2012 IEEE Seventh International Conference on Wireless, Mobile and Ubiquitous Technology in Education

(WMUTE 2012)

Takamatsu, Kagawa, Japan
27-30 March 2012
# Table of Contents

**Preface** ................................................................................................................. xi
**Conference Committees** ...................................................................................... xii
**Reviewers** .............................................................................................................. xv
**Keynote Speakers** .................................................................................................. xvii

## Full Papers

- Enculturing Self-Directed Seamless Learners: Towards a Facilitated Seamless Learning Process Framework Mediated by Mobile Technology ........................................... 1  
  *Lung-Hsiang Wong and Chee-Kit Looi*
- Mobile Digital Storytelling for Promoting Creative Collaborative Learning ................................................................. 9  
  *Susanna Nordmark and Marcelo Milrad*
- Mobile Gaming - A Serious Business! ........................................................................ 17  
  *David Parsons, Krassie Petrova, and Hokyoung Ryu*
- Multimodal Analysis of Spatial Characteristics of a Real-world Learning Field .............................................................. 25  
  *Masaya Okada and Masahiro Tada*
- Outdoor Activities for the Learning of Mathematics: Designing with Mobile Technologies for Transitions across Learning Contexts ......................................................... 33  
  *Håkan Sollervall, Nuno Otero, Marcelo Milrad, David Johansson, and Bahtijar Vogel*
- Personalization in Context-aware Ubiquitous Learning-Log System ............................................................ 41  
  *Mengmeng Li, Hiroaki Ogata, Bin Hou, Noriko Uosaki, and Yoneo Yano*
- Sortko: Learning Sorting Algorithms with Mobile Devices ......................................................................................... 49  
  *Ivica Boticki, Ante Barisic, Sergio Martin, and Neven Driljevic*

## Short Papers

- A New Type of Learning Experience in Nomadic Inquiry: Use of Zydeco in the Science Center ................................................................. 57  
  *Wan-Tzu Lo, Ibrahim Delen, Clara Cahill, Alex Kuhn, Shannon Schmoll, and Chris Quintana*
- A Study of Campus Butterfly Ecology Learning System Based on Augmented Reality and Mobile Learning ............................................................ 62  
  *Wernhuar Tarng and Kuo-Liang Ou*

<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>An Architecture for Supporting Heterogeneous Multi-Device Learning Environments</td>
<td>67</td>
</tr>
<tr>
<td>CAMLES: An Adaptive Mobile Learning System to Assist Student in Language</td>
<td>72</td>
</tr>
<tr>
<td>Designing Better Mobile Collaborative Laboratories for Ecology Field Work for Upper Secondary Schools</td>
<td>77</td>
</tr>
<tr>
<td>Development and Practice of Teaching Material in Tablet Computer Based on Computer Graphics by Quantumchemistry Calculation Reaction of $1 + H_2 \rightarrow HI + H$</td>
<td>82</td>
</tr>
<tr>
<td>Device-Free Personal Response System Based on Fiducial Markers</td>
<td>87</td>
</tr>
<tr>
<td>Evaluating Interaction with Mobile Devices in Mobile Inquiry-Based Learning</td>
<td>92</td>
</tr>
<tr>
<td>Folksonomy-based Indexing for Retrieving Tutoring Resources</td>
<td>97</td>
</tr>
<tr>
<td>How We Can Entwine In-class Vocabulary Learning with Out-class One in English Course for Japanese EFL Learners</td>
<td>102</td>
</tr>
<tr>
<td>Integrating SMS Components into CSCL Scripts</td>
<td>107</td>
</tr>
<tr>
<td>Introducing Podcasts to the Educational Palette of a Dual-Mode Course</td>
<td>112</td>
</tr>
<tr>
<td>Mainstream but Specialized: Mobile Technology for Cognitive Support in Education</td>
<td>117</td>
</tr>
<tr>
<td>Open Device Control (OpenDC): Human Interface Device Framework for Interactive Applications Including Educational Contents in Ubiquitous Environments</td>
<td>122</td>
</tr>
<tr>
<td>PACALL: Supporting Language Learning Using SenseCam</td>
<td>127</td>
</tr>
<tr>
<td>Possibilities and Challenges in Mobile Learning for K-12 Teachers: A Pilot Retrospective Survey Study</td>
<td>132</td>
</tr>
<tr>
<td>Recommendation of Helpers Based on Personal Connections in Mobile Learning</td>
<td>137</td>
</tr>
<tr>
<td>Scaffolded Participatory and Collaborative Learning: Enhancing Children Reading with E-book Readers</td>
<td>142</td>
</tr>
</tbody>
</table>
Supporting Field and In-class Collaborative Learning: Towards a Generalized Framework ..........................................................147
  Madiha Shafaat Ahmad and Niels Pinkwart

Supporting Place/Space Based Patterns of Citywide Mobile Learning through Multi-Agent Framework ...................................152
  A. Basit Khan and Mihhail Matskin

The Implications of Learning Cloud for Education: From the Perspectives of Learners .........................................................157
  Cheng-Sian Chang, Tsung-Shi Chen, and Hsiu-Ling Hsu

Towards a Decentralized and Self-Adaptive System for M-Learning Applications .................................................................162
  Didac Gil, Jesper Andersson, Marcelo Milrad, and Håkan Sollervall

Using IMS Learning Design to Author Authentic Learning Examples in Mobile Context .............................................................167
  Ryan Jesse, Kinshuk, and Maiga Chang

Using Mobile Devices for Learning in School Education .............................................................................................................172
  Siu Cheung Kong

Utilizing Gesture Based Interaction for Supporting Collaborative Explorations of Visualizations in TEL ..................................177
  Bahtijar Vogel, Oskar Pettersson, Arianit Kurti, and Andreas Simonsson Huck

What, How and Why - A Peek into the Uses and Gratifications of Ubiquitous Computing for Pre-service Teachers in Singapore .........................................................182
  Wenli Chen, Cheryl Lee, Ashley Tan, and Chiu-Pin Lin

Poster Papers

AccelPen: Detecting Writing Action with Pen Acceleration Toward Learning Support Systems ......................................................187
  Hironori Egi and Shigeto Ozawa

An Application of Peer Review for Art Education: A Tablet PC Becomes a Language for Students Who are Hard of Hearing ...............................................................190
  Miki Namatame and Noboru Matsuda

Browsing and Retrieval Tool of Slides and Related Lecture Movies .............................................................................................193
  Yoshitomo Yaginuma, Motofumi T. Suzuki, and Haruo Kodama

Cloud Computing Based Technologies, Applications and Structure in U-learning .................................................................196
  Aida Ghazizadeh and Maziar Manouchehry

Cloud Computing Benefits and Architecture in E-Learning ...........................................................................................................199
  Aida Ghazizadeh

Designing Mobile Language Learning Applications Using Multimedia: Implications from a Small-scale Prospective Learner Study .................................................................202
  Maria Uther and Alberta Ipser

Development of a Mobile Video Learning System for Cellular Phone ..........................................................................................205
  Yoahiaiki Hada
Editing the Visual Properties of Collaborative KJ Diagram Decoration
by User-Defined Handwritten Gestures ................................................................. 208
  Takahiro Nyu and Motoki Miura

Energy Awareness Displays: Designing a Prototype for Personalised Energy
Consumption Feedback at the Workplace ............................................................ 211
  Dirk Börner, Marco Kalz, and Marcus Specht

Evaluating the Input of Characters using Software Keyboards in a Mobile Learning
Environment: A Comparison between Software Touchpanel Devices and Hardware
Keyboards ............................................................................................................. 214
  Akira Hasegwa, Tomiya Yamazumi, Satoshi Hasegwa, and Masaru Miyao

Exploring the Use of Augmented Reality to Support Science Education in Secondary
Schools .................................................................................................................. 218
  Mattias Davidsson, David Johansson, and Katrin Lindwall

mbclick - An Electronic Voting System that Returns Individual Feedback .................. 221
  Geoff Rubner

Semantic Interpretation and Feedback for Digital Sketching Environments .................. 223
  Stefan Weinbrenner, Jum Engler, Pouyan Fotouhi Tehrani, and H. Ulrich Hoppe

Towards Combating Youth Obesity with a Mobile Fitness Application ......................... 226
  Fletcher Lu and Jessica Welton

Towards Opportunistic Uses of Future Learning Environments: Flexible
and Activating Learning in Higher Education ...................................................... 229
  Antti Syvänen and Jarmo Viteli

Using Personalized VLS on Mobile English Vocabulary Learning ................................. 232
  Fang-Chuan Ou Yang

Visual Interactive and Location Activated Mobile Learning ........................................ 235
  Yiqun Li, Aiyuan Guo, Jimmy Addison Lee, Yan Gao, and Yiy Leong Ling

W1: Workshop on Mobile/Ubiquitous Learning Strategies and Applications

A Design of Mobile Application for English Learning .............................................. 238
  Chen-Chung Chi, Chin-Hwa Kuo, and Kuo-Yang Lin

A Mind Map-oriented Mobile Learning Approach to Promoting Creative Thinking
Ability of Students in a Business Course .................................................................. 242
  Gwo-Jen Hwang, Chih-Hsiang Wu, Iwen Huang, and Fan-Ray Kuo

Analysing Research Trends of Mobile Learning with the Milky Way .......................... 249
  Brendan Flanagan, Chengjui Yin, Sachio Hirokawa, Han-Yu Sung, and Gwo-Jen Hwang

Approaching M-learning with the Application of Instructional Pervasive Game .............. 254
  Ju-ling Shih and Cheng-ping Chen

Development of a Web 2.0-based Ubiquitous Learning Platform for Schoolyard Plant
Identification ......................................................................................................... 259
  Gwo-Haur Hwang, Beyin Chen, Hui-Chun Chu, and Zheng Shan Cheng
### Educational Resources for Mobile Wireless Devices: A Case Study
*Rosa Reis, Paula Escudeiro, and Nuno Escudeiro*

Evaluation of Serious Games in Mobile Platforms with QEF: QEF (Quantitative Evaluation Framework)
*Paula Escudeiro and Nuno Escudeiro*

On Auxiliary Information Presentation Sequence Applied to Mobile Devices
*Yu-Hsiang Wang, Chorng-Shiuh Koong, Chun-Cheng Chen, and Deng-Jyi Chen*

The Differences of Collaborative Learning and Scientific Inquiry Competencies between Experienced and Novice Learners in Ubiquitous Problem-Based Learning
*Pi-Hsia Hung, Gwo-Jen Hwang, Tsung-Hsun Wu, I-Hua Lin, Yueh-Hsun Lee, and Wen-Yi Chang*

The Evaluation of Two-Stage Mobile Learning Guidance of Math in an Elementary School
*Ah-Fur Lai, Horng-Yih Lai, Victor R.L. Shen, I Chang Tsai, and Andy Chou*

### W2: Workshop on Scalability and Interoperability Dimensions for Mobile Learning Applications

Challenges in Scaling Mobile Learning Applications: The Example of Quizzer
*Adam Giemza, Per Verheyen, and H. Ulrich Hoppe*

*Tsu-Chi Yang, Tosti H.C. Chiang, and Stephen Jen-Hwa Yang*

Designing a Decentralized Distributed Self-Adaptive System in M-Learning Activities
*Didac Gil de la Iglesia*

Mathematics Assisted Instruction System of M/U-Learning Environment
*Shu-Hsien Huang, Ting-Ting Wu, Hong-Ren Chen, Pei-Chen Yang, and Yueh-Min Huang*

Reusability and Interoperability in Mobile Learning: A Study of Current Practices
*Oskar Pettersson and Bahtijar Vogel*

Towards a Multichannel Input Dimension in Learning Scenarios with Mobile Devices
*Lars Bollen, Marc Jansen, and Sabrina C. Eimler*

Using Procedural Scaffoldings to Enhance Group Discourse Levels in a Paper-plus-smartphone Learning Context
*Hui-Wen Huang, Chih-Wei Wu, and Nian-Shing Chen*

### Demo Papers

AR-based Remote Video Learning System
*Su Cai and Qian Song*

Interactive Use of Kit-Build Concept Map with Media Tablets
*Kouta Sugihara, Yoshiaki Nino, Shogo Moriyama, Ryoichi Moriyama, Kouhei Ishida, Takuya Osada, Youhei Mizuta, Tsukasa Hirashima, and Hideo Funaoi*

SCROLL: System for Capturing and Reminding of Ubiquitous Learning Log
*Mengmeng Li, Hiroaki Ogata, Bin Hou, and Noriko Uosaki*
Supporting Language Learning Using SenseCam ............................................................... 331
Bin Hou, Hiroaki Ogata, Mengmeng Li, and Noriko Uosaki

Doctor Student Consortium Papers
A Generalized Framework to Support Field and In-class Collaborative Learning ......................................................... 333
Madiha Shafaat Ahmad
Ambient Learning Displays: Distributed Mixed Reality Information Mash-ups
to Support Ubiquitous Learning .......................................................................................... 337
Dirk Börner

Author Index ........................................................................................................................... 339
