Editorial Foreword vii

A Biographical Note and Tribute to Jia-An Yan On His 70th Birthday ix

1. Non-linear evolution equations driven by rough paths 1
   Thomas Cass, Zhongmin Qian and Jan Tudor

2. Optimal stopping times with different information levels and with time uncertainty 19
   Arijit Chakrabarty and Xin Guo

3. Finite horizon optimal investment and consumption with CARA utility and proportional transaction costs 39
   Yingshan Chen, Min Dai and Kun Zhao

4. Uniform integrability of exponential martingales and spectral bounds of non-local Feynman-Kac semigroups 55
   Zhen-Qing Chen

5. Continuous-time mean-variance portfolio selection with finite transactions 77
   Xiangyu Cui, Jianjun Gao and Duan Li

6. Quantifying model uncertainties in the space of probability measures 99
   J. Duan, T. Gao and G. He

18. Optimal partial information control of SPDEs with delay and time-advanced backward SPDEs
   Bernt Øksendal, Agnès Sulem and Tusheng Zhang

19. Simulation of diversified portfolios in continuous financial markets
   Eckhard Platen and Renata Rendek

20. Coupling and applications
   Feng-Yu Wang

21. SDEs and a generalised Burgers equation
   Jiang-Lun Wu and Wei Yang

22. Mean-variance hedging in the discontinuous case
   Jianming Xia
