Proceedings of the 14th HKSTS International Conference

TRANSPORTATION and GEOGRAPHY

Volume 1

10-12 December, 2009

Edited by

Donggen Wang and Si-Ming Li

Hong Kong Society for Transportation Studies
CONTENTS

KEYNOTE ADDRESS

Challenges for Territorial and Transport Development in Hong Kong
Ava S Y NG ................................................................. 3

Collecting Activity-Travel Data Using Modern ICT: Recent Developments and Prospects
Harry TIMMERMANs, Anastasia MOISEEVA and Joran JESSURAN ....................... 5

PLENARY SESSION I

Air Freight and Airports: A Global Study
Daniela JOVANOVIC and Kevin O’CONNOR ................................................. 19

Econometric Modelling of Time-Varying Origin-Destination Flows
Hing Po LO and Kam Hin CHUNG............................................................. 29

Modeling Heterogeneous Drivers’ Responses to Route Guidance and Parking Information Systems in Stochastic and Time-Dependent Networks
Zhi-Chun LI, Hai-Jun Huang and William H. K. Lam .................................... 37

SESSION A1: AIRLINE NETWORKS

Optimal Aircraft Maintenance Schedule Adjustment following Incidents in Short-Term Operations
Fei-Yen HSIAO, Shangyao YAN and Yu-ching CHEN .................................... 41

Airline Operating Performance Indicators towards Implications: An Analysis of Major North American Airlines
Winai HOMSOMBAT, Xiaowen FU and Agachai SUMALEE............................ 51

How to Characterize Airline Networks: A Case Study of Binter Canarias
Juan Carlos MARTIN and Isabel SANTANA .................................................. 61

Exploring Network Effects of Point-to-Point Networks: An Investigation of the Spatial Entry Patterns of Southwest Airlines
Jia YAN, Xiaowen FU and Tae OUM ............................................................ 63

SESSION A2: BUILT ENVIRONMENT AND TRAVEL BEHAVIOR

A Study on Travel Patterns and Characteristics of Travellers and Land Uses in Seoul using a Large Data Set
C. H. JOH, C.S. HWANG, T. A. ARENTZE and Harry TIMMERMANs .................... 67
Built Environment Effects on Leisure Travel for Children: Trip Generation and Travel Mode
Jen-Jia LIN and Tzu-Pen YU .......................................................... 75

Commuting Cost in Hong Kong: A Multi-Group Comparison
Becky P.Y. LOO and Winnie W.Y. LAM ........................................... 85

GPS-enabled Automated Data Collection for Studying Individuals' Activity-Travel Behavior
Bingxia SUN, Donggen WANG and Linyuan XIA ............................... 95

---

SESSION A3: OUTSTANDING STUDENT PAPER AWARD

Calibration of the Pedestrian Activity-Simulation Model for Hong Kong Urban Areas
JODIE Y. S. LEE ............................................................................. 107

Heuristic Global Optimization Method for Continuous Network Design Problem
Paramet LUATHEP ....................................................................... 117

Stochastic Cell Transmission Model (SCTM) for Traffic Network
RENXIN ZHONG ....................................................................... 127

---

SESSION A4: VEHICLE ROUTING

A Novel Solution Algorithm for Solving Multi-Class Reliability-Based Path Choice Problem
Bi Yu CHEN, William H.K. LAM, Hu SHAO and Mei Lam TAM ......................... 139

A Heuristic Algorithm for the Vehicle Routing Problem with Loading Constraints
Stephen C. H. LEUNG, Jiemin ZHENG, Defu ZHANG and Xiyue ZHOU ................ 149

Lane Recognition and Preceding Vehicle Tracking based on Computer Vision
Yanwen CHONG, Wu CHEN, ZhiLin LI and William H. K. LAM ..................... 159

A New Car Following Model Considering the Acceleration of Leading Car
Li-juan LIU and Ning ZHANG .......................................................... 169

---

SESSION A5: TRAFFIC MODELS

The Impact of Location and Number of Traffic Counts in the Accuracy of O-D Matrices Estimated From Traffic Counts
Nindyo Cahyo KRESNANTO and Ofyar Z. TAMIN .................................. 179

A Mean-Variance Approach to Mixed Strategies for Dispatching Problems under Travel Time Uncertainty
Takeshi NAGAE and Shin'ichi SASAKI .............................................. 189
Grouping the Nodes of a Digital Road Map for Matching a Rough Network
Kazutaka TAKAO and Yasuo ASAKURA ...................................................... 197

A Reinforcement Learning Algorithm for Analysing Route-Choice Behavior in Road Networks
Toshihiko MIYAGI ...................................................................................... 207

SESSION B1: AIRPORTS

The Specification of Aircraft Operations in the Airports' Cost Function: The Problem of Aggregation
Juan Carlos MARTIN and Augusto VOLTES-DORTA .................................. 219

Implications of the Haneda Airport Expansion on Air Passenger Transport in Tokyo: A Traveller’s Perspective
H. Y. TONG, K.L. LEI, Simon S.M. YUEN .................................................. 229

Economic Growth Effects of Airport Capital and Air Traffic: the Case of German Airports
Florian ALLROGGEN and Robert MALINA ................................................. 239

Combining Grey Relational Analysis with TOPSIS Techniques to Evaluate Service Quality of Airports in Fuzzy Environment
Ming-Shin KUO, Shao-Yun CHEN and Wen-Chih HUANG ............................ 249

Manpower Scheduling Problem at the Airport with Heterogeneous Skills
Yong-Hong KUO ....................................................................................... 259

SESSION B2: MODELLING PEDESTRIAN MOVEMENT AND TRAVEL SURVEY

Highlights of the 2009 Travel Characteristics Survey of Macao
I.M. WAN, K. I. WONG and K. P. KOU ........................................................ 263

Modelling Pedestrian Movement in Shopping Street Segments
Aloys BORGERS, Astrid KEMPERMAN and Harry TIMMERMANS .................. 267

Origin-Destination Estimation Based on Stability Evaluation using Mobile Phone Records
Hao TIAN, Han WANG, Kunqing XIE, Xiujun MA and Shujuan ZHAO .............. 269

Q-K-V Modeling for a Dense Pedestrian Traffic Corridor of an Industrial Estate in Gujarat, India.
G.J. JOSHI, B. K. KATTI and Ravi BHAJIYAWALA ...................................... 279
SESSION B3: ENERGY AND EMISSION

Congestion Pricing to Reduce Traffic Emission
Shuli SONG and Xiaoning ZHANG ........................................................................ 289

Analysis of Critical Evaluation Factors of Alternative Fuel Vehicles using DEMATEL
Sheng-Hung CHEN, Chen-Hui FAN, Yung- Hsuan OU, Cheng-Wei LIN and Gwo-Hshiung TZENG.................................................................................. 297

Mode Shift Travel Demand Management Strategy for Congestion and Emission Reductions for Developing Countries (Jakarta Case)
Osynar Z. TAMIN and Muhammad Nanang PRAYUDYANTO ........................................ 307

Renewable Fuels Standards: Issues and Challenges
Frank W. RUSCO and W. D. WALLS ....................................................................... 317

A Mass Balance Emission Model with Speed Modification
K.L. MAK and W.T. HUNG...................................................................................... 325

SESSION B4: TRAVEL TIME AND LEVEL OF SERVICE

Quick Estimates of Travel Time Reliability: Analytical and Numerical Results
Man Wo NG, W.Y. SZETO and S. Travis WALLER .................................................. 337

Dynamic Stochastic Travel Time Estimation: The Stochastic Cell Transmission Model Based Approach
Tianlu PAN and Agachai SUMALEE ...................................................................... 347

Level of Service Criteria for Multilane Highways Carrying Heterogeneous Traffic
G. DHIVYA and V. Thamizh ARASAN .................................................................. 357

Evaluating Traffic Congestion Measures from Motorist’s Perceptions: A Case Study from Bangkok’s Intelligent Traffic Sign System
Kittipat TANGITINUNT and Kasem CHOOCHARUKUL ............................................ 367

SESSION B5: LOGISTICS AND DISTRIBUTION

A Study on Forecasting the Freight OD Volume of Railway Refrigerated Goods in China Based on Improved Gravity Model
Jiao WANG, Xiao-dong ZHANG, Bo-ling HAN, Jun ZHOU, Yang SUN, Bin DENG ...... 379

Minimum Cost Flow Problem in Distribution System with Product Differentiation
Sutanto SOEHODHO and M.T. NAHRY .................................................................. 389

The Cost of Supplying Segmented Consumers from a Central Facility
Marcel TURKENSTEEN and Andreas KLOSE ................................................................ 399
Critical Factor for Choosing an Outsourced Transportation Operator Using DEMATEL and ANP
Wang-Ho HSU, Chen-Hui FAN, Sheng-Hung CHEN, Gwo-Hshiung TZENG and Leon YEN

Study on Freight Volume Share Ratio of Railway Tank Container in China
Zhi-hua HUANG, Xiao-dong ZHANG, Yu-hua GUO, Bin DENG and Jing HE
