Proceedings of the

ASME INTERNATIONAL DESIGN ENGINEERING
TECHNICAL CONFERENCES AND
COMPUTERS AND INFORMATION IN
ENGINEERING CONFERENCE

- 2011 -

VOLUME 6
PART B

35TH MECHANISMS AND ROBOTICS CONFERENCE

presented at
ASME 2011 INTERNATIONAL DESIGN ENGINEERING TECHNICAL CONFERENCES AND
COMPUTERS AND INFORMATION IN ENGINEERING CONFERENCE
AUGUST 28–31, 2011
WASHINGTON, D.C.

sponsored by
THE DESIGN ENGINEERING DIVISION, ASME
THE COMPUTERS AND INFORMATION IN ENGINEERING DIVISION, ASME

ASME
Three Park Avenue * New York, N.Y. 10016
PART B

MECHANISMS AND ROBOTICS EDUCATION

DETC2011-47259 ................................................................. 659
Real-Time Validation and Control Environment for Parallel Robot Control Design
   A. Zubizarreta, E. Portillo, I. Cabanes, M. Marcos, and Ch. Pinto

DETC2011-47592 ................................................................. 669
Improved Robotics Joint-Space Trajectory Generation With Via Point
   Robert L. Williams, II

PARALLEL MANIPULATORS
DETC2011-47440 ................................................................. 871
Machining With Redundant Kinematics
  Reimund Neugebauer, Welf-Guntram Drossel, Steffen Ihlenfeldt, and Hendrik Rentzsch

DETC2011-47525 ................................................................. 883
Static Balancing of Translational Parallel Mechanisms
  Teunis van Dam, Patrice Lambert, and Just L. Herder

DETC2011-47541 ................................................................. 891
On the S-(nS)PU-SPU and S-(nS)PU-2SPU Under-Actuated Wrists
  Raffaele Di Gregorio

DETC2011-47564 ................................................................. 899
IRSBot-2: A Novel Two-DOF Parallel Robot for High-Speed Operations
  Coralie Germain, Sébastien Briot, Victor Glazunov, Stéphane Caro, and Philippe Wenger

DETC2011-47573 ................................................................. 911
Identifiable Parameter Analysis for the Kinematic Calibration of a Hybrid Robot
  Yongbo Wang, Huapeng Wu, and Heikki Handroos

DETC2011-47695 ................................................................. 921
Prototype Design of a 6-DOF Compliant Parallel Micro-Manipulator
  Yi Yue, Feng Gao, and Hao Ge

DETC2011-47703 ................................................................. 931
Geometry and Constraint Based Design of Metamorphic Parallel Mechanisms
  Ketao Zhang, Jian S. Dai, and Yuefa Fang

DETC2011-47725 ................................................................. 941
Quantitative Performance Analysis of Haptic Devices With Parallelogram Subsystems
  Leng-Feng Lee, Xiaobo Zhou, and Venkat N. Krovi

DETC2011-47752 ................................................................. 949
Optimal Trajectory Tracking Control With a 5R Parallel Robot
  Gianmarc Coppola and Dan Zhang

DETC2011-47836 ................................................................. 959
A Unified Method for Computing Position and Orientation Workspaces of General Stewart Platforms
  Oriol Bohigas, Lluis Ros, and Montserrat Manubens

DETC2011-47884 ................................................................. 969
Solving the Forward Kinematic Problem of 4-DOF Parallel Mechanisms (3T1R) With Identical Limb Structures and Revolute Actuators Using the Linear Implicitization Algorithm
  Mehdi Tale Masouleh, Dominic R. Walter, Manfred Husty, and Clément Gosselin
DETC2011-47929 ................................................................. 979
More Flexibility and Versatility in Automated Handling Processes With an Alterable
Parallel Manipulator
  Martin Riedel, Tom Mannheim, and Burkhard Corves

DETC2011-47943 ................................................................. 989
Adaptive and Singularity-Free Inverse Dynamics Models for Control of Parallel Manipulators
With Actuation Redundancy
  Andreas Müller and Timo Hufnagel

DETC2011-48089 ................................................................. 999
Conceptual Design, Performance Evaluation and Dimensional Optimization of a Compact
Acceleration Sensor Based on Flexure Parallel Mechanisms
  Dan Zhang and Zhen Gao

DETC2011-48165 ................................................................. 1009
Geometric Interpretation of Singular Configurations of a Class of Parallel Manipulators
  Xianwen Kong, Jingjun Yu, and Clément Gosselin

DETC2011-48226 ................................................................. 1017
Singularity Analysis of the 4-RUU Parallel Manipulator Based on Grassmann-Cayley
Algebra and Grassmann Geometry
  Semaan Amine, Mehdi Tale Masouleh, Stéphane Caro, Philippe Wenger, and
  Clément Gosselin

DETC2011-48274 ................................................................. 1027
Mobility and Singularity Analysis of a Class of 2-DOF Rotational Parallel Mechanisms
Using a Visual Graphic Approach
  J. J. Yu, X. Dong, X. Pei, G. H. Zong, Xianwen Kong, and Qunxian Qiu

DETC2011-48304 ................................................................. 1037
Screw Systems Generated by Subalgebras: A Further Analysis
  A. Tadeo-Chávez, J. M. Rico, J. J. Cervantes-Sánchez, G. I. Pérez-Soto, and A. Müller

DETC2011-48476 ................................................................. 1051
Mobility Analysis and Inverse Kinematics of a Novel 2R1T Parallel Manipulator
  Enrique Cuan-Urquizo, Ernesto Rodriguez-Leal, and Jian S. Dai

DETC2011-48510 ................................................................. 1059
Type Synthesis of 3-DOF Parallel Manipulators With Both Planar and Translational
Operation Modes
  Xianwen Kong

DETC2011-48557 ................................................................. 1069
Closed-Form Solutions to the Kinematics of a Parallel Locomotion Mechanism With
Actuated Spoke Wheels
  Ping Ren and Dennis Hong
Visual Synthesis of RRR- and RPR-Legged Planar Parallel Manipulators Using Constraint Manifold Geometry
   - Anurag Purwar and Aditya Gupta

ROBOT DYNAMICS AND CONTROL

Kinematics of the (nS)-2SPU Wrist
   - Raffaele Di Gregorio

Vibration Suppression for a Flexible Link Robot Using Acceleration and/or Angular Rate Measurements and a Flatness Based Trajectory Control
   - Peter Staufer, Hubert Gattringer, and Hartmut Bremer

Planning Manipulation and Grasping Tasks With a Redundant Arm
   - Steven R. Gray, Joseph M. Romano, Jordan Brindza, Soonkyum Kim, Katherine J. Kuchenbecker, and Vijay Kumar

NURBs for Robot Manipulator Trajectory Generation
   - John Steuben, John Steele, and Cameron J. Turner

Optimal Trajectory Planning for Brachiation Robot on Ladder With Irregular Branches
   - Ali Meghdari, Seyyed Mohammad Hosseini Lavasani, Mir Saman Rahimi Mousavi, and Mohsen Norouzi

Kinematic Mapping and Calibration of the Thumb Motions for Teleoperating a Humanoid Robot Hand
   - Lei Cui, Ugo Cupcic, and Jian S. Dai

Improved PID Control Using an Adaptive Two-Input Single-Output Coarse/Fine Approach
   - Eric Wood, Carl A. Nelson, and Alyssa Koch

How Dynamic is Dynamic Walking? Human vs. Robotic Gait
   - Carlotta Mummolo and Joo H. Kim

An Analytical Stiffness Analysis Between Actuator Structure and Principal Bearings Used for Robot Actuators
   - Hoon Lee and Delbert Tesar
DETC2011-48221 ................................................................. 1177
Inclination Parameter Estimation for Manipulator and Humanoid Robot Links
Vishesh Vikas and Carl D. Crane III

DETC2011-48237 ................................................................. 1185
Optimum Trajectory Planning for Redundant and Hyper-Redundant Manipulators
Through Inverse Dynamics
Kagan K. Ayten, M. Necip Sahinkaya, and P. Iravani

DETC2011-48279 ................................................................. 1193
A New Variable Stiffness Suspension Mechanism
Olugbenga M. Anubi and Carl D. Crane III

DETC2011-48349 ................................................................. 1203
Hybrid Position-Force Control of Climbing Parallel Robot Using Electrohydraulic
Servo Actuators
Ilka Banfield, Roque J. Saltaren, Lisandro J. Puglisi, and Rafael Aracil Santonja

DETC2011-48529 ................................................................. 1211
Ground Reaction Forces for Various Standing Tasks Considering Generic Terrain
Brad Howard and Jingzhou (James) Yang

DETC2011-48654 ................................................................. 1221
Pseudo Standing, Forward Falling, and Pulling Simulation for Pregnant Women
Qiuling Zou and Jingzhou (James) Yang

TENSEGRITY AND CABLE-DRIVEN SYSTEMS
DETC2011-47432 ................................................................. 1233
A Novel Inflatable Tendon Driven Manipulator With Constant Volume
Sébastien Voisembert, Nazih Mechbal, Alain Riwan, and André Barraco

DETC2011-47599 ................................................................. 1243
Reciprocal Screw-Based Force-Closure of Cable-Driven Closed Chains
Shabbir Kurbanhusen Mustafa and Sunil Kumar Agrawal

DETC2011-47726 ................................................................. 1253
A Comparative Study of 4-Cable Planar Manipulators Based on Cylindrical Algebraic
Decomposition
Damien Chablat, Erika Ottaviano, and Guillaume Moroz

DETC2011-47751 ................................................................. 1263
Towards Parallel Cable-Driven Pantographs
Simon Perreault, Philippe Cardou, and Clément Gosselin

DETC2011-47807 ................................................................. 1273
Wrench Capability Analysis of Cable-Driven Parallel Mechanisms
Yu Zou and Yuru Zhang
