Proceedings of the Fourth International Conference on Grouting and Deep Mixing 2012

February 15–18, 2012
New Orleans, Louisiana

Sponsored by
Deep Foundation Institute
The Geo-Institute of the American Society of Civil Engineers

Edited by
Lawrence F. Johnsen

Published by the American Society
Volume Two

Anchors and Piles

Grouting of Anchors to Resist Hydrostatic Uplift at Burnley Tunnel, Melbourne, Australia .................................................. 1073
Devon Mothersille and Stuart Littlejohn

Application of Shaft Grouting Technique in Deep Foundations—Hong Kong Experience .................................................. 1085
James W. C. Sze and K. M. Chan

miniJET: A New Type of Micropile ........................................... 1095
Timothy J. Myers, Jeffrey J. Bean, and M. Kevin Bolton

Anchor Bars in Frozen Bedrock—Curing Techniques for Backfill Grout .......................................................... 1105
Grant Bonin and Justin Bieber

A Case Study on Excavation Stabilization Using Ground Anchors and High Pressure Injection ........................................... 1115
Ali Parsapajouh, Siavash Litkouhi, and Bahram Amini

The Multi-Point Synchronous Grouting Method for the Bottom of a Caisson Foundation of an Offshore Bridge .................. 1124
Kyung-Sub Cha, Kyung-Tae Bae, Kyung-Hwan Jung, and Byung-Gi Ahn

Dam Foundations Grouting

Dams Founded on Dispersive Soils and Rocks: Drilling and Grouting under Difficult Conditions .................................. 1134
W. F. Heinz

Grouting Experience in Variable Geological Conditions in Southern Africa ................................................ 1147
G. P. Steyn and D. J. Mouton

Carno Dam: Case History of Investigation and Remedial Works .......................................................... 1158
Clif Kettle, Matthew Brown, Vojtech Vrba, Jane Walbancke, and Andrew Rowland

Remedial Treatment Exploration, Wolf Creek Dam, KY (Reprint) .................................................. 1187
Marvin D. Simmons

Dams: Grout Curtains and Cutoffs

A Case History of Grouting at Logan Martin Dam .................................................. 1204
Stacy S. Sprayberry, Bobby E. Williams, Stephanie Espinal-Todd, and James David Holland

Installation of a Seepage Cutoff Wall at the Herbert Hoover Dike Using the Cutter Soil Mixing Method ................................ 1214
D. A. Schauer, D. A. Mevers, and C. J. Puccini

McCook Reservoir—Case History of Current U.S. Rock Grouting Practice .................................................. 1226
Luca Barison, Thomas D. Richards, Jr., and Roger A. Baldwin

Advances in Monitoring and Control Systems for High Mobility Grouting .................................................. 1238
F. B. Gularte, D. A. Ringen, and L. S. Shao
Composite Cut-Off Walls for Existing Dams: Theory and Practice ................................. 1248
Donald A. Bruce, Trent L. Dreese, Mark C. Harris, and Douglas M. Heenan

Howard Hanson Dam Emergency Interim Grout Curtain ............................................. 1265
Ryan P. Sullivan and Thomas J. Danielson

Foundation Preparation and Seepage Barrier Installation at the Wyaralong Dam Construction Project ................................................................. 1276
Conrad H. Ginther and Brendan White

A Case Study—Installation of Cut-Off Wall in Seyrantepe Dam Project ....................... 1287
H. Turan Durgunoglu, Selim Ikiz, Sabahattin Eser, Onder Akcakal, and Melis Sutman

Evaluating the Performance of Grouting for Hydraulic Barriers in Rock ..................... 1294
William M. Roman, Adam N. Hockenberry, John N. Berezniak, and David B. Wilson

Protection of Embankments during Drilling and Grouting ........................................ 1304
Daniel P. Stare, Adam N. Hockenberry, Trent L. Dreese, David B. Wilson, and Donald A. Bruce

Analysis of Quality Control Testing for Grouting at Center Hill Dam, Tennessee .......... 1314
Haixue (Michael) Xu, Bryan S. Elledge, and Douglas M. Heenan

The Initial Grouting in the Embankment Foundation at Wolf Creek Dam near Jamestown, Kentucky .................................................. 1324
Sarah G. Mackey and Tommy A. Haskins

Seepage Control Measures for the Papadia Dam Foundation: Design, Construction, and Performance ................................................................. 1335
K. Anastasopoulos, D. A. Bruce, Ch. Oikonomidis, and G. Rizopoulos

Dyke Rehabilitation with a Trencher: Recent Applications in Europe ......................... 1345
Fabrice Mathieu, Marie Lebreton, Mariuz Hoffman, Richard Mercer, Antoine Victor, Stephane Guerineau, and Arnaud Gossart

Grouting and Deep Mixing for Environmental Containment and Treatment

Multiple Pass Permeation Grouting to Encapsulate and Contain Radioactive Waste in a Predictable Fashion .................................................. 1353
A. Naudts, J. D. Long, E. A. Krispin, and W. Naudts

In Situ Treatment of Low-Level Radioactive Buried Waste at the Idaho National Laboratory Site Using an Innovative Jet Grouting Technique .................. 1363
F. B. Gularte, B. G. Meagher, J. J. Jessmore, M. W. Blanding, and A. P. Gerondale

Properties of Hydraulically Dumped Coal Ash after Soil Mixing Improvement .......... 1373

Grouting for Seepage Control

Unique Seepage Cut-Off Barriers for Lockport Canal Wall Rehabilitation: Lockport, Will County, Illinois .................................................. 1385
Spring Borchardt, Matthew Didier, and Raymond Franz
Effective Grouting is Key to Open Tunnel Excavation at Lake Mead
Intake No. 3 Connector Tunnels .................................................................1398
Shimi Tzobery, Ted Davis, Zachary Hills, and Erika Moonin

Chemical Grouting for Water Control in Nearshore Poorly Cemented Sands ........1410
L. Liersch, G. Abdo, W. Choucair, and S. Sadek

Sealing of a Temporary Excavation for the Downtown Line—Application of Scandinavian Grouting Practice in Singapore ..................................................1421
Mikael Creütz, Lars Hässler, Nick Shirlaw, and Willie Kay

Pre-Excavation Grouting Using Multiple Grouting Techniques for CSO Project in Dearborn, MI .................................................................1431
Timothy J. Myers, Holly J. Donoghue, Alex Naudts, and David Magill

Grouting Performance Testing
Assessing the Effectiveness of Compaction Grouting Using Seismic Methods ........1441
Khamis Y. Haramy, Justin T. Henwood, and Tom Szynakiewicz

Applying Real Time Grouting Control Method in Sedimentary Rock ................1450
Jalaleddin Yaghoobi Rafi, Håkan Stille, and Mehdi Bagheri

Towards Better Injection Control and Verification of Rock Grouting ...............1460
Grant R. Bonin, Vafa T. Rombough, Trevor G. Carter, and Michael G. Jefferies

Improved Methods of Design for Grouting Fractured Rock ............................1472
Trevor G. Carter, William Dershowitz, Dawn Shuttle, and Michael Jefferies

The Use of Drilling Parameters Recording As a Tool for Quality Control in Jet Grouting Treatments .................................................................1484
Sandra Coelho, António Viana da Fonseca, Duflio Cebola, and Nuno Anta

Automatic Monitoring of Grouting Performance Parameters ..........................1494
Robert M. Taylor and Pierre Choquet

Grouting Verification Using 3-D Seismic Tomography ....................................1506
Christopher Lynch, Marilyn Dodson, and John S. McCartney

Ten Years of Computer Monitoring and Beyond .............................................1516
Adam N. Hockenberry, Daniel P. Stare, Christopher M. Hallahan, and Trent L. Dreese

The Use of the Optical Televiewer in Geotechnical Construction ......................1531
Kenneth Ivanetich, Keith Bryant, and Francis Gularte

The Role of Surface Science in Grouting ......................................................1540
James Warner

Innovations in Grouting Methods
Recent Developments in Jet Grouting .........................................................1548
Hiroshi Yoshida

Acrylamide Grouting: Successfully Controlling Groundwater from Canada to South America .................................................................1562
Jim Gentry and Daniel Magill
Karst: Grouting Applications and Technology

Geological and Geotechnical Aspects of Grouting in Karst.................................................1569
Joseph A. Fischer, James G. McWhorter, and Joseph J. Fischer

Karst Grouting for Foundation Support: A Discussion Board ..................................................1578
Allen Cadden

Hot Bitumen Grouting at Lonestar Quarry .................................................................1586
Jim Bruce and Marcelo Chuaqui

Treatment of Covered Karst Using LMG and JG: Natura Case Revisited from the Perspective of an Application of the Observational Method.........................................................1601
Makoto Namba, Cláudio M. de Almeida Prado, Michael J. Byle, Waldemar Hachich, Frederico Falconi, and Arsenio Negro, Jr.

Compaction Grouting in Karst Terrain (A Test Program) ..................................................1612
Michael J. Miluski and Giovanni Bonita

Development of a Response Plan and Grout System for Remediation of Sinkholes .................1626
Ross T. McGillivray, Walt Williams, and Ron L. Broadrick

Low Mobility Grouting

Limited Mobility Displacement Grouting Design for Foundation Bearing Improvement.................................................................1634
Tarek F. Haider, Christopher J. Kufro, and Mohd F. Rahman

Remediation of Settlement in Shallow-to-Deep Utility Trenches Using Low Mobility Compaction Grouting Techniques in Cohesive Backfill .........................................................1644
Marc E. Cleveland, Joe Harris, and Rick Forsyth

Enhancing Base Stability of Deep Excavation in Soft Clay with Grout Piles ..........................1653
Hung-Jiun Liao, Chih-Chen Lin, and Chao-Jie Jeng

Compaction Grouting—A Half-Century Review ............................................................1664
Sam Bandimere

Materials: Cement-Based Grouts

Observation and Testing of Diutan Gum in Grout Mixes ..................................................1672
Stephanie Espinal-Todd and Stacy S. Sprayberry

Bleeding and Bleeding Measurement of Cement-Based Grout ...........................................1681
Almir Draganović and Håkan Stille

A Swedish Grouting Design Concept: Hydraulic Testing and Selection of Grout .....................1691
Åsa Fransson, Magnus Zetterlund, Gunnar Gustafson, Johan Funehag, Lisa Hernqvist, and Christian Butrón

Physical Properties of Cement-Sodium Silicate Grout with Kaolinite ..................................1701
Sina Kazemian and Arun Prasad

Resonant Column Testing of Microfine Cement Grouted Sands .......................................1711
Ioannis A. Pantazopoulos and Dimitrios K. Atmatzidis

Triaxial Compression Testing of Microfine Cement Grouted Sands ..................................1721
I. A. Pantazopoulos, I. N. Markou, D. K. Atmatzidis, and A. I. Droudakis
