2012 IEEE 11th International Conference on Trust, Security and Privacy in Computing and Communications

(TrustCom 2012)

Liverpool, United Kingdom
25-27 June 2012

Pages 1342-2039
Development of a Typing Behaviour Recognition Mechanism on Android .................................................. 1342

Xuan Huang, Geoffrey Lund, and Andrew Sapeluk
Network Security (2)

Domain Name to IP Address Resolution System with Multiple Name Servers
Adaptable to MANETs ................................................................. 1348
Younchan Jung and Manuel Peradilla

A Scalable Anonymity Scheme Based on DHT Distributed Inquiry ................................ 1358
Wentao Wang, Yuewu Wang, Jiwu Jing, and Zhongwen Zhang

Secure Reputation Framework for BitTorrent ........................................ 1364
Hani Ragab Hassen, Olga Jones, and Nikos Galanis

RedJsod: A Readable JavaScript Obfuscation Detector Using Semantic-based Analysis ........ 1370
Ismail Adel Al-Taharwa, Hahn-Ming Lee, Albert B. Jeng, Kuo-Ping Wu, Ching-Hao Mao,
Te-En Wei, and Shyi-Ming Chen

An Attribute-Based Encryption Scheme Secure against Malicious KGC ......................... 1376
Guoyan Zhang, Lei Liu, and Yang Liu

Social Networks

Social Network Content Management through Watermarking ........................................ 1381
Athanasios Zigomtros, Achilleas Papageorgiou, and Constantinos Patsakis

U+F Social Network Protocol: Achieving Interoperability and Reusability
between Web Based Social Networks ........................................................................ 1387
Lorena González-Manzano, Ana I. González-Tablas, José M. de Fuentes, and Arturo Ribogorda

Mitigating SPIT with Social Strength ........................................................................ 1393
Muhammad Ajmal Azad and Ricardo Morla

Evolution of Cooperation Based on Reputation on Dynamical Networks ...................... 1399
Linlin Tian, Mingchu Li, Weifeng Sun, Xiaowei Zhao, Baohui Wang, and Jianhua Ma

Engagement and Cooperation in Social Networks: Do Benefits and Rewards Help? .......... 1405
Sanat Kumar Bista, Surya Nepal, and Cecile Paris

Trust Model and Applications

Practicable Unified Security, Trust and Privacy (STP) Framework for Federated
Access Management (FAM) .............................................................................. 1411
Jamalul-lail Ab Manan, Zubair Ahmad Khattak, and Suziah Sulaiman

Evaluation of Trustworthiness of Reviews in the Online Travel Community ............... 1417
Yifang Ku, Hsiao-Hui Li, and Fan Wu

Research on Trust Issue of Current Chinese C2C E-commerce: Problems
and Solutions ................................................................................................ 1423
Yu Zhang

How to Track Your Data: Rule-Based Data Provenance Tracing Algorithms .................. 1429
Olive Qing Zhang, Ryan K.L. Ko, Markus Kirchberg, Chun Hui Suen, Peter Jagadpramana,
and Bu Sung Lee
IUCC-2012: The 11th IEEE International Conference on Ubiquitous Computing and Communications

Cloud Computing and Internet of Things

VehiCloud: Cloud Computing Facilitating Routing in Vehicular Networks .......................................................... 1438
Yang Qin, Dijiang Huang, and Xinwen Zhang

Geographic-Based Service Request Scheduling Model for Mobile Cloud Computing ........................................... 1446
Tianyi Xing, Hongbin Liang, Dijiang Huang, and Lin X. Cai

Evaluating Ubiquitous Sensor Information Sharing on the Internet-of-Things ......................................................... 1454
Stefan Forsström, Patrik Österberg, and Theo Kanter

A Block-Based Still Image Coder for Parallel Computing ......................................................................................... 1461
Yu Lin Wang, Chia-Te Liao, and Alvin W.Y. Su

Optical and Broadband Networks

The Load Balancing Problem in Extended OTIS-n-Cube Interconnection Networks ............................................. 1469
Jehad Al-Sadi

Performances of CS-DCSK UWB Communication System in the Presence of Narrow Band Interferers ............. 1475
Zhixiong Chen, Weikai Xu, Jin Huang, and Lin Wang

Enhanced Multi-rate Multicast for Optimal User Satisfaction and Efficient Bandwidth Utilization ................. 1481
Khodor Hamandi, Farah Saab, and Ayman Kayssi

User Satisfaction Based ZFBF Scheduling Algorithm in Multi-user MIMO System ....................................... 1486
Hailang Cao, Ping Wang, Lei Chen, Fuqiang Liu, Xinhong Wang, Yin Zhu, and Huifang Pang

Discovering a Large Scale Internet Topology: Complementary and Contrast View ........................................ 1491
Hao Yin, Heungsun Chang, Fangming Liu, Tongyu Zhan, Ying Zhang, and Bo Li

Pervasive Computing

Interference Free Integration of Pervasive Applications ......................................................................................... 1499
Christophe Soares, Rui S. Moreira, Ricardo Morla, José Torres, and Pedro Sobral

Including Metadata into an Ontology Based Pervasive Computing Architecture ............................................ 1507
Martin Peters, Christopher Brink, and Sabine Sachweh

Chronological Accommodation of Oculo-motors in Response to Varying Sizes of Visual Stimuli ................ 1513
Minoru Nakayama and Masashi Fujimoto

Ubiquitous Secure Interactions with Intelligent Artifacts on the Internet-of-Things ..................................... 1520
Stefan Forsström, Theo Kanter, and Patrik Österberg
Optimal Resource Allocation for Multi-layered Video Streaming over Multi-channel Cognitive Radio Networks ................................................................. 1525
Bo Guan and Yifeng He

Distributed Rerouting for Multiple Sessions in Cognitive Radio Networks .................................................. 1529
Ying Dai and Jie Wu

Sensor Networks

Formal Verification of a Key Agreement Protocol for Wireless Sensor Networks ................................................. 1537
Yue Li, Dehua Chen, and Thomas Newe

Window Energy Detection for Unmanned Surveillance with PIR Sensor ............................................................. 1543
Sang Gi Hong, Young Bag Moon, Nae Soo Kim, and Whan Woo Kim

A Dynamic Bandwidth Allocation Algorithm for a Multi-sink Wireless Sensor Network Converged with a Passive Optical Network ........................................... 1548
Zhenfei Wang, Kun Yang, and David K. Hunter

Fast and Efficient Information Dissemination in Event-Based Wireless Sensor Networks ................................ 1555
Sain Saginbekov and Arshad Jhwnka

Data-centric Dissemination to Mobile Sink Group in Wireless Sensor Networks .............................................. 1562
Hee-Sook Mo, Hyochan Bang, and Cheol Sig Pyo

Ad Hoc Networks

Link Stability Evaluation and Stability Based Multicast Routing Protocol in Mobile Ad Hoc Networks .................... 1570
Zhuyong Zhang, Zhiping Jia, and Hui Xia

A Reliability-Based Routing Scheme for Vehicular Ad Hoc Networks (VANETs) on Highways .......................... 1578
Mahmoud Hashem Eiza and Qiang Ni

Hyper-mutation Based Genetic Algorithms for Dynamic Multicast Routing Problem in Mobile Ad Hoc Networks ........................................................................ 1586
Hui Cheng and Shengxiang Yang

A Reception Based Node Selection Protocol for Multi-hop Routing in Vehicular Ad-hoc Networks ..................... 1593
M. Bilal, M.O. Hussain, and P.M.L. Chan

Flow-Aware Broadcasting Algorithm ............................................................................................................. 1601
Diogo Lima and Hugo Miranda
**Wireless and Mobile Networks**

User Preferences-Adaptive Dynamic Network Selection Approach in Cooperating Wireless Networks: A Game Theoretic Perspective ................................................................. 1609
  
  Haris Pervaiz and Qiang Ni

Design and Analysis of Multicast-Based Publisher/Subscriber Models over Wireless Platforms for Smart Grid Communications ................................................................. 1617
  
  Sina Fateri, Qiang Ni, Gareth A. Taylor, Siva Panichadcharam, and Ioana Pisica

A HiperLAN/2 Based MAC Protocol for Efficient Vehicle-to-Infrastructure Communication Using Directional Wireless Mesh Backbone ........................................ 1624
  
  Sandip Chakraborty and Sukumar Nandi

Location Assisted Vertical Handover Algorithm for QoS Optimization in End-to-end Connections ................................................................. 1632
  
  Martin S. Dam, Steffen R. Christensen, Lars M. Mikkelsen, and Rasmus L. Olesen

Collision and Detection Performance with Three Overlap Signal Collisions in Space-Based AIS Reception ................................................................. 1641
  
  Menghui Yang, Yongzhong Zou, and Li Fang

Error Performance Analysis of Opportunistic Relaying System Based on DCSK ................................................................. 1649
  
  Jin Huang, Zhexin Xu, Weikai Xu, and Lin Wang

Modelling of Prioritised Vertical Handoff Scheme in Integrated UMTS/WLANs ................................................................. 1654
  
  Z. Zabanoot and G. Min

**Mobility Management**

Design and Evaluation of an Operational Mobility Model over IPv6 (OMIPv6) Based on ID/Locator Split Architecture ................................................................. 1661
  
  Yulei Wu, Jingguo Ge, Junling You, and Yuepeng E.

AR Teleport: Digital Reconstruction of Historical and Cultural-Heritage Sites Using Mobile Augmented Reality ................................................................. 1666
  
  Jiyoung Kang

A Model Driven Infrastructure for Context-Awareness Mobile Assessment Personalization ................................................................. 1676
  
  Ahlem Harchay, Lilia Cheniti-Belcadhi, and Rafik Braham

Modeling an Enhanced Tuple Space Based Mobile Middleware in UNITY ................................................................. 1684
  
  Suddhasil De, Sukumar Nandi, and Diganta Goswami

A Trajectory Model to Deal with Transmission Failures ................................................................. 1692
  
  Francisco Moreno, Sebastian Munera, and Luis Munoz

Improving the Energy-Efficiency of GPS Based Location Sensing Smartphone Applications ................................................................. 1698
  
  Thomas Olutoyin Oshin, Stefan Poslad, and Athen Ma
Efficient Internet Mapping in the Presence of Network Load Balancers .........................................................1706
Mehiar Dabbagh, Naoum Sayegh, and Ayman Kayssi

Network Protocols
The Impact of Sensor Node Distribution on Routing Protocols Performance: A
Comparitive Study .................................................................1714
Uthman Baroudi, Anas Al-Roubaiey, Samir Mekid, and Abdelhafid Bouhraoua
A Temporalised Belief Logic for Reasoning about Authentication Protocols .......................................................1721
Ji Ma and Klaus-Dieter Schewe
Cross-Technology Overlay Control Protocol for Resource Management in Converged
Networks ..................................................................................1729
Andreas Bontozoglou, Kun Yang, and Ken Guild
Improving Query for P2P SIP VoIP ...........................................1735
Linchen Yu
A Round Robin Load Balancing and Redundancy Protocol for Network Routers ......................................................1741
Sarah Abdallah, Elias Najjar, and Ayman Kayssi

Smart Home and Ambient Intelligence
Genetic Algorithm in Resource Provider Selection for Personal Live Content Delivery
in User-Provided Platform .............................................................1748
Joseph C.H. So and Po-choi Wong
On Designing Privacy-Aware Data Upload Mechanism — Towards
Information-Gathering System for Disasters .................................................1755
Shinsaku Kiyomoto, Yutaka Miyake, and Toshiaki Tanaka
A Hybrid Ontological and Temporal Approach for Composite Activity Modelling .................................................1763
George Okeyo, Liming Chen, Hui Wang, and Roy Sterritt
Categorising Context and Using Short Term Contextual Information to Obtain Long
Term Context ..............................................................................1771
Abhinav Duggal, Manoj Misra, and Ramesh Srinivasaraghavan
Semantic Decision Support Models for Energy Efficiency in Smart-Metered Homes ...........................................1777
Yan Tang and Ioana G. Ciuciu
Robot Navigation Using Brain-Computer Interfaces .........................................................................................1785
Athanasis Vourvopoulos and Fotis Liarokapis
KAMIoT-2012: International Workshop on Knowledge Acquisition and Management in the Internet of Things

A Comprehensive Ontology for Knowledge Representation in the Internet of Things ..............................................1793
    Wei Wang, Suparna De, Ralf Toenjes, Eike Reetz, and Klaus Moessner

Hybrid Ontology Matching for Solving the Heterogeneous Problem of the IoT ..................................................1799
    Zhichun Wang, Rongfang Bie, and Mingquan Zhou

Design of Real Time Multimedia Platform and Protocol to the Internet of Things ..............................................1805
    Wei Jiang and Limin Meng

Knowledge Acquisition and Management Architecture for Mobile and Personal Health Environments Based on the Internet of Things .................................................................1811
    Antonio J. Jara, Miguel A. Zamora, and Antonio F. Skarmeta

Efficient Searching Mechanism for Trust-Aware Recommender Systems Based on Scale-Freeness of Trust Networks ...........................................................................................................1819
    Weiwei Yuan, Donghai Guan, Lei Shu, and Jianwei Niu

Square-Root Unscented Kalman Filtering Based Localization and Tracking in the Internet of Things .................................................................1824
    Junqi Guo, Hongyang Zhang, Yunchuan Sun, and Rongfang Bie

A Text Representation Method Based on Harmonic Series .........................................................................................1830
    Xue Chen and Chao Wu

Research on Embedding ECC into RFID Authentication Protocol ........................................................................1835
    Guicheng Shen and Bingwu Liu

A Hybrid MPI/OpenMP Model Based on DDM for Large-Scale Partial Differential Equations ..................................................1839
    Dandan Li, Xiaohui Ji, Zhangbing Zhou, and Qun Wang

Real-Time Distributed Sensor-Assisted mHealth Applications on the Internet-of-Things ......................................1844
    Stefan Forsström, Theo Kanter, and Olle Johansson

MultiCom-2012: The Second International Workshop on Multimedia Communications and Networking

Quality Assessment of Video Transmission in Heterogeneous Networks as Applied to Real-Time Telecare ..............1850
    Colin Bailey and Xiao-Hong Peng

Time- and Frequency-Domain Impulsive Noise Spreader for OFDM Systems .....................................................1856
    S. Nayyef, C. Tsimenidis, A. Al-Dweik, B. Sharif, and A. Hazmi

DSDV, DYMO, OLSR: Link Duration and Path Stability .........................................................................................1862
    S. Kumar, N. Javaid, Z. Youstf, H. Kumar, Z.A. Khan, and A. Bibi

Analysis and Modeling Experiment Performance Parameters of Routing Protocols in MANETs and VANETS ..........1867
    S. Sagar, N. Javaid, Z.A. Khan, J. Saqib, A. Bibi, and S.H. Bouk
AIPNGN-2012: The Second International Workshop on All-IP Next Generation Networks

Role Based Privacy-Aware Secure Routing in WMNs .................................................................1872
   Hui Lin, Jia Hu, Atulya Nagar, and Li Xu

An Ant Colony Optimization Algorithm for Overlay Backbone Multicast Routing in Content Delivery Networks .................................................................1878
   Gang Liu, Hua Wang, and Hong Zhang

The Research and Application of a Specific Instruction Processor for SMS4 ..................................1883
   Zhennzhou Li, Feng Li, Zhiping Jia, Lei Ju, and Renhai Chen

Prediction-Based Algorithm for Event Detection in Wireless Sensor Networks ................................1889
   Yongji Yu, Zhiping Jia, and Ruhua Zhang

IWVT-2012: The Third International Workshop on Virtualization Technology

Testing Method of Code Redundancy Simplification Based on Program Dependency ..........................1895
   Yang Fan, Zhang Huanguo, Yan Fei, and Yang Jian

Dynamic Optimization on Multi-core Platform ..............................................................................1901
   Jiahui Wen, Li Shen, and Zhiying Wang

A Dynamic Cache Partitioning Mechanism under Virtualization Environment ..............................1907
   Xiaolin Wang, Xiang Wen, Yechen Li, Yingwei Luo, Xiaoming Li, and Zhenlin Wang

HVD-TLS: A Novel Framework of Thread Level Speculation .......................................................1912
   Xu Fan, Shen Li, and Wang Zhiying

An Efficient Distributed Transactional Memory System ....................................................................1918
   Xin Peng, Xiaofei Liao, Hai Jin, Xuepeng Fan, Xuping Tu, and Linchen Yu

IEETeL-2012: The Third International Workshop on Interactive Environments and Emergent Technologies for eLearning

Causal Analysis of Student’s Characteristics of Note-Taking Activities and Learning .................................1924
   Minoru Nakayama, Kouichi Mutsuura, and Hiroh Yamamoto

Research on Cooperative Learning of Digital English Writing in Network Environment ....................1930
   Xiaodong Li and Hong Zhang

Development and Validation of a Virtual Worklog as a Collaboration Tool for the Keluwen Learning Community .................................................................1936
   Katherine Inalof, Julio Guerra, and Eliana Scheihing

Actualization of a Course Library through Influential Twitter Knowledge ...........................................1942
   Malinka Ivanova and Tatyana Ivanova
AUCN-2012: The 2012 International Symposium on Advances in Ubiquitous Computing and Networking

Cloud Computing and Wireless Networks

The Current State of Understanding of the Energy Efficiency of Cloud Computing ........................................1948
Francis Owusu and Colin Pattinson

Enabling the IoT Paradigm in E-health Solutions through the VIRTUS Middleware .........................................1954
Marco Bazzani, Davide Conzon, Andrea Scalera, Maurizio A. Spirito, and Claudia Irene Trainito

Ubiquitous Healthcare in Wireless Body Area Networks .................................................................1960
N.A. Khan, N. Javaid, Z.A. Khan, M. Jaffar, U. Rafiq, and A. Bibi

Performance Study of Localization Techniques in Wireless Body Area Sensor Networks ................................1968
Obaid ur Rehman, Nadeem Javaid, Ayesha Bibi, and Zahoor Ali Khan

Radio Frequency Energy Harvesting Characterization: An Experimental Study ...........................................1976
Uthman Baroudi, Amin-ud-din Qureshi, Samir Mekid, and Abdelhafid Bouhraoua

Network Analysis

A Novel System for Evaluating Website Using Link Analysis .................................................................1982
Xiaoqiang Li, Yun Mi, Yingwei Jin, Heng Qi, and Zhiyang Li

An Efficient Detecting Communities Algorithm with Self-Adapted Fuzzy C-Means Clustering in Complex Networks .................................................................1988
Jianzhi Jin, Yuhua Liu, Laurence T. Yang, Naixue Xiong, and Fang Hu

An Analysis of Peer to Peer Protocols for Massively Multiplayer Online Games ........................................1994
Andrew Jones, Lu Liu, Nick Antonopoulos, and Weining Liu

Padati: A Robust Pedestrian Dead Reckoning System on Smartphones ......................................................2000
Deepak Pai, Inguva Sasi, Phani Shekhar Mantripragada, Mudit Malpani, and Nitin Aggarwal

High Accuracy 3D Indoor Positioning Using Broadband Ultrasonic Signals .............................................2008
Sérgio Ivan Lopes, José Manuel Neto Vieira, and Daniel Albuquerque

Ubiquitous System, Services, and Applications

Weighted Flow and Spectral Resource to Enhance QoS for Multi-hop Cognitive Radio Networks ..................2015
Yean-Fu Wen

An Integrated Mobile System for Long-Term Aerobic Activity Monitoring and Support in Daily Life ..........2021
Attila Reiss, Didier Stricker, and Ilias Lamprinos

Foundations for a Platform to Develop Context-aware Systems by Domain Experts ..................................2029
David Martín, Carlos Lamsfus, Aukene Alzua, and Diego López de Ipiña
