Contents

Preface: Applied mathematical programming and modelling 2008 1
G.C. Pflug and R. Hochreiter

Approximation and contamination bounds for probabilistic programs 3
M. Branda and J. Dupačová

A framework for optimization under ambiguity 21
D. Wozabal

Multivariate value at risk and related topics 49
A. Prékopa

Hypergraphs as a mean of discovering the dependence structure of a discrete multivariate probability distribution 71
T. Szántai and E. Kovács

A stochastic model for the daily coordination of pumped storage hydro plants and wind power plants 91
M.T. Vespucci, F. Maggioni, M.I. Bertocchi, and M. Innorta

A stochastic programming model for the optimal electricity market bid problem with bilateral contracts for thermal and combined cycle units 107
F.-J. Heredia, M.J. Rider, and C. Corchero

Heuristic optimisation in financial modelling 129
M. Gilli and E. Schumann

A stochastic programming model for the optimal issuance of government bonds 159
A. Consiglio and A. Staino

HMM based scenario generation for an investment optimisation problem 173
C. Erlwein, G. Mitra, and D. Roman

Multi-resource allocation in stochastic project scheduling 193
W. Wiesemann, D. Kuhn, and B. Rustem

Stochastic optimization for real time service capacity allocation under random service demand 221
C. Dance and A.A. Gaivoronski
The kidney exchange problem: How hard is it to find a donor?
K. Ceclárová and V. Lacko

Complete voting systems with two classes of voters: weightedness and counting
J. Freixas, X. Molinero, and S. Roura
