GAUGE THEORIES OF GRAVITATION
A Reader with Commentaries

editors

Milutin Blagojević
University of Belgrade, Serbia

Friedrich W. Hehl
University of Cologne, Germany & University of Missouri, Columbia, USA

foreword by

T. W. B. Kibble, FRS

Imperial College Press

**Part B Poincaré Gauge Theory**

4. Einstein–Cartan(–Sciama–Kibble) Theory as a Viable Gravitational Theory

Commentary

5. General Structure of Poincaré Gauge Theory (Including Quadratic Lagrangians)

Commentary

6. Translational Gauge Theory

Commentary

6.3. Y. Itin, Energy-momentum current for coframe gravity, _Class. Quantum Grav._ 19, 173–190 (2002); extract, pp. 175–181, p. 189

7. Fallacies About Torsion

Commentary

Part C Extending the Gauge Group of Gravity

Commentary

9. From the Poincaré to the Affine Group: Metric-Affine Gravity

Commentary

10. Conformal Gauge Theory of Gravity

Commentary

11. (Anti-)de Sitter Gauge Theory of Gravity*

Commentary

12. From the Square Root of Translations to the Super-Poincaré Group 405

Commentary

Part D Specific Subjects of Metric-Affine Gravity and Poincaré Gauge Theory 427

13. Hamiltonian Structure 429

Commentary

14. Equations of Motion for Matter* 469

Commentary
15. Cosmological Models

Commentary

16. Exact Solutions

Commentary

17. Poincaré Gauge Theory in Three Dimensions

Commentary

18. Dislocations and Torsion*

Commentary

19. The Yang Episode: A Historical Case Study*

Commentary

Index
