Contents

Preface xi

The Editor xv

Contributors xvii

1 Characteristics of Human Vision 1

Stefan Winkler

2 An Analysis of Human Visual Perception Based on Real-Time Constraints of Ecological Vision 37

Haluk Öğmen

3 Image and Video Quality Assessment: Perception, Psychophysical Models, and Algorithms 55

Anush K. Moorthy, Kalpana Seshadrinathan, and Alan C. Bovik

4 Visual Aesthetic Quality Assessment of Digital Images 91

Congcong Li and Tsuhan Chen

5 Perceptually Based Image Processing Algorithm Design 123

James E. Adams, Jr., Aaron T. Deever, Efrain O. Morales, and Bruce H. Pillman

6 Joint White Balancing and Color Enhancement 167

Rastislav Lukac

7 Perceptual Thumbnail Generation 193

Wei Feng, Liang Wan, Zhouchen Lin, Tien-Tsin Wong, and Zhi-Qiang Liu

8 Patch-Based Image Processing: From Dictionary Learning to Structural Clustering 223

Xin Li

9 Perceptually Driven Super-Resolution Techniques 251

Nabil Sadaka and Lina Karam

10 Methods of Dither Array Construction Employing Models of Visual Perception 287

Daniel L. Lau, Gonzalo R. Arce, and Gonzalo J. Garateguy
11 Perceptual Color Descriptors
Serkan Kiranyaz, Murat Birinci, and Moncef Gabbouj

319

12 Concept-Based Multimedia Processing Using Semantic and
Contextual Knowledge
Evaggelos Spyrou, Phivos Mylonas, and Stefanos Kollias

359

13 Perceptually Driven Video Shot Characterization
Gaurav Harit and Santanu Chaudhury

399

14 Perceptual Encryption of Digital Images and Videos
Shujun Li

431

15 Exceeding Physical Limitations: Apparent Display Qualities
Piotr Didyk, Karol Myszkowski, Elmar Eisemann, and Tobias Ritschel

469
