Preface ........................................................................................................ vii  
Editors ......................................................................................................... ix  
Contributors ................................................................................................. xi  

## Section I  Approaches to Understanding the Neural Network's Functions

1 Psychological Constructs versus Neural Mechanisms: Different Perspectives for Advanced Research of Cognitive Processes and Development of Neuroadaptive Technologies .................................................................................. 3  
   Joanna Trzopek, Magdalena Fafrowicz, Tadeusz Marek, and Waldemar Karwowski  

2 Neural Cybernetics of Executive Control and Learning .......................................................... 33  
   Phan Luu, Don M. Tucker, and Catherine Poulsen  

3 A New Neural Framework for Adaptive and Maladaptive Behaviors in Changeable and Demanding Environments ...................................................................................................................... 43  
   Koryna Lewandowska, Barbara Wachowicz, Ewa Beldzik, Aleksandra Domagalik,  
   Magdalena Fafrowicz, Justyna Mojsa-Kaja, Halszka Oginska, and Tadeusz Marek  

4 Object Perception versus Target-Directed Manual Actions ...................................................... 69  
   Gregory Króliczak, Cristiana Cavina-Pratesi, and Mary-Ellen Large  

5 Neural Control of Visually Guided Eye Movements ................................................................. 97  
   Peter H. Schiller  

6 Sleep Deprivation and Error Negativity: A Review and Reappraisal ....................................... 139  
   Shulan Hsieh  

## Section II  Neuroadaptive Systems: Challenges and Applications

7 Augmenting Human Performance ......................................................................................... 167  
   Kay M. Stanney  

8 Electroencephalographic Metrics of Workload and Learner Engagement .......................... 183  
   Carryl L. Baldwin, Joseph T. Coyne, and James Christensen  

9 Brain–Computer Interfaces: Effects on Brain Activation and Behavior .............................. 203  
   Sonja C. Kleih, Steve Lukito, and Andrea Kübler
10 Neuroadaptive Systems: Challenges and Opportunities in Creating Symbiotic Relationships between Humans and the Machines They Use
Joseph V. Cohn and Tracey L. Wheeler

239

11 Eye-Tracking Data Analysis and Neuroergonomics
Heiner Bubb and Martin Wohlfarter

255

12 Potential Applications of Systems Modeling Language and Systems Dynamics to Simulate and Model Complex Human Brain Functions
Waldemar Karwowski, Tareq Z. Ahram, Chris Andrzejczak, Magdalena Fafrowicz, and Tadeusz Marek

311

13 Neuroethics: Considerations for a Future Embedded with Neurotechnology
Joseph R. Keebler, Grant Taylor, Elizabeth Phillips, Scott Ososky, and Lee W. Sciarini

333
