### Part I  
Fundamentals of implant wear

1  
**Introduction to wear phenomena of orthopaedic implants**  
S. Affatato and D. Brando, Istituto Ortopedico Rizzoli, Italy

1.1 History of wear  
1.2 Wear mechanisms  
1.3 Importance of wear mechanisms and their evaluation  
1.4 In vivo wear measurements  
1.5 In vitro wear measurements  
1.6 Socio-economic wear impact  
1.7 Future trends  
1.8 References  

2  
**Biology of implant wear**  
G. Ciapetti, Istituto Ortopedico Rizzoli, Italy

2.1 Introduction  
2.2 Inflammatory reaction to particulate materials  
2.3 Cellular/molecular response to wear  
2.4 Conclusion and therapeutic targets  
2.5 References  

3  
**Biomechanics of the hip and knee: implant wear**  
F. E. Kennedy, Dartmouth College, USA

3.1 Introduction  
3.2 Kinematics of hip and knee joints  
3.3 Kinetics and joint forces  

© Woodhead Publishing Limited, 2012
3.4 Lubrication and contact conditions in hip and knee implants 71
3.5 Implications for implant wear 80
3.6 Future trends in biomechanics of hip and knee joints 86
3.7 Sources of further information 87
3.8 References 87

4 Anatomy of the hip and suitable prostheses 93
F. Traina, M. De Fine and S. Affatato, Istituto Ortopedico Rizzoli, Italy
4.1 Anatomy of the hip 93
4.2 Kinematics of the hip 98
4.3 Biomechanics of the hip 101
4.4 History and indications for total hip replacement 104
4.5 Prosthetic designs and bearing surfaces 105
4.6 Future trends 109
4.7 Acknowledgments 110
4.8 References 111

5 Anatomy of the knee and suitable prostheses 115
F. Traina, M. De Fine and S. Affatato, Istituto Ortopedico Rizzoli, Italy
5.1 Bones and ligaments 115
5.2 Kinematics 120
5.3 Biomechanics 123
5.4 History and indications for total knee replacement 124
5.5 Prosthetic designs and bearing surfaces 126
5.6 Future trends 129
5.7 Acknowledgment 129
5.8 References 130

6 Orthopaedic implant materials and design 133
D. Tigani, Santa Maria alle Scotte Hospital, Italy, M. Fosco, R. Ben Ayad and R. Fantasia, Istituto Ortopedico Rizzoli, Italy
6.1 Introduction 133
6.2 Materials in knee and hip arthroplasty 134
6.3 Evolution of total knee arthroplasty 147
6.4 History of total hip arthroplasty 151
6.5 Future trends 168
6.6 Sources of further information and advice 169
6.7 Acknowledgments 169
6.8 References 170
7 Materials used for hip and knee implants

E. KAIVOSOJA, Helsinki University Central Hospital, Finland, V.-M. TIAINEN, Orton Orthopaedic Hospital of the Invalid Foundation, Finland, Y. TAKAKUBO, Helsinki University Central Hospital, Finland and Yamagata University School of Medicine, Japan. B. RAJCHEL, Polish Academy of Sciences, Poland, J. SOBIECKI, Warsaw University of Technology, Poland, Y. T. KONTTINEN, Helsinki University Central Hospital, Finland, Orton Orthopaedic Hospital of the Invalid Foundation, Finland and COXA Hospital for Joint Replacement, Finland and M. TAKAGI, Yamagata University School of Medicine, Japan

7.1 Introduction 178
7.2 Polymer evolution and internal/surface treatments 179
7.3 Metal evolution and internal/surface treatments to use in vivo 187
7.4 Ceramic evolution and internal/surface treatments to use in vivo 196
7.5 Conclusion 206
7.6 References 206

Part II Wear phenomena 219

8 Wear phenomena of ultra-high molecular weight polyethylene (UHMWPE) joints

C. CHO, The University of Kitakyushu, Japan, T. MURAKAMI and Y. SAWAE, Kyushu University, Japan

8.1 Introduction 221
8.2 Wear phenomena of UHMWPE knee joints 227
8.3 Concluding remarks 242
8.4 Acknowledgments 242
8.5 References 243

9 Wear phenomena of metal joints

N. DIomidis, Ecole Polytechnique Fédérale de Lausanne, Switzerland

9.1 Alloys for orthopaedic implants 246
9.2 Electrochemical aspects of corrosion 249
9.3 Passivity and corrosion of implant alloys 253
9.4 Surface phenomena in biotribocorrosion 257
9.5 Tribocorrosion at the articulating interface 262
## Contents

9.6 Fretting corrosion 267  
9.7 Conclusions 272  
9.8 References 272  

10 Wear phenomena of ceramic joints 278  

*S. AFFATATO, Istituto Ortopedico Rizzoli, Italy and  
P. TADDEI, Università di Bologna, Italy*

10.1 Introduction 278  
10.2 Developments in ceramic technology 280  
10.3 Wear of ceramic components 288  
10.4 References 293  

11 The influence of surgical techniques on implant wear 298  

*X. FLECHER, S. PARRATTE, J.-M. AUBANIAC and J.-N. ARGENSON, Institut du Mouvement et de l’Appareil Locomoteur, France*

11.1 Introduction 298  
11.2 Hip arthroplasty 299  
11.3 Knee arthroplasty 303  
11.4 Conclusion 305  
11.5 References 305  

12 Factors contributing to orthopaedic implant wear 310  

*L. C. JONES, Johns Hopkins University School of Medicine, USA, A. K. TSAO, Sun Valley Orthopedic Surgeons, USA and L. D. T. TOPOLESKI, University of Maryland, Baltimore County, USA*

12.1 Introduction 310  
12.2 Implant-specific factors – materials and design 318  
12.3 Surgical factors 327  
12.4 Patient factors 330  
12.5 Interactions between different factors 333  
12.6 Conclusion 334  
12.7 References 334  

13 Diagnosis and surveillance of orthopaedic implants 351  

*S. AFFATATO, D. BRANDO, Istituto Ortopedico Rizzoli, Italy and D. TIGANI, Santa Maria alle Scotte Hospital, Italy*

13.1 The importance of a correct diagnosis 351  
13.2 Predictive and detection methods 364  
13.3 Choice of prosthesis 366
