Proceedings of the 9th International Conference on

Shock & Impact Loads on Structures

16 – 18 November 2011, Fukuoka, Japan

Editors
Prof. Yoshimi SONODA – Kyushu University, Japan
Assoc. Prof. Tat Seng LOK – Nanyang Technological University, Singapore
# 9th International Conference on
## SHOCK & IMPACT LOADS ON STRUCTURES
### 16-18 November 2011 - Fukuoka, Japan

### Table of Contents

### CONFERENCE LECTURE

**Collapse mechanism of seawalls by impulsive load due to the March 11 tsunami**  
N. Ishikawa*, M. Beppu, T. Mikami, H. Tatesawa and M. Asai  
[1]

### KEYNOTE PAPERS

**Methodologies to resist progressive collapse - current standards and their deficiencies**  
John E. Crawford and Shengrui Lan*  
[13]

**Effect of FRP strengthening of concrete structures on its blast load-carrying capacities**  
Hong Hao* and Azrul A. Mutalib  
[23]

**Perspectives on high explosives research [abstract only]**  
Y Horie*  
[39]

**Particle methods for modelling impact load on structures**  
C G Koh*, S. Swaddiwudhipong, Z. S. Liu and M. Gao  
[41]

**An overview of current study on residual capacity of blast damaged reinforced concrete and composite columns**  
Bing Li*  
[57]

**On the perforation of ductile plates by rigid projectiles [abstract only]**  
Z. Rosenberg* and E. Dekel  
[73]

**Blast retrofit of building components**  
Murat Saatcioglu*, Alan Lloyd, Eric Jacques, Hamid Anvari, Laura Ciornei and Timo Tikka  
[75]

**Structural reliability analysis of reinforced concrete columns subject to explosive blast loading**  
Mark G. Stewart*, Yufeng Shi and Xudong Zhi  
[91]

**New building concepts protecting against aircraft impact**  
Klaus Thoma*, Markus Nöldgen and Werner Riedel  
[103]

### SPECIAL SESSIONS

**Special Session 1: AIJ Guidelines**

**Design considerations in tentative AIJ guideline**  
Takuji Hamamoto*  
[116]

**Member design in tentative AIJ guideline**  
Y. Mukai, N. Igawa, A. Kushibe, Y. Takeuchi and T. Hamamoto*  
[125]

**Dynamic response in tentative AIJ guideline**  
N Nakamura, A. Nishida and T. Hamamoto*  
[133]

**Design examples in tentative AIJ guideline**  
A. Nishida, Y. Ohashi, H. Obi, Y Takeuchi and T. Hamamoto*  
[143]

**Design loads in tentative AIJ Guideline**  
T Ohta*, T. Kano, M Tamura* and T. Hamamoto*  
[153]
Special Session 2: Forensic Engineering – Contribution to Blast Protective Design

Protective structure applications in war zones – assessment through construction
Edward J. Conrath and Kirk A. Marchand*

Building code improvements resulting from World Trade Center and Oklahoma City attacks
W Gene Corley*, Jared E. Brewe and David Drengenberg

Attack on the Pentagon
Don Dusenberry*

Essential role of decision-making tools in performance based design of protective structures
Mohammed M. Ettouney* and Hassan A. Pekoz

Vulnerability studies and forensic investigations-identifying blast damage hazards
[abstract only]
Robert Smilowitz* and Mohammed Ettouney

TECHNICAL PAPERS

The significance of the thickness and the structural damping of an orthotropic plate when subjected to localized blast loads
Sofia W Alisjahbana* and Wiratman Wangsadinata

A study of violent water induced impact problems using ISPH method
Abdelraheem M Aly*, Mitsuteru Asai and Yoshimi Sonoda

Fast dynamic FEM solver for the seismic design of bridge using a model order reduction
Mitsuteru Asai*, Hiroki Iida, Norliyati M. Amin and Yoshimi Sonoda

High velocity impact test of short fiber reinforced concrete plates
Masuhiro Beppu*, Jun Takahashi and Atsuhisa Ogawa

Blast retrofit of unreinforced masonry infill walls with polyurea
Laura Ciornei*, Murat Saatcioglu* and Timo K. Tikka

Shape considerations in culvert design against improvised explosive device (IED) blasts
J.C. Croucher* and P.J. Heffernan

Performance assessment of reinforced concrete beams under varying rates of concentrated loading
Satadru Das Adhikary, Bing Li and Kazunori Fujikake

A proposal on improved impact load specification for the design of a rockfall interceptive cable-net structure
Shanker Dhakal*, Netra Prakash Bhandary, Ryuichi Yatabe and Naoki Kinoshita

Dynamic response of UHPC members under internal and external blast loading
Jonathan Dragos, Chengqing Wu* and Matthew Lukaszewicz

A New Standard for blast protection of buildings
Don Dusenberry*

Dynamic responses of single-layer reticulated domes under various impact loads
Feng Fan*, Xudong Zhi, Hongfeng Yin and Tingting Liang

Numerical study of the ballistic performance of multi-layered metallic plates subjected to deformable projectile impact
E.A. Flores-Johnson*, M. Saleh and L. Edwards

Effect of residual-stress field on the ballistic performance of welded steel plate
TECHNICAL PAPERS

Dynamic shear resistance of rc beams
Kazunori Fujikake* and Bing Li

Modelling masonry under dynamic loadings, material models, numerical simulations
Norbert Gebbeken, Tobias Linse and Tamara V. Araújo

Application of plate bonding method for the seismic performance improvement of damaged rc bridge piers
Kyoungbong Han, Dooyong Cho*, Junghwan Kim and Sunkyu Park

Ultimate velocity and penetration depth for high velocity projectile penetrating concrete-type material
He Xiang, Li Xiaojun, Dang Aiguo, Zha Lvying

Evaluation of the relationship between velocity of a train going around a curve and absorbed energy of rc protective barrier
T. Hisamori* and E. Tachibana

Numerical simulation on impact of sand filled pack
Sy Tam Ho, Hiroshi Masuya*, Yoichi Nishita and Stephane Lambert

Adaptive impact absorption for safety engineering
J. Holnicki-Szulc*, C. Graczykowski, G. Mikulowski, A. Mróz, M. Ostrowski and R. Wiszowaty

Application of assembled element DEM on evaluation of shear resistance of filled boulder
Toshiyuki Horiguchi*, H. Shibuya and S. Katsuki

Blast demolition planning tool using key element index
Daigoro Isobe* and Takuya Katsu

A dynamic CAP model with spall failure for concrete with applications to impact loadings
Masaharu Itoh*, M Beppu and M Katayama

Collision performance of new bridge guard fences using the numerical simulation
Seiji Itoh*, Yoshito Itoh and O Takadóh

Investigation of causes of failures of buildings in October 08, 2005 earthquake and their remedies
Qaiser uz Zaman Khan, Muhammad Amjad Hanif and Muhammad Fiaz Tahir

Rigid-Body-Spring network with rheological model for simulating failure behavior of structural concrete under impact loading
Kunhwí Kim and Yun Mook Lim*

Numerical simulation of dynamic response behavior of a rc portal frame under road vehicle crashing
N. Kishi*, M. Komuro and M. Takeda

Large-scale falling-weight impact test of rockfall protection gallery with sand cushion
H Kon-no*, H Nishi, S Yamaguchi, N Kishi and Y Ushiwatari

Improvement on forestal formula
Li Xiaojun, He Xiang, Dang Aiguo and Zha Lvying

Design, build and maintenance of protective designs for the blast mitigation of structures
Liu Chunlin*

Ground vibration generated by a falling weight
Liwei Liu, Feng Lin, Xinyuan Zhao and Xianglin Gu

Impact response simulation of mortar beams using ASPH method
Shahrul Niza Mokhtar*, Yoshimi Sonoda and Soichiro Tokumaru

# TECHNICAL PAPERS

Simulation of cellular materials using micro-scale model  
Chengqing Wu* and Ling Yu  

Large-scale falling-weight impact test of RC slabs with cushion material  
S Yamaguchi*, H Nishi, H Kon-no, N Kishi, Y Kurihashi and Y Ushiwatari  

Numerical simulation of shear failure behavior of prestressed concrete beams under drop-weight impact loads using RBSM  
Y. Yamamoto*, T. Yoshimura, I. Kuroda and N. Furuya  

Impact loading experiment on a falling-down prevention device for bridges  
Yoichi Yuki*, Kazutaka Ikezue, Toshihiro Kasugai and Satoji Oshita  

Laboratory test and numerical simulation of laminated glass window response to impact and blast loads  
Xihong Zhang* and Hong Hao  

The pressure field of rectangle shells under blast loading  
Xudong Zhi*, Jialu Ma, Haifeng Wang and Feng Fan  

Metal foam cladding subjected to a localized blast: A theoretical approach  
Hongyuan Zhou*, Guowei Ma, Jingde Li and Zhiye Zhao
