Track 1. NCM

Performance Comparison of IEEE 802.1Q and IEEE 802.1 AVB in an Ethernet-based In-Vehicle Network ................................................................. 1
Hyung-Taek Lim, Daniel Herrscher, Firas Chaari

Fair Resource Allocation Scheme Using Cooperative Game Theory in Layer 1 VPN .................................................................................. 7
Aran Kim, Sangdo Lee, Hyeopgeon Lee, Yongtae Shin

A Fast Seat Assignment Algorithm Based-on Bucket Data Structure .............. 11
Gene Eu Jan, Cheng-Hung Li, Chi-chia Sun, Bor-Shing Lin

A Scalable Data Distributing Method Supporting Replication and Weight .......... 16
Wenhan Zhan, Hancong Duan, Lin Li, Xiaowen Nie, Cheng Chen

Intelligent Mining Agent ............................................................................. 23
Dr. Abbas M. Al-Bakry, Jinan Ali

A Two-phase Iterative Pre-copy Strategy for Live Migration of Virtual Machines .... 29
Cho-Chin Lin, Yu-Chi Huang and Zong-De Jian
An Empirical Evaluation and Improvement of the Item Balancing Algorithm in P2P Systems .................................................. 35
Tarek Helmy, Ahmed Al-Herz

Blink II: A node ranking system of DHT network using Map Reduce Framework .................................................. 41
Ruo Ando, Akihiko Shinohara, Takayuki Sugiura

Model-Driven Requirements Validation for Automotive Embedded Software using UML .................................................. 46
Kwan-Hyung Lee, Pan-Gi Min, Ju-Hyung Cho and Dong-Jin Lim

Towards High Performance and Usability Programming Model for Heterogeneous HPC Platforms .................................. 51
Myungho Lee, Heeseung Jo, Dong Hoon Choi

A Survey and Comparison of Some Popular IPTV Applications .................. 58
Hathairat Ketmaneechairat

CloudPP: A Novel Cloud-based P2P Live Video Streaming Platform with SVC technology .................................................. 64
Hong-Yi Chang, Ya-Yueh Shih, Yuan-Wei Lin

A Dynamic Personalization in e-Learning Process Based on Triple-Factor Architecture .................................................. 69
Sfenrianto, Heru Suhartanto, Zainal A. Hasibuan

An Android Application Launch Analyzing System .................. 76
Kyosuke Nagata, Saneyasu Yamaguchi

An Integrated I/O Analyzing System for Virtualized Environment .................. 82
Masaya Yamada, Yuki Watanabe, Saneyasu Yamaguchi

Saving Streaming Bandwidth via Wireless Sharing for a Tree-based Live Streaming System on Public-Shared Network .................. 88
Hong-Yi Chang, Nen-Fu Huang, Kwei-Bor Chen, Yih-Jou Tzang, Yuan-Wei Lin

Emerging ICT Ecosystem: From Value Chain to Value Ecosystem .................. 95
Khalid Rafique, Chunhui Yuan, Abdul Wahid Tareen, Muhammad Saeed

Multi-Negotiation Targets in Automated Trust Negotiation over TrustBuilder2 Framework .................. 101
Korawit Orkphol, Li Jianli
Threat Risk Analysis for Cloud Security based on Attack-Defense Trees .......... 106
Ping Wang, Wen-Hui Lin Pu-Tsun Kuo, Hui-Tang Lin, Tzu Chia Wang

Design and Implementation of a Negotiation Model based on the Principle of Leverage ........................................ 112
Patrick Gacirane, Lasheng Yu

A Novel Pattern of Distributed Low-Rate Denial of Service Attack Disrupts Internet Routing ........................................... 119
LIU Xiao-ming, LI Qi, LIU Xiao-guang

Anonymous Identity Authentication Scheme In Wireless Roaming Communication ......................................................... 124
Tao Feng, Wenying Zhou, Xinghua Li

WAPI Secure Access Authentication Scheme for Heterogeneous Networks Based on Identity-Based Cryptograph ......................... 130
FENG Tao, JIAO Jian

A Multiplication Algorithm with Square-free Gauss Period Normal Basis ........................................................................... 136
Yasuyuki Nogami and Kenta Nekado

Ganesh Subramanian, Dr.R.Amutha

Encrypting Ontological Meta-Model Using Elliptic Curve Cryptography with Identity Based Encryption .......................................... 146
Pramukh R. Karla, Sang C. Suh, Varadraj P. Gurupur

General Survey on Massive Data Encryption ........................................... 150
Mengmeng Wang, Guiliang Zhu, Xiaoqiang Zhang

A Fast Parallel Algorithm For Decoding Algebraic Geometry Codes .......... 156
Xiaohui Fu, Junjian Yang

Improved Parcel Delivery Service by using Delivery Points Information and RFID .............................................................. 160
Geeju Moon, Sungmee Park

Integration of Predictive Route Data in Active Safety Systems .................. 165
Hadj Hamma Tadjine, Steven Myslinski, Bert Auerbach, Karsten Schulze
Evaluating the Role of Maintenance Environment Activities in Software Handover ......................................................... 230
Ahmad Salman Khan, Mira Kajko-Mattsson

Management of Documentation and Maintainability in the Context of Software Handover ......................................................... 238
Ahmad Salman Khan, Mira Kajko Mattsson

Analyzing Deployment from the Perspective of Software Handover and Maintenance ......................................................... 244
Ahmad Salman Khan, Mira Kajko-Mattsson

Managing Versions and Configurations in a Software Handover Process ......................................................... 252
Ahmad Salman Khan, Mira Kajko-Mattsson

A Unified Monitoring Framework for Distributed Information System Management ......................................................... 259
Shiping Chen, Surya Nepal, Suraj Pandey

Managing the Accompaniment to Change using ICT and Experiential Training: R&D Context ......................................................... 265
Amina Zaghbib, Philippe Pernelle, Thibault Carron

Market-modeling and Automated Bargain Based on Negotiation for Electronic Transaction of Bulk Stock ......................................................... 273
Zhu Junwu, Jiang Yi

The Auction Mechanism Research with Objective of Maximizing the Social Efficiency ......................................................... 279
Ming Xu, Yiyi Ma, Liang Li, Kai Chen

The Impact of Bandwidth and Storage Space on Job Scheduling and Data Replication Strategies in Data Grids ......................................................... 283
Fatemeh Jolfaei, Abolfazl T. Haghighat

Ant Colony Algorithm-Based Travelling Route Problems: A Case Study in Bangkok ......................................................... 289
Wiboonsak Watthayu

Enhanced Encoded Bitmap Index for Equality Query ......................................................... 293
Amorntep Keawpibal, Niwan Wattanakitrungroj and Sirirut Vanichayobon
Influence of Knowledge Management System on Organization Effectiveness in Macedonian Organization .......................................................... 299
Blazeska-Tabakovska Natasha, Manevska Violeta

Research on Inter-Domain Collaborative Syllabus Services with Cross-Retrieval ................................................................. 305
Takashi KAWABA, Takeshi TSUCHIYA, Keiichi KOYANAGI

Privacy Protection of User-Created Content on Multicore-based Handheld Devices .......................................................... 310
Sungju Lee, Heegon Kim, Yongwha Chung

Indexing the Past, Present and Future Positions of Moving Objects Using PPFI* .......................................................... 314
Ying Fang, Jiuheng Cao, Ceng Zeng, Nengcheng Chen

Bushra Abdulliah Al-Anesi, Dr. Khalid Omar Thabit

Knowledge Acquisition, Information Exchanges, and Supply Chains Cycle Time .......................................................... 327
Kuo-En Huang, Jiao-Hong Cheng

New Graph Mining Algorithm for Vector GIS Systems .......................................................... 335
Mahdi JASIM, Dr. Tawfiq Al ASADI

Pattern Analysis for Load Forecasting .......................................................... 339
Yingju Xia, YuHang Yang, Fuijiang Ge, Jian Su, Hao Yu

VIQI: A New Approach for Visual Interpretation of Deep Web Query Interfaces .......................................................... 344
Radhouane Boughmoumoura, Lobna Hlaoua, Mohamed Nazih Omri

An Ontology-based Multi-dimensional Organization and Management Model for Web Services .......................................................... 350
Kun Yang, WeiQun Cui, Junheng Teng, Chenzhe Hang

Tile Based Geographic Information System to Improve Response Speed of Mapping Application in E-Government of Indonesia .......................................................... 356
Imairi Eitiveni, Dana Indra Sensuse
Research on Semantic Expression Methods of Management Policy in Multi-Agent Based NMS ................................................................. 361
Gang Xiao, Xi-lin Ji, Run-qing Zhang

Young Children's Perception of IrobiQ, the teacher assistive robot, with reference to Speech Register ......................................................... 366
Eunja Hyun, Hawon Lee, Hyemin Yeon

Evaluating Packet-level Forward Error Correction: 1-D Interleaved Parity Codes ................................................................. 370
Lin Liu, Xiaoshe Dong

Promote Visitor Interactions by Smart Devices in Museum Learning Scenario ...... 376
Binyue Cui, Shigeki Yokoi

A User-Centric uncertain data model for Homogeneous Service .................. 380
Xin Gao, Wenhui Hu, Rundong Li, Wei Ye

Effect Evaluation for Airfield Target Based on Queueing Theory .................. 386
WU Jian LIU Xin-xue SHU Jian-sheng LI Ya-xiong HAO Hui

Economy Analysis for a Comprehensive Model of Emergency Reserve and Supermarket ................................................................. 391
Yuanhui Xiu, Xiwu Han

Using LBS to Construct an E-learning Environment .................................. 395
Tung-Hsiang Chou, Che-Wei Fan

A Middleware for Smart Object in Ubiquitous Computing Environment .......... 400
EunJung Ko, JiHoon Kang, JongHyun Park

Automatic Registration of Remote Sensing Image with Moderate Resolution .... 404
Qiang Wang, Yahui Qiu, Ximin Cui, Guo Wang

Integrating Similar Images to Effectively Improve Image Retrieval Accuracy .... 410
Hai Thanh Mai, Myoung Ho Kim

A Self-learning Stateful Application Identification Method for Deep Packet Inspection ................................................................. 416
Uday Trivedi

The Study of Feature-Level Fusion Algorithm for Multimodal Recognition ...... 422
Xiaona Xu, Yue Zhao, Haijun Li
Increase the Hiding-bit Capacity and Strength for Text Watermarking with the Line Intersection on Text Image ................................................................. 427  
Wiyada Yawai, Nualsawat Hiransakolwong

New Methods and Tools for the Development and Verification of Safety Functions during Development of Pedestrian Detection Systems ................................. 434  
Hadj Hamma Tadjine, Karsten Schulze, Rene Roellig, Herold Daniel

Real-Time Moving Target Detection in the Dynamic Background .......................... 439  
Qin Yue, Mao Zheng, Yuan Jian Jian, Qu Jin Song

BER and Throughput Analysis of X-OR Network Coded D-F Relays alongwith LDPC Channel Coding ................................................................. 444  
Tariq Aziz, Ishtiaq Ahmad, Nasir Saleem, Lin Zhang, Jiaru Lin

Path Clustering using Dynamic Time Warping Technique .................................. 449  
Kelvin Lo Yir Siang, Siak Wang Khor

Visualizing Futuristic Ubiquitous Media Services - A Collaborative Approach in the Newspaper Industry ................................................................. 453  
Carina Ihlström Eriksson

A Metadata-orientated Integrated Approach to Personal File Management .......... 459  
Md Maruf Hasan, Chutiporn Anutariya, M Zau Ja

System Architecture In the Dynamic Environment Based On Commonality and Variability Business Processes ................................................................. 465  
Ahmad Nurul Fajar, Eko K. Budiarjo, Zainal A. Hasibuan

Designing Solutions to Problems - From co-design approach ............................. 470  
Ya-Ling Ko, Wen-Huei Chou

A Fingerprinting-Based Plagiarism Detection System for Arabic Text-Based Documents ................................................................. 477  
Ameera Jadalla, Ashraf Elnagar

RGB Digital Image Forgery Detection Using Singular Value Decomposition and One Dimensional Cellular Automata .................................................. 483  
Dr. Mohammad V. Malakooti, Ahmad Pahlavan Tafti, Faezeh Rohani, Mohammad Amin Moghaddasifar

An Optimized Lumped Element Improved Performance Hybrid Directional Couplers ................................................................. 489  
Mazhar B. Tayel, Hani S. Alhakami
A Real-Time Sand Simulation using a GPU .................................................. 495
Dieudonné Nkulikyimfura, Jee-In Kim, HyungSeok Kim

Multiresolution Volumetric Medical Data Modeling Based on Gaussian Curvature by Using Weighted Alpha Shapes ................................................................. 499
Kun Lee

A Content Based Retrieval Method For MR Brain Images .......................... 505
Abduljawad A. Amory, Hassan I Mathkour, Rachid Sammouda

Object Localization using Intended Signal Blocking in Passive UHF Far-Field Systems .......................................................... 510
Jae Sung Choi, Hee Kuk Kang, Jung Eun Kim, Dong Ha Lee, Hyun Lee

Extraction of Brain Tumor Based on Morphological Operations ............... 515
Kiran Thapaliya, Goo-Rak Kwon

Graph Classification based on Top near optimal Co-occurrence Graph patterns of size-k .................................................. 521
Maniraguha Muhamad, Nyirabahizi A., Ntawumeyikizaba A., YK Lee, SY Lee

Comparative Analysis On Evaluation Results of Case Base Reasoning Classification and ANN Classification On Mammogram Mass Detection ......................... 527
Valliappan Raman, Patrick Then, Putra Sumari

A Decision Support System for Cancer Prevalence in South Africa ............ 532
Nosipho Dladlu, Okuthe P. Kogeda

Self - Monitoring for the Horizontal Fragmentation Evolution based on Ants in the Relational Datawarehouses ................................................................. 538
Mohamed BARR
