# Contents

**Session 1: Blowing Agents & Foaming Processes 2012**

| Paper 1 | Forty years formulated endothermics in the foamed plastics world  
Dieter Scholz, Germany |
|---|---|
| Paper 2 | Advancements in high performance blowing agents  
Jim M Bowman, Honeywell, USA |
| Paper 3 | Blowing agent blends – the new norm  
John Murphy & Roy Choudhury, Foam Supplies Inc, USA |
| Paper 4 | Performance update of FEA-1100 – a zero ODP and low GWP foam expansion agent  
Gary Loh, Joseph A Creazzo & Dr Mark L Robin, DuPont Company, USA |

**Session 2: Extrusion Direct Gassing Processes and Applications**

| Paper 5 | Design of experiments in physical foaming and its relation to practice: Sabic developments in foam polyolefins  
John Krist & Emanuel van der Ven, SABIC Europe BV, The Netherlands |
|---|---|
| Paper 6 | Twin/single tandem laboratory equipment for basic research in foam extrusion  
Matthias Reimker & Otto Deseke, KraussMaffei Berstorff GmbH, Germany |
| Paper 7 | Foam-extruded high temperature thermoplastics with different nucleating agents for printed circuit boards  
Clemens Keilholz, T Apeidorn, T Köppl & V Altstädt, University of Bayreuth, Germany |
| Paper 8 | XPS insulation board – new machinery developments  
Nick King, Sunwell Global Ltd, UK |
| Paper 9 | Extensional stress-induced foaming behaviours of polystyrene-talc composites  
Anson Wong & Prof Chul B Park, University of Toronto, Canada |

**Session 3: New Aspects, New Foams, Specialities**

| Paper 10 | Novel polymer foams for sustainable solutions  
Holger Ruckdäschel, Peter Gutmann, Christian Däschlein, Roland Hingmann & Klaus Hahn, BASF SE, Germany |
|---|---|
| Paper 11 | Rheological properties of cellulose acetate with respect to its foamability: influence of plasticizer and blowing agent  
Stefan Zapnik\(^1\), T Hildebrand\(^2\), S Kabasci\(^3\), H-J Radusch\(^2\), F van Lück\(^4\), T Wodke\(^1\)  
\(^1\)Fraunhofer UMSICHT, Germany, \(^2\)Martin Luther University Halle-Wittenberg, Germany, \(^3\)Institute of Plastics Processing (IKV), RWTH Aachen University, Germany, \(^4\)Inde Plastik Betriebsgesellschaft mbH, Germany |
| Paper 12 | Laser-induced expansion (LIF) of plastics (and expandable matrices) for the production of raised structures and tactile lettering  
Rüdiger Wissemborski, Chemische Fabrik Budenheim KG, Germany |
| Paper 13 | Innovative low density silicone RT-foams  
Dr Delphine Blanc, Bluestar Silicones, France |
Session 4: Injection Moulding New Findings and Efforts

Paper 14  Dry ice – physical foam injection moulding the easy way  
Daniel Sander & Prof Christian Hopmann, Institute for Plastics Processing (IKV), RWTH Aachen University, Germany  
paper unavailable at time of print

Paper 15  Overmoulding of plane structural foamed parts with a second thermoplastic component  
Johannes Müller, Andreas Spoerr & V Altstädt, Neue Materialien Bayreuth GmbH, Germany

Paper 16  Using mould filling tools for large part, multi-drop parts with the MuCell™ process  
Scott Powers & Levi Kishbaugh Trexel Inc, Wilmington, USA

Paper 17  Challenges and possibilities in foaming of semi-crystalline poly(butylene terephthalate)  
Thomas Köppl, B Fischer & V Altstädt, University of Bayreuth, Germany

Paper 18  Block copolymer-assisted microcellular supercritical CO2 foaming of polymers and blends  
Michel Dumon, José Antonio Reglero Ruiz & E. Cloutet, Université de Bordeaux, France, Javier Pinto Sanz & Miguel Angel Rodriguez Perez, Universidad de Valladolid, Spain, J-M. Tallon & M. Pedros, Universitaire de Technologie,Gradignan, France and P. Viot, Institut de Mécanique et d'Ingénierie de Bordeaux, France

Session 5: Biodegradables and Nanostructures

Paper 19  Effects of talc and compounding on morphology and mechanical properties of low-pressure-injection-moulded structural polylactide foams  
Aboutaleb Ameli, D Jahani, P U Jung & Prof Chul B Park, University of Toronto, Canada

Paper 20  Multifunctional nanocomposite foams based on polypropylene with carbon nanofillers  
Dr Marcelo Antunes, Gabriel Gedler, Miguel Mudarra & José Ignacio Velasco, Universitat Politècnica de Catalunya, Spain

Session 6: News from Research and Development Activities

Paper 21  Reinforced particle foams  
Florian Rapp, Dr Axel Kauffmann, F Henning & Dr Jan Diemert, Fraunhofer Institute for Chemical Technology ICT, Germany

Paper 22  Density graded polyethylene foams produced by compression moulding using a chemical blowing agent  
Jiaolian Yao & Denis Rodrigue, Université Laval, Canada

Paper 23  Improving XPS insulation boards and new insulation products  
Frank van Lück, AIXtrusion Consulting, Germany

Paper 24  Research progress in High melt strength polypropylene  
Dr Peng Guo, Prof Mingfu Lv & Prof Dr Shijun Zhang, Beijing Research Institute of Chemical Industry, SINOPEC, China
