Preface xiii

1. Food Chemistry: An Introduction 1

What Is Food Chemistry? 1
Basic Review 8
Atoms and Molecules 10
  Carbon 15
  Hydrogen 16
  Oxygen 16
  Nitrogen 17
  Phosphorous 18
  Halogens 18
  Transition Metals 18
Review of Thermodynamics 19
  The First Law of Thermodynamics 20
    Heat Capacity 22
    Heat Evolved during Physical Changes 24
  Thermochemistry: Enthalpies of
    Formation 25
    Hess’s Law 26
    Calorimetry 27
  Entropy and the Second Law of
    Thermodynamics 31
    Free Energy 32
    Mixtures and Solutions 36
    Chemical Equilibrium 41
    Phases and Phase Changes 43
    Colligative Properties 46
      Freezing Point Depression 48
      Osmosis and Osmotic Pressure 53

Suggested Reading 57

2. Water in Foods 59

Physical Properties of Water 59
Molecular Structure and Hydrogen Bonding 65
- Hydrogen Bonds 67
- Types of Hydrogen Bonds in Biological and Food Molecules 70
- Hydrogen Bonds in Water: Ice and Liquid Water 72

Aqueous Solutions 78
- Solutions with Multiple Solutes: The Hofmeister Series 87
- Solutions of Gases in Liquids: Carbonated Beverages 91

Water Activity and Mobility 95
- Food Glasses 100
- Freezing and Freeze-Drying 106
- Ice Nucleation and Growth 107

Suggested Reading 112

3. Dispersed Systems: Food Colloids 113

Colloids and Types of Dispersions 113
- Gels 117
- Emulsions 118

The Importance of Surface Area 120

The Thermodynamics of Surfaces 122
- The “Mentos Eruption” 124
- Curved Surfaces, the Kelvin Equation, and Ostwald Ripening 126
- Antifreeze Proteins and Ice Nucleating Proteins 127

Adsorption at Liquid Surfaces 129

Adsorption at Solid Surfaces 131

Hysteresis in Moisture Sorption Isotherms 135

Producing Emulsions 137
- HLB Numbers 139

Emulsion Stability 142
- Solvation Forces 142
- DLVO Theory 144
- Steric Stabilization 147
- Effects of Dissolved Polymers on Emulsion Stability 149
- Sedimentation and Creaming 149

Foams 152

Suggested Reading 154

4. Carbohydrates 155

Carbohydrates in Foods 155

Carbohydrate Structures 157
- The D-Aldoses 160
- The D-Ketoses 164
- Systematic Nomenclature 164
- Carbohydrate Rings 165
- The Relationship between D- and L-Sugars 173
- Tautomerization 173

Sugar Derivatives 177
- Alditols 177
- Aldonic and Uronic Acids 178
- Aldaric Acids 179
- Sugar Amides 179
- Deoxy Sugars 180
- Inositos 180

Reactions of Carbohydrates 181

Acid-Catalyzed Reactions 181
- Mutarotation 181
- Glycosidic Condensation: The Formation of Glycosides 182
- Glycyrrhizin and Stevioside 184
- Cyanogenic Glycosides 186
- S-Glycosides: Mustard, Horseradish, and Wasabi 188
- Common Food Disaccharides 189
- Sucrose 190
- Food Oligosaccharides 193
- Internal Glycosidic Condensation: Levoglucosan 194
- Acid Hydrolysis 196
- Enzymatic Hydrolysis 197
- Production of Corn Syrups and High-Fructose Corn Syrups 200
- HFCs as Sweeteners 201

Reactions under Basic Conditions 203
- Enolization 203
- Dehydration and Thermal Degradation 203

Non-Oxidative Browning 205
- Caramelization 207
- Maillard Reaction 209
- The Strecker Reaction 217
- Acrylamide 218
Functional Properties 218
  Sweetness 218
  Water Binding and Solubility 223
Polysaccharides 225
  Homopolymers 227
    Starch 227
    Cyclodextrins 238
    Chemically Modified Starches 241
  Cellulose 242
  Chitin and Chitosan 250
Heteropolymers 251
  Hemicellulose 251
Seaweed Polysaccharides 252
  Alginites 252
  Carrageenans 254
  Agar, Agarose, and Agaropectin 257
Bacterial Polysaccharides 259
  Xanthan 259
  Pullulan 261
  Gellan 261
Plant Polysaccharides 262
  Pectins 262
  Seed Gums 266
  The galactomannans 266
  TAMARIND SEED GUM 268
  Glucomannans 269
  Exudate Gums 270
Suggested Reading 276

5. Proteins 277
Proteins in Foods 277
Polypeptide Chains 278
Amino Acids 282
  Amino Acid Configurations and Taste; MSG 283
  Aspartame 284
  Tryptophan and Serotonin 285
Protein Conformations 286
  Ramachandran Maps 290
  Secondary Structures 291
    Alpha Helices 292
    Beta Sheets 294
  Reverse Turns 295
  Prolines 296
  Collagen 297
    Gelatin 300
  Disulfide Bonds 302
  Gluten 302
Folding of Globular Proteins 306
  The Chain Configurational Entropy
  Contribution to the Free Energy of Folding 309
Tertiary Structure of Globular Proteins 312
Milk Proteins 313
  Whey Proteins 313
    B–Lactoglobulin—An Example of a Typical Globular Food Protein 314
  Other Whey Proteins 316
  Caseins: Random Coil-Like Chains 317
Sweet-Tasting Proteins 323
Botulinum Toxin 327
Legume Proteins 329
  Soy Proteins 329
  Peanut Allergies 335
Zein Proteins 336
Egg White Proteins: Albumen 337
Egg Yolk Proteins: Lipoproteins 345
Meat Proteins 345
Mad Cow Disease 350
Reactions of Proteins 356
  Acid Hydrolysis 356
  Racemization and Cross Linking 357
  Reactions with Nitrites and the Formation of N-Nitrosamines 357
  Methionine Oxidation 360
  The Kjeldahl Method 361
  Maillard Reactions 363
  Reactions with Aldehydes 363
  Ionizing Radiation 364
  Acylation 364
  Homocysteine 364
  Aspartame Degradation 367
  Heterocyclic Amine Formation 368
GMO Foods: “Frankenfoods” 370
Suggested Reading 374
6. Enzymes in Foods 375

- Enzymes in Foods 375
- Enzyme Kinetics 378
- Enzyme Thermodynamics: The Production of High-Fructose Corn Syrups 380

Proteases 383
- Endopeptidases 383
- Exopeptidases 391

Glycosidases and Other Enzymes with Carbohydrate Substrates 392
- Amylases 392
- Pectic Enzymes 392
- Lactases 395

Lipases 395
- Foaming in Beer 397

Enzymatic Browning: Polyphenol Oxidases 397

Suggested Reading 400

7. Lipids 401

- Fats in Foods 401
- Fatty Acids 402
- Omega-3 Fatty Acids 407
- Conjugated Linoleic Acid (CLA) 408
- Glycerol and Triacylglycerols (Triglycerides) 409
- Diglycerides and Monoglycerides 410
- Stereospecific Numbering 411
- Phospholipids 412
- Waxes 414
- Cholesterol and Phytosterols 415
- Reduced-Calorie Synthetic Fat Substitutes 420
- Synthetic Fat Replacers 421

Fat Compositions 421
- Animal Fats 422
- Dairy Fats 424
- Oils from Plants 426

Reactions of Lipids 432
- Fractionation 432
- Interesterification 432
- Saponification 433
- Hydrogenation of Vegetable Oils 433
- Bromination and Brominated Vegetable Oil (BVO) 435

Lipid Oxidation 436
- Autoxidation 436
- Photosensitizer-Induced Singlet Oxygen Oxidation 442
- Enzymatic Lipid Oxidation 443
- Tests for Lipid Oxidation 444
- The Control of Lipid Oxidation 445

Frying 446
- Smoke Points 447

Fat Crystallization 447
- Crystal Phases 448
- Chocolate 450

Three-Component Phase Diagrams 453

Suggested Reading 455

8. Flavors 457

Taste and Odor Perception 457

Sweeteners 462
- Nutritive Sweeteners 463
- Nonnutritive Sweeteners 463
  - Saccharin 463
  - Cyclamate 465
  - Aspartame 466
  - Neotame 467
  - Alitame 467
- The Safety of Peptide Sweeteners 467
- Acesulfame K 468
- Sucralose 468
- Choice of Sweeteners 470

Nonsweet (Savory) Flavors and Odors 470

- Volatile Sulfides and Mercaptans: Onions and Garlic 470
- Furfuryl Mercaptan 473
- Aldehydes, Esters, and Ketones 473
- Diacetyl 475

Essential Oils 476
- Carvone: Spearmint and Caraway 477
- Vanillin 477
- Citrus Oils 478
- Cinnamon, Cloves, Nutmeg, and Bay 480
- Thyme and Thymol 481
- Menthol 482
- Phellandrene 483
Contents

9. Food Colors 507

The Importance of Food Colors 507
Visible Light and Color 508
Natural Colors in Foods 512
Tetrapyrrole Pigments 512
Heme Compounds and Meat 512
Chlorophyll 516
Carotenoids 520
Provitamin A Activity of Carotenoids 527
Flavonoids 529
Anthocyanins 530
Polyphenolic Flavonoid Antioxidants 535
Flavanols 536
Flavanones, Flavones, Flavonols, and Isoflavonols 538
Resveratrol 541
Tannins 543
Polyphenolic Chemistry in Wines 547
Betalains 551
Cochineal 552
Colorants 553
Titanium Dioxide 553
Synthetic Colors 554
Azo Dyes 555
Triphenylmethane Dyes 557
Indigotine 557
Xanthines 559
Commercial Use of Synthetic Colors 560
Suggested Reading 560

10. Food Additives 561

Food Additives and the Law 561
Acids 564
Chelating Agents 566
Antioxidants 567
Antimicrobial Agents 567
Epoxides 568
Antibiotics 569
Anticaking Agents 570
Confectioner's Glaze 571
Polydextrose 571
Suggested Reading 572

11. Food Toxicology 573

Toxicity and Dose 573
Chinese Restaurant Syndrome 579
Toxins in Foods 580
Industrial Pollutants 581
Dioxins and PCBs 581
Mercury 583
Arsenic in Drinking Water 585
Toxins from Packaging and Containers 585
Pesticides 586
Organochlorine Compounds 587
Organophosphates 588
Pyrethroids 589
Naturally Occurring Toxins 590
Toxins in Fish and Shellfish 591
Scombroid Fish Poisoning 591
