Proceedings of the

ASME Turbo Expo
2012

VOLUME 8
PART C

TURBOMACHINERY:
DESIGN METHODS AND CFD MODELING FOR TURBOMACHINERY
UNSTEADY FLOWS IN TURBOMACHINERY

presented at
The ASME 2012 Turbo Expo
June 11–15, 2012
Copenhagen, Denmark

sponsored by
The International Gas Turbine Institute
PART C

TURBOMACHINERY: DESIGN METHODS AND CFD MODELING AND TURBOMACHINERY

GT2012-68029 ................................................................. 1853
Speed Line Computation of a Transonic Compressor Stage With Unsteady CFD Methods
Thomas Biesinger, Christian Cornelius, Dirk Nürnberg, and Christoph Rube

GT2012-68036 ................................................................. 1863
Performance Uncertainty Quantification for Centrifugal Compressors:
1 — Stage Performance Variability
Andrea Panizza, Giuseppe Iurisci, Giuseppe Sassanelli, and Sankaran Sivasubramaniyan

GT2012-68040 ................................................................. 1873
Three Dimensional Design Optimisation of Multistage Axial Flow Turbines Using a RSM Based Approach
Carlo Cravero, Paolo Macelloni, and Giuseppe Briasco
Multi-Disciplinary Optimization of Mid-Span Shroud Ring Structure: A Multi-Parameter Geometry Study Case

Yuan-Ting Wu, Jerome Le Moine, Pei-feng Hsu, Christian X. Campbell, Sam R. Miller, John J. Marra, Christian K. Funk, and C. Subramanian

Implementation and Assessment of an Advanced Plenum Boundary Condition for Turbine Design Calculations

Richard Jefferson-Loveday, Paul Tucker, and John Northall

Differential Equation Specification of Integral Turbulence Length Scales

Richard Jefferson-Loveday, Paul Tucker, John Northall, and Nagabhushana Rao Vadlamani

Numerical Investigation of High-Pressure Turbine Environment Effects on the Prediction of Aerothermal Performances

Fabien Wlassow, Francis Leboeuf, Gilles Leroy, Nicolas Gourdain, and Ghislaine Ngo Boum

Further Validation of the Non Linear Harmonic Method in a Subsonic Counter-Rotating Compressor

Lei Wang, Bo Liu, Xiaodong Yang, and Zhiyuan Cao

Through Flow Flange-to-Flange Turbine and Diffuser Analysis

Andrei Granovskiy, Mikhail Kostege, Vladislav Krupa, and Sergey Rudenko

The Influence of Metamodelling Techniques on the Multidisciplinary Design Optimization of a Radial Compressor Impeller

Christopher Chahine, Jörg R. Seume, and Tom Verstraete

Multidisciplinary Optimization of a Turbocharger Radial Turbine

Lasse Mueller, Zuheyr Alsalihi, and Tom Verstraete

Characterization of Aerodynamic Performance of Boundary-Layer-Ingesting Inlet Under Crosswind

Meng-Sing Liou and Byung Joon Lee

Multi-Stage Turbomachinery Blades Optimization Design Using Adjoint Method and Thin Shear-Layer N-S Equations

Lucheng Ji, Weiwei Li, Yong Tian, Weilin Yi, and Jiang Chen
Multi-Objective Compressor Design Optimization Using Multi-Design Transfer Between Codes of Different Fidelity
   Fiete Poehlmann and Dieter Bestle

Boundary Conditions for Vortex CFD Simulations
   Grant McLelland, Domenico di Cugno, David G. MacManus, and Vassilios Pachidis

Generation of Gas Turbine Component Maps on Basis of Operational Data
   M. Zwingenberg, B. Dobrzynski, S. Klumpp, K. Werner, and F.-K. Benra

Design Procedure for a Turgo Type Turbine Using a Three-Dimensional Potential Flow
   Jorge Luis Clarembaux Correa, Jesus De Andrade, Ricardo Noguera, Sergio Croquer, Freddy Jeanty, and Miguel Asuaje

On LES Methods Applied to Seal Geometries
   James Tyacke, Richard Jefferson-Loveday, and Paul Tucker

Steady State and Transient CFD Studies on Aerodynamic Performance Validation of a High Pressure Turbine
   Sridhar Murari, Sathish Sunnam, and Jong S. Liu

Applications of EARSM Turbulence Models to Internal Flows
   O. Z. Mehdizadeh, L. Temmerman, B. Tartinville, and Ch. Hirsch

Quantification of the Numerical Solution Sensitivity to Unknown Parameters: Application to Compressor and Turbine Flows
   Nicolas Gourdain and Karl Dewandel

DNS of a Low Pressure Turbine Blade Computed With the Discontinuous Galerkin Method
   Corentin Carton de Wiart, Koen Hillewaert, and Philippe Geuzaine

Modeling of the Hub Cavity Leakage Flows in Axial Compressors
   Hasham H. Chougule, Anand Dhamarla, Shraman Goswami, and Mahmoud L. Mansour

Novel Performance Prediction of a Transonic 4.5 Stage Compressor
   Andreas Schmitz, Marcel Aulich, Dirk Schönweitz, and Eberhard Nicke
PADRAM: Parametric Design and Rapid Meshing System for Complex Turbomachinery Configurations

Andrea Milli and Shahrokh Shahpar

Constrained Adjoint-Based Aerodynamic Shape Optimization of a Single-Stage Transonic Compressor

Benjamin Walther and Siva Nadarajah

Three-Dimensional Pressure Controlled Vortex Design of a Turbine Stage

Qingfeng Deng, Qun Zheng, Guoqiang Yue, Hai Zhang, and Mingcong Luo

Aerodynamic Optimisation of High Pressure Turbines for Lean-Burn Combustion System

Shahrokh Shahpar and Stefano Caloni

An Evaluation of Mixing Effect on the Recycle Stage of Syngas Compressor Based on Numerical and Experimental Investigations

Liang Ding, Tong Wang, Yao Fu, Bo Yang, and Chuangang Gu

Investigation of 3D Internal Flow Using New Flux-Reconstruction High Order Method

Yi Lu, Xin Yuan, and W. N. Dawes

Robust Optimization for Aerodynamic Problems Using Polynomial Chaos and Adjoints

Sriram Shankaran and Andre Marta

Interpretation of Adjoint Solutions for Turbomachinery Flows

Sriram Shankaran, Andre Marta, Prem Venugopal, Brian Barr, and Qiqi Wang

Use of Transition Modeling to Enable the Computation of Losses for Variable-Speed Power Turbine

Ali A. Ameri

Nozzle Guide Vane Cooling System Optimization

Julian Girardeau, Frederic Pardo, Jérôme Pailhès, and Jean-Pierre Nadeau

Calibration of Gas Turbine Blade Temperature Predictions Using Surrogate Models

John M. McFarland, Grant O. Musgrove, Sung Yong Chang, and David L. Ransom
Gas Turbine Blade Stress and Temperature Sensitivity to Turbine Inlet Profile and Cooling Flow
   Beom Soo Kim, Bum Shin Kim, Woosung Choi, Grant O. Musgrove, John McFarland, Frank Fierro, and David L. Ransom

Probabilistic Analysis of Radial Gear Compressors
   Thorsten van Lil, Matthias Voigt, Konrad Vogeler, Christian Wacker, and Uwe Rockstroh

Full Design of a Highly Loaded Fan by Multi-Objective Optimization of Through-Flow and High-Fidelity Aero-Mechanical Performances
   Michael Joly, Tom Verstraete, and Guillermo Paniagua

Unsteady Simulation of a 1.5 Stage Turbine Using an Implicitly Coupled Nonlinear Harmonic Balance Method
   Chad H. Custer, Jonathan M. Weiss, Venkataramanan Subramanian, William S. Clark, and Kenneth C. Hall

Gradient Enhanced Surrogate Models Based on Adjoint CFD Methods for the Design of a Counter Rotating Turbofan
   Jan Backhaus, Marcel Aulich, Christian Frey, Timea Lengyel, and Christian Voß

General Capability of Parametric 3D Blade Design Tool for Turbomachinery
   Kiran Siddappaji, Mark G. Turner, and Ali Merchant

Selection of One-Dimensional Design Parameter 'Reaction Degree' for 1st Stage of a Cooled Gas Turbine
   Hina Noor, Magnus Genrup, and Torsten Fransson

Engine Performance Prediction for Varied LPT Vane Geometry Utilizing Test Rig Data and Combined CFD and Cycle Models
   Michel van Rooij, Oscar Kogenhop, Edward Rademaker, Ray Woodason, and Bambang Soemarwoto

Through-Flow Analysis of Air-Cooled Gas Turbines
   Milan V. Petrovic and Alexander Wiedermann

Multiphase CFD Model Development for a Rotating Centrifugal Separator
   Daniel DeMore and William C. Maier
