PART B

HEAT TRANSFER: GENERAL INTEREST

GT2011-45098 .......................................................................................................................... 1023
Flow Visualization and Conjugate Heat Transfer Study From Shower Head Impinging Jets
   Rajesh Kumar Panda and B. V. S. S. Prasad

GT2011-45118 .......................................................................................................................... 1033
Effects of Ribs on Internal Blade-Tip Cooling
   Tareq Salameh and Bengt Sunden

GT2011-45146* ......................................................................................................................... 1043
Turbulent Convection From Deterministic Roughness Distributions With Varying
   Thermal Conductivities
   Steven R. Mart, Stephen T. McClain, and Lesley M. Wright

GT2011-45150 .......................................................................................................................... 1057
Heat Transfer, Hydrodynamics and Pressure Drop in the Model of a Blade Leading Edge
   Cyclone Cooling
   Artem A. Khalatov, Igor I. Borisov, Sergey D. Severin, Vyacheslav V. Romanov,
   Vladimir Y. Spitsyn, and Yuriy Y. Dashevskyy

GT2011-45169 .......................................................................................................................... 1067
Heat Transfer in an Oblique Jet Impingement Configuration With Varying Jet Geometries
   Simon Schueren, Florian Hoefler, Jens von Wolfersdorf, and Shailendra Naik

GT2011-45180* ......................................................................................................................... 1079
Protuberances in a Turbulent Thermal Boundary Layer
   Steven R. Mart and Stephen T. McClain

GT2011-45251 .......................................................................................................................... 1095
Numerical Investigation of Heat Transfer and Pressure Drop Characteristics for Different
   Hole Geometries of a Turbine Casing Impingement Cooling System
   F. Ben Ahmed, R. Tucholke, B. Weigand, and K. Meier

GT2011-45254 .......................................................................................................................... 1109
Detailed Heat Transfer Distributions in Engine Similar Cooling Channels for a Turbine
   Rotor Blade With Different Rib Orientations
   Christopher LeBlanc, Srinath V. Ekkad, Tony Lambert, and Veera Rajendran

GT2011-45267 .......................................................................................................................... 1117
Computational Study of Micro-Jet Impingement Heat Transfer in a High Pressure
   Turbine Vane
   Karan Anand and B. A. Jubran

*This paper has been recommended for publication in the ASME Transaction Journals
Optimization of Temperature Measurement Technique Used in High Heat Flux Environment

Dmitriy Romanov, Jason DeVoe, and Lev Ginzburgsky

Numerical Comparison of Heat Transfer and Pressure Drop in Gas Turbine Blade Cooling Channels With Dimples and Rib-Turbulators

R. S. Amano, Krishna S. Guntur, Sourabh Kumar, and Jose Martinez-Lucci

Numerical Study on Heat Transfer Characteristics in Rectangular Ducts With Pin-Fins

Xinjun Wang, Xiaowei Bai, Jiangbo Wu, Rui Liu, Ding Zhu, and Gaoliang Liao

Numerical Study on Flow and Heat Transfer Characteristics of Jet Impingement

Xinjun Wang, Rui Liu, Xiaowei Bai, and Jinling Yao

DNS of Stagnation Point Heat Transfer Affected by Varying Wake-Induced Turbulence

Lars Venema, Dominic von Terzi, Hans-Jörg Bauer, and Wolfgang Rodi

Heat Transfer Enhancement due to Combination of Dimples, Protrusions, and Ribs in Narrow Internal Passage of Gas Turbine Blade

Akira Murata, Satomi Nishida, Hiroshi Saito, Kaoru Iwamoto, Yoji Okita, and Chiyuki Nakamata

Gongnan Xie and Bengt Sundén

Heat Transfer and Friction Factor in the Rib Roughened Blade Leading Edge Cooling Passage

Artem A. Khalatov, Yuriy Y. Dashevskyy, and Dmytro M. Pysmennyi

Local Heat Transfer Characteristics in Channels With Pin Fin and Pin Fin-Dimple Arrays

Yu Rao, Chaoyi Wan, Yamin Xu, and Shusheng Zang

Detailed Heat Transfer Distributions and Pressure Drop Measurements for a Rotating Parallelogram Channel With Radially Outward Flow

S. W. Chang, T.-M. Liou, and T.-H. Lee

Evaporation of Volatile Liquid Pools Under Forced Convection: Experimental Approach for Multi-Component Liquids and Validation of a Vaporization Model

Dominique Alonso, Ghislain Genin, David Heller, Brice Chabrier, and Michel Molière
Aero-Thermal Performance of a Cooled Winglet at Engine Representative Mach and Reynolds Numbers
   D. O. O'Dowd, Q. Zhang, L. He, B. C. Y. Cheong, and I. Tibbott

Flow Field Analysis of a Trailing Edge Internal Cooling Channel
   A. Andreini, C. Bianchini, A. Armellini, and L. Casarsa

The Influence of Leading Edge Diameter on Stagnation Region Heat Transfer Augmentation Including Effects of Turbulence Level, Scale, and Reynolds Number
   P. Gandavarapu and F. E. Ames

Effects of Rotation on Jet Impingement Channel Heat Transfer
   Justin A. Lamont and Srinath V. Ekkad

Large-Eddy Simulation With Zonal Near Wall Treatment of Flow and Heat Transfer in a Ribbed Duct for the Internal Cooling of Turbine Blades
   Sunil Patil and Danesh Tafti

Flowfield Measurements in a Single Row of Low Aspect Ratio Pin-Fins
   Jason K. Ostanek and Karen A. Thole

Coal Ash Deposition on Nozzle Guide Vanes: Part I — Experimental Characteristics of Four Coal Ash Types

Massively Parallel DNS and LES of Turbine Vane Endwall Horseshoe Vortex Dynamics and Heat Transfer
   Markus Schwänen, Michael Meador, Josh Camp, Shriram Jagannathan, and Andrew Duggleby

Effect of Rib Spacing on Heat Transfer in a Two Pass Rectangular Channel (AR=2:1) at High Rotation Numbers
   Jiang Lei, Je-Chin Han, and Michael Huh

Mist/Air Cooling in a Two-Pass Rectangular Rotating Channel With 45-deg Angled Rib Turbulators
   T. S. Dhanasekaran and Ting Wang

*This paper has been recommended for publication in the ASME Transaction Journals
Heat Transfer Characteristics of a Non-Rotating Two-Pass Rectangular Duct With Various Guide Vanes in the Tip Turn Region

Dong Myeong Lee, Jun Su Park, Dong Hyun Lee, Beom Soo Kim, and Hyung Hee Cho

Aerodynamic and Aerothermal Investigation of the Flow Around an HPT Rotor Shroud: PIV Measurements

Knut Lehmann, Vasudevan Kanjirakkad, and Howard P Hodson

Knut Lehmann, Vasudevan Kanjirakkad, and Howard Hodson

Experimental and Numerical Crossover Jet Impingement in a Rib-Roughened Airfoil Trailing-Edge Cooling Channel

M. E. Taslim and M. K. H. Fong

Experimental/Numerical Cross-Over Jet Impingement in an Airfoil Leading-Edge Cooling Channel

K. Elebiary and M. E. Taslim

Effect of Narrow Jet Spacing on Impinging Flow and Heat Transfer

L. Guo, Y. Y. Yan, and Y. Q. Zu

Flow and Heat Transfer in the Tip-Turn Region of a U-Duct Under Rotating and Non-Rotating Conditions

Effects of Pin-Fin Height on Flow and Heat Transfer in a Rectangular Duct

Heat Transfer Enhancement in a Rectangular Channel With the Combination of Ribs, Dimples and Protrusions

Jibing Lan, Yonghui Xie, and Di Zhang

Effect of Aggressive Inlet Swirl on Heat Transfer and Aerodynamics in an Unshrouded Transonic HP Turbine

Imran Qureshi, Arrigo Beretta, Kam Chana, and Thomas Povey

*This paper has been recommended for publication in the ASME Transaction Journals
Effect of Entrance Geometry on Heat Transfer in a Narrow (AR=1:4) Rectangular Two Pass Channel With Smooth and Ribbed Walls
Krishnendu Saha and Sumanta Acharya

Effects of Pin Detached Space on Heat Transfer in a Rib Roughened Channel
Sin Chien Siw, Minking K. Chyu, and Mary Anne Alvin

Numerical Study on Flow and Heat Transfer Characteristics of Swirl Cooling on Leading Edge Model of Gas Turbine Blade
Zhao Liu, Zhenping Feng, and Liming Song

Heat Transfer Enhancement in a Rectangular (AR=3:1) Channel With V-Shaped Dimples
C. Neil Jordan and Lesley M. Wright

PIV Study on the Dimple Mid-Plane of a Narrow Rectangular Channel With Dimples Applied to One Wall
Lucky V. Tran, Michelle I. Valentino, Abhishek Saha, Carson D. Slabaugh, Mark Ricklick, J. S. Kapat, and Saptarshi Basu

An Experimental Investigation of Heat Transfer Characteristics in a Steam-Cooled Square Channel With Rib Turbulators
Jiazeng Liu, Jianmin Gao, and Tieyu Gao

Optimized Impingement Configurations for Double Wall Cooling Applications
Preston Stoakes and Srinath Ekkad

Swirl-Enhanced Internal Cooling of Turbine Blades: Part 1 — Radial Flow Entry
Del Segura and Sumanta Acharya

Heat Transfer Enhancement in Tip-Turn Region of Two-Pass Channel With a 180-Degree Turn
Pavin Ganmol, Minking K. Chyu, and Mary Anne Alvin

Validation and Analysis of Numerical Results for a Two-Pass Trapezoidal Channel With Different Cooling Configurations of Trailing Edge
Waseem Siddique, Lamyaa A. El-Gabry, Igor V. Shevchuk, and Torsten H. Fransson

Thermal Validation of a Heat Shield Surface for a High Lift Blade Profile
M. Cochet, W. Colban, M. Gritsch, S. Naik, and M. Schnieder
Inclusion of an Estimation Method for Heat Losses in the Design Phase of High-Pressure Turbines  
Christoph Starke and Heinz-Peter Schiffer

Heat Transfer Investigation of the Channels With Rib Turbulators and Double-Row Bleed Holes  
Tao Guo, Huiren Zhu, and Duchun Xu

Heat Transfer in a Channel Under the Effects of a Shallow-Angle Jet Impingement and a Rib  
Lei Wang, Bengt Sunden, Andreas Borg, and Hans Abrahamsson

The Aero-Thermal Performance of a Cooled Winglet Tip in a High Pressure Turbine Cascade  
Chao Zhou, Howard Hodson, Ian Tibbott, and Mark Stokes

Effects of Endwall Motion on the Aero-Thermal Performance of a Winglet Tip in a HP Turbine  
Chao Zhou, Howard Hodson, Ian Tibbott, and Mark Stokes

Investigation of the Effect of Rotation on the Flow in a Two-Pass Cooling System With Smooth and Ribbed Walls Using PIV  
Michael Schroll, Lena Lange, and Martin Elfert

Optimization of a U-Bend for Minimal Pressure Loss in Internal Cooling Channels: Part I—Numerical Method  
Tom Verstraete, Filippo Coletti, Jérémy Bulle, Timothée Vanderwiel, and Tony Arts

Effect of Inlet Skew on Heat/Mass Transfer From a Simulated Turbine Blade  
Kalyanjit Ghosh and R. J. Goldstein

Optimization of a U-Bend for Minimal Pressure Loss in Internal Cooling Channels: Part II—Experimental Validation  
Filippo Coletti, Tom Verstraete, Timothée Vanderwiel, Jérémy Bulle, and Tony Arts

Method and Measurement of Adiabatic Wall Temperature Downstream of a High Pressure Turbine Using Thin-Film Sensors  
V. Pinilla, J. P. Solano, and G. Paniagua

*This paper has been recommended for publication in the ASME Transaction Journals
Time-Dependent Deposition Characteristics of Fine Coal Flyash in a Laboratory Gas Turbine Environment

Robert G. Laycock and Thomas H. Fletcher

Heat Transfer for the Film-Cooled Vane of a 1-1/2 Stage High-Pressure Transonic Turbine: Part I — Experimental Configuration and Data Review With Inlet Temperature Profile Effects

Harika S. Kahveci, Charles W. Haldeman, Randall M. Mathison, and Michael G. Dunn

Heat Transfer for the Film-Cooled Vane of a 1-1/2 Stage High-Pressure Transonic Turbine: Part II — Effect of Cooling Variation on the Vane Airfoil and Inner Endwall

Harika S. Kahveci, Charles W. Haldeman, Randall M. Mathison, and Michael G. Dunn

Swirl-Enhanced Internal Cooling of Turbine Airfoils: Part II — 90 Degree Flow Entry

Del Segura and Sumanta Acharya

Coal Ash Deposition on Nozzle Guide Vanes: Part II — Computational Modeling

B. Barker, B. Casaday, P. Shankara, A. Ameri, and J. P. Bons

Experimental Investigation of Disc Cavity Leakage Flow and Hub Endwall Contouring in a Linear Rotor Cascade

Ryan D. Erickson, Terrence W. Simon, Luzeng Zhang, and Hee-Koo Moon

3D RANS Prediction of Gas-Side Heat Transfer Coefficients on Turbine Blade and Endwall

Jiang Luo, Eli H. Razinsky, and Hee-Koo Moon

Flexible Non-Intrusive Heat Flux Instrumentation for the AFRL Research Turbine

Richard J. Anthony, John P. Clark, Stephen W. Kennedy, John M. Finnegan, Dean Johnson, James Hendershot, and James Downs

Flow Distribution and Heat Transfer Coefficients Inside Gas Holes Discharging Into an Orthogonal Crossflow

S. Acharya, A. Eshtaighi, and R. Schilp

Criteria for Boundary Layer Transition

Stefan Becker, Donald M. McEligot, Edmond Walsh, and Eckart Laurien

*This paper has been recommended for publication in the ASME Transaction Journals
GT2011-45566* .......................................................................................................................... 1835
Prediction of Separation-Induced Transition on High Lift Low Pressure Turbine Blade
Abdelkader Benyahia, Lionel Castillon, and Robert Houdeville

GT2011-46106 .......................................................................................................................... 1847
Combined Effects of Wakes and Pulsed Vortex Generator Jet Flow Control on
Boundary Layer Separation on a Very High Lift Low Pressure Turbine Airfoil
Ralph J. Volino

GT2011-46385* .......................................................................................................................... 1859
Identifying Turbulent Spots in Transitional Boundary Layers
Brendan Rehill, Philipp Schlatter, Ed J. Walsh, Luca Brandt, Tamer A. Zaki, and
Donald M. McEligot

GT2011-46807 .......................................................................................................................... 1869
Separation Control Using Plasma Actuators: Steady Flow in Low Pressure Turbines
Debashish Burman, Terrence W. Simon, Uwe Kortshagen, and Douglas Ernie

HEAT TRANSFER: COMBUSTION

GT2011-45675 .......................................................................................................................... 1879
A Joined MBL-Zonal Method Technique for Evaluating Radiative Thermal Loads Into
Combustion Chambers of Industrial Gas Turbines
Gabriele Ottino, Luca Ratto, and Massimiliano Maritano

GT2011-45916 .......................................................................................................................... 1891
Analysis of Flow Migration in an Ultra-Compact Combustor
Brian T. Bohan and Marc D. Polanka

GT2011-45919 .......................................................................................................................... 1903
Characterizing the Effect of Radial Vane Height on Flame Migration in an
Ultra Compact Combustor
Kenneth D. Lebay, Marc D. Polanka, and Richard D. Branam

GT2011-45961 .......................................................................................................................... 1915
Thermal Analysis of Cooling System in a Gas Turbine Transition Piece
Jun Su Park, Namgeon Yun, Hokyu Moon, Kyung Min Kim, Sin-Ho Kang, and
Hyung Hee Cho

GT2011-46037* .......................................................................................................................... 1925
HP Vane Aerodynamics and Heat Transfer in the Presence of Aggressive Inlet Swirl
Imran Qureshi, Andy D. Smith, and Thomas Povey

GT2011-46217 .......................................................................................................................... 1943
Detailed Cold-Flow Simulation to Estimate Mass Flow Distribution of Aircraft Combustor
Mitsumasa Makida, Naoki Nakamura, and Osamu Nozaki

*This paper has been recommended for publication in the ASME Transaction Journals
Modeling of the Heat Flux for Multi-Hole Cooling Applications
Guillaume Cottin, Emmanuel Laroche, Nicolas Savary, and Pierre Millan

Integrated Combustor - Turbine Design for Improved Aerothermal Performance: Effect of Dilution Air Control
A. M. Basol, K. Regina, A. I. Kalfas, and R. S. Abhari

Implementation of a Multi Zone Radiation Method in a Low NOx Gas Turbine Combustion Chamber Conceptual Simulator

LES and RANS Assessment of Rib Cooled Channel Related to SGT-800 Combustor Liner
Daniel Lörstad

Experimental Investigation on the Effects of a Large Recirculating Area on the Performance of an Effusion Cooled Combustor Liner
Bruno Facchini, Francesco Maiuolo, Lorenzo Tarchi, and Daniele Coutandin

Large Eddy Simulation of Flow and Convective Heat Transfer in a Gas Turbine Can Combustor With Synthetic Inlet Turbulence
Sunil Patil and Danesh Tafti

Can-Annular Combustion Chamber Surface Temperature Measurements and Damage Signatures at Operationally Representative Conditions
D. Bouchard, G. Pucher, and W. D. E. Allan

Life Estimation of TBC on an Aero Gas Turbine Combustor: A Finite Element Approach
R. Ragupathy, R. D. Misal, and R. K. Mishra

Gas Turbine Nozzle Life Assessment due to Thermal Fatigue
Z. Mazur, E. B. Pérez-Hernández, and R. Garcia-Illescas

Coupled Thermo-Mechanical Fatigue Tests for Simulating Load Conditions in Cooled Turbine Parts
Roland Mücke and Klaus Rau

*This paper has been recommended for publication in the ASME Transaction Journals
