## Contents

1. **Introduction** 1

2. **Radar Basics** 7

3. **Radar Search and Overview of Detection in Interference** 87

4. **Propagation Effects and Mechanisms** 117

5. **Applications** 161

6. **Software and Hardware** 181

7. **Appendices** 195

8. **References** 203

9. **Index** 215

### Part II: External Factors

- **3.1 Introduction** 87
- **3.2 Search Mode Fundamentals** 89
- **3.3 Overview of Detection Fundamentals** 95
- **3.4 Further Reading** 111
- **3.5 References** 111
- **3.6 Problems** 112

- **4.1 Introduction** 117
- **4.2 Propagation Factor** 118
- **4.3 Propagation Paths and Regions** 119
- **4.4 Atmospheric Attenuation and Absorption** 121
- **4.5 Atmospheric Refraction** 130
- **4.6 Turbulence** 137
- **4.7 Exploiting the Ionosphere** 138
- **4.8 Diffraction** 140
- **4.9 Multipath** 142
- **4.10 Skin Depth and Penetration: Transmitting Through Walls** 156
- **4.11 Commercial Simulations** 158
- **4.12 Summary and Further Reading** 160
- **4.13 References** 161
- **4.14 Problems** 163
5 Characteristics of Clutter 165
  5.1 Introduction and Definitions 165
  5.2 General Characteristics of Clutter 172
  5.3 Clutter Modeling 202
  5.4 Concluding Remarks 206
  5.5 Further Reading 207
  5.6 References 207
  5.7 Problems 210

6 Target Reflectivity 211
  6.1 Introduction 211
  6.2 Basic Reflection Physics 212
  6.3 Radar Cross Section Definition 219
  6.4 Three Scattering Regimes 224
  6.5 High-Frequency Scattering 227
  6.6 Examples 236
  6.7 Further Reading 244
  6.8 References 244
  6.9 Problems 245

7 Target Fluctuation Models 247
  7.1 Introduction 247
  7.2 Radar Cross Section of Simple Targets 248
  7.3 Radar Cross Section of Complex Targets 251
  7.4 Statistical Characteristics of the RCS of Complex Targets 253
  7.5 Target Fluctuation Models 263
  7.6 Doppler Spectrum of Fluctuating Targets 267
  7.7 Further Reading 269
  7.8 References 269
  7.9 Problems 270

8 Doppler Phenomenology and Data Acquisition 273
  8.1 Introduction 273
  8.2 Doppler Shift 274
  8.3 The Fourier Transform 276
  8.4 Spectrum of a Pulsed Radar Signal 277
  8.5 Why Multiple Pulses? 286
Contents

8.6 Pulsed Radar Data Acquisition 287
8.7 Doppler Signal Model 291
8.8 Range-Doppler Spectrum for a Stationary Radar 293
8.9 Range-Doppler Spectrum for a Moving Radar 296
8.10 Further Reading 303
8.11 References 303
8.12 Problems 303

PART III Subsystems

9 Radar Antennas 309
9.1 Introduction 309
9.2 Basic Antenna Concepts 310
9.3 Aperture Tapers 314
9.4 Effect of the Antenna on Radar Performance 317
9.5 Monopulse 320
9.6 Reflector Antennas 322
9.7 Phased Array Antennas 326
9.8 Array Architectures 339
9.9 Further Reading 343
9.10 References 343
9.11 Problems 345

10 Radar Transmitters 347
10.1 Introduction 347
10.2 Transmitter Configurations 351
10.3 Power Sources and Amplifiers 356
10.4 Modulators 371
10.5 Power Supplies 373
10.6 Transmitter Impacts on the Electromagnetic Environment 375
10.7 Operational Considerations 381
10.8 Summary and Future Trends 384
10.9 Further Reading 385
10.10 References 385
10.11 Problems 388

11 Radar Receivers 391
11.1 Introduction 391
11.2 Summary of Receiver Types 392
20.4 Straddle Loss 786
20.5 Pulse Compression Waveforms 787
20.6 Pulse Compression Gain 788
20.7 Linear Frequency Modulated Waveforms 789
20.8 Matched Filter Implementations 794
20.9 Sidelobe Reduction in an LFM Waveform 797
20.10 Ambiguity Functions 800
20.11 LFM Summary 808
20.12 Phase-Coded Waveforms 808
20.13 Biphase Codes 817
20.14 Polyphase Codes 824
20.15 Phase-Code Summary 829
20.16 Further Reading 830
20.17 References 830
20.18 Problems 833

21 An Overview of Radar Imaging 835
21.1 Introduction 835
21.2 General Imaging Considerations 837
21.3 Resolution Relationships and Sampling Requirements 843
21.4 Data Collection 852
21.5 Image Formation 856
21.6 Image Phenomenology 875
21.7 Summary 888
21.8 Further Reading 888
21.9 References 889
21.10 Problems 890

Appendix A: Maxwell’s Equations and Decibel Notation 893
A.1 Maxwell’s Equations 893
A.2 The Ubiquitous dB 895
A.3 Reference 897

Appendix B: Answers to Selected Problems 899
Index 905
