CONTENTS

PART A

ADVANCED L/ILW CONDITIONING TECHNOLOGIES

ICEM2011-59008 ..................................................................................................................... 1
Immobilisation of Radwaste in Synthetic Rock: An Alternative to Cementation
Bernard Rottner

ICEM2011-59021 ..................................................................................................................... 5
Cementitious Materials for Radioactive Waste Management Within IAEA Coordinated
Research Project
Zoran Drace and Michael I. Ojovan

ICEM2011-59102 ..................................................................................................................... 15
Elution Behavior of Heavy Metals From Cement Solidified Products of
Incinerated Ash Waste
Yoshihiro Meguro, Yoshimi Kawato, Takuya Nakayama, Osamu Tomioka, and
Motoyuki Mitsuda

ICEM2011-59116 ..................................................................................................................... 21
Advanced Drying System to Meet Radiolysis Criteria of Metallic Waste
Masamichi Obata and Yasushi Ooishi

ICEM2011-59172 ..................................................................................................................... 25
Applying Fluid Dynamics Simulations to Improve Processing and Remediation of
Nuclear Waste
Kelly J. Knight, Jon Berkoe, Brigette Rosendall, Joel Peltier, and Chris Kennedy

APPLYING STRATEGIC PLANNING, DECISION-MAKING AND
RISK REDUCTION METHODOLOGIES IN EM

ICEM2011-59148 ..................................................................................................................... 33
Can Sustainability Be Applied to Our Remediation Challenges?
Peter Booth and Vicky Gaskin

CONTRIBUTION AND COMPLEMENTARIES OF INTERIM STORAGE,
GEOLICAL DISPOSAL, PARTITIONING AND TRANSMUTATION
REVERSIBILITY REGARDING GLOBAL OPTIMIZATION OF
RADWASTE MANAGEMENT

ICEM2011-59077 ..................................................................................................................... 39
New Nuclear Programmes Must Not Neglect Waste Management
Charles McCombie
D&D MANAGEMENT APPROACHES AND PLANNING TOOLS

How an Integrated Change Programme Has Accelerated the Reduction in High Hazard Nuclear Facilities at Sellafield
   Angela Mackintosh

Development of Computer Program for Estimating Decommissioning Cost
   Hak-Soo Kim and Jong-Kil Park

Use of Source Term and Air Dispersion Modeling in Planning Demolition of Highly Alpha-Contaminated Buildings
   James G. Droppo, Bruce A. Napier, Jeremy P. Rishel, and Richard W. Bloom

Magnox Swarf Storage Silo Liquor Effluent Management: Sellafield Site, Cumbria, UK
   Stephen Le Clerc

Implementation of the International Structure for Decommissioning Costing: Examples and Related IAEA Projects
   Vladimir Daniska, Michele Laraia, and Patrick O'Sullivan

Experience of Application of New Remote Controlled Instruments for Scanning of Distribution of Radioactive Contamination in Rooms With High Dose Rate
   V. E. Stepanov, A. S. Danilovich, O. P. Ivanov, V. N. Potapov, S. V. Smirnov, and A. G. Volkovich

D&D OF NON-REACTOR NUCLEAR FACILITIES

Decommissioning the Belgonucleaire Dessel Mox Plant: Presentation of the Project and Situation on 30/06/2011
   J. M. Cuchet, H. Libon, C. Verheyen, J. Bily, J. Custers, and R. Walthéry

Systematic Chemical Decontamination Using I$_7$F$_7$ Gas
   Haruhi Hata, Kaoru Yokoyama, and Noritake Sugitsue

Uranium Workshops Dismantling and Criticality Control
   Pierre Lisbonne and Julie Rosello

Decommissioning & Demolition of Facilities Used for the Storage & Stabilisation of Water Reactor Sludge
   N. Brown, R. M. Cornell, and A. Staples
ICEM2011-59133 .................................................................................................................. 129
The Complex Challenge of Repairing the Gantry Steelwork on the First Generation Magnox Storage Pond at Sellafield: Legacy Waste Storage, First Generation Magnox Storage Pond
   Ian E. Richardson

ICEM2011-59207 .................................................................................................................. 141
Decommissioning of the Radio Chemical Hot Laboratory of the European Commission Joint Research Centre of Ispra
   Daniele Ugolini, Francesco Rossi, and Francesco Basile

D&D OF POWER REACTORS AND RESEARCH REACTORS
ICEM2011-59013 .................................................................................................................. 151
Feedback From Westinghouse Experience on Segmentation of Reactor Vessel Internals
   Paul J. Kreitman, Joseph Boucau, Per Segerud, and Stefan Fallström

ICEM2011-59189 .................................................................................................................. 157
Full System Decontamination (FSD) Prior to Decommissioning
   Christoph Stiepiani

ICEM2011-59197 .................................................................................................................. 165
DfD: An Approach to New Reactor Designs
   Jas S. Devgun

ICEM2011-59261 .................................................................................................................. 175
The Removal, Transportation and Final Treatment and Conditioning of the Thetis Research Reactor Spent Fuel of the University of Ghent (Belgium) Achieved in 2010
   Hubert Thierens, Myriam Monsieurs, Vincent De pooter, Luc Noynaert, Patrick Maris, Luc Ooms, Patrick Lewandowski, Marnix Braeckeveldt, and Karel Strijckmans

ICEM2011-59321 .................................................................................................................. 183
The Decommissioning of the CIEMAT Nuclear Research Center
   Sergio Vidaechea and Manuel Ondaro

ICEM2011-59322 .................................................................................................................. 191
Update on José Cabrera NPP Decommissioning
   Nieves Martín and Manuel Rodríguez

ICEM2011-59366 .................................................................................................................. 199
Decommissioning and Dismantling of the French Brennilis NPP
   Thierry André and Werner Botzem

D&D RADIOLOGICAL CHARACTERIZATION AND MONITORING
ICEM2011-59024 .................................................................................................................. 203
Quantifying Tc-99 Contamination in a Fuel Fabrication Plant
   Carol Darbyshire and Pete Burgess

ICEM2011-59149 .......................................................... 277
Reuse of Conditional Released Materials From Decommissioning:
A Review of Approaches and Scenarios With Long-Term Constructions
Vladimir Daniska, Jozef Pítrský, František Ondra, Matej Zachar, and Vladimír Nécas

ICEM2011-59166 .......................................................... 287
New Degreasing Formulations for the Decontamination of Solid Substrates, Consistent
With Concentration and Vitrification Process of the Final Wastes
Jeremy Causse, Cyril Roussignol, Jean-François Valéry, and Jean-Charles Hamel

ICEM2011-59167 .......................................................... 291
Characterization of Iraq’s Remote Nuclear Facilities for Decommissioning and
Waste Management
Fouad Al-Musawi, Adnan Jarjies, and Ross A. Miller

ICEM2011-59206 .......................................................... 297
Remote Decommissioning of Blind Cells: APM 214 Facility CEA Marcoule
Olivier Calixte and Thomas Garnier

ICEM2011-59225 .......................................................... 301
Decommissioning of the A-1 NPP Heavy Water Evaporator Facility
Jan Medved and Ladislav Vargovcik

ICEM2011-59248 .......................................................... 309
Dealing With a Pa-231 Contaminated Ventilation Duct
Clare Irving, Pete Burgess, and Keith Stevens

ICEM2011-59249 .......................................................... 315
The Use of Standard Alpha and Beta Surface Scintillation Contamination Monitors to
Confirm the Contamination Fingerprint and to Check on Source Quality
Pete Burgess

ICEM2011-59250 .......................................................... 321
Measurement of Plutonium Contamination Through Paint Using a Fidler Probe
Robert Clark, Pete Burgess, and Ian Croudace

ICEM2011-59280 .......................................................... 327
Clearance of Buildings of NPP Würgassen (Germany) Using an Innovative
Clearance Concept
Stefan Wörlein, Marco Steinbusch, Alexander Kummer, Stefan Thierfeldt, and
Frank Schartmann

DISPOSAL SITE AND WASTE FORM CHARACTERIZATION AND
PERFORMANCE ASSESSMENT
ICEM2011-59093 .......................................................... 335
Mineralogical Analyses of Old (78 and 98 Years) Concrete
Tomoko Ishii, Hitoshi Owada, Hiroyuki Sakamoto, Masahito Shibata, and Kumi Negishi
Modeling of Alteration Behavior on Blended Cementitious Materials
Hitoshi Owada, Tomoko Ishii, Mayumi Takazawa, Hiroyasu Kato, Hiroyuki Sakamoto, and Masahito Shibata

Characterization and Assessment of the Groundwater Pathway for the Low Level Waste Repository, UK
Lee J. Hartley, Martin James, Peter Jackson, Matt Couch, and John Shevelan

Characterisation of the Geology of the UK Low Level Waste Repository
John Shevelan and Nicholas T. Smith

Evolution of Sorption Properties in Large-Scale Concrete Structures Accounting for Long-Term Physical-Chemical Concrete Degradation
Janez Perko, Diederik Jacques, Dirk Mallants, and Suresh Seetharam

Delivering Value for Money: Trust and Verify?
Alastair Laird

Set Up of an Environmental Monitoring System, Shchuchye, Russia Technical Assistance
Stephane Belbeze and Matthieu Hallouin

Optimisation (Sampling Strategies and Analytical Procedures) for Site Specific Environment Monitoring at the Areas of Uranium Production Legacy Sites in Ukraine
Oleg V. Voitsekhovych, Tatiana V. Lavrova, and Alexander B. Kostezh

Post-Iodine Production NORM Repository Technical Design and Reconstruction Experience in Turkmenistan
A. B. Gelbutovsky, P. I. Cheremisin, A. V. Troshev, A. J. Egorov, and M. M. Boriskin

Foam: Novel Delivery Technology for Remediation of Vadose Zone Environments
Danielle Jansik, Dawn M. Wellman, Shas V. Mattigod, Lirong Zhong, Yuxin Wu, Martin Foote, Fred Zhang, and Susan Hubbard
Soils Radiological Characterization Under a Nuclear Facility
Emilie Aubonnet and Didier Dubot

Radiological Evaluation of Contaminated Sites and Soils: VEgAS — An Expertise and Investigation Vehicle
Julien Attiogbe, Patrick De Moura, and Marie Lavielle

Characterization of a Deep Radiological Contamination: Integration of Geostatistical Processing and Historical Data
Yvon Desnoyers and Patrick de Moura

High-Density Gamma Radiation Spectrometry Surveys of Contaminated Land
Mike Davies, Robert Clark, and Ian Adsley

Remediation and Assessment of the National Radioactive Waste Storage and Disposal Site in Tajikistan
Nazirzhon T. Buriev, Dzhamshed A. Abdushukurov, and Tjalle T. Vandergraaf

Integrating History and Measurement Into a Case for Site Release
Angela Bartlett, Mike Davies, Peter Burgess, and Gavin Coppins

Determination of the Radionuclide Contamination on the Absheron Peninsula in Azerbaijan
Tjalle T. Vandergraaf, Gudrat G. Mamedov, Mahammadali A. Ramazanov, Jalal A. Naghiyev, Afat A. Mehdiyeva, and Nazim A. Huseynov

Industrial Experience Feedback of a Geostatistical Estimation of Contaminated Soil Volumes
Claire Faucheux and Nicolas Jeannée

Sampling and Decommissioning: CETAMA Seminar and International Overview
Guy Granier, Danièle Roudil, and Didier Dubot

Groundwater Remediation of Hexavalent Chromium Along the Columbia River at the Hanford Site in Washington State, USA
Dyan L. Foss and Briant L. Charboneau
Decommissioning of the Active Storage Facility for Residuals in Rheinsberg (Brandenburg/Germany) and Results of Groundwater Monitoring
Mathias Steinhoff

Environmental Remediation of an ALSTOM Grid Industrial Site (France)
Stéphanie Roméro

Design and Installation of a Permeable Treatment Wall to Passively Remove Strontium-90 From Groundwater at a Former Commercial Nuclear Fuel Reprocessing Facility in New York
Douglas Bablitch, Rupeet Malhotra, Rick Frappa, and Scott Warner

Optimization of Radioactive Waste Cementation for Decommissioning of Salaspils Research Reactor
A. Abramenkovs and J. Malnacs

Conditional Release of Steel From Decommissioning in a Form of Reinforced Concrete
Jozef Pitršky, Miroslav Brodnan, and Vladimir Necas

Development of Nuclear Facilities Piping Cleaning System Using Microbubble
Jongseon Jeon, Sangchul Lee, Haksoo Kim, Byoungsub Han, and Wisoo Kim

A Matrix-Inversion Method for Gamma-Source Mapping From Gamma-Count Data
Richard K. Bull, Ian Adsley, and Claire Burgess

Reuse of Conditionally Released Steel: Proposals and Evaluation of Processes for Manufacturing of Steel Elements and Processes for Construction of Selected Scenarios
Peter Bezák, František Ondra, Eva Hajková, Vladimír Daniška, and Vladimír Necas

Influence of the Conditional Release of the Materials With Very Low Level of Radioactivity on the Environment
Slavka Prvakova, Adela Mrskova, and Jozef Pitršky

Methodology of External Exposure Calculation for Reuse of Conditional Released Materials From Decommissioning
František Ondra, Marek Vaško, and Vladimír Necas
Uncertainty Analysis of Activity Measurement of New Monitoring System for Free-Release for NPP A-1 Decommissioning, Slovakia
Alojz Slaninka, Ondrej Slavik, and Vladimir Necas

Use of Highly Pressurized Liquid Nitrogen Technology for Concrete Scabbling Application at SICN Nuclear Facility
Fabrice Moggia, Claire-Emilie Vaudey, Thierry Varet, Valerie Toulemonde, Frederic Richard, Gary Anderson, and Frederique Damerval

Laser Removal of Contaminants on the Metal Surface
Hui-Jun Won, Sun-Hee Jung, Chong-Hun Jung, Byung-Seon Choi, Kune-Woo Lee, and Jai-Kwon Moon

The Assessment of the Waste Management Plan to Decommissioning of Cernavoda NPP for Environmental Impact Reduction
Gheorghe Barariu

Application of the Data Quality Objective Process to the Partial De-Licensing at Oldbury Nuclear Power Station
Denis Buckley

New Generation of Diamond Toolings for Facilitating Decommissioning Operations
Claude Besson, Erico Mariotti, Alexandre Mouysset, Lorenz zur Nedden, and Bernard Delannay

Technical Justification and Choice for Remediation Methods
Mark Morton and Janaka Jayamaha

GLOBAL PARTNERSHIP IN ENVIRONMENTAL MANAGEMENT

UK Contributions to the Decommissioning of the BN-350 Reactor in Kazakhstan: 2002-2011
Steven Laws, David Wells, and Andrew Herrick

Environmental and Radiological Remediation Under Canada’s Global Partnership Program 2004-11
Michael J. Washer

Methodological and Practical Bases of Providing Information Support to Activities on Environmental Remediation of the Spent Nuclear Fuel and Radioactive Waste Temporary Storage Facility in Gremikha
D. B. Stepennev, A. P. Varnavin, A. A. Zakharchev, and L. Pillette-Cousin
Dismantling of Civilian Nuclear Powered Fleet Technical Support Vessels: Engineering Solutions
Konstantin N. Kulikov, Rinat A. Nizamutdinov, and Andrey N. Abramov

Progress in International Cooperation on Regulation of Legacy Management: Experience and New Developments in Norwegian Cooperation Programmes
Malgorzata Karpov Sneve

GLOBAL PARTNERSHIPS AND NATIONAL INITIATIVES IN ENVIRONMENTAL MANAGEMENT

Advanced Simulation Capability for Environmental Management (ASCEM)
Paul Dixon, Mark Williamson, Mark Freshley, David Moulton, Ian Gorton, Elizabeth Keating, Yvette Collazo, Kurt Gerdes, and Juan Meza

The Global Threat Reduction Initiative’s Radiological Security Cooperation With Russia
Tiffany A. Blanchard, William J. Abramson, James W. (J. R.) Russell, and Catherine K. Roberts

Kola Peninsula Radwaste Management in the Framework of the Italian-Russian Cooperation Agreement for Global Partnership
Massimiliano Nobile, Dmitry Izmailov, Antonino Spadoni, and Oleg Uryvsky

HLW, FISSILE, TRU AND SPENT FUEL SHORT AND LONG-TERM STORAGE ISSUES

Advanced Surveillance Technologies for Used Fuel Long-Term Storage and Transportation
Hanchung Tsai, Yung Y. Liu, Mark Nutt, and James Shuler

West Valley Demonstration Project High Level, Transuranic, and Greater Than Class C Wastes
James A. Blankenhorn

Managing Aging Effects on Used Fuel Dry Cask for Very Long-Term Storage
Omesh Chopra, Dwight Diercks, David Ma, Vikram Shah, Shiu-Wing Tam, Ralph Fabian, Yung Liu, and Mark Nutt

Generic Design Assessment of Long-Term Spent Fuel Storage for New Reactors in the UK
ICEM2011-59237 ........................................................................................................ 731
Industrial Complementarities Between Interim Storage and Reversible Geological
Repository
Jean-Michel Hoorelbeke

ICEM2011-59246 ........................................................................................................ 737
Application of Coupled Thermo-Hydro-Mechanical-Chemical (THMC) Processes in
Hydrothermal Systems to Processes Near a High-Level Nuclear Waste Repository
Geoffrey J. Peter

L/ILW TREATMENT TECHNOLOGY DEVELOPMENT AND
IMPLEMENTATION
ICEM2011-59004 ........................................................................................................ 747
Preliminary Demonstration of GeoMelt Treatment of Hanford's K-Basin Sludge
Keith Witwer

ICEM2011-59018 ........................................................................................................ 753
Waste Loading Enhancements for Hanford Low-Activity Waste Glasses
Albert A. Kruger

ICEM2011-59084 ........................................................................................................ 755
THOR® Steam Reforming Technology for the Treatment of Complex and
Problematic Wastes
J. Brad Mason and Adam L. Foster

ICEM2011-59103 ........................................................................................................ 765
A Room Temperature Stabilization and Waste Volume Reduction Method Tested on
Belgian Intermediate-Level Homogeneous Bituminized Waste (Eurobitum)
Nathalie R. E. N. Impens, Lesley Adriaensen, Jan Deckers, and Pierre Van Iseghem

ICEM2011-59233 ........................................................................................................ 777
Standardizing of LLW/ILW Treatment for Russian Type Pressure Water Reactors
Klaus Büttnner and Rainer Slametschka

ICEM2011-59264 ........................................................................................................ 783
35 Years of Incineration in Studsvik: Lessons Learned and Recent Modifications and
Improvements
Maria Lindberg, Joakim Lövstrand, and Karin von Kronhelm
