3.4 Failure modes and safety considerations
3.5 Design aspects
  3.5.1 Material choice
  3.5.2 Required tensile strength
  3.5.3 Stability in waves
  3.5.4 Stability when subject to longitudinal current flows
  3.5.5 Stability when subject to overtopping currents
  3.5.6 Stability of geotextile bags placed in mounds
3.6 Construction aspects
3.7 Calculation example

4 Geotextile mattresses
  4.1 Application areas and general experimental data
  4.2 Installation procedure
  4.3 Geometric design
  4.4 Potential failure mechanisms and safety considerations
  4.5 Design aspects
    4.5.1 Material choice
    4.5.2 Required tensile strength
    4.5.3 Stability in waves
    4.5.4 Stability in longitudinal currents
    4.5.5 Geotechnical stability
  4.6 Construction aspects
  4.7 Calculation example

5 Geotextile tubes
  5.1 Applications and general experimental data
  5.2 Installation procedure
    5.2.1 General
    5.2.2 Pump speed and pump capacity
    5.2.3 Fill material
  5.3 Geometric design
  5.4 Failure mechanisms and safety considerations
  5.5 Design aspects
    5.5.1 Material choice and fabrication
    5.5.2 Required tensile strength
    5.5.3 Stability
  5.6 Construction aspects
  5.7 Calculation example

6 Geotextile containers
  6.1 Application areas and general experimental data
6.2 Installation procedure 71
  6.2.1 General 71
  6.2.2 Fill methodology 72
  6.2.3 Fill material 72
  6.2.4 Degree of filling 73
6.3 Geometric design 74
6.4 Failure mechanisms and safety considerations 77
6.5 Design aspects 78
  6.5.1 Material choice 78
  6.5.2 Loading on geotextile while opening the split barge 78
  6.5.3 Loading on geotextile upon impact on the bottom 79
  6.5.4 Required tensile strength 85
  6.5.5 Stability in waves 86
  6.5.6 Stability in currents over the structure 87
  6.5.7 Stacking stability 88
  6.5.8 Influence of wave-induced liquefaction 91
  6.5.9 Placement accuracy 92
6.6 Construction aspects 94
6.7 Calculation example 95

Appendix A: Permeability of geotextiles 101
Appendix B: CE marking 107
Appendix C: Design charts for the geotechnical stability of geotextile mattresses and geotextile bags on slope revetments 113
Appendix D: Dimensions and shape of geotextile tubes 115
Appendix E: Shape and forces in geotextile tubes (Timoshenko method) 119
Appendix F: Tensile load in geotextile container during the opening of the split barge 125
Appendix G: Fall velocity of the geotextile container 131
Appendix H: Placement accuracy for geotextile containers 135
