27th International Conference on Computers and Their Applications 2012

(CATA-2012)

Las Vegas, Nevada, USA
12 – 14 March 2012

Editor:

Sahra Sedigh

TECHNICAL PAPER INDEX

INTELLIGENT SYSTEMS AND KNOWLEDGE DISCOVERY

An Affordable Housing Energy Management System Based upon ANFIS Prediction
Jennifer Sindelir and Gordon K. Lee (San Diego State University, USA) .................................................. 1

Relational Association Rule Mining in Market Basket using the RoloDex Model with P-Tree
Arijit Chatterjee, Mohammad Hossain, Arjun G. Roy, and William Perrizo (North Dakota State University, USA) ................................................................. 7

Retrieving Information by Clustering Related Events using Vector Space
Kanwalinderjit K. Gagneja and Kendall E. Nygard (North Dakota State University, USA) ......................... 13

NeuroCog: An Adaptive Topological Map Learning and Reactive System for Maze Navigation
Luciene de O. Marin, Melisa F. Fagundes, Edson R. De Pieri, Mauro Roisenberg and Patricia D. M. Plentz (Federal University of Santa Catarina, Brazil) .................................................. 19

Developing a Simulation Platform for Intelligent Transportation Systems Applications Based on Connected Vehicles
Muhammad Arafat (University of Detroit Mercy, USA and TELECOM Bretagne, France), Utayba Mohammad, Nizar Al-Holou, Malok Alamir Tamer, and Mohammad Abdul-Hak (University of Detroit Mercy, USA) .................................................. 25

Mining Twitter Streams for Evaluating Event Relatedness Using a Density Based Clustering Approach
Chung-Hong Lee, Wei-Shiang Wen (National Kaohsiung University of Applied Sciences, Taiwan), and Hsin-Cheng Yang (National University of Kaohsiung, Taiwan) .................................................. 34

On Improving Keyword Conversion Rates in Organic & Sponsored Search
Pierre M. Fiorini (CF Search Marketing, USA) ............................................................................................ 40

A Developmental Theory to Resolve the Self’s Halting Problem
S. Jeffrey Besser (Naval Postgraduate School, USA) ................................................................................ 46

SOFTWARE ENGINEERING AND TESTING

A Software Tool that Extracts Syntax-based Software Metrics based on the Z Formalization
Raouf Alomainy and Wei Li (University of Alabama in Huntsville, USA) .................................................. 52

Towards Tool-Driven Penetration Testing for Form-Based Authentication
Rebecca A. Woelfel and Joshua J. Pauli (Dakota State University, USA) .................................................. 58
Algorithms to Calculate the Manhattan (L1) Distance for Vertical Data Represented in pTrees  
Mohammad K. Hossain, Arjun G. Roy, Arijit Chatterjee, and William Perrizo (North Dakota State University, USA) ................................................................. 65

Measuring the Overhead of Intel C++ CnC over TBB for Gauss-Jordan Elimination  
Peiyi Tang (University of Arkansas at Little Rock, USA) ......................................................... 71

APPLICATIONS AND SERVICES

TOZE: A GUI Editor and Type Checker for Object-Z  
Tim Parker, Kasi Periyasamy and Kenny Hunt (University of Wisconsin-La Crosse, USA) ...................... 77

UV6: an OS Kernel as an Application Program without Virtualization  
Shuichi Oikawa (University of Tsukuba, Japan) ........................................................................... 83

Using a Screen Real Estate Index to Support Adaptive User Interfaces  
Alfred Taylor, Sr., Karthik Ramalingam, and Les Miller (Iowa State University, USA) ................... 89

Web-based Translation Support System for Group Reading  
Katsuhito Hozoji and Susumu Matsumae (Saga University, Japan) ........................................... 95

Simplifying Neuorobotic Development with NCSTools  
Corey M. Thibeault, Joshua M. Hegie, Laurence Jayet Bray and Frederick C. Harris, Jr.  
(University of Nevada, Reno, USA) .......................................................................................... 101

A Soft Real-Time, Parallel GUI Service in Tessellation Many-Core OS  
Albert Kim, Juan A. Colmenares, Hilfi Aikaff and John Kubiatowicz (University of California Berkeley, USA) ................................................................. 108

An Approach of Service Selection and Design with Sensitivity Analysis  
Xiaobu Yuan and Mohit Sud (University of Windsor, Canada) ................................................. 116

A Low Occupancy Study of Artificial Neural Networks on GPUs  
Thomas Donaldson and Yoginder Dandass (Mississippi State University, USA) ...................... 122

COMPUTER NETWORKS AND SECURITY

An Integrated Approach to Network Vulnerability Scanning for Security Engineers  
Devon J. Greene and Patrick Engebretson (Dakota State University, USA) ................................. 128

An Introductory Look at Vulnerability Hunting  
Adam Klindworth and Joshua Pauli (Dakota State University, USA) ........................................ 134

Characterization of a Campus Internet Workload  
Adam H. Villa and Elizabeth Varki (University of New Hampshire, USA) ............................... 140

Applying Open Resilient Cluster Management (ORCM) To A Multi-Chassis Core Router  
Douglas Comer and Salman Javed (Purdue University, USA) .................................................. 148

A Filter-based Approach for SQL Injection Attack Detection  
Ying Jin, Xiaoying Shen, and Chunhui Song (California State University, USA) .................... 156

Keeping the Bad Eyes Out: Database Security for Forensics Data  
Kinyetta Jeter, Luay A. Wahsheh, Aftab Ahmad, Jonathan M. Graham, Cheryl V. Hinds, Aurelia T. Williams, and Sandra J. DeLoatch (Norfolk State University, USA) .................... 160

A Vulnerability Evaluation Method for Power Analysis Attacks against Cryptography Circuits  
Masaya Yoshikawa and Toshiya Asai (Meijo University, Japan) ................................................ 167
### EDUCATIONAL SYSTEMS

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>A Professional Development Program Using Graphing Handhelds/Mini-Computers and Its Attitudinal Effect on Teachers of Mathematics - A Two Year Study</td>
<td>Gail M. Gallitano (West Chester University, USA)</td>
<td>173</td>
</tr>
<tr>
<td>A Curriculum Model for Industrial Control Systems Cyber-Security with Sample Modules</td>
<td>J. Chris Foreman, James H. Graham, Jeffrey L. Hieb, and Rammohan K. Ragade (University of Louisville, USA)</td>
<td>179</td>
</tr>
<tr>
<td>E-Learning Ecosystem based on Multi-Agent Systems</td>
<td>Randa Aljebly, Salah Hammami, and Hassan Mathkour (King Saud University, Saudi Arabia)</td>
<td>184</td>
</tr>

Experiments on Synopsis-based TV Program Recommendation
Snehasis Banerjee, Plaban K. Bhowmick, Debnath Mukerjee, and Prateep Misra (Tata Consultancy Services, India) .............................................................. 258

Column-oriented Database Systems: A Comparison Study
Arjun G. Roy, Mohammad K. Hossain, Arijit Chatterjee, and William Perrizo (North Dakota State University, USA) .............................................................. 264

LexSpec: Toward a New Model of Digital Publication
Kendra Douglas and Joshua Stein (Western Washington University, USA) .............................................................. 270

Autonomic Database Management: State of the Art and Future Trends
Katarina Grolinger and Miriam A. M. Capretz (The University of Western Ontario, Canada) .............................................................. 276

Sufficient Statistics for Re-optimizing Repetitive Queries
Feng Yu, Wen-Chi Hou, and Michael Wainer (Southern Illinois University, USA), Cheng Luo (Coppin State University, USA), and Dunren Che (Southern Illinois University, USA) .............................................................. 282

SIGNAL PROCESSING

An NMF based Approach for Addressing DNA Microarray Sub-grid Images
Mohammed M. Elhenawy and Yue Wang (Virginia Tech, USA) .............................................................. 288

Mammograms Segmentation Using Log-Normal Distribution
Yasser Reyad, Ali El-Zaart, and Alaaeldin M. Hafez (King Saud University, Saudi Arabia) .............................................................. 294

3D Scans of As-built Historical Street Scenes in Tamsui
Naai-Jung Shih, Chia-Yu Lee, Yu-Hwa Yang, Tzu-Ying Chan, and Shih-Cheng Tseng Tseng (National Taiwan University of Science and Technology, Taiwan) .............................................................. 299
