Proceedings
VL/HCC 2008

Table of Contents

Foreword ................................................................. viii
Conference Committees ................................................. x
Extra Reviewers ......................................................... xii
Sponsors ................................................................. xiii

Workshops

Layout of (Software) Engineering Diagrams ................................. 3
Andrew Fish, Harald Störrle

Sketch Tools for Diagramming .............................................. 4
Beryl Plimmer, Tracy Hammond

Keynotes

Visualization for Information Exploration and Analysis ..................... 7
John Stasko

Model Driven Development with Mechatronic UML .......................... 9
Wilhelm Schäfer

Visualization and Animation

Exploring the Evolution of Software Quality with Animated Visualization ................................................. 13
Guillaume Langelier, Houari Sahraoui, Pierre Poulin

Flexible Visualization of Automatic Simulation based on Structured Graph Transformation ................................. 21
Enrico Biermann, Claudia Ermel, Jonas Hurrelmann, Karsten Ehrig
End-User Programming I

What's in a mashup? And why? Studying the perceptions of web-active end users .................................................. 31
Nan Zang, Mary Beth Rosson

End-User Programming in the Wild: A Field Study of CoScripter Scripts .......................................................... 39
Christopher Bogart, Margaret Burnett, Allen Cypher, Christopher Scaffidi

Using Scalable Game Design to Promote 3D Fluency: Assessing the AgentCubes Incremental 3D End-User Development Framework .......................................................... 47
Andri Ioannidou, Alexander Repenning, David Webb

Supporting Professional Programmers

Can Information Foraging Pick the Fix? A Field Study .......................................................... 57
Joseph Lawrance, Rachel Bellamy, Margaret Burnett, Kyle Rector

Codetrail: Connecting Source Code and Web Resources .......................................................... 65
Max Goldman, Robert C. Miller

Tool Support for Working with Sets of Source Code Entities .......................................................... 73
Curtis Fraser, Chris Luce, Jamie Starke, Jonathan Sillito

Analyzing a Socio-Technical Visualization Tool Using Usability Inspection Methods .................................................. 78
Erik Trainer, Stephen Quirk, Cleidson de Souza, David Redmiles

Towards the Next Generation of Bug Tracking Systems .......................................................... 82
Sascha Just, Rahul Premraj, Thomas Zimmermann

The Design and Experimental Evaluation of a Tool to Support the Construction and Wizard-of-Oz Testing of Low Fidelity Prototypes .......................................................... 86
Christopher Hundhausen, Stephen Trent, Anzor Balkar, Mohamed Nuur

Domain-Specific Languages

EulerView: article organisation within the ACM Classification .......................................................... 93
Rosario De Chiara, Andrew Fish

A Visual Language for Representing and Explaining Strategies in Game Theory .................................................. 101
Martin Erwig, Eric Walkingshaw

A Domain Specific Visual Language for Design and Coordination of Supply Networks .................................................. 109
John Hosking, Nikolay Mehandjiev, John Grundy

Visual Programming Language for Bit-Level Concurrent Programming: APECbits .................................................. 113
Takashi Ajiro, Kensei Tsuchida

FlatCAD and FlatLang: Kits by Code .......................................................... 117
Gabe Johnson
Visual Programming Tools

Dimension Inference in Spreadsheets ................................................................. 123
  Chris Chambers, Martin Erwig

Test-Driven Goal-Directed Debugging in Spreadsheets ...................................... 131
  Robin Abraham, Martin Erwig

Unobtrusive Data Acquisition for Spreadsheet Research ........................................ 139
  Brian Bishop, Kevin McDaid

Mashing up Visual Languages and Web Mash-ups .................................................. 143
  M. Cameron Jones, Elizabeth F. Churchill, Michael B. Twidale

End-User Programming II

Can Feature Design Reduce the Gender Gap in End-User Software Development Environments? ............................... 149
  Valentina Grigoreanu, Jill Cao, Todd Kulesza, Christopher Bogart, Kyle Rector, Margaret Burnett, Susan Wiedenbeck

Enabling End-User Driven Business Process Composition through Programming by Example in a Collaborative Task Management System .............................................. 157
  Todor Stoitsev, Stefan Scheidl, Felix Flentge, Max Mühlhäuser

End-User Development for Task Management: Survey of Attitudes and Practices .................................................. 166
  Nikolay Mehandjiev, Todor Stoitsev, Olaf Grebner, Stefan Scheidl, Uwe Riss

Understanding and Supporting Designers

How Designers Design and Program Interactive Behaviors ...................................... 177
  Brad Myers, Sun Young Park, Yoko Nakano, Greg Mueller, Andrew Ko

Designers' Natural Descriptions of Interactive Behaviors ...................................... 185
  Sun Young Park, Brad Myers, Andrew Ko

A Case Study of API Redesign for Improved Usability ............................................ 189
  Jeffrey Stylos, Benjamin Graf, Daniela K. Busse, Carsten Ziegler, Ralf Ehret, Jan Karstens

Usability Challenges for Enterprise Service-Oriented Architecture APIs ..................... 193
  Jack Beaton, Sae Young Jeong, Yingyu Xie, Jeffrey Stylos, Brad Myers

Coordinated Queries: A Domain Specific Language for Exploratory Development of Multiview Visualizations .................. 197
  Chris Weaver

Modeling and Graphs

A model-driven approach for the visual specification of Role-Based Access Control policies in web systems .................. 203
  Paloma Díaz, Ignacio Aedo, Daniel Sanz, Alessio Malizia
End-User Programming to Support Classroom Activities on Small Devices ........................................ 270
*Craig Prince*

Connecting the Social and Technical Aspects of Computing with Visualization ................................. 272
*Erik H. Trainer*

Designing Explanation-Oriented Languages ............................................................................................. 274
*Eric Walkingshaw*

Mashups for the web-active user ............................................................................................................... 276
*Nan Zang*

Author Index ............................................................................................................................................ 279
