. W. Lian

Effect of streamer plasma air purifier on SBS symptoms and performance of office work
X. J. Zhang, L. Fang, P. Wargocki, D. Szulc, T. Tanaka, K. Kegawa

Study on indoor thermal environment of rural residential building in winter in Jinlin and Chongqing region
C. H. Sun, C. Y. Qi, H. Yang, B. H. Yan, Z. M. Zhao

Influence of temperature and airflow on fatigue of office workers: an experimental study
G. G. Cao, J. Yu, Q. Ouyang, N. Yu, H. F. Di, Y. X. Zhu

Test of a generalized drift flux model for simulating indoor particle dispersion
B. Zhou, B. Zhao

Experimental research on the effect of the air purification device adopting the personalized ventilation system in the tollbooth
Proceedings: ISHVAC 2011

Multi-objective optimization of indoor air quality for displacement ventilation using genetic algorithms
F. P. Qian, X. J. Zhu, N. N. Zhao

Resuspension of expiratory aerosols from indoor surfaces: preliminary adhesive force measurement
W. T. Leung, S. Yin, G. N. Sze-To, C. Y. H. Chao

Filtration efficiency study of glass-fiber filter media for airborne bacteria bioaerosol
J. J. Guo, J. J. Liu, G. Y. Han

Numerical approach of carbon monoxide dispersion in a big enclosed parking lot
J. Y. Zheng, L. J. Luo, Z. Q. Chen

Effectiveness of indoor air quality improvement with outdoor air for building ventilation
J. Wang, X. Zhang, X. Zhou

Contribution of outdoor nitrogen dioxide on indoor air quality of roadside stores using indoor mass balance

Investigation of indoor air quality of kindergartens in Nanjing
X. Y. Shen, X. J. Xie, H. Huang

Reviewing pollutant dispersion around buildings
Q. Xia, J. L. Niu

Diffusion-controlled reference material for VOC emissions testing
Z. Liu, C. Howard-Reed, S. S. Cox, J. C. Little

Reason and solution of unsatisfied parameters in high-bay depot and moisture condensation in connected external corridor in a cigarette factory
X. F. Zhang, G. J. Song, X. L. Shao, X. T. Li, H. G. Shen

Investigation of the subjective evaluation of indoor illumination level on perceived air quality
Y. T. Jiang, C. Z. Yang

Impact of indoor temperature and fresh air rate on evaluation of perception of indoor air quality studies in a wide temperature range
Y. T. Jiang, C. Z. Yang

Volatile organic compounds (VOCs) concentration simulation of a newly decorated residential unit
W. Liang, P. Gao, J. Guan, X. Yang

Lighting influencing air conditioning loads and energy saving analysis for office buildings
J. You, S. H. Xu, W. F. Li

Simulation of flow noise generation in a circular ceiling diffuser – a comparison between a silent and a noisy design by using CFD and Lighthill's acoustic analogy
P. Saarinen, P. Mustakallio

Air ionization as an indoor environment factor
K. A. Chernyy

Methodology for measurement of objective and subjective appreciation of multicriteria comfort in residential buildings
S. Boulet
Statistical analysis for energy consumption of office buildings in Japan

Effects of dynamic airflow on body temperature during 30-day head-down bed rest
Z. Z. Yang, X. J. Yu, J. X. Fei, D. Song, S. Y. Chang, J. Lu

TOPIC 3. CLIMATE AND OUTDOOR ENVIRONMENT

Discussion on low-carbon technologies of communities
J. Zhang, D. Y. Li

Simulation of carbon storage and absorption by tree planting within residential district
W. J. Zhang, Q. Q. Zhang, J. Yang

Climate adaptability division for application of evaporative cooling air-conditioning
Y. H. Di, S. C. Wang, Y. H. Wang

Greenhouse gas accounting for quantifying low carbon districts in China
B. P. Xu, P. Liu, C. C. Long, Y. Ding

Analysis of heat power cascade utilization for hot spring

Field investigation of traffic-related air pollutant concentrations in a regular street canyon
X. T. Liu, S. F. Wang, J. Zhao, Y. C. Wang

Modeling particle deposition in turbulent duct flows using Lagrangian approach
N. P. Gao, Q. B. He, J. L. Niu, T. Zhu, J. Z. Wu

Room temperature NOx removal over carbon nanofibers fabricated by electrospinning
M. X. Wang, Z. H. Huang, F. Y. Kang, K. M. Liang, C. Muller

Integral and difference forms of revised CFK equation for prediction carbon monoxide thresholds in tunnels
W. Ye, X. Zhang

Quantitative study on visibility effect in road tunnels
C. Zhu, X. Zhang, L. Morawska

A Permissible carbon monoxide concentration limit model for longitudinal tunnel with shafts
W. Ye, X. Zhang

Evaluation and improvement of planting effect on district air environment by CFD simulation
W. J. Zhang, N. Wang, B. Zhang

Study on heat island effect of Chongqing in summer
Z. H. Wang, J. Lu, L. Xie, S. L. Chen

CFD study of urban water body effect on the urban local thermal climate
X. C. Song, J. Liu, Z. D. Ye, H. Rao, Y. Li

The influence of building facades on the outdoor thermal environment of residential quarter
Y. Q. Ou, X. S. Yang, L. H. Zhao, Q. L. Meng, Z. P. Zhang

A modelling study of microscale heat island effect in a courtyard
X. Y. Yang, Y. G. Li, L. N. Yang
TOPIC 4. POWER AND ENERGY SYSTEM

Improving energy efficiency of existing suburban areas through district energy planning
A. F. Monique, S. Reiter

Low carbon economy in cities of China - possibilities to estimate the potential of CO₂-emissions
H. P. Leimer

Analysis on the establishment and application of dynamic cooling load database of district buildings
L. Duanmu, H. W. Shu, C. Z. Han, Z. J. Wang

Analysis of the heat preservation and economical efficiency of the rock wool in engineering
J. F. Mo, J. Y. Zhao, L. Zhou

Utilization of industrial waste heat for district heating – a case study
H. Fang, Q. Shen, J. J. Xia, Y. Jiang

Hydraulic analysis method of faulty condition based on the topology reestablishment of spatial heating network
X. X. Wang, L. H. Zhao, W. W. Du

District heating and energy indicators: a method to assess the link between urban planning characteristics and energy efficiency of district heating networks
P. E. Pacot, S. Reiter

A neural-fuzzy based adaptive control scheme for heat exchangers in district heating system
L. Huang, Z. Y. Liao, L. Zhao

Technical and economic analysis of water-mixing direct connection and indirect connection in heating system
X. Q. Li, D. Y. Shi, X. J. Zhang

Operation analysis and energy-saving solution of CHP and heating system
Y. M. Song, Y. N. Liu, X. Zhou

Real-time database design of heating measurement and control
Y. M. Song, X. Zhou, Z. H. Zhu
