CONTENTS

KEYNOTE ADDRESS

Transportation Systems and Sustainable Urban Form
Chai-kwong MAK ................................................................. 3

PLENARY SESSION 1

Freeway Congestion, Ramp Metering, and Tolls
Pravin VARAIYA ................................................................. 7

Modelling Dynamics of Activity-Travel Behavior
Theo A. ARENTZE and Harry TIMMERMANS ........................................ 17

Monte Carlo Traffic Simulation Models: Can We Use Them for Optimisation?
Mike MAHER ................................................................. 27

SESSION A1: TRAFFIC DYNAMICS

Discrepancy between Time-Based and Cost-Based System Optimizations with Heterogeneous Users
Xiaolei GUO and Hai YANG .................................................. 41

How Changing the Location of a Work Place Affects People's Travel
E. Owen WAYGOOD, Ryuichi KITAMURA and Shusaku NAKAI ................. 49

Unintended Consequences of Network Modification in Day-to-Day Traffic Dynamics
Jing BIE and Hong K. LO ...................................................... 57

SESSION A2: TRIP SCHEDULING

Preliminary Findings on Empirical Analysis of Work Trip Scheduling in Hong Kong
L.M. Jennifer LI, S.C. WONG, Becky P.Y. LOO and Timothy D. HAU .................. 69

Trip Scheduling under Travel Time Uncertainty
Barbara W.Y. SIU and Hong K. LO .................................................. 79

Estimation of Pedestrian Time-Dependent Trip Matrix: An Activity-Based Approach
L.Q. OUYANG and William H.K. LAM ........................................ 89
SESSION A3: OUTSTANDING STUDENT PAPER AWARD

Analysing UE and SO over Networks with Multiple User Classes
Anna CLARK .......................................................... 101

A Model System to Determine Traffic-Induced Air Pollution in Highly Compact Urban Forms
U.W. TANG .................................................................. 111

A Shock-Fitting Algorithm for the Lighthill-Whitham-Richards Traffic Flow Model on Inhomogeneous Highways
Wenjun SUN .................................................................. 121

SESSION A4: TRAFFIC FLOW MODELING

Spatiotemporal Mixed Traffic Patterns with Revised Cellular Automation Simulation
Lawrence W. LAN, Yu-Chiun CHIOU, Chih-Cheng HSU and Zih-Shin LIN ............... 133

Real Time Multiclass Traffic Flow Modelling – English M25 Freeway Case Study
Dong NGODUY .................................................................. 143

Stochastic Cell Transmission Model: Traffic State Estimation and Control under Uncertainties
Renxin ZHONG and Agachai SUMALEE .............................................................. 153

SESSION A5: TRANSPORTATION ALGORITHMS

Acceleration of Traffic Assignment with Practical Network Representations by Shortest-Path Tree Memorization
Kazutaka TAKAO and Yasuo ASAKURA ............................................................. 165

On the Estimability of Mixed Logit Models
Shusaku NAKAI and Ryuichi KITAMURA ......................................................... 175

Genetic-Ant Clustering Algorithms
Yu-Chiun CHIOU, Lawrence W. LAN and Pei-Shan TSAI ........................................ 185

SESSION B1: TOLLING AND CAPACITY MANAGEMENT

Second Best Toll and Capacity Optimisation in Networks
Andrew KOH, Simon SHEPHERD and Agachai SUMALEE ........................................ 197

Strategic Organization and Toll Road Competition
W.D. WALLS and L. YUAN ................................................................. 207
Second-Order Capacity Reliability Evaluation for Transportation Network under Uncertain Travel Demand
Paramet LUATHEP, Agachai SUMALEE, William H.K. LAM and Richard D. CONNORS .......................................................... 213

Optimizing Capacity Reliability and Travel Time Reliability in the Network Design Problem
Anthony CHEN, Zhong ZHOU, Piya CHOOTINAN and Sze Chun WONG ...................... 223

SESSION B2: ACTIVITY MODELING I

A Model of Household Time Allocation Behavior with Endogenously Determined Balance of Power
Junyi ZHANG, Harry TIMMERMANS, Akimasa FUJIWARA and Masaru OOSEO .... 235

Valuation of Leisure Time on Non-Work Days Estimated with the Discrete-Continuous Analysis: Empirical Case Study of Tokyo
Hironori KATO ........................................................................................................ 245

Automobility Cohort, Lifecycle Stage and Travel: Probing into Structural Change in Urban Travel
Yilin SUN and Ryuichi KITAMURA ................................................................. 255

Activity-Travel-Based Lifecycle Classification
Hongzhi LIN and Hing-Po LO ........................................................................ 265

SESSION B3: ROUTING AND DESPATCHING

Waiting Strategies for the Dynamic Dial-a-Ride Problem
C.W. YUEN, K.I. WONG and Anthony F. HAN ....................................................... 277

Nonlinear Pricing of Taxi Services
Angela C.S. FUNG, Hai YANG and K.I. WONG .................................................. 279

Vehicle Routing in Milk-Run Operations: A Column Generation Based Approach
Theeratham MEETHET and Manoj LOHATEPANONT ........................................ 289

Heterogeneous Truck Routing Policies: Case Study of a Malaysian Trucking Company
Mei Khing ONG and Ada Suk-Fung NG .......................................................... 297

SESSION B4: PEDESTRIAN TRAFFIC

The Follow-the-Crowd Effect in a Pedestrian Flow Model
Yinhua XIA, Ling HUANG, S.C. WONG, Mengping ZHANG, Chi-Wang SHU and William H.K. LAM ......................................................... 309
Development and Analyzing of Pedestrian Behavior Model in the Transfer Stairs using the CA Model
Seungjae LEE, Seungjun LEE and Sukmo KU ................................................................. 319

Bi-Directional Flow Effects on Pedestrian Indoor and Outdoor Walkways in Hong Kong
Jodie Y.S. LEE and William H.K. LAM ................................................................. 321

Passenger Flow Control in Congested Transit Networks
Jan-Dirk SCHMÖCKER, Hiroshi SHIMAMOTO, Fumitaka KURAUCHI and
Michael G.H. BELL ........................................................................................................... 331

SESSION B5: FREIGHT LOGISTICS

A Typology of Logistics Strategies and Structures for Analyzing their Impacts on Commercial Freight Traffic
Uwe CLAUSEN and Larissa NEUMANN ................................................................. 343

New Planning Approaches for Groupage Freight Increase Efficiency and Flexibility of Transport Networks
Lothar SCHULZE and Marcus GERASCH .............................................................. 353

Development of Freight Mode Choice Model using SP Data
Seungjin SHIN, Dongjoo PARK, Euiyoung SHON, Changho CHOI and Hansoo KIM .... 363

Operational Decision for a Supply Chain in a Decentralized Assembly System
Zhaoqiong QIN .................................................................................................................. 373

PLENARY SESSION 2

The Importance of Stochastics in Logistics Modelling
Michal KAUT, Arnt-Gunnar LIUM, Theodor Gabriel CRAINIC and
Stein W. WALLACE ......................................................................................................... 385

Container Terminal Operation and Operations Research – Recent Challenges
Stefan VOß .......................................................................................................................... 387

Next Generation Real-Time Traffic Adaptive Management Systems
Pitu MIRCHANDANI .......................................................................................................... 397

SESSION C1: TRAFFIC MODELING

Empirical Analysis of Drivers' Car-Following Heterogeneity based on Video Image Data
Dahee HONG, Nobuhiro UNO, Fumitaka KURAUCHI and Mitsunori IMADA .......... 401

A Method of Estimating Desired Speed Distribution on Divided 2-lane Expressway
Yasuhiro SHIOMI, Toshio YOSHII and Ryuichi KITAMURA ....................................... 411
Assessment of Rainfall Impacts on Vehicular Travel Speeds
Mei Lam TAM, Biyu CHEN and William H.K. LAM

SESSION C2: ACTIVITY MODELING II

How Internet Use Affects Activity-Travel Patterns? A Study on Gender Differences Using Multiple-Group Analysis
Fang REN and Mei-Po KWAN

On Temporal Variability of Leisure Activities Between One-Worker and Two-Worker Households
Ari TARIGAN and Ryuichi KITAMURA

Modelling Two-level Multiple Discrete-Continuous Activity-Travel Choices
Jiukun LI and Donggen WANG

SESSION C3: MARITIME TRANSPORTATION

The Evolution of UK Maritime Trans-shipment
Michael ASTERIS

Dealing with Ballast Water in Naval Transport: Methods and Costs Analysis
Paul Arsenie, Eugen BĂRȘAN, Felicia SURUGIU, Nicoleta ACOMI and Radu HANZU-PAZARA

Capacity Allocation to Decentralized Sales Agents in Sea Cargo Shipping Industry
Ozgun CALISKAN DEMIRAG and Julie L. SWANN

SESSION C4: TRANSPORT POLICY AND SOCIETY

Urban Development with Sustainable Rail Transit Services
Z.W. WANG and Hong K. LO

Social Exclusion and Rapid Transit in Bangkok
Craig TOWNSEND

Travel Behaviour, Urban Form and Transport Policies: A Comparative Study of Hong Kong and Taipei
Becky P.Y. LOO and Alice S.Y. CHOW

SESSION C5: TRANSPORTATION AND INFORMATION TECHNOLOGY

Using Automatic Vehicle Identification Data to Assess the Rainfall Impacts on Vehicular Travel Choice Behaviors
K.S. CHAN and William H.K. LAM
Research to Stimulate Telematic Applications in the Transport System
Reinhard PFLIEGL ............................................................................................................. 511

Microsimulating Space Development in Baltimore
J.D. HUNT, J.E. ABRAHAM, D. DE SILVA, M. ZHONG, J. BRIDGES and
J. MYSKO .................................................................................................................. 513

SESSION D1: TRANSPORTATION NETWORK MODELING

Agent-based Route Choice Model with Learning and Exchange of Information
Shanjiang ZHU, David LEVINSON and Lei ZHANG ....................................................... 525

The Reliability of a Simulation-Based Dynamic Trip Assignment Model
C.O. TONG ..................................................................................................................... 535

Network Equilibrium under Cumulative Prospect Theory
Richard D. CONNORS and Agachai SUMALEE .......................................................... 545

SESSION D2: TRANSPORTATION DATA ISSUES

Commercial Vehicle Movement Tour Generation in Edmonton
J.D. HUNT, A.T. BROWNLEE, L.P. DOBLANKO and C. HARDIN .................................. 557

Paper-and-Pencil versus Personal Digital Assistant Enabled Surveys: A Comparison
B. KOCHAN, T. BELLEMANS, D. JANSSENS, G. WETS and
H.J.P. TIMMERMANS ................................................................................................... 565

Drivers’ Privacy Concerns on Automatic Vehicle Detection System for Traffic Data Collection in Hong Kong
C.K. WONG .................................................................................................................... 575

SESSION D3: FREIGHT TRANSPORTATION AND LOCATION

Influential Attributes in Freight Mode Choice Decisions: Focusing on Container, Cement and Steel Manufacturers
Doekkwang KIM, Euiyoung SHON, Dongjoo PARK, Changho CHOI and Songju KIM... 585

Research on the Location Model of Automotive Parts Logistics Center Based on DEA
Ai-na WANG and Xiao-dong ZHANG .............................................................................. 593

The Development of Thailand Railway Freight Transportation: A Key Element to Become the Great Mekong Subregion (GMS) Freight Distribution Center
Pongtana VANICHKOBCHINDA ..................................................................................... 601
SESSION D4: TRAFFIC FLOW AND SAFETY

Queue Management for Arterials with Closely Spaced Intersections
Wei-Hua LIN and Hong K. LO ................................................................. 611

Traffic Crashes at Signalized Intersections
S.C. WONG, N.N. SZE and Y.C. LI ........................................................ 621

Improved ITS Sensors for Reducing Dilemma Zone Incursions at Isolated High Speed Intersections
Anuj SHARMA, Darcy BULLOCK and Matthew HARDING ..................... 623

SESSION D5: COMPETITION IN PUBLIC TRANSIT

West Rail and the Modal Hierarchy in Hong Kong: Some Preliminary Findings
Becky P.Y. LOO and Eric T.H. CHAN .................................................. 633

Modeling the Effects of the Number of Operators in a Deregulated Transit Market
Zhi-Chun LI, William H.K. LAM and S.C. WONG .................................. 641

Competition among Public Transit Operators
Eddie Y.S. CHAN and Janny M.Y. LEUNG ............................................ 651

SESSION E2: PUBLIC TRANSIT AND LAND USE DEVELOPMENT

Railway-based Transit-oriented Development in Hong Kong: Factors Affecting its Success
Becky P.Y. LOO and Winnie W.Y. LAM ................................................. 655

Taxonomy of Public Private Partnership on Mass Railway Transit Development – A Benchmark with Hong Kong Experience
Siman TANG and Hong K. LO ............................................................... 665

Acceptability of Introducing Citywide Parking Taxes to Revitalize Downtown of a Local City in Japan
Shoji MATSUMOTO and Shu HIGUCHI ................................................... 675

SESSION E3: IT AND SUPPLY CHAIN MANAGEMENT

Hajnalka VAAGEN and Stein W. WALLACE ......................................... 687

Risk Management in the Supply of Oil to Nepal
Biju Kr. THAPALIA and Stein W. WALLACE ........................................ 697
Research on Grain Emergency Transportation Dispatch  
Hao LUO and Xiaodong ZHANG ................................................................. 707

SESSION E4: TRAFFIC ESTIMATION

Effective Discharge Width for Exclusive Motorbike Lane  
Chiung-Wen CHANG and Pin-Yi TSENG .................................................. 711

Estimation of Dynamic Passenger Car Unit (PCU) Values for Effective Roadway Operation  
V. THAMIZH ARASAN and K. KRISHNAMURTHY ....................................... 721

Use of Electricity Consumption as a Surrogate Variable for Socio-Economic Attributes in Trip Distribution Modelling  
Tissa U. LIYANAGE and Amal S. KUMARAGE ........................................ 731

SESSION E5: URBAN TRANSPORTATION AND ENVIRONMENT

Analysis of Roadside Air Quality Trends on Hong Kong Island  
Jason LAU, W.T. HUNG and C.S. CHEUNG ............................................. 743

Paving Fabric Systems and their Performances to Reduce Reflective Cracking  
Farshad AMINI .......................................................................................... 751

Where in Mega-cities could the Intermodal Transport Mode be well Encouraged  
Chao-Fu YEH ......................................................................................... 753
