# Table of Contents

## Track I: New Methods in Design Science Research

- **Resolving Name Conflicts for Mobile Apps in Twitter Posts**
  
  Sangaralingam Kajanan, Ahmed Shafeeq Bin Mohd Shariff, Kaushik Dutta, and Anindya Datta

- **Using Adjective Features from User Reviews to Generate Higher Quality and Explainable Recommendations**
  
  Xiaoying Xu, Anindya Datta, and Kaushik Dutta

- **Product Semantics in Design Research Practice**
  
  Jonas Sjöström, Brian Donnellan, and Markus Helfert

## Track II: Recent Developments in Inductive Research Methods

- **Action Design Ethnographic Research (ADER): Vested Interest Networks and ICT Networks in Service Delivery of Land Records in Bangladesh**
  
  M. Shahanoor Alam, Laurence Brooks, and N.I. Khan

- **Grounded Analytic Research: Building Theory from a Body of Research**
  
  Bjørn Furuholt and Maung Kyaw Sein

- **Using Photo-Diary Interviews to Study Cyborgian Identity Performance in Virtual Worlds**
  
  Ulrike Schultze

## Track III: Emerging Themes in Interpretive Case Study Research

- **Living in a Sociomaterial World**
  
  Eric Monteiro, Petter Almklov, and Vidar Hepsø

- **Co-materialization: Digital Innovation Dynamics in the Offshore Petroleum Industry**
  
  Thomas Østerlie

- **Mutability and *Becoming*: Materializing of Public Sector Adoption of Open Source Software**
  
  Maha Shaikh
Track IV: New Ideas in Positivist Research

Moderating Effect of Environmental Factors on eHealth Development and Health Outcomes: A Country-Level Analysis ........................................... 143
  Supunmali Ahangama and Danny Chiang Choon Poo

Social Networks and Communication Media for Generating Creative Ideas ................................................................. 160
  Yi Wu and Klarissa Chang

Cultural Challenges in Information Systems Innovation: The Need for Differentiation Studies ........................................... 177
  Carl Lawrence and Markku Oivo

Track V: Innovative Trends in Information Systems Research

Digital Artifacts as Institutional Attractors: A Systems Biology Perspective on Change in Organizational Routines ......................... 195
  SungYong Um, Youngjin Yoo, Nicholas Berente, and Kalle Lyytinen

Amazon Mechanical Turk: A Research Tool for Organizations and Information Systems Scholars ............................... 210
  Kevin Crowston

Customization of Product Software: Insight from an Extensive IS Literature Review ........................................... 222
  Matthias Bertram, Mario Schaarschmidt, and Harald F.O. von Kortzfleisch

Author Index ................................................................. 237
