# Decomposition of bilinear forms as sums of bounded forms

Inauguraldissertation  
zur Erlangung des akademischen Grades  
eines Doktors der Naturwissenschaften  
durch den Fachbereich Mathematik und Informatik  
der Westfälischen Wilhelms-Universität Münster

vorgelegt von  
*Mohamed Elmursi*  
*aus Aswan(Ägypten)*  
— 2012 —

# Contents

<b>Introduction</b>	<b>1</b>
<b>1 Preliminaries</b>	<b>4</b>
1.1 Vector spaces with a scalar product, pre-Hilbert spaces . . . . .	4
1.2 Hilbert spaces . . . . .	19
1.3 Linear operators and their adjoints . . . . .	22
1.4 Special classes of linear operators . . . . .	24
1.5 Trace class and Hilbert-Schmidt operators . . . . .	27
1.6 Tensor products . . . . .	36
1.7 The projective tensor product . . . . .	37
<b>2 Decomposition of bilinear forms on Hilbert spaces</b>	<b>40</b>
2.1 Decomposition of a bilinear form into two terms . . . . .	40
2.2 Decomposition of bilinear form into three terms . . . . .	49
<b>3 Decomposition of bilinear forms into n terms</b>	<b>59</b>
<b>4 A counterexample to decomposing bilinear forms into three bi-linear forms</b>	<b>67</b>
4.1 A useful lemma . . . . .	67
4.2 A counterexample . . . . .	69
<b>Bibliography</b>	<b>75</b>
