CONTENTS

CONTROLS, DIAGNOSTICS, AND INSTRUMENTATION

GT2011-45030  ................................................................. 1
Nonlinear Model Based Diagnostic of Gas Turbine Faults: A Case Study
Yongwen Liu and Ming Su

GT2011-45071* ................................................................. 9
Air Flow Modulation for Refined Control of the Combustion Dynamics Using a Novel Actuator
Fabrice Giuliani, Andreas Lang, Klaus Johannes Gradl, Peter Siebenhofer, and Johannes Fritzer

GT2011-45152  ................................................................. 19
Passive Absorption/Emission Spectroscopy for Gas Temperature Measurements in Gas Turbine Engines
Hejie Li, Guanghua Wang, Nirm Nirmalan, Samhita Dasgupta, and Edward R. Furlong

GT2011-45177  ................................................................. 29
Design and Optimization of a High Temperature Water Cooled Probe for Gas Analysis Measurement on K11 Combustion Test Rig
Vincent Plana, Jean Sébastien Vauthier, and Cyril Casteloot

GT2011-45249  ................................................................. 39
Diagnostics of Highly Degraded Industrial Gas Turbines Using Bayesian Networks
Brian K. Kestner, Young K. Lee, Gautham Voleti, Dimitri N. Mavris, Viren Kumar, and TsungPo Lin

GT2011-45262  ................................................................. 51
Measurement of a Benchmarking Jet in Crossflow Configuration Under Highly Turbulent Conditions
Camilo Cárdenas, Julia Sedlmaier, Nikolaos Zarzalis, Richard J. Valdes, and Werner Krebs

GT2011-45282* ................................................................. 61
Spray and Flame Structure of a Generic Injector at Aeroengine Conditions
Ulrich Meier, Johannes Heinze, Stefan Freitag, and Christoph Hassa

GT2011-45298  ................................................................. 73
Distributed Network System for Real-Time Model Based Control of Industrial Gas Turbines
V. Panov

GT2011-45318  ................................................................. 83
High Frequency Pressure Measurements With an Uncooled Fast Insertion Probe at Turbine Exit in a Turbojet Engine
R. J. Lubbock and M. L. G. Oldfield

*This paper has been recommended for publication in the ASME Transaction Journals
GT2011-45346* ................................................................. 95
Novel Dynamic Rotor and Blade Deformation and Vibration Monitoring Technique
Thorst en Pfister, Philipp Günther, Florian Dreier, and Jürgen Czarske

GT2011-45371 ................................................................. 105
An Analytical Approach to Gas Turbine Engine Model Linearization
Gi-Yun Chung, Manuj Dhingra, J. V. R. Prasad, Richard Meisner, and Steven Sirica

GT2011-45558* ................................................................. 117
A High Temperature High Bandwidth Fast Response Total Pressure Probe for Measurements in a Multistage Axial Compressor
Mehmet Mersinlilgi, Jean-François Brouckaert, Nicolas Courtiade, and Xavier Ottavy

GT2011-45565 ................................................................. 133
A Gas Turbine Engine Model of Transient Operation Across the Flight Envelope
Reza Rezvani, Metin Ozcan, Brian K. Kestner, Jimmy Tai, Dimitri N. Mavris,
Richard Meisner, and Steven Sirica

GT2011-45605 ................................................................. 141
Robust Gas Turbine Speed Control Using QFT
Zoleikha Abdollahi Biron, Ali Khaki Sedigh, and Roghiyeh Abdollahi Biron

GT2011-45625 ................................................................. 149
Gas Path Analysis on KLM In-Flight Engine Data
Michel L. Verbist, Wilfried P. J. Visser, Jos P. van Buijtenen, and Rob Duivis

GT2011-45626 ................................................................. 159
Power Reserve Control for Gas Turbines in Combined Cycle Applications
Eric A. Müller and Andrew Wihler

GT2011-45633 ................................................................. 169
Engine Parameter Estimation in Test Cells Using Hybrid Physics/Empirical Models
Jonathan A. DeCastro, Dean K. Frederick, and Liang Tang

GT2011-45670 ................................................................. 179
Advanced Gas Turbine Diagnostics Using Pattern Recognition
Shintaro Kumano, Naotaka Mikami, and Kuniaki Aoyama

GT2011-45704 ................................................................. 189
Amplified Pressure Transducers Using SOI Sensors and SOI Electronics, Suitable for High Temperature Operation (250°C)
Alex A. Ned, Wolf S. Landmann, Andrew Bemis, and David S. Kerr

GT2011-45711* ................................................................. 199
Constrained Sparse Estimation for Improved Fault Isolation
S. Borguet and O. Léonard

GT2011-45741 ................................................................. 209
Turbo-Machinery Monitoring Measures for Propulsion Safety and Affordable Readiness
Richard C. Millar

*This paper has been recommended for publication in the ASME Transaction Journals

</table>
Correlation Measure-Based Stall Margin Estimation for a Single-Stage Axial Compressor
Yuan Liu, Manuj Dhingra, and J. V. R. Prasad

Sub-Miniature Five-Hole Probe Calibration Using a Time Efficient Pitch and Yaw Mechanism and Accuracy Improvements
Jason Town and Cengiz Camci

Application of an Optimal Tuner Selection Approach for On-Board Self-Tuning Engine Models
Donald L. Simon, Jeffrey B. Armstrong, and Sanjay Garg

Gas Path Analysis and Gas Turbine Re-Mapping
Giovanni Cerri, Leila Chennaoui, Ambra Giovannelli, and Coriolano Salvini

Integration of Unknown Input Observers and Classification for Turbofan Engine Diagnosis
Daoliang Tan, Al He, Xiangxing Kong, and Xi Wang

An Acoustic Methodology to Measure Heat Release Rate Fluctuations From Unsteady Laminar Flames
J. Li, F. Richecoeur, T. Schuller, and Y. Huang

Effects due to the Temperature Measurement Section on the Performance Estimation of a Centrifugal Compressor Stage
Alessandro Bianchini, Giovanni Ferrara, Lorenzo Ferrari, Valeria Ballarini, Lorenzo Bianchi, Libero Tapinassi, and Lorenzo Toni

Blade Tip Measurement Advanced Visualization Using a Three Dimensional Representation
Michaël A. Hafner, Thomas A. Holst, and Scott A. Billington

Prognostics and Health Management of Aircraft Engine EMA Systems
Matthew J. Watson, Matthew J. Smith, Jared Kloda, Carl S. Byington, and Kenneth Semega

Quantifying Optical Tip-Timing Probe Error With Laboratory Apparatus
Bruce Hockaday

Robust Lean Blowout Sensing for Turbine Engine Combustors
Ravi K. Bompelly and Jerry M. Seitzman

*This paper has been recommended for publication in the ASME Transaction Journals
Robust Post-Processing Procedure for Multi-Hole Directional Probes
Tolga Yasa and Guillermo Paniagua

Neural Networks for Gas Turbine Fault Identification: Multilayer Perceptron or Radial Basis Network?
Igor Loboda, Yakov Feldshteyn, and Volodymyr Ponomaryov

More Electric Engine Architecture for Aircraft Engine Application
Noriko Morioka, Hitoshi Oyori, Daiki Kakiuchi, and Kanji Ozawa

Health Monitoring in an Industrial Gas Turbine Application by Using Model Based Diagnosis Techniques
Emil Larsson, Jan Åslund, Erik Frisk, and Lars Eriksson

EDUCATION
Design of a Rich Internet Application for Gas Turbine Engine Simulations
Crosby Johnson, Christopher Paolini, and Subrata Bhattacharjee

The Use of Mathcad Functions in Teaching an Undergraduate Aerospace Propulsion Course
Kevin H. Macfarlan and Stephen T. McClain

Design and Implementation of Problem-Based Learning in a Graduate Engineering Course
Ahti Jaatinen, Teemu Turunen-Saaresti, and Jari Backman

Aerodynamic Design, Analysis, Integration, and Optimization Tool for Centrifugal Compressor OEM
Yuri Biba and Julie A. Maier

Integrating Systems Engineering Into the USAF Academy Capstone Gas Turbine Engine Course
August J. Rolling, Aaron R. Byerley, and Charles F. Wisniewski

Design Build and Virtually Fly: Investigation of the B-1A Cruise Performance With F101 Engines Compared With its Re-Engined Performance Using F119 Engines
August J. Rolling

*This paper has been recommended for publication in the ASME Transaction Journals
ELECTRIC POWER

GT2011-45051 .................................................................................................................. 547
The ORegen™ Waste Heat Recovery Cycle: Reducing the CO₂ Footprint by Means of
Overall Cycle Efficiency Improvement
Paolo Del Turco, Antonio Asti, Alberto Scotti Del Greco, Alessandro Bacci,
Giacomo Landi, and Giacomo Seghi

GT2011-45055 .................................................................................................................. 557
Functional Analysis and Exergoeconomic Evaluation for the Combined Production of
Electromechanical Power and Useful Heat of a Cogeneration Power Plant
Washington Orlando Irrazabal Bohorquez and João Roberto Barbosa

GT2011-45121 .................................................................................................................. 567
Compressor Performance Recovery Systems: A New Thermoeconomic Approach
Andrea Fabbri, Alberto Traverso, and Silvio Cafaro

GT2011-45172 .................................................................................................................. 579
Development of Key Technologies for the Next Generation High Temperature Gas Turbine
Elisaku Ito, Ikuo Okada, Keizo Tsukagoshi, and Junichiro Masada

GT2011-45373 .................................................................................................................. 587
F-Class DLN Technology Advancements: DLN2.6+
Krishna Venkataraman, Skigh E. Lewis, Jayaprakash Natarajan, Stephen R. Thomas, and
Joseph V. Citeno

GT2011-45464 .................................................................................................................. 595
The Approach to the Development of the Next Generation Gas Turbine and History of
Tohoku Electric Power Company Combined Cycle Power Plants
Yoshiaki Nishimura, Sadahiro Ohno, Shinya Ishikawa, Junichiro Masada, and
Kazumasa Takata

GT2011-45514 .................................................................................................................. 601
Power Output Increase due to Decreasing Gas Turbine Inlet Temperature by
Mist Atomization
Yukiko Agata, Shinichi Akabayashi, Shinya Ishikawa, and Yuji Matsumura

GT2011-45518 .................................................................................................................. 611
A Higher Turndown Flexibility on AE64.3A Gas Turbine: Design and Operating Experience
Federico Bonzani, Luca Bozzi, Alessia Bulli, Andrea Silingardi, and Domenico Zito

GT2011-45550 .................................................................................................................. 621
Thermo-Economic Optimization of the CCPP Design With Supplementary Firing
Considering Off-Design Performance and Operating Profile
Enrico Conte and Camille Pedretti

GT2011-45563 .................................................................................................................. 633
Operating Experience on Advanced Technology AE64.3A Gas Turbine
Federico Bonzani, Andrea Silingardi, Laura Traversone, and Luigi Di Pasquale
Combined Cycle Off-Design Performance Estimation: A Second-Law Perspective
S. Can Gülen and Joseph John

A Competitive Market Approach to Gas Turbine Technology Portfolio Selection
Cedric Y. Justin, Simon I. Briceno, Dimitri N. Mavris, and Frederic Villeneuve

The Role of Simple and Combined Cycles in Renewable Applications Deployment
Justin Zachary

Process Flow Model of Combined High Temperature Fuel Cell Operated With Mixture of Methane and Carbon Dioxide
Farshid Zabihian and Alan S. Fung

MICROTURBINES AND SMALL TURBOMACHINERY

Effects of Pulsating Flow Conditions on Mixed Flow Turbine Performance
Li Chen, Weilin Zhuge, Yangjun Zhang, Lei Xie, and Shuyong Zhang

Prospects for Application of Ship’s Multi-Module Gas Turbine Engines on the Basis of Ceramic Tunnel Turbomachines
A. V. Sudarev, A. A. Suryaninov, and V. G. Konakov

"Low Cost" Microturbines via the Turbocharger Route
Colin Rodgers

A Computational Study of Hydrogen Substitution Effects on the Combustion Performance for a Micro Gas Turbine
Hsin-Yi Shih and Chi-Rong Liu

Investigations Into the Performance of a Turbogenerated Biogas Engine During Speed Transients
Ian Thompson, Stephen Spence, Charles McCartan, David Thornhill, and Jonathan Talbot-Weiss

Improved Map Scaling Methods for Small Turbocharger Compressors
Benedikt Ernst, Jasper Kammeyer, and Joerg R. Seume

Study on Compensatory Magnitude of Axial Misalignment for Flexible Couplings Assembled by Interference Fit
Guoping Wang, Hualing Chen, Shemiao Qi, Jiuhui Wu, and Lie Yu
GT2011-45500 ................................. 759
Improving the Application of Turbine Maps in 1D Engine Process Modelling
Mathias Vogt, Florian Frese, Holger Mai, and Roland Baar

GT2011-45541 ........................................ 771
A High Performance Low Pressure Ratio Turbine for Engine Electric Turbocompounding
Aman M. I. Mamat, Muhamad H. Padzillah, Alessandro Romagnoli, and Ricardo F. Martinez-Botias

GT2011-45752 ........................................ 785
Evaluation of a Wire-Mesh Duct Burner Premixer Using LSI Techniques
Omar B. Ramadan, Patrick M. Hughes, and J. E. Donald Gauthier

GT2011-45785 ................................. 795
Vibration Control of a Turbo Molecular Pump Suspended by Active Magnetic Bearings
Kai Zhang, Jinping Dong, Xingjian Dai, and Xiaozhang Zhang

GT2011-45822 ........................................ 801
Geometry Optimization of Textured 3D Micro-Thrust Bearings
C. I. Papadopoulos, E. E. Efstathiou, P. G. Nikolakopoulos, and L. Kaiktsis

GT2011-45897 ........................................ 811
Novel Concept for an Air-Pressure Driven Micro-Turbine for Power Generation
Michele Focchi, Giacomo Persico, Emanuele Guglielmino, and Darwin Caldwell

GT2011-45945 ........................................ 823
ICR350: A Turbine Solution for Medium and Heavy Duty Vehicles
David W. Dewis

GT2011-46007 ........................................ 833
Development of an Air-Cycle Environmental Control System for Automotive Applications
Christopher J. Forster and Patrick Lemieux

GT2011-46015 ........................................ 843
Numerical Investigation of Different Casing Treatments on Performance of a High Speed Centrifugal Compressor Stage
Yan Ma, Guang Xi, and Guangkuan Wu

GT2011-46036* ........................................ 853
CFD Optimization of Gas-Side Flow Channel Configuration Inside a High Temperature Bayonet Tube Heat Exchanger With Inner and Outer Fins
T. Ma, Y. P. Ji, M. Zeng, and Q. W. Wang

GT2011-46050 ........................................ 863
A Simplified CFD Model With Multi-Periodic Boundary Conditions for Cross Wavy Channels
L. X. Du, M. Zeng, and Q. W. Wang
