CISIS 2012 Main Conference

Session 1: Artificial Intelligence and Agent Technology
Experience Generation in Tic-Tac-Toe for General Game Learning ......................................................... 1
   Xiaojian Song

An Interaction Protocol for Mutual Assistance in Agent Teamwork ................................................................. 6
   Jernej Polajnar, Narek Nalbandyan, Omid Alemi, and Desanka Polajnar

A Notation for Modeling Jason-Like BDI Agents ...................................................................................... 12
   Massimo Cossentino, Antonio Chella, Carmelo Lodato, Salvatore Lopes, Patrizia Ribino, and Valeria Seidita

Session 2: Support Systems and Services
Benchmarking and Evaluation Support for Self-Adaptive Distributed Systems ........................................... 20
   Ante Vilenica and Winfried Lamersdorf

Experimental Evaluation of a Waste Management Robot System ..................................................................... 28
   Keita Matsuo, Kouhei Umezaki, Evjola Spaho, Leonard Barolli, Jiro Iwashige, and Makoto Takizawa

Using Serious Games to Motivate Children with Cystic Fibrosis to Engage with Mucus Clearance Physiotherapy ................................................................. 34
   Andreas Oikonomou and David Day

A Universal Push Service for Mobile Devices ................................................................................................... 40
   Jonas Brüstel and Thomas Preuss

Session 3: Intelligent and Adaptive Systems
Forces That Drive Organizational Change in an Adaptive Virtual Organization .............................................. 46
   Sergio Esparcia and E. Argente

A Comparison Study between Two Fuzzy-Based Trustworthiness Systems for P2P Networks ...................... 54
   Kouhei Umezaki, Evjola Spaho, Leonard Barolli, Fatos Xhafa, Keita Matsuo, and Jiro Iwashige
Towards Automatic Analysis of Cloud Vendors APIs for Supporting Cloud Application Portability ..............................................................61
Giuseppina Cretella and Beniamino Di Martino

Real-Time Classification of Sports Movement Using Adaptive Clustering ..............................................................68
Kin Fun Li, Ana-Maria Sevcenco, and Kosuke Takano

**Session 4: Complex Systems, Software Modeling, and Analytics**

Customizing Rational Unified Process in a Systems Integration Scenario ..............................................................76
Erida Lice and Marenglen Biba

Clifford Algebra Based Edge Detector for Color Images ..................................................................................84
Silvia Franchini, Antonio Gentile, Filippo Sorbello, Giorgio Vassallo, and Salvatore Vitabile

Mission Operations Scheduling: Complexity and Resolution Methods ..........................................................92
Fatos Xhafa, Junzi Sun, Admir Barolli, and Makoto Takizawa

Coverage of Design for Service Principles in Software Engineering .........................................................100
Markus Aleksy

**Session 5: Database and Data Mining Applications**

Monitoring and Control of Machining Process by Data Mining and Pattern Recognition ..............................................106
Soumaya Yacout, Mouhab Meshreki, and Helmi Attia

The F&A Methodology and Its Experimental Validation on a Real-Life Parallel Processing Database System ..................................................114
Ladjel Bellatreche, Soumia Benkrid, Alain Crolotte, Alfredo Cuzzocrea, and Ahmad Ghazal

Simultaneous Resolution of Buffer Allocation and Query Scheduling Problems .............................................122
Amira Kerkad, Ladjel Bellatreche, and Dominique Geniet

**Session 6: Multimedia Systems and Virtual Reality**

An Explorable Immersive Panorama ........................................................................................................130
Marzio Guarnaccia, Orazio Gambino, Roberto Pirrone, and Edoardo Ardizzone

Combined Opportunity Cost and Image Classification for Non-Linear Image Enhancement ............................................135
Lung-Jen Wang and Ya-Chun Huang

Multimedia Transmissions over a MANET Testbed: Problems and Issues .........................................................141
Elis Kulla, Makoto Ikeda, Tetsuya Oda, Leonard Barolli, Fatos Xhafa, and Makoto Takizawa
Quorums for Replication of Multimedia Objects in P2P Overlay Networks ......................................................... 148
Tadateru Ohkawara, Ailixier Aikebaier, Tomoya Enokido, and Makoto Takizawa

Session 7: Security and Trusted Computing
Split Message-Based Anonymity for JXTA Applications .......................................................... 156
Joan Amedo-Moreno and Noeml Pérez-Gilabert
Multiple Filters of Spam Using Sobel Operators and OCR ......................................................... 164
Peng Wan and Minoru Uehara
Intrusion Tolerance in Cloud Applications: The mOSAIC Approach ........................................ 170
Massimo Ficco and Massimiliano Rak
Secure Inter Vehicle Communications ....................................................................................... 177
Mimoza Durresi, Arjan Durresi, and Leonard Barolli

Session 8: Semantic Web, Web Services, and Data Integration
On-Demand Web Search Using Browser-Based Volunteer Computing ........................................ 184
Tomasz Krupa, Przemyslaw Majewski, Bartosz Kowalczyk, and Wojciech Turek
Supporting Value Chain Integration through Ontology-Based Modeling .................................. 191
Corinna Engelhardt-Nowitzki, Klaus Arthofer, Natalia Kryvinska, and Christine Strauss
Towards a Semantic Engine for Cloud Applications Development ........................................ 198
Giuseppina Cretella and Beniamino Di Martino

Session 9: Intelligent Systems and Algorithms
User-Centered Evaluation of Recommender Systems with Comparison between Short and Long Profile .......................................................... 204
Francesco Epifania and Paolo Cremonesi
An Intelligent System for Building Bioinformatics Workflows .................................................. 212
Antonino Fiannaca, Salvatore Gaglio, Massimo La Rosa, Riccardo Rizzo, and Alfonso Urso
Object Tracking Based on Fuzzy Information Employing a Particle Filter Algorithm .......................................................... 219
Ehsan Jafari, Saeed Tossizadeh, and Saeed Ahoon Manesh
Leader Election: From Higham-Przytycka's Algorithm to a Gracefully Degrading Algorithm .......................................................... 225
Itziar Arrieta, Federico Fariña, José Ramón G. de Mendivil, and Michel Raynal
Session 10: Cloud Computing

Cloud Virtual Machine Scheduling: Modelling the Cloud Virtual Machine Instantiation .............................................................. 233

Stelios Sotiriadis, Nik Bessis, Fatos Xhafa, and Nick Antonopoulos

Large-Scale Context Provisioning: A Use-Case for Homogenous Cloud Federation .......................................................... 241

Saad Liaquat Kiani, Ashiq Anjum, Nik Bessis, and Richard Hill

Agents Based Cloud Computing Interface for Resource Provisioning and Management ......................................................... 249

Salvatore Venticinque, Luca Tasquier, and Beniamino Di Martino

A Framework for User Feedback Based Cloud Service Monitoring .............................................................. 257

Zia ur Rehman, Omar K. Hussain, Sazia Parvin, and Farookh K. Hussain

Session 11: Energy Aware Information Systems

Motoi Yamagiwa and Minoru Uehara

Energy-Aware Distributed Systems for Computation and Storage-Based Applications ......................................................... 269

Takuro Inoue, Ailixier Alkebaier, Tomoya Enokido, and Makoto Takizawa

Energy-Efficient Server Selection Algorithm Based on the Extended Simple Power Consumption Model ...................................... 276

Tomoya Enokido and Makoto Takizawa

Session 12: Ad Hoc Networks

Performance Investigation of a MANET Testbed in Outdoor Stairs Environment for Different Scenarios ........................................ 284

Masahiro Hiyama, Elis Kulla, Tetsuya Oda, Makoto Ikeda, Leonard Barolli, and Makoto Takizawa

Congestion Control for Multi-flow Traffic in Wireless Mobile Ad-Hoc Networks .............................................................. 290

Makoto Ikeda, Elis Kulla, Masahiro Hiyama, Leonard Barolli, Rozeta Miho, and Makoto Takizawa

Ad Hoc Wireless Communications for Marketing Purposes .............................................................. 298

Mimoza Durresi, Illiana Shukallari, and Arjan Durresi

Evaluation of Never Die Network for a Rural Area in an Ultra Large Scale Disaster ......................................................... 306

Noriki Uchida, Kazuo Takahata, Yoshitaka Shibata, and Norio Shiratori
Session 13: Sensor and Mesh Networks
Performance Evaluation of WMN-GA System for Low Densities of Clients and Different Settings of Population Size ............................................ 314
Tetsuya Oda, Admir Barolli, Evjola Spaho, Leonard Barolli, Fatos Xhafa, and Makoto Takizawa
Performance Evaluation of WSNs for Different MAC Protocols Considering TwoRayGround Radio Model and AODV Routing Protocol .............................................. 320
Tao Yang, Tetsuya Oda, Leonard Barolli, Fatos Xhafa, Arjan Durresi, and Makoto Takizawa
Domain Independent Architecture and Behavior Modeling for Pervasive Computing Environments .................................................... 327
Martin Peters, Christopher Brink, and Sabine Sachweh

Session 14: Algorithms and Techniques
Tuning of Operators in Memetic Algorithms for Independent Batch Scheduling in Computational Grids ............................................. 335
Fatos Xhafa, Bernat Duran, Leonard Barolli, Vladi Kolici, Rozeta Miho, and Makoto Takizawa
Evolutionary Mechanism for Disaggregated Computing ........................................ 343
Ichiro Satoh
Fingerprint Traits and RSA Algorithm Fusion Technique ........................................ 351
Vincenzo Conti, Salvatore Vitabile, and Filippo Sorbello
A Simple Asynchronous Shared Memory Consensus Algorithm Based on Omega and Closing Sets .................................................. 357
Michel Raynal and Julien Stainer

Session 15: Vehicular Networks
Performance Analysis of DSR and DYMO Routing Protocols for VANETs .............. 365
Evjola Spaho, Makoto Ikeda, Leonard Barolli, Fatos Xhafa, Vladi Kolici, and Makoto Takizawa
Towards Secure Vehicular Clouds ............................................................... 370
Gongjun Yan, Danda B. Rawat, and Bhed B. Bista
A Novel Road Monitoring Approach Using Wireless Sensor Networks ................. 376
Mario Collotta, Giovanni Pau, Valerio Mario Salerno, and Gianfranco Scatà
CISIS 2012 Workshops

Sixth International Workshop on Engineering Complex Distributed Systems (ECDS 2012)

Session 1: Distributed Systems and Applications
Trustworthiness-based Group Communication Protocols .......................................................... 382
   Ailixier Aikebaier, Tomoya Enokido, and Makoto Takizawa
A Transparent Service Replication Mechanism for Clouds .................................................... 389
   Manu Vardhan, D.K. Yadav, and Dharmender Singh Kushwaha
An Architecture for E-Government Social Web Applications ............................................... 395
   Jonas Brüstel, Thomas Preuss, Carsten Schwenke, and Dirk Wieczorek
Model Driven Architecture for Industrial Applications ......................................................... 401
   Maciej Zygmunt and Marek Budyn

Session 2: Software Intensive Systems
An Approach Based on Software Components and Mobile Agents for Developing Distributed Applications with Verification of Validity Criterion ......................................................... 407
   Siam Abderrahim, Maamri Ramdane, and Sahnoun Zaidi
An Automated Approach for Software Bug Classification ......................................................... 414
   Neelofar, Muhammad Younus Javed, and Hufsa Mohsin
Secure File Sharing in JXTA Using Digital Signatures .......................................................... 420
   Erita Skendaj and Marenglen Biba
Performance Evaluation of WMN-GA System for Dense Networks Considering Different Distributions ................................................................. 426
   Admir Barolli, Tetsuya Oda, Leonard Barolli, Fatos Xhafa, Makoto Takizawa,
   and Kazunori Uchida

Fifth International Workshop on Engineering Parallel and Multi-Core Systems (ePaMus 2012)

Session 1: Engineering Parallel and Multi-Core Systems
Synthesis of NoC Interconnects for Multi-core Architectures ................................................. 432
   Gul N. Khan and Anita Tino
Modelling the Behaviour of an Adaptive Scheduling Controller ............................................. 438
Mapping Geospatial Applications onto Parallel and Distributed Environments ....................... 443
   Denisa Rodila and Dorian Gorgan
Simulation of Biological Neural Microcircuits on Multi-core Systems ................................................. 449
   Ioan Lucian Muntean and Marius Joldos

**Fifth International Workshop on Intelligent Interfaces for Human-Computer Interaction (IIHCI 2012)**

**Session 1: Human-Robot Interaction and Devices**

Evaluation of Human Robot Interaction Factors of a Socially Assistive Robot Together with Older People ................................................................. 455
   Katharina Werner, Johannes Oberzaucher, and Franz Werner

Human-Robot Interaction Based on Introspective Capability ................................................................. 461
   Giovanni Pilato, Riccardo Rizzo, Filippo Vella, and Ignazio Infantino

Comparing User Performance on an iPad to a 17-inch BackPad ............................................................. 469
   Fatemeh Rajabi Yazdi and Tom Gedeon

Hand Grip Strength on a Large PDA: Holding While Reading Is Different from a Functional Task ................................................................. 475
   Fatemeh Rajabi Yazdi and Tom Gedeon

**Session 2: Medical Applications**

Serious Game for Laparoscopic Suturing Training ................................................................. 481
   Lucio Tommaso De Paolis

Intraoperative Navigation System for Image Guided Surgery ................................................................. 486
   Alessandro De Mauro, Julien Mazars, Luigi Manco, Taulent Metaj, Alberto Hernandez Fernandez, Camilo Cortes, and Lucio Tommaso De Paolis

Developing a Gesture-Based Game for Deaf/Mute People Using Microsoft Kinect ................................................................. 491
   Fakhteh Soltani, Fatemeh Eskandari, and Shadan Golestan

**Session 3: Intelligent Environments**

Guidelines to Design Inclusive Ambient Intelligence Solutions for Human Activity Sharing ................................................................. 496
   Nadia Catenazzi, Vanessa De Luca, Lorenzo Sommaruga, and Massimo Botta

Pingu: A New Miniature Wearable Device for Ubiquitous Computing Environments ................................................................. 502
   Hamed Ketabdar, Peyman Moghadam, and Mehran Roshandel

Monitoring Interior Wall Maintenance in a Virtual Environment ................................................................. 507
   A. Zita Sampaio and Daniel P. Rosário
Session 4: Advanced Interaction Techniques I
Towards Designing Users' Intuitive Web Interface .......................................................... 513
  Muhammad Nazrul Islam
Intelligent Interface Architectures for Folksonomy Driven Structure Network ........................ 519
  Massimiliano Dal Mas
