2010 6th IEEE International Conference on Wireless, Mobile, and Ubiquitous Technologies in Education
(WMUTE 2010)

Kaohsiung, Taiwan
12-16 April 2010

Editors:
Ulrich Hoppe
Roy Pea
Chen-Chung Liu

IEEE Catalog Number: CFP10WMT-PRT
The 6th IEEE International Conference on Wireless, Mobile, and Ubiquitous Technologies in Education

WMUTE 2010

Table of Contents

Preface ix
Organizing Committee x
Program Committee xi
Keynote Abstracts xiv

Full Papers

1:1 Learning Technology to Support Collaborative Concept Mapping: A Case Study of Social Studies Lesson in Elementary School ................................................................. 3

Chiu-Pin Lin, Lung-Hsiang Wong, Yinjuan Shao, Jitti Niramitranon, and Chih-Jong Tong

A Context-Aware Personalized M-learning Application Based on M-learning Preferences ................................................................. 11

Jane Y.-K. Yau and Mike Joy

Adaptive Content Delivery in Ubiquitous Learning Environment ........................................................................................................ 19

Xinyou Zhao, Xin Wan, and Toshio Okamoto

An Investigation on Students’ Cognitive Load and Learning Achievements for Participating in a Local Culture Mobile Learning Activity ................................................................. 27

Gwo-Jen Hwang, Po-Han Wu, Ya-Yan Zhuang, Wan-Ling Kuo, and Yueh-Min Huang

Development of Adaptive Vocabulary Learning via Mobile Phone E-mail ........................................................................................................ 34

Mengmeng Li, Hiroaki Ogata, Bin Hou, Satoshi Hashimoto, Noriko Uosaki, Yuqin Liu, and Yoneo Yano

Learning Animal Concepts with Semantic Hierarchy-Based Location-Aware Image Browsing and Ecology Task Generator ................................................................. 42

Ming-Chi Liu, Dunwei Wen, Kinshuk, and Yueh-Min Huang
Enhancing Emerging Learning Objects with Contextual Metadata Using the Linked Data Approach ............................................................... 50
  Martin Svensson, Arianit Kurti, and Marcelo Milrad

Go Math! How Research Anchors New Mobile Learning Environments ............................................................... 57
  April Alexander, Kristen Pitner Blair, Shelley Goldman, Osvaldo Jimenez,
  Masataka Nakaue, Roy Pea, and Andrew Russell

Integrating Mobile, Web and Sensory Technologies to Support Inquiry-Based Science Learning ............................................................... 65
  Bahtijar Vogel, Daniel Spikol, Arianit Kurti, and Marcelo Milrad

LEMONADE: A Flexible Authoring Tool for Integrated Mobile Learning Scenarios ............................................................... 73
  Adam Giemza, Lars Bollen, Peter Seydel, André Overhagen, and H. Ulrich Hoppe

LET's GO! to the Creek: Co-design of Water Quality Inquiry Using Mobile Science Collaboratories ............................................................... 81
  Heidy Maldonado and Roy D. Pea

Mobile-Assisted Vocabulary Learning in Real-Life Setting for Primary School Students: Two Case Studies ............................................................... 88
  Lung-Hsiang Wong and Chee-Kit Looi

Orchestrating Learning in a One-to-One Technology Classroom ............................................................... 96
  Jitti Niramitranon, Mike Sharples, Chris Greenhalgh, and Chiu-Pin Lin

Short Papers

A Review of Literature in Mobile Learning: Affordances and Constraints ............................................................... 107
  Gregg Orr

Collaboration with Mobile Media: Shifting from “Participation”
to “Co-creation” ............................................................................................................................... 112
  Sarah Lewis, Roy Pea, and Joseph Rosen

Development of Web-Based Japanese Mimicry and Onomatopoeia Learning Assistant System with Sensor Network ............................................................... 117
  Bin Hou, Hiroaki Ogata, Masayuki Miyata, Mengmeng Li, and Yoneo Yano

Generating Adaptive Learning Sheets for Museum Tour Guide in U-learning Grid Environments ............................................................... 122
  Wen-Chung Shih, Shian-Shyong Tseng, Chao-Tung Yang, and Anthony Y.H. Liao

Heuristics Evaluation Strategy for Mobile Game-Based Learning ............................................................................................... 127
  Syamsul Bahrin Zaibon and Norshuhada Shiratuddin

Integrate Handheld Device and RFID to Support Context Awareness Environment for Outdoor Inquiry Learning Activity ............................................................... 132
  Ah-Fur Lai, Chien-Hsun Wu, Kuan-Chih Chou, and Horng-Yih Lai

Lessons from Designing Geometry Learning Activities that Combine Mobile and 3D Tools ............................................................... 137
  Daniel Spikol and Johan Eliasson
Lessons Learned from Planning the Use of Mobile Technologies at Schools in Hong Kong ....................................................... 142
  Gary Cheng and Siu Chew Kong
Location-Based and Knowledge-Oriented Microblogging for Mobile Learning—Framework, Architecture, and System .................................................. 146
  Yen-Ting Lin, Yueh-Min Huang, Qing Tan, and Kinshuk
LORAMS: Sharing Learning Experiences with Social and Ubiquitous Media .................................................. 151
  Hiroaki Ogata, Toru Misumi, Bin Hou, Mengmeng Li, Moushir El-Bishouty, and Yoneo Yano
MoMAt: A Mobile Museum Adaptive Tour .................................................. 156
  Pierpaolo Di Bitonto, Teresa Roselli, Veronica Rossano, Lucia Monacis, and Maria Sinatra
On the Issue of Reusability and Adaptability in M-learning Systems .................................................. 161
  Oskar Pettersson and Didac Gil
Providing Flexibility in Learning Activities Systems by Exploiting the Multiple Roles of Mobile Devices .................................................. 166
  Didac Gil and Oskar Pettersson
Students’ Voices: Enriching Learning Experiences through M-learning .................................................. 171
  Patrick Hak-Chung Lam and Sally Wai-Yan Wan
The Effect of Situated Mobile Learning on Chinese Rhetoric Ability of Elementary School Students .................................................. 177
  Wen-Jen Hsieh, Po-Sheng Chiu, Tsung-Shi Chen, and Yueh-Min Huang
The Study of Self-Seamless Teaching Strategy for Ubiquitous Learning Environments .................................................. 182
  Shu-Hao Ye and Yen-Chu Hung
Posters
A Language Exchange SNS in Ubiquitous Environment .................................................. 189
  Chengjiu Yin, Hiroaki Ogata, Yoshiyuki Tabata, and Yoneo Yano
A New Perspective on First Read Rate of 2D Barcodes in Mobile Applications .................................................. 192
  Keng T. Tan and Douglas Chat
A Study of Elevating the Efficiency of Practice-Based Instruction Strategy with 3D Handheld Device .................................................. 195
  Yen-Chu Hung and Kuang-Shuo Peng
An Automatic Scoring System for PDA Integrated Ecology Observation Worksheet .................................................. 198
  I-Hsiang Su, Pi-Hsia Hung, Gwo-Jen Hwang, and Yu-Fen Lin
Augmenting Paper-Based Reading Activities with Mobile Technology to Enhance Reading Comprehension .................................................. 201
  Nian-Shing Chen, Daniel Chia-En Teng, and Cheng-Han Lee
Developing the Mobile 3D Agent Sign Language Learning System .............................................. 204
   Yi-Chun Lin, James Jiunn-Yin Leu, Jyh-Win Huang, and Yueh-Min Huang

Effective Materials for Abstract Words in Foreign Vocabulary Learning ........................................ 207
   Takahiro Kayama, Keiichi Kaneko, Haruko Miyakoda, and Masatoshi Ishikawa

GIS-Integrated Learning System for Taiwan Local Cultures .......................................................... 210
   Ju-Ling Shih, Chien-Wen Chuang, Jia-Jia Cheng, and Gwo-Jen Hwang

Learning Historical and Cultural Contents via Mobile Treasure Hunting in Five-Harbor District of Tainan, Taiwan ................................................................. 213
   Stis Wu, Alex Chang, Maiga Chang, Yu-Ren Yen, and Jia-Sheng Heh

MoViE: Mobile Social Video Sharing Tool for Learning Applications ............................................. 216
   Jari Multisilta, Arttu Perttula, Marko Suominen, and Antti Koivisto

Social Interaction Mining Based on Wireless Sensor Networks for Promoting Cooperative Learning Performance in Classroom Learning Environment .......................................... 219
   Jeng-Cheng Hsieh, Chih-Ming Chen, and Hsiao-Fang Lin

Statecraft X: Enacting Citizenship Education Using a Mobile Learning Game Played on Apple iPhones .................................................................................................................. 222
   Yam San Chee, Ek Ming Tan, and Qiang Liu

Studying Different Methods of Providing Input to Collaborative Interactive Museum Exhibit Using Mobile Devices ........................................................................................................... 225
   Priscilla F. Jimenez and Leilah B. Lyons

Ubiquitous Wikipedia on Handheld Device for Mobile Learning ....................................................... 228
   Shih-Hung Wu, Min-Xiang Li, Ping-che Yang, and Tsun Ku

WebQuest: M-learning for Environmental Education ............................................................................ 231
   Cheng-Sian Chang, Tzung-Shi Chen, and Wei-Hsiang Hsu

Author Index ................................................................................................................................. 234
