2011 15th IEEE International Enterprise Distributed Object Computing Conference Workshops
EDOCW 2011
Table of Contents

Message from the General Chair ........................................................................................................... x
Message from the EDOC Program Co-Chairs and Workshops Chair ................................................... xi
Conference Committees ..................................................................................................................... xii
Program Committee ........................................................................................................................ xiii
Workshop Committees ...................................................................................................................... xvi
Reviewers .......................................................................................................................................... xxii
Sponsors .............................................................................................................................................. xxiv

Conference Short Papers
Modeling Contextual Concerns in Enterprise Architecture .................................................................... 3
Gonçalo Antunes, Jose Barateiro, Christoph Becker, Jose Borbinha, and Ricardo Vieira

Does Enterprise Architecture Form the Ground for Group Decisions in eGovernment Programme? Qualitative Study of the Finnish National Project for IT in Social Services ................................................................................................................. 11
Miia-Maarit Saarelainen and Virpi Hotti

Solving Service Ecosystem Governance .............................................................................................. 18
Toni Ruokolainen, Sini Ruohomaa, and Lea Kutvonen

Metadata Categories for Supporting Concurrent Engineering .................................................................. 26
Juliane Blechinger, Frank Lauterwald, and Richard Lenz

Flexible Deviation Handling during Software Process Enactment ......................................................... 34
Marcos Aurélio Almeida da Silva, Reda Bendraou, Jacques Robin, and Xavier Blanc

Introducing Security Access Control Policies into Legacy Business Processes ...................................... 42
Fáber D. Giraldo, Mireille Blay-Fornarino, and Sébastien Mosser
Workshop Papers

Second International Workshop on Models and Model-Driven Methods for Service Engineering (3M4SE 2011)

Message from the 3M4SE 2011 Chairs .................................................................55

Marten van Sinderen, Luis Ferreira Pires, and Maria-Eugenia Iacob

SOA Integration Modeling: An Evaluation of How SoaML Completes UML

Modeling ...........................................................................................................57

Irina Todoran, Zuheb Hussain, and Niina Gromov

Orthographic Service Modeling .................................................................67

Colin Atkinson, Dietmar Stoll, and Christian Tunjic

Towards a Unified Conceptual Framework for Service-Oriented Computing .........................................................................................71

Philipp Boston, Colin Atkinson, and Dirk Draheim

Looking for a Software Wizard for Architectural Definitions of Information Systems..................................................................................81

Bruno Traverson

Process Model of DSM Solution Development and Evolution for Small and Medium-Sized Software Companies ........................................85

Dmitrij Koznov

Fifth International Workshop on Advances in Quality of Service Management (AQuSerM 2011)

Message from the AQuSerM 2011 Chairs ........................................................95

Iman Poernomo and Guijun Wang

On the Restriction to Numeric Indicators in Performance Measurement Systems .................................................................................................96

Tim Pidun and Carsten Felden

Towards Adapting System Execution Traces for Validation of Enterprise Distributed System QoS Properties .................................................................103

T. Manjula Peirs and James H. Hill

Dynamic Analysis of Enterprise Business Scenarios ...................................112

Lukasz Budnik and Henryk Krawczyk

A Conceptual Model Based on the Fuzzy Set Theory to Measure and Evaluate the Performance of Service Processes .....................................................122

Schafiq Amini and Roland Jochem

Clinical Process Modeling and Performance Measurement in Hospitals ........................................................................................................132

Eva Gattnar, Okan Ekinci, and Vesselin Detschew
Fourth International Workshop on Evolutionary Business Processes (EVL-BP 2011)

Message from the EVL-BP 2011 Workshop Chairs ................................................................. 143
  Dragan Gaševic, Georg Grossmann, Sylvain Hallé, and Florian Rosenberg

A Context-Aware Framework for Business Processes Evolution ........................................... 146
  Antonio Bucchiarone, AnnaPaola Marconi, Marco Pistore, and Adina Sirbu

Runtime Process Adaptation for BPEL Process Execution Engines ...................................... 155
  Simon Tragatschnig and Uwe Zdun

Semantically-Driven Workflow Generation Using Declarative Modeling for Processes in Software Engineering ................................................................. 164
  Gregor Grambow, Roy Oberhauser, and Manfred Reichert

Synchronization of Adaptive Process Models Using Levels of Abstraction ............................ 174
  Monika Weidmann, Falko Koetter, Thomas Renner, David Schumm, Frank Leymann,
  and Daniel Schleicher

Always Stay Flexible! WFMS-independent Business Process Controlling in SOA ...................... 184
  Andreas Hausotter, Carsten Kleiner, Arne Köschel, David Zhang, and Heiner Gehrken

From Smart Objects to Smarter Workflows—An Architectural Approach ............................. 194
  Steffen Kunz, Benjamin Fabian, Holger Ziekow, and Dirk Bade

Optimizing Process Performance Visibility through Additional Descriptive Features in Performance Measurement ................................................................. 204
  Tim Pidun, Johannes Buder, and Carsten Felden

Querying Process Models Based on the Temporal Relations between Tasks .......................... 213
  Liang Song, Jianmin Wang, Lijie Wen, Wenxing Wang, Shijie Tan, and Hui Kong

Third International Workshop on Service-Oriented Enterprise Architecture for Enterprise Engineering (SoEA4EE 2011)

Message from the SoEA4EE 2011 Chairs ................................................................. 225
  Selmin Nurcan and Rainer Schmidt

Using Role Knowledge for Service Configuration in SOA-based Enterprise Representation .......... 229
  Kurt Sandkuhl, Ulf Seigerroth, Alexander Smirnov, Tatiana Levashova, and Nikolay Shilov

Value-Based Service Bundling: A Customer-Supplier Approach ......................................... 237
  Iván S. Razo-Zapata, Pieter De Leenheer, and Jaap Gordijn

Healthcare Software as a Service: The Greater Paris Region Program Experience—The So-called “Région Sans Film” Program ............................................. 247
  Pierre Boiron and Valère Dussaux
Extending the Method of Bedell for Enterprise Architecture Valuation

Markus Buschle and Dick Quartel

Sixth International Workshop on Vocabularies, Ontologies and Rules for the Enterprise (VORTE 2011)

Message from the VORTE 2011 Workshop Chairs

Dragan Gašević, Giancarlo Guizzardi, and Andreas L. Opdahl

Ontologies and Rules for Enterprise Modeling and Simulation

Gerd Wagner

Exploiting Structured Linked Data in Enterprise Knowledge Management Systems: An Idea Management Case Study

Adam Westerski and Carlos A. Iglesias

Service Mashups Using Natural Language and Context Awareness: A Pragmatic Architectural Design

Mariano Belaunde and Slim Ben Hassen

Semantic Integration Platform

Vilho Räisänen

Detection of Conflicting Compliance Rules

François Hantry, Mohand-Said Hacid, and Romuald Thion

Proactive Business Process Compliance Monitoring with Event-Based Systems

Robert Thullner, Szabolcs Rosznyai, Josef Schiefer, Hannes Obweger, and Martin Suntinger

Engineering Policies for Secure Interorganizational Information Flow

Steffen Kunz, Benjamin Fabian, Daniel Marx, and Sebastian Müller

DIGO: An Open Data Architecture for e-Government

Alexandre Lopes Machado and José Maria Parente de Oliveira

Author Index
