STORM SURGE BARRIERS
TO PROTECT
NEW YORK CITY
AGAINST THE DELUGE

EDITED BY

Malcolm J. Bowman, Ph.D., P.E.
Jagtar S. Khinda, Ph.D., P.E.

Preface .................................................................................................................. vii

1 Introduction ........................................................................................................ 1
Douglas Hill

2 The Lessons of Katrina: What Went Wrong and Why .................................. 9
Lawrence H. Roth

3 Synthetic Storm Simulation for Wind Risk Assessment ............................ 15
Kerry Emanuel and Sai Ravela

4 Hydrodynamic/GIS Simulation of Storm Surge Flooding
in the NY/NJ Harbor System ............................................................................. 37
Nicholas B. Kim, Brian S. George, and Philip W. Simmons

5 Vulnerability and Potential Losses in New York City from Coastal
Flooding ................................................................................................................ 58
Douglas Hill

6 Hydrologic Feasibility of Storm Surge Barriers .......................................... 71
Malcolm J. Bowman and M. Hamish Bowman

7 Climate Adaptation Cost for Flood Risk Management
in the Netherlands .................................................................................................... 99
Jeroen C.J.H. Aerts and Wouter J.W. Botzen

8 Regulatory Changes to a New York Harbor Storm Barrier System ....... 114
Michael Scarano

9 Storm Surge Barriers: Ecological and Special Concerns ............................ 122
R. L. Swanson, C. O'Connell, and R. E. Wilson

10 Geotechnical Aspects of Three Storm Surge Barrier Sites to
Protect New York City from Flooding ............................................................... 134
Hugh S. Lacy, Anthony DeVito, and Athena C. De Nivo

11 A Global Overview of Navigable Storm Surge Barriers:
Suitable Gate Types for New York from a Dutch Perspective .................... 150
P. T. M. Dircke, T. H. G. Jongeling, and P. L. M. Jansen

12 Student Designs of Storm Surge Barriers for the NYC
Metropolitan Area .................................................................................................. 170
A. D. Ronan
13 East River Storm Surge Barrier ................................................. 182
  Michael J. Abrahams

14 Verrazano Narrows Storm Surge Barrier: A Dutch Vision ............. 191
  P. L. M. Jansen and P. T. M. Dircke

15 Arthur Kill Storm Surge Barrier: Design Concept ...................... 207
  Lawrence J. Murphy and Thomas Schoettle

16 NY/NJ Outer Harbor Gateway ................................................. 218
  Dennis V. Padron and Graeme Forsyth

17 Review Panel: Should Barriers Be Built in New York City? .......... 250
  Douglas Hill

Index .............................................................................................. 257
