Advances in Design Technology

PART 1

Selected, peer reviewed papers from the 2nd International Conference on Advanced Design and Manufacturing Engineering (ADME 2012), August 16-18, 2012, Taiyuan, China

Edited by
Quan Yang, Xiaozhong Du, Xingzhong Zhang, Xiaochen Wang and Fei He
## Table of Contents

Preface v  
Organization Committee vi  

### PART 1

#### Chapter 1: Machine Design and Analysis

- **Research on Modeling and Simulation of Electric Power Steering System for Electric Power Bus**  
  R.W. Shen and X.H. Tai ............................................................. 3

- **Kinematic Characteristics and Optimization Analysis of Oval Geared Hoeken Mechanism**  

- **Modeling and Analysis of Joint Motion of the Rope and Trolley in Crane System**  

- **Design and Performance Analysis of Yielding Anchor Bolt with Large Deformation**  
  Z.M. Jiang, C.J. Wang and T. He .................................................. 21

- **Design of a Hybrid Magnetic Bearing Based on Equivalent Magnetic Circuit Method**  
  Y. Liu ..................................................................................... 27

- **Study on the 4-PTT Variable Topology Parallel Chinese Massage Manipulator**  
  S.H. Sun ............................................................................... 33

- **Study on Oblique Cam Type Mechanical Torsional Vibrator**  
  F.Q. Han, Z.Z. Li and D.Y. Zhang ................................................ 37

- **The Improved Research of the Defrosting of an Automobile Windshield**  
  T.M. Huang, W.K. An, J.Y. Tan and Y. Zhou .................................. 42

- **Study on Magnetic Suspension-Type Needle Driving Model for a New Knitting Device**  
  X.G. Wu, L. Zhu, S. Li, Y.Q. Wu, C. Zhang, C.J. Zhang and J. Fu ............................................................... 46

- **Optimizing Design System of Four Linkage Mechanism in Hydraulic Support Based on VC++**  
  W.A. Gao and J.L. Wang ............................................................ 50

- **Optimum Design for Improvement of Roller Bearing Load Distribution in a Medium Scale Mill**  
  M. Li and L.N. Sun .................................................................. 54

- **Design Optimization of the Flexspline in Harmonic Drive**  
  J. Dai, L.Z. Chen and X.B. Pang ................................................ 59

- **Design of Three-Dimensional Parallel Vibration Casting Machine**  
  C.J. Wang, T. He, X. Yang and J.S. Chen ..................................... 64

- **Structure Analysis to the Rotary Wheel of a Tire Testing Machine**  
  F. Tian, G.M. Liu and K. Tao ...................................................... 70

- **The Research for the Piezoelectricity Rain-Removing System of Rearview Mirror**  

- **Finite Element Analysis and Optimizing Design of the Bus Body**  
  S.Y. Zhi and H.J. Liu ............................................................... 78

- **Assembly Planning Method Based on Design Structure Matrix**  
  G.B. Zhang, D.Y. Li, L. Peng and J.H. Lou .................................. 82
Optimal Design of the Rubber Chain Attached Board Used in Steel Wire Knitting Machine
Based on ANSYS Workbench
Q.L. Zeng, Z.C. Wu, J. Lu and B. Zhang

Reliability Analysis of Over-Center Locking of Mechanism
Q. Qin, Y.W. Feng and Y.S. Feng

Application of Orthogonal Experiments in Simulation and Optimization of Jaw Crusher on
Traveling Characteristic Value of Moving Jaw
L.Z. Zhang, X.Q. Shen, S.Q. Cao and C. Lv

Optimization Design and Simulation of Negative-Pressure Removing-Chip Mechanism of
Deep Hole
B. Wang, L.Q. Zhao and Q.Y. Ma

The Design of Slope Mower
J.M. Yi, D.Q. Gao, H. Lin and Z.G. Chang

Optimization Design of Rolling Bearing Based on Reliability Assessment
J.H. Zheng, Y.C. Liu and M. Li

Structural Design of Banana-Stem Shattering and Returning Machine
Y. Huang, Q.G. Mo, C.K. Wei and R.Z. Li

Low Cost CPM Machine for Knee Joint
S.S. Metan, P. Krishna and G.C. Mohankumar

Optimization Design of Trusses Based on Covariance Matrix Adaptation Evolution
Strategy Algorithm
G.S. Su, Y. Zhang, Z.X. Wu and L.B. Yan

A General Method for Synthesizing Straight-Line Linkage with Ball and
Burmester Points
L.R. Yin, J.Y. Han, J. Huang and T. Yang

Study on Field Seedling Raising Vacuum-Vibration Tray Precision Seeder’s Horizontal
Adjustment Mechanism
Z.Q. Gong, J. Chen, Y.M. Li, C.J. Wang and C. Hang

Comparison Research on Two Luffing Mechanisms of Lemniscate Type Crane
K.Q. Li and C.X. Jiang

Design and Realization of the Optimization System for ZLZ/ZLY Reducer
R.M. Qin and S.Y. Li

Instance Analysis on Designing Method of the Transmission
Multi-Cones Synchronizer
X.C. Huang, Y. Zhang and H.B. Zhang

Simulation Analysis of the Working Process of the Corn Seed Metering Device with
Combination Inner-Cell
Q.L. Li, J.Y. Yu, Q.Q. Zhang, J.Q. Yu and H. Fu

Finite Element Analysis of Portable Exoskeleton Based on Ergonomics
Parameters Model
F. Liu, W.M. Cheng and L. He

Optimization Analysis Based on the Articulated Structure of Cement Floor
All-Terrain Vehicle
Z.L. Meng, F.Q. He, Q.M. Guan and H.D. Wang

Minimizing Surplus Parts in Selective Assembly Using GA
J.F. Fei, C. Lu and S.L. Wang

Simulation Analysis and Optimization Study on Automotive Air Suspension
Y. Ding and B. Zhang

Structural Parameters Optimization of Parallel Stable Platform Based on
Physical Programming
Z.H. Dong, H.S. Ding, F. Jiang, Z.C. Huang and T. Fu
### Advances in Design Technology

**Chapter 1: Product Design and Development**

- **A Novel Two Degrees of Freedom Rotational Decoupled Parallel Mechanism**

- **Design of the Lower Extremity Rehabilitation Robot Communication System**
  Q. Guo and D. Jiang

- **Study on Interference Fit of Composite Flywheel Rotor**
  S.B. Wen

- **A Multiply Function Device for Self Protection (Especially for Females)**
  Y. Zhai, Y. Zhang and J. Tang

- **Parametric and Optimum Design of Cylinder Mechanism Based on Statics and Modal Analysis**
  F.Q. Yang, H.T. Zhang, R. Zong and D.G. Chang

- **The Data Analysis and Decision of Designation and Optimization on Incline Car Brake Equipment**
  G.S. Tang and Q.M. Wang

- **High Efficient Viscoelastic Damper for Heavy Trucks**
  S.F. Zhang, X.L. Liu and Y. Liu

- **A New Method of Gear-Position Decision for Automatic Manual Transmission of Parallel Hybrid Electric Bus**
  H.K. Zhang, W.J. Li and F.G. Hua

- **Simulation Study of Kinematic Characteristic for Torsion-Beam Rear Suspension of Automobile**
  J. Gao and J.F. Xie

- **Study on the Vibration Lamella Thickener and its Application in Mineral Processing Plant**

- **Principle and Approach for Determining the Reasonable Cross-Section of the Solid-Web Double-Beam Component**
  A.F. Li

**Chapter 2: Product Design and Development**

- **Practical Utility**: A Design Concept of Immaterial Society
  L.Y. Tian, J.Z. Yuan and X. Li

- **The Study on the Smart Reference of Movie Arts Applied in Dress Design**
  Y.J. Zhang, Y.N. Liu, D. Tang, T.J. Shao, X.C. Wu and D.M. Wang

- **Method of Genetic Algorithm Optimization Design of Permanent Magnet Retarder**
  Y.Q. Huang, G.W. Cai, Y. Jiang and Z.Y. Luo

- **A New Technology of Producing Color Gradient Products**
  W.Y. Li, X.Q. Ren and Y. Sun

- **A Design Method Based on Extraction of Key Points of the Contours of Agricultural Machinery's Internal Structure: A Case Study on the Design of a Small Self-Propelled Square Baler**
  S. Liu, Y.Q. Wang, X.G. Ma and D.C. Wang

- **Application of Ergonomics Principles in the Packaging Machinery Design**
  N.B. Yang

- **An Optimal Design Procedure for Golf Clubhead Considering Impedance Matching**
  Z.Q. Wu, Y. Sogabe, Y. Arimitsu and T. Tamaogi

- **Design and Parameterized Virtual Simulation Test of a Kind of Seat Bench for Ergonomic Test**
  S. Liu, Y.Q. Wang, W.J. Wei, L. Wei and T.X. Che

- **Optimum Design of Planar Four-Bar Linkage for Scheduled Tracks**
  T.X. Liu and C. Wang
Cab Conceptual Design for the Equipment System Used for Passenger Car Ergonomic Design and Evaluation
X.M. Du, J.D. Ren, Y.Q. Liu, Z.X. Chen, S.H. Li and C.L. Sang .................................................. 399

A New Algorithm for Determining the Optimal Parameters of the Spring of a Slider Cell-Phone
C.T. Lee, H.C. Kuo and J.L. Wu ................................................................. 407

Aircraft Product Data Traceability Technology Based Workflow
X.L. Yang and G.R. Yan ................................................................. 419

Uneven Granular Module Clustering and Intelligent Optimization for Customizable Products
M. Zhang, G.X. Li, W. Li and J.Z. Gong ................................................................. 426

Optimization Design on Vibration and Noise Reduction of Damping Sandwich Circular Saw
T. Wang, T. Yao and G.L. Duan ................................................................. 433

An Aero-Thermo-Elasticity Method Applied on the Supersonic Aircraft Model
H. Tang, G.G. Chen and H.Z. He ................................................................. 438

Research on Sprayer Innovative Design Based on Ergonomics and Rapid Prototyping

Optimized Design and Experiment of the Jatropha-Nut Huller
L.H. Zhang, C. Wang and T.T. Liu ................................................................. 447

The Effects of Background upon Engineering Design Expertise – A Sino Occidental Comparison
A. Newing, S.v.d. Waal and C. Steele ................................................................. 452

Study on Development & Design of Product Service System
Y.X. Yu, Z.G. Liu, X. Li and C.Y. Chen ................................................................. 468

The Application of the Expansion Lever Method
Q.Q. Cheng and J.J. Li ................................................................. 475

Gravity Torque Balancing Device's Optimization Design of Prosthesis’s Shoulder Based on Nonlinear Programming Genetic Algorithm
B.H. Fan, C.Z. Yuan and F. Min ................................................................. 479

Users' Requirements and Preferences in the Success of a New Product: A Case Study of Automotive Design
Z. Taha, H. Alli and S.H. Abdul Rashid ................................................................. 484

Product Evaluation in Stages Based on Robust Design
X.C. Lu and H.X. Zhang ................................................................. 489

Conception of Innovation of the Electric Vehicles
J.Q. Zhang, F.H. Zhao and J.Y. Huang ................................................................. 493

Finite Element Analysis of Bicycle Saddle Based on Ergonomics
Y. Xin, X.P. Yang and L. Zhang ................................................................. 497

On Auto Brand Mark Design
L.M. Fu and J. Li ................................................................. 501

Mechanical Products Conceptual Innovation Design by Application of Enhanced Genetic Algorithm
Z.H. Yuan, H.L. Jiang, Z.J. Wang and K.P. Ma ................................................................. 506

Optimizing Study of Top Beam Structure of Electrostatic Precipitator Casing
X.M. Ji, D.F. Wang, Y.Q. Wang and Y.J. Shi ................................................................. 510

Application Research on TRIZ Technical Contradiction Solving Principles in Tank’s Protective Armor
Y.L. Cui, C.M. He and S.X. Zhang ................................................................. 518

The Modeling Design of Health Bedding
H.X. Zhang, Q.D. He, L.X. Fan and X.L. Shi ................................................................. 522
Maintenance for the Mirror Systems of LAMOST Telescope
J.F. Zhang, J.J. Zhou and H.L. Shi ................................................................. 526

Analysis of Cold Protective Clothing’s Design and Market - Functional &
Structural Design
C.Y. Wu, C.F. Qu, G.W. Song, L.B. Xu and Y.J. Zhang ............................................. 532

The Study of the Furniture Design Based on Product Morphological Semantics
X. Li and Z.H. Ye ...................................................................................... 536

Resource Configuration for the Collaborative Development of Product
F.H. Zeng and L.H. Zhou ........................................................................ 540

The Suit Pattern Optimal Design Based on the Features of Middle-Aged Women’s Body Shape
B. Lin .................................................................................................. 544

Research of Product Form Design Based on Comprehensive Product Processes
M.L.C. Cao and N.B. Yang .................................................................... 547

Carbon Reduction Technique Used in Panel Furniture Design & Manufacturing
Z.G. Hong ........................................................................................... 551

Diagnostic Strategy Optimization Based on Particle Swarm Algorithm
Y.S. Zhang, Z.T. Qiao and J.H. Jing .............................................................. 555

The Conceptual Design of Exercise Washing Machine Based on Trimming
E.H. Zhang, C.Q. Gao, B. Yang and H.H. Su .............................................. 561

The Research and Application of Innovative Approaches Based on
Cognitive Processes
H.H. Su, C.Q. Gao, B. Yang and E.H. Zhang .............................................. 566

The Analysis Technology of Parameters Change Impact Based on the Product Interface
Coupling Network Model
L. Wang and A.M. Wang ...................................................................... 571

Modulus Packaging Design of the Cylindrical Ceramic Furnishings
L. Xu, D.G. Li, C.Y. Xu, S.G. Zhang and Y.X. Shi ........................................ 577

Evaluation Model for Product Green Design Based on Active Remanufacturing
L.L. Wang, Z.M. Zhang and C. Chen .......................................................... 583

Study on Evaluation System Based on the Reconfigurable and Modular Design
R. Shang, Y.F. He and Z. Zhang ............................................................... 588

Study on Mix-Variable Collaborative Design Optimization
L. Gao and R.R. Wang ......................................................................... 592

Pedigree Based Product Conceptual Design
K. Yao, B. Yang, X.Z. Wang and C.Q. Gao .............................................. 597

Prototyping in the Product Interface Design
Z.S. Li and C.Q. He ............................................................................ 602

Finite Element Analysis and Optimization of Wave-Frame Based on ANSYS
S.J. Wang, X. Xiong and X.P. Yang ............................................................ 607

Product Pedigree Based Conceptual Structure Evolutionary Design
X.Z. Wang, B. Yang, K. Yao and C.Q. Gao ............................................... 612

Research on Product Cooperation Design for Knowledge Management
Q. Feng, S.H. Yu, Q. Zhang and W.W. Wang .......................................... 616

Research on Multi-Objective Decision-Making of Materials Selection for
Green Manufacturing
J.J. Xi, H.Y. Liu and J.Q. Liu ................................................................. 621

An Analysis of Apparel Products Development Process Model: From the Prospective of
Integrated Design
H.L. Zhou, R. Yuan and L. Dong ............................................................. 626
