# Table of Contents

- List of Figures and Tables ......................................................... ix
- Foreword ....................................................................................... xiii
- Preface ............................................................................................ xv

## Chapter 1  I. Quality Concepts and Tools ......................... 1

**A. Quality Concepts** ................................................................. 1
    1. Customers and Suppliers ..................................................... 1
    2. Quality Principles for Products and Processes ..................... 2
    3. Quality Standards, Requirements, and Specifications ............ 5
    4. Cost of Quality (COQ) ........................................................... 6
    5. Six Sigma .............................................................................. 8
    6. Lean ..................................................................................... 13
    7. Continuous Improvement Techniques .................................. 15

**B. Quality Tools** ............................................................... 16
    Cause-and-Effect Diagram .................................................... 17
    Flowcharts (Process Maps) ...................................................... 18
    Check Sheets ........................................................................... 18
    Pareto Diagrams ..................................................................... 20
    Control Charts ........................................................................ 22
    Histograms ............................................................................... 26
    Scatter Diagrams ..................................................................... 27

**C. Team Functions** .......................................................... 29
    1. Meeting Management ......................................................... 29
    2. Team Building Methods ...................................................... 31
    3. Team Stages ......................................................................... 32
    4. Global Communication ....................................................... 33

## Chapter 2  II. Statistical Techniques .......................... 35

**A. General Concepts** ............................................................ 35
    1. Terminology ......................................................................... 35
    2. Frequency Distributions ...................................................... 36

**B. Calculations** .............................................................. 43
    1. Measures of Central Tendency ............................................. 43
    2. Measures of Dispersion ....................................................... 44
    3. Statistical Inference ............................................................. 47
    4. Confidence Limits ................................................................ 48
    5. Probability ........................................................................... 49

| B. Inspection Concepts | 137 |
| 1. Types of Measurements | 138 |
| 2. Gauge Selection | 139 |
| 3. Measurement Systems Analysis (MSA) | 140 |
| 4. Rounding Rules | 141 |
| 5. Conversion of Measurements | 142 |
| 6. Inspection Points | 142 |
7. Inspection Error ................................................................. 145
  Measurement Scales .......................................................... 146
8. Product Traceability .......................................................... 147
  9. Certificates of Compliance (COC) and Analysis (COA) ............... 147
C. Inspection Techniques and Processes ........................................ 148
  1. Nondestructive Testing (NDT) Techniques ............................. 148
  2. Destructive Testing Techniques ........................................ 149
  3. Other Testing Techniques ................................................ 150
D. Sampling ............................................................................... 152
  1. Sampling Characteristics .................................................. 152
  2. Sampling Types .................................................................. 153
  3. Selecting Samples from Lots ............................................... 157
E. Nonconforming Material ........................................................ 162
  1. Identifying and Segregating ............................................... 162
  2. Material Review Process .................................................. 163

Chapter 5  V. Quality Audits ...................................................... 165
A. Audit Types and Terminology ................................................ 165
  Source of Auditors ................................................................ 167
  Auditor Types ....................................................................... 168
B. Audit Components .................................................................. 168
  Purpose/Scope ...................................................................... 169
  Preparation ........................................................................... 169
  Performance .......................................................................... 171
  Documentation ...................................................................... 172
  Closure .................................................................................. 173
C. Audit Tools and Techniques .................................................... 173
  Checklists ............................................................................. 174
  Audit Working Papers ........................................................... 175
  Qualitative Quality Tools ...................................................... 176
  Quantitative Quality Tools .................................................... 176
  Objective Evidence .............................................................. 176
  Forward and Backward Tracing .............................................. 176
  Audit Sampling Plans ............................................................ 177
  Procedural Guidelines ........................................................... 177
D. Audit Communication Tools .................................................. 178
  Interviewing Techniques ....................................................... 179
  Listening Skills ..................................................................... 180

Chapter 6  VI. Preventive and Corrective Action .......................... 181
A. Corrective Action ................................................................. 182
B. Preventive Action .................................................................. 185
Nonconforming Material Identification ....................................... 189
  Determining Conformance Status ......................................... 189
  Identifying Nonconforming Materials .................................... 190
  Segregating Nonconforming Materials ................................... 190
Nonconforming Material Review Process ................................... 191
Investigation of Root Causes ..................................................... 191
# Table of Contents

Appendix A  ASQ Code of Ethics .................................................. 193
Appendix B  ASQ Certified Quality Technician (CQT) Body of Knowledge ................................................................. 195
Appendix C  Areas under Standard Normal Curve ...................... 203
Appendix D  Control Limit Formulas ....................................... 205
Appendix E  Constants for Control Charts .............................. 206
Appendix F  Standard Normal Distribution for Select Values of Z ........ 207

Glossary ................................................................................. 209
References ............................................................................. 225
