2012 IEEE 19th International Conference on Web Services

ICWS 2012

Table of Contents

Message from the General Chairs............................................................... xv
Message from the Research Track Chairs................................................ xvi
Message from the Applications and Industry椅子........................................ xvii
Organizing Committee................................................................................ xviii
Program Committee.................................................................................. xx
External Reviewers..................................................................................... xxiii
IEEE Computer Society Technical Committee on Services Computing........ xxv

Research Track

Research Track 1: Service Selection

Efficient Correlation-Aware Service Selection ................................................. 1
  Lina Barakat, Simon Miles, and Michael Luck
Behind the Curtain: Service Selection via Trust in Composite Services .............. 9
  Chung-Wei Hang, Anup K. Kalia, and Munindar P. Singh
Trustworthy Web Service Selection Using Probabilistic Models ......................... 17
  Mohamad Mehdì, Nizar Bouguila, and Jamal Bentahar

Research Track 2: Business Processes and Artifacts

Verifying GSM-Based Business Artifacts .................................................... 25
  Pavel Gonzalez, Andreas Griesmayer, and Alessio Lomuscio
Dynamic Adaptation of Fragment-Based and Context-Aware Business Processes .................................................. 33
  Antonio Bucchiarone, Annapaola Marconi, Marco Pistore, and Heorhi Raik
Data-centric Web Services Based on Business Artifacts ................................ 42
  Roman Vaculin, Terry Heath, and Richard Hull
Research Track 3: Service Composition
Continuous Query for QoS-Aware Automatic Service Composition ........................................... 50
    Wei Jiang, Songlin Hu, Dongwon Lee, Shuai Gong, and Zhiyong Liu
Shapley Value Based Impression Propagation for Reputation Management in Web Service Composition ......................................................................................................................... 58
    An Liu, Qing Li, Liusheng Huang, and Shiting Wen

Research Track 4: Quality of Service
Cost-Driven Optimization of Complex Service-Based Workflows for Stochastic QoS Parameters .............................................................................................................................................. 66
    Dieter Schuller, Ulrich Lampe, Julian Eckert, Ralf Steinmetz, and Stefan Schulte
An Approach to Forecasting QoS Attributes of Web Services Based on ARIMA and GARCH Models ............................................................................................................................................. 74
    Ayman Amin, Alan Colman, and Lars Grunske
A Hybrid Diagnosis Approach for QoS Management in Service-Oriented Architecture ................................................................................................................................................................. 82
    Jing Zhang, Zhenqiu Huang, and Kwei-Jay Lin

Research Track 5: Gathering and Using QoS Measures
WSP: A Network Coordinate Based Web Service Positioning Framework for Response Time Prediction ........................................................................................................................................ 90
    Jieming Zhu, Yu Kang, Zibin Zheng, and Michael R. Lyu
Scaling Spatial Alarm Services on Road Networks ................................................................................. 98
    Kisung Lee, Ling Liu, Shicong Meng, and Balaji Palanisamy
Negotiation Strategies for Probabilistic Contracts in Web Services Orchestrations ......................................................... 106
    Ajay Kattepur, Albert Benveniste, and Claude Jard

Research Track 6: Service Security
Enabling Message Security for RESTful Services .................................................................................. 114
    Gabriel Serme, Anderson Santana de Oliveira, Julien Massiera, and Yves Roudier
A Low-Cost Security Certification Scheme for Evolving Services ..................................................... 122
    Marco Anisetti, Claudio A. Ardagna, and Ernesto Damiani
Architecting Web Service Attack Detection Handlers ........................................................................ 130
    Alex Andrekanic and Rose Gamble
Research Track 7: Service Creation and Delivery

Enabling the Delivery of Customizable Web Services .................................................. 138
Tuan Nguyen, Alan Colman, and Jun Han

Migrating Component-Based Web Applications to Web Services: Towards
Considering a “Web Interface as a Service” ............................................................. 146
Chouki Tibermacine and Mohamed Lamine Kerdoudi

Automatic Abstract Service Generation from Web Service Communities .................. 154
Xumin Liu and Hua Liu

Research Track 8: Service Middleware

Disk-Offload Middleware for Web-Services Using the Application-Caching Paradigm ................................................................. 162
Avraham Leff, James T. Rayfield, Tom Gissel, and Ben Pareses

An Infrastructure Based in Virtualization for Intrusion Tolerant Services ................ 170
Jim Lau, Luciano Barreto, and Joni da Silva Fraga

Green Web Services: Modeling and Estimating Power Consumption of Web Services ......................................................................................... 178
Peter Bartalos and M. Brian Blake

Research Track 9: Web Service Recommendation

AWSR: Active Web Service Recommendation Based on Usage History ................. 186
Guosheng Kang, Jianxun Liu, Mingdong Tang, Xiaoping (Frank) Liu,
Buqing Cao, and Yu Xu

Decision Tree Learning from Incomplete QoS to Bootstrap Service
Recommendation ........................................................................................................ 194
Qi Yu

Location-Aware Collaborative Filtering for QoS-Based Service
Recommendation ........................................................................................................ 202
Mingdong Tang, Yechun Jiang, Jianxun Liu, and Xiaoping (Frank) Liu

Research Track 10: Service Analysis and Trade-Offs

Computing Strategic Trade-Offs in Web Service Deployment and Selection ........ 210
Alan M.V. Neves, Cesar A.L. Oliveira, Ricardo M.F. Lima, and Cecilia L. Sabat

Large-Scale Longitudinal Analysis of SOAP-Based and RESTful Web Services .... 218
Wei Jiang, Dongwon Lee, and Songlin Hu

Measuring Change Impact Based on Usage Profiles ................................................ 226
Marcelo Yamashita, Bruno Vollino, Karin Becker, and Renata Galante
Applications and Experiences Track

Applications and Experiences Track 1: QoS

Multi-objective Service Composition with Time- and Input-Dependent QoS ......................................................... 234
  Florian Wagner, Adrian Klein, Benjamin Klöpper, Fuyuki Ishikawa, and Shinichi Honiden

Web Services Composition Verification Using Satisfiability Solving ................................................................. 242
  Ehtesham Zahoor, Olivier Perrin, and Claude Godart

Optimizing QoS-Aware Services Composition for Concurrent Processes in Dynamic Resource-Constrained Environments ........................................... 250
  Yuanhong Shen, Xiaohu Yang, Ye Wang, and Zhen Ye

Applications and Experiences Track 2: Formal Modeling

A Probabilistic Approach for Long-Term B2B Service Compositions ........................................................... 259
  Adrian Klein, Florian Wagner, Fuyuki Ishikawa, and Shinichi Honiden

A Dynamic Web Service Composition Method Based on Viterbi Algorithm .............................................. 267
  Lizhen Cui, Jian Li, and Yongqing Zheng

Towards Multimodal Query in Web Service Search ......................................................... 272
  Bin Xu, Sen Luo, and Kewu Sun

Applications and Experiences Track 3: Semantic Services

Discovery of Semantic Web Services Compositions Based on SAWSDL Annotations ............................................. 280
  Guilherme C. Hobold and Frank Siqueira

Ontology Alignment by Combining Lexical Analysis with Consequences from Reasoners ........................................... 288
  Jianxin Liao, Xiulei Liu, Xiaomin Zhu, Tong Xu, Jingyu Wang, and Haifeng Sun

Rep4WS: A Paxos Based Replication Framework for Building Consistent and Reliable Web Services .................. 295
  Xu Wang, Hailong Sun, Ting Deng, and Jinfeng Huai
Applications and Experiences Track 4: Business Process Management

Transactional Recovery Support for Robust Exception Handling in Business Process Services ........................................................................................................................................... 303
  João E. Ferreira, Kelly R. Braghetto, Osvaldo K. Takai, and Calton Pu

On Recommendation of Process Mining Algorithms ........................................................................................................................................................................... 311
  Jianmin Wang, Raymond K. Wong, Jianwei Ding, Qinlong Guo, and Lijie Wen

Rigorous Analysis of Service Composability by Embedding WS-BPEL into the BIP Component Framework .................................................................................. 319
  Emmanouela Stachtiari, Anakreon Mentis, and Panagiotis Katsaros

Applications and Experiences Track 5: Service Selection

Towards Optimal and Scalable Non-functional Service Matchmaking Techniques .................................................................................................................................... 327
  Kyriakos Kritikos and Dimitris Plexousakis

Web Service Selection Algorithm Using Vickrey Auction ...................................................................................................................................................... 336
  Atsushi Watanabe, Fuyuki Ishikawa, Yoshiaki Fukazawa, and Shinichi Honiden

Behavior Classes for Specification and Search of Complex Services and Processes .............................................................................................................................. 343
  Martin Junghans, Sudhir Agarwal, and Rudi Studer

Applications and Experiences Track 6: Optimization

Identifying Test Requirements by Analyzing SLA Guarantee Terms ................................................................................................................................. 351
  M. Palacios, J. Garcia-Fanjul, J. Tuya, and George Spanoudakis

Analytic Profit Optimization of Service-Based Systems ............................................................................................................................................... 359
  Xianzhi Wang, Zhongjie Wang, and Xiaofei Xu

From Abstract to Executable BPEL Processes with Continuity Support .............................................................................................................................. 368
  Zeina Azmeh, Marianne Huchard, Fady Hamoui, and Naouel Moha

Applications and Experiences Track 7: Service Ranking

Linked Context: A Linked Data Approach to Personalised Service Provisioning ...................................................................................................................... 376
  Hong Qing Yu, Xia Zhao, Stephan Reiff-Marganiec, and John Domingue

Discovering Trust Networks for the Selection of Trustworthy Service Providers in Complex Contextual Social Networks ........................................................................ 384
  Guanfeng Liu, Yan Wang, Mehmet A. Orgun, and Huan Liu
## Applications and Experiences Track 8: Service Recommendation

- Analyzing the Evolution of Web Services Using Fine-Grained Changes
  
  *Daniele Romano and Martin Pinzger*
  
  Page 392

- Personalized Services Recommendation Based on Context-Aware QoS Prediction
  
  *Li Kuang, Yingjie Xia, and Yuxin Mao*
  
  Page 400

- Domain-Independent Data Validation and Content Assistance as a Service
  
  *Maira Gatti, Ricardo Herrmann, David Loewenstern, Florian Pinel, and Larisa Shwartz*
  
  Page 407

## Applications and Experiences Track 9: Service Management

- Tenant Onboarding in Evolving Multi-tenant Software-as-a-Service Systems
  
  *Lei Ju, Bikram Sengupta, and Abhik Roychoudhury*
  
  Page 415

- A Financial Compensation Based Transaction Management Model for Service-Oriented Business Collaborations
  
  *Zheng Yang, Jinhui Yao, Shiping Chen, David Levy, and Rafael Calvo*
  
  Page 423

- Redundant Service Removal in QoS-Aware Service Composition
  
  *Min Chen and Yuhong Yan*
  
  Page 431

## Applications and Experiences Track 10: Service Discovery

- QoS-Aware Adaptive Service Orchestrations
  
  *Gianpaolo Cugola, Leandro Sales Pinto, and Giordano Tamburrelli*
  
  Page 440

- A Specialized Search Engine for Web Service Discovery
  
  *Ourania Hatzi, Georgios Batistatos, Mara Nikolaidou, and Dimosthenis Anagnostopoulos*
  
  Page 448

- User-Centered QoS Computation for Web Service Selection
  
  *Chunqi Shi, Donghui Lin, and Toru Ishida*
  
  Page 456

## Applications and Experiences Track 11: Service Management

- Collaborative Web Service QoS Prediction with Location-Based Regularization
  
  *Wei Lo, Jianwei Yin, Shuiguang Deng, Ying Li, and Zhaohui Wu*
  
  Page 464

- TASS: Transaction Assurance in Service Selection
  
  *Jiuxin Cao, Gongrui Zhu, Xiao Zheng, Bo Liu, and Fang Dong*
  
  Page 472

- Enabling Advanced Loading Strategies for Data Intensive Web Services
  
  *Quirino Zagarese, Gerardo Canfora, Eugenio Zimeo, and Françoise Baude*
  
  Page 480
Information Diffusion in Web Services Networks ................................................................. 488
   Shahab Mokarizadeh, Peep Küngas, Mihhail Matskin, Marco Crasso, Marcelo Campo, and Alejandro Zunino

Industry Track

Industry Track 1: Service Evolution

Formal Evolution of XML Schemas with Inheritance .......................................................... 496
   Jakub Klimek and Martin Nečaský

Andes: A Highly Scalable Persistent Messaging System .................................................... 504
   Charith Wickramarachchi, Srinath Perera, Shammi Jayasinghe, and Sanjiva Weerawarana

A Cost-Effective Approach to Delivering Analytics as a Service ....................................... 512
   Xi Sun, Bo Gao, Liya Fan, and Wenhao An

Industry Track 2: Service Discovery

Service Discovery Mechanism for an Intentional Pervasive Information System ................... 520
   Salma Najar, Manuele Kirsch Pinheiro, Carine Souveyet, and Luiz Angelo Steffenel

Towards Automatic Tagging for Web Services ...................................................................... 528
   Lu Fang, Lijie Wang, Meng Li, Junfeng Zhao, Yanzhen Zou, and Lingshuang Shao

Industry Track 3: Service QoS

How to Design a Global SOA Infrastructure: Coping with Challenges in a Global Context ............................................................. 536
   Alain Hsiung, Giovanni Rivelli, and Georg Hütttenegger

Intelligent Database Placement in Cloud Environment ......................................................... 544
   Tao Yu, Jie Qiu, Berthold Reinwald, Lei Zhi, Qirong Wang, and Ning Wang

An Empirical Study of Programmable Web: A Network Analysis on a Service-Mashup System ........................................................................ 552
   Keman Huang, Yushun Fan, and Wei Tan

Industry Track 4: Semantic Service

OWL-S Based Semantic Cloud Service Broker ..................................................................... 560
   Le Duy Ngan and Rajaraman Kanagasabai

COnTag: A Framework for Personalized Context-Aware Search of Ontology-Based Tagged Data ........................................................................ 568
   Knarig Arabshian and Troy Cauble

Effect of Data Validity on the Reliability of Data-centric Web Services ................................. 576
   Ewa Musial and Mei-Hwa Chen
Modeling and Analyzing the Reliability and Cost of Service Composition in the IoT: A Probabilistic Approach .......................................................... 584
  Lixing Li, Zhi Jin, Ge Li, Liwei Zheng, and Qiang Wei

Industry Track 5: Business Process Management
Towards Simplifying and Automating Business Process Lifecycle Management in Hybrid Clouds .......................................................... 592
  Hua Liu, Yasmine Charif, Gueyoung Jung, Andres Quiroz, Frank Goetz, and Naveen Sharma
Towards Decentralized Monitoring of Supply Chains .......................................................... 600
  Aymen Baouab, Walid Fdhila, Olivier Perrin, and Claude Godart
Servicization of Australian Privacy Act for Improving Business Compliance .......................................................... 608
  Dongxi Liu

Work-in-Progress Track

Work-in-Progress Track 1: Social Network Services
SocFeedViewer: A Novel Visualization Technique for Social News Feeds .......................................................... 616
  Chi-Yao Tseng, Yu-Jen Chen, and Ming-Syan Chen
Summarization on Social Network Services .......................................................... 616
  Wuhui Chen, Incheon Paik, and Ryohsei Komiya
Linked Social Service: Evolving from an Isolated Service into a Global Social Service Network .......................................................... 618
  Cheng Bo, Qiao Xiuquan, Wu Budan, Wu Xiaokun, Shi Ruisheng, and Chen Junliang

Work-in-Progress Track 2: Services Composition
Trust Computation in Web Service Compositions Using Bayesian Networks .......................................................... 623
  Mohammad-Reza Motallebi, Fuyuki Ishikawa, and Shinichi Honiden
A Service Pattern Model for Flexible Service Composition .......................................................... 626
  Chien-Hsiang Lee, San-Yih Hwang, and I-Ling Yen
An Approach of QoS-Guaranteed Web Service Composition Based on a Win-Win Strategy .......................................................... 628
  Ying-Qiu Li and Tao Wen
Flexible Construction of Complex Service Compositions from Reusable Semantic Knowledge .......................................................... 631
  Rik Eshuis, Freddy Lécué, and Nikolay Mehandjiev
WSCRec: Utilizing Historical Information to Facilitate Web Service Composition
Liang Chen, Hengyi Jian, and Jian Wu

Work-in-Progress Track 3: Services Management

Selecting Skyline Web Services for Multiple Users Preferences
Karim Benouaret, Djamal Benslimane, and Allel Hadjali

Identifying and Managing Variation Scope in Service Management
Harald Psaier, Heiko Ludwig, Laura Anderson, and Ben Shaw

Advanced Case Management Enabled by Business Provenance
Axel Martens, Aleksander Slominski, Geetika T. Lakshmanan, and Nirmal Mukhi

Kachako: Towards a Data-centric Platform for Full Automation of Service Selection, Composition, Scalable Deployment and Evaluation
Yoshinobu Kano

A Relational Taxonomy of Services for Large Scale Service Repositories
Yan Wu, Chungang Yan, Zhijun Ding, Pengwei Wang, Changjun Jiang, and Mengchu Zhou

Work-in-Progress Track 4: Services Optimization

Binding Optimization of Web Services: A Quantitative Study of Local Repository-Based Approach
Jaber Kouki, Walid Chainbi, and Khaled Ghedira

Cloud Based Test Coverage Service
Sheng Huang, Xiaomin Xu, Yanghua Xiao, and Wei Wang

Testing Optimization in Service EcoSystems (TEOS)
Usman Wajid, Pedro Sampaio, and Nikolay Mehandjiev

MapReduce-Based Balanced Mining for Closed Frequent Itemset
Guang-Peng Chen, Yu-Bin Yang, and Yao Zhang

Overcoming Large Data Transfer Bottlenecks in RESTful Service Orchestations
Ryan K.L. Ko, Markus Kirchberg, Bu Sung Lee, and Elroy Chew

Describing and Verifying Integrity Constraints in XML Using OCL
Jakub Malý and Martin Nečaský
### Work-in-Progress Track 5: Services Management

**An Approach for Producing Privacy-Aware Reusable Business Process Fragments** ................................................................. 659
- Mohamed-Anis Zemni, Nejib Ben Hadj-Anouane, and Moez Yeddes

**Privacy-Preserving Business Process Outsourcing** ................................................................. 662
- Mehdi Bentounsi, Salima Benbernou, and Mikhail J. Atallah

**Service Contracts: Current State and Future Directions** ................................................................. 664
- Yucong Duan

### Other Papers

**Identifying the Relevance of Social Issues to a Target** ................................................................. 666
- Soyeon Caren Han and Byeong Ho Kang

**Cirrus: Towards Business Provenance As-a-Service in the Cloud** ................................................................. 668
- Sergio Manuel Serra da Cruz, Mary Manhães, Jorge Zavaleta, and Raimundo Macário Costa

**Checking Compatibility of Web Services Using SOGs** ................................................................. 670
- Kais Klai and Hanen Ochi

**Parallel Computing Framework as a Cloud Service** ................................................................. 672
- Rongheng Lin, Huake Tu, and Hua Zou

**Automatic DAG-Based Service Composition: A Model Checking Approach** ................................................................. 674
- Yuzhang Feng, Anitha Veeramani, and Rajaraman Kanagasabai

**Towards Service Atomization for Analyzing Information** ................................................................. 676
- Arif Bramantoro, Toru Kamada, Masahiro Tanaka, Yohei Murakami, and Koji Zettsu

**Highly Resilient Systems for Cloud** ................................................................. 678
- Teresa Tung, Shaw-Yi Chaw, Qing Xie, and Qian Zhu

**Dodai-Deploy: Fast Cluster Deployment Tool** ................................................................. 681
- Shigetoshi Yokoyama and Nobukazu Yoshioka

**Popularity Based Web Service Search** ................................................................. 683
- Selwa Elfirdoussi, Zahi Jarir, and Mohamed Quafafou

**A Framework for Self-Healing Service Compositions in Cloud Computing Environments** ................................................................. 690
- Wenrui Li, Pengcheng Zhang, and Zhongxue Yang

**Toward Exposing and Accessing HPC Applications in a SaaS Cloud** ................................................................. 692
- Philip Church, Adam Wong, Michael Brock, and Andrzej Goscinski

**Author Index** ................................................................. 700
