# CONTENTS

## 5TH INTERNATIONAL CONFERENCE ON MICRO- AND NANOSYSTEMS

Introduction .................................................................................................................. 1

### SYMPOSIUM ON BIO MEMS/NEMS

DETC2011-47123........................................................................................................ 3

A Highly Sensitive Electrochemical Impedimetric Nanobiosensor for Dust Mite Antigen Der p2 Detection

*I-Jiuan Bau and Gou-Jen Wang*

DETC2011-47178........................................................................................................ 11

In-Vitro Diagnosis of Colon Cancer Using Bio-Functionalized Magnetic Nanoparticles

*Chin-Yih Hong, Shieh-Yueh Yang, K. W. Huang, Heng-Er Horng, and Hong-Chang Yang*

DETC2011-47320........................................................................................................ 17

Determining Necessary Parameters for Nanoinjector Electrodes During Attraction

*Nathan C. Toone and Brian D. Jensen*

DETC2011-47528........................................................................................................ 25

Improving Adhesion Density and Coverage Uniformity of Antibody-Antigen Binding on a Sensor Surface Using U-Type, T-Type and W-Type Microfluidic Devices

*Chia-Che Wu, Ping-Kuo Tseng, and Ching-Hsiu Tsai*

DETC2011-47532........................................................................................................ 33

Fabrication of Pillared PLGA Microvessel Scaffold Using Femtosecond Laser Ablation

*Hsiao-Wei Wang, Chung-Wei Cheng, Ching-Wen Li, and Gou-Jen Wang*

DETC2011-47653........................................................................................................ 41

Application of a New Spherical Super Element in Predicting the Deformation of Biological Cells in Microinjection

*Masoud Nasiri Sarvi and M. T. Ahmadian*

DETC2011-48005........................................................................................................ 51

Investigation of Automated Cell Manipulation in Optical Tweezers-Assisted Microfluidic Chamber Using Simulations

*Sagar Chowdhury, Petr Svec, Chenlu Wang, Kevin T. Seale, John P. Wikswo, Wolfgang Losert, and Satyandra K. Gupta*

DETC2011-48379........................................................................................................ 63

On Electrostatically Actuated CNT Bio-Sensors

*Dumitru I. Caruntu and Cone S. Salinas Trevino*

### SYMPOSIUM ON DYNAMICS OF MEMS AND NEMS

DETC2011-47116........................................................................................................ 71

Simulation of Actuation in Micro-Thermal Switches

*Elham Maghsoudi and Michael James Martin*

<td>Multiple Limit Cycles in Laser Interference Transduced Resonators</td>
</tr>
<tr>
<td>DETC2011-47461</td>
<td>Noise Squeezing Control for Bifurcation Sensing in MEMS</td>
</tr>
<tr>
<td>DETC2011-47506</td>
<td>Parametric Resonance Based Piezoelectric Micro-Scale Resonators: Modeling and Theoretical Analysis</td>
</tr>
<tr>
<td>DETC2011-47575</td>
<td>Bistable Threshold Sensor With Mechanically Nonlinear Self-Limiting Suspension and Electrostatic Actuation</td>
</tr>
<tr>
<td>DETC2011-47791</td>
<td>Deformation, Stress and Natural Frequency Analysis of the Fullerene by Finite Super Element Method</td>
</tr>
<tr>
<td>DETC2011-47978</td>
<td>The Effects of Geometric Asymmetry on the Dynamic Response of Silicon Nanowires</td>
</tr>
<tr>
<td>DETC2011-48008</td>
<td>Comprehensive Reduced-Order Models of Electrostatically Actuated Curved MEMS Switches and Their Dynamics Including Impact and Bounce</td>
</tr>
</tbody>
</table>
SYMPOSIUM ON MEASUREMENT AND CONTROL IN MICRO- AND NANO-SYSTEMS

DETC2011-47512 .................................................................................................................. 269
Cost-Effective Measurements of Piezoelectric Coefficient $d_{33}$ of Thin-Film PZT Using a
Mini Force Hammer
   Qing Guo, G. Z. Cao, and I. Y. Shen

DETC2011-47902 .................................................................................................................. 279
Integrated Piezoresisitive Flexure Model in Polysilicon
   Gerrit T. Larsen, Larry L. Howell, and Brian D. Jensen

DETC2011-48029 .................................................................................................................. 287
Solving for Quantum Controls
   Katherine A. Kime

DETC2011-48467 .................................................................................................................. 291
On Nonlinear Control of Optical Traps Using Pulling Trajectory Tracking for
Single-Molecule Experiments
   Daniel G. Cole

DETC2011-48472 .................................................................................................................. 301
Exogenous Force Estimation Using Disturbance Modeling for Optical Trap Experiments
   Jason G. Pickel and Daniel G. Cole

DETC2011-48734 .................................................................................................................. 309
Ultra Low Power Energy Storage Circuit for Piezoelectric Nanogenerators
   Richard Galos, Xi Chen, and Yong Shi

DETC2011-48848 .................................................................................................................. 317
Measurement and Characterization of Stiction Force in Microstructures With
Tapered Features
   Christopher Pelzmann and Laxman Saggere

SYMPOSIUM ON MICRO AND NANO MECHANISMS AND ROBOTICS

DETC2011-47717 .................................................................................................................. 327
Design and Analysis of a Micro-Positioning Stage
   Jau-Liang Chen and Yan-Ming Chen

DETC2011-47914 .................................................................................................................. 335
Decoupling of the Cartesian Stiffness Matrix: A Case Study on Accelerometer Design
   Ting Zou and Jorge Angeles

DETC2011-48810 .................................................................................................................. 345
Challenges in Development of Sub-Millimeter Resolution Thermo-Fluidic Actuator Based
Wearable Tactile Display System for Blind Individuals
   Prakash C. R. J. Naidu, Ramesh Yechangunja, Andrea Prosperetti, and
   Mandayam A. Srinivasan
SYMPOSIUM ON MICRO- AND NANO-MANUFACTURING

**DETC2011-47298** ................................................................. 417
Electrical Discharge Machining of Micro Holes on Titanium Sheets
  Gianluca D'Urso, Michela Longo, Giancarlo Maccarini, and Chiara Ravasio

**DETC2011-47945** ................................................................. 425
Non-Cleanroom Fabrication of Carbon Nanotube-Based MEMS Force and Displacement Sensors
  Michael A. Cullinan, Robert M. Panas, Cody R. Daniel, Joshua B. Gafford, and Martin L. Culpepper

**DETC2011-48301** ................................................................. 433
Micro Injection Moulding Process and Product Characterization
  Rossella Surace, Gianluca Trotta, Alessandro Bongiorno, Vincenzo Bellantone, Claudia Pagano, and Irene Fassi

**DETC2011-48331** ................................................................. 441
Micro Electro Discharge Milling of Freeform Micro-Features With High Aspect Ratio
  F. Modica, V. Marocco, G. Trotta, and I. Fassi

**DETC2011-48619** ................................................................. 447
A Two Degree of Freedom Nanopositioner With Electrothermal Actuator for Decoupled Motion
  Yong-Sik Kim, Nicholas G. Dagalakis, and Satyandra K. Gupta

SYMPOSIUM ON NONLINEAR MECHANICS, DYNAMICS, AND CONTROL IN ATOMIC FORCE MICROSCOPY

**DETC2011-47082** ................................................................. 459
Numerical Analysis of Sub-Atomic AFM Imaging in Ultra-High Vacuum: Coupling Quantum Mechanics With Continuum Dynamics
  C. Alan Wright and Santiago D. Solares

**DETC2011-47199** ................................................................. 469
Utilization of Simple Scaling Laws for Modulating Tip-Sample Interaction Forces in Aqueous Environment AFM Characterization: Application to the Self-Assembly of Protein Polymers
  Santiago D. Solares, Jonathan Chang, Joonil Seog, and Adam U. Kareem

**DETC2011-47455** ................................................................. 475
Feedback Controlled Optomechanical Force Sensor
  Jon R. Pratt, Paul Wilkinson, and Gordon Shaw

**DETC2011-47503** ................................................................. 481
Measuring Effective Modulus With Bifurcation Based Atomic Force Microscope Method
  Wei Huang and Andrew J. Dick

DETC2011-47498
Impacts of Team Characteristics and Design Activities on Design Outcomes
Shun Takai

DETC2011-48168
Lessons Learned From a Project-Based Learning Approach for Teaching New Cognitive Product Development to Multi-Disciplinary Student Teams
Torsten Metzler and Kristina Shea

DETC2011-48310
Using Wikis as a Formative Assessment Tool for Student Engineering Design Teams
Jacob P. Moore, Christopher B. Williams, and Marie C. Paretti

DETC2011-48357
Exploring the Effect of Design Education on the Design Cognition of Mechanical Engineering Students
Christopher B. Williams, John Gero, Yoon Lee, and Marie Paretti

DETC2011-48724
The Development of a Framework for Investigating the Effectiveness of Capstone Course Curricular Changes
Ben Sherrett and John Parmigiani

BROAD ADAPTATION/ADOPTION OF DESIGN TOOLS IN ENGINEERING EDUCATION: ISSUES AND LESSONS LEARNED
DETC2011-47852
On Teaching Functionality and Functional Modeling in an Engineering Curriculum
Robert L. Nagel and Matt R. Bohm

DETC2011-48163
Augmented Books Applied to Engineering: An Attractive Tool for the Student and Useful for Learning
Jorge Martín-Gutiérrez and Manuel Contero

DETC2011-48439
Mechanix: A Sketch Recognition Truss Tutoring System
Olufunmilola Atilola, Martin Field, Erin McTigue, Tracy Hammond, and Julie Linsey

DETC2011-48571
Concepts in Biomimetic Design: Methods and Tools to Incorporate Into a Biomimetic Design Course
Michael W. Glier, Daniel A. McAdams, and Julie S. Linsey
EXPERIENTIAL LEARNING AND NEW PEDAGOGY FOR ENGINEERING EDUCATION

DETC2011-47796
Some Initial Findings From an Investigation of Engineering Students’ Choices and Motivations
Warren F. Smith

DETC2011-47933
Upper Level Engineering Design Instruction Using a Product Archaeology Paradigm
Kemper Lewis and Deborah Moore-Russo

DETC2011-48078
Preparing Mechanical Engineering Students for Product Design Professional Practice Through PBL: Planning and Execution of the Subject “Product Design Methodology”

DETC2011-48242
Using Product Archaeology to Embed Context in Engineering Design
Ann F. McKenna, Xaver Neumeyer, and Wei Chen

DETC2011-48258
Experiential Learning Based Engineering Curriculum to Develop Meta-Competencies
Zahed Siddique, Amy Bradshaw, Patricia Hardre, and Farrokh Mistree

DETC2011-48298
From Product Dissection to Product Archaeology: Exposing Students to Global, Economic, Environmental, and Societal Impact Through Competitive and Collaborative “Digs”
Timothy W. Simpson, Gül E. Okudan, Omar M. Ashour, and Kemper Lewis

DETC2011-48438
Using Product Archaeology to Integrate Global, Economic, Environmental, and Societal Factors in Introductory Design Education
Erich Devendorf, Phil Cormier, Deborah Moore-Russo, and Kemper Lewis

DETC2011-48817
Engineering Design and Education: A Case Study on Designing a Competition Fuel Efficient Vehicle Through Experiential Learning
Wen Feng Lu, Hong Wee Lim, and Kim Hoo Goh

INNOVATION AND ENTREPRENEURSHIP IN DESIGN

DETC2011-47837
Nurturing Creativity and Design Teaching: Are We Doing All We Can?
Gül E. Okudan, Ann McKenna, Carolyn Plumb, Hyun K. Ro, and Alexander Yin

DETC2011-48265
Interactive Scenario-Based Teaching of Metal Casting Processes
Zahed Siddique, Mrinal Saha, Firas Akasheh, Shaiful Arif, and Bipul Barua

21st Reliability, Stress Analysis, and Failure Prevention Conference

Introduction .................................................................................................................. 861

Failure Analyses and Modeling

DETC2011-47343 ........................................................................................................... 863
Failure Mode and Effects Analysis of Compressor Blades of Aeroengines Using Dempster-Shafer Evidence Theory
Jianping Yang, Hong-Zhong Huang, Li-Ping He, Dunwei Wen, and Shun-Peng Zhu

DETC2011-47378 ........................................................................................................... 871
A Fuzzy Similarity-Based Approach to Reliability Allocation of Diesel Engine
Zhong-Zhe Chen, Yu Liu, Hong-Zhong Huang, Dan Ling, and Li-Ping He

DETC2011-47485 ........................................................................................................... 877
A Method for Inferring Conditional Stochastic Failure Rates From the Time-History of Observed Failures
David Thompson and Philippe Pèbay

DETC2011-47583 ........................................................................................................... 887
Fuzzy Dynamic Fault Tree Analysis of Hydraulic System of CNC Machining Center
Yan-Feng Li, Jian Sun, Haiqing Li, Hong-Zhong Huang, and Yu Liu

DETC2011-48413 ........................................................................................................... 893
An Improved Risk Based Design Method Based on a Novel Upper Bound Formulation
Hami Golbayani and Kazem Kazerounian

RSAFP Considerations in Design Process and Computer-Based Analyses for RSAFP

DETC2011-47080 ........................................................................................................... 899
Design Attributes for Geometry Optimization Process of Thin Walled Honeycomb Structures
Shabnam Sadeghi-Esfahlani, Hassan Shirvani, Sunday Nwaubani, and Ayoub Shirvani

DETC2011-47265 ........................................................................................................... 909
Surface Modification of Polymer-Clay Nanocomposites by Excimer Laser Ablation
I-Ta Chang and Erol Sancaktar

DETC2011-47375 ........................................................................................................... 915
A Method for Estimating Parameters of P-S-N Curves Based on Weibull Distribution
Dan Ling, Shun-Peng Zhu, Hong-Zhong Huang, Li-Ping He, and Zhong-Lai Wang

DETC2011-48002 ........................................................................................................... 921
System Optimization Design Under Time Variant Reliability Constraints
Xiao-Ling Zhang, Hong-Zhong Huang, Zhong-Lai Wang, and Pei-Nan Ge

DETC2011-48650 ........................................................................................................... 927
Combining Separable Monte Carlo With Importance Sampling for Improved Accuracy
Anirban Chaudhuri and Raphael T. Haftka
