CONTENTS

Preface ................................................................. ix

Acknowledgments .................................................... xi

Materials Research Society Symposium Proceedings ............ xiii

* Mechanical Behavior of Ion-irradiated Fe-Cr Alloys
  Investigated by Spherical Indentation ......................... 1
    Christopher D. Hardie, Steve G. Roberts,
    and Andrew J. Bushby

The Role of Stacking Fault Energy on the Indentation Size
Effect of FCC Pure Metals and Alloys ........................... 7
    D.E. Stegall, M.A. Mamun, and A.A. Elmustafa

Measuring Size-dependent Mechanical Properties
of Electrospun Polystyrene Fibers Using In-situ AFM-SEM ........ 13
    Russell J. Bailey, Beatriz Cortes-Ballesteros, Hao Zhang,
    Congwei Wang, and Asa H. Barber

Recording IR Spectra for Individual Electrospun Fibers Using
an In Situ AFM-synchrotron Technique .......................... 19
    Urszula Stachewicz, Fei Hang, Russell J. Bailey,
    Himadri S. Gupta, Mark D. Frogley, Gianfelice Cinque,
    and Asa H. Barber

Determining Mechanical Properties of Escherichia Coli
by Nanoindentation ................................................... 25
    C.A. Wright, C.J. Sullivan, B. Crawford, L.D. Britt,
    M.A. Mamun, and A.A. Elmustafa

Failure of Bone at the Sub-lamellar Level Using In Situ
AFM-SEM Investigations .............................................. 31
    Ines Jimenez-Palomar and Asa H. Barber

Improvement of Adhesive Strength of Polyacetal by Irradiation
of Vacuum Ultra-violet Light and Deposition of Nanometer-sized
Particles Simultaneously Using Laser Ablation .................. 37
    Akihiro Takeichi, Yasushi Okamoto,
    and Hirozumi Azuma

*Invited Paper
Individual Electrospun Poly(Vinyl Alcohol) Nanofiber Wetting Using AFM .................................................. 43
Shuangwu Li and Asa H. Barber

Nanoscale Dynamic Viscoelastic Measurements at Elevated Temperature .................................................. 49
Jiping Ye and Satoshi Shimizu

Nanomechanical Properties of Teflon Amorphous Fluoropolymer - MWCNT Bilayer Films .................................. 55
R.L. Schoeppner, A. Qiu, D.D. Stauffer, R.C. Major,
J.L. Skinner, T. Zifer, G. O'Bryan, A. Vance,
W.W. Gerberich, D.F. Bahr, and N.R. Moody

Testing the Limits of Small Scale Plasticity with Thin Wires in Torsion .......................................................... 61
Andrew J. Bushby, Julien Feuvrier, Dong V. Dong,
and David J. Dunstan

Dislocation Dynamics Simulations of Junctions in Hexagonal Close-packed Crystals ............................................. 67
Chi-Chin Wu, Sylvie Aubry, Peter W. Chung,
and Athanasios Arsenlis

Deformation and Fracture of Oxides Fabricated on 304L Stainless Steel via Pulsed Laser Irradiation ......................... 73
Samantha K. Lawrence, Douglas D. Stauffer,
Ryan C. Major, David P. Adams, William W. Gerberich,
David F. Bahr, and Neville R. Moody

Activation Energy and Blistering Rate in Hydrogen-implanted Semiconductors .................................................. 79
Daniel J. Pyke, Robert G. Elliman,
and Jeffrey C. McCallum

An Examination of the Indentation Size Effect and Bi-linear Behavior of FCC Metals ........................................... 85
D.E. Stegall, B. Crawford, and A.A. Elmustafa

Studies of Nanomechanical Properties of Pulsed Laser Deposited NbN films on Si Using Nanoindentation .................. 91
M.A. Mamun, A.H. Farha, Y. Ufuktepe,
H.E. Elsayed-Ali, and A.A. Elmustafa
Development of Objective Type Atomic Force Microscopy for PSISCM-Nanoindentation Combined System................97
M. Fujitsuka, M. Yamaguchi, and S. Ueno

Measuring Residual Stress on the Nanometer Scale - Novel Tools for Fundamental and Applied Research........103
R.B. Wehrspohn, M. Krause, and C. Schriever

Dynamic Nanoscale In Situ TEM Tribology......................109
A.J. Lockwood, K. Anantheshwara, M.S. Bobji,
and B.J. Inkson

Nanoparticle Enhanced Solders for Increased Solder Reliability.......115
Omid Mokhtari, Ali Roshanghias, Roya Ashayer,
Hiren R. Kotadia, Farzad Khomamizadeh,
Amir H. Kokabi, Michael P. Clode, Mark Miodownik,
and Samjtid H. Mannan

Effect of van der Waals Interaction Strength and Nanocluster Size on the Dynamical and Mechanical Properties of 1,4-cis-polybutadiene Melts........121
Canan Atilgan, Ibrahim Inane, and Ali Rana Atilgan

Influence of Surface Segregation on the Mechanical Property of Metallic Alloy Nanowires................127
Aditi Datta, Zhiyao Duan, and Guofeng Wang

Probing Strain and Microstrain in Nanostructured Thin Layers.....133
Gianguido Baldinozzi, David Simeone, Dominique Gosset,
and Jean-Francois Bérar

Dielectric Gradient Force Actuation with on-chip Electrode and Free-space Optical Measurement of SiNx Nanomechanical Resonator...................139
Sungwan Cho, Myung Rae Cho, Seung-Bo Shim,
and Yun Daniel Park

Author Index.........................................................145

Subject Index........................................................147
