Proceedings of the 11th IASTED European Conference on

Power and Energy Systems

Editor: J.P.S. Catalão
# TABLE OF CONTENTS

## EuroPES 2012

### PLANNING, OPERATION, AND CONTROL

- **775-025**: Application of UPFC to Control Power Flow in a Part of Libyan 220 kv Transmission System  
  Sadek M. Alkiesh, Ibrahim M. Shlaibek, and Omar G.A. Mrehel ............................................. 1

- **775-045**: Distributed Generation Penetration in a Large-Scale Medium-Voltage Network  
  Anastasia S. Safigianni, Anastasios I. Spyridopoulos, and George N. Koutrompezes .............................. 7

- **775-075**: Multi-Objective Distribution System Optimization using Euclidean Distance Calculations in the Genetic Operators  
  Andrea Mazza and Gianfranco Chicco ............................................. 14

- **775-080**: Micro Grid Studies Due to Fault Occurrence using Immunity Technique  
  Marwa A. Abd El-Hamid, Noha H. El-Amary, and Mohamed M. Mansour ........................................... 20

- **775-094**: Islanding Operation of Hybrid Micro-Grid System with Power Management Control Scheme  
  Mir N. Ambia, Ahmed Al-Durra, Cedric Caruana, and SM Muyeen ............................................. 26

### SUSTAINABLE ENERGY

- **775-005**: Optimal Placement of Wind Turbines by using Genetic Algorithm and Social Welfare Assessment  
  Geev Mokryani, Pierluigi Stano, and Antonio Piccolo ............................................. 34

  Aonghus McNabola, Paul Coughlan, Lucy Corcoran, Christine Power, Prysor Williams, Ian Harris, Rachel Taylor, and Andrew Packwood ............................................. 40

- **775-049**: A Linear Parameter Varying Control Technique for Horizontal Axis Wind Turbine  
  Guoyan Cao and Karolos Grigoriadis ............................................. 47

- **775-055**: Dynamic Multi-Criteria Decision Analysis of Electricity Generation Mix Choices for Future Sustainability  
  David G. del Riego, Jose A. Souto, and Juan J. Casares ............................................. 56

- **775-069**: Economic and Environmental Performance of Solar Desiccant Cooling in Subtropical Australia  
  Ali M. Baniyounes, Gang Liu, Mohammad G. Rasul, and Masud K. Khan ............................................. 91

- **775-070**: How Policies Control Energy Efficiency  
  Jan Christian Schinke ............................................. 97

- **775-082**: Suboptimal Power System Stabilizers for Multi Machine Systems  
  Jawad Talaq ............................................. 123

- **775-096**: Suboptimal Power System Stabilizers for Multi Machine Systems  
  Jawad Talaq ............................................. 131
775-071: Design of an Absorption Solar Refrigeration System for Air Conditioning in the Yucatan Peninsula
Elizabeth Cortés Rodríguez, José L. Castilla Carrillo, Claudia A. Ruiz Mercado, and Wilfrido Rivera Gómez-Franco .............................................. 139

775-098: Minimal Energy Storage System using Carbon Nanotube and Nano-Onion Ultracapacitors for an Electrified Bike
Fabio Parigi, Tanya Gachovska, Taesic Kim, Yang Gao, Dean Patterson, Jerry L. Hudgins, and Yongfeng Lu .................................................. 147

775-102: Feasibility Study of Solar Desiccant Cooling for an Institutional Building in Subtropical Queensland, Australia
Ali M. Baniyounes, Mohammad G. Rasul, and Masud K. Khan ..................................................... 154

ANALYSIS, MANAGEMENT, AND MODELLING

775-006: Fault Ride-Through Capability Enhancement by using Fuzzy Control
Geev Mokiyani, Pierluigi Siano, Antonio Piccolo, and Zhe Chen .................................................. 162

775-022: The Reliable Data Set Construction for Power System Operation using State Estimation
Byoung-Ho Kim, Hongrae Kim, and Junmin Cha .................................................. 168

775-043: A Simulated Annealing Approach for Distance Relaying under Arcing Fault Conditions
Abdel-aal Hassan Mantawy, Hossam E.A. Talaat, Said F.M. Mekhame, and Mohamad I. Ahmad .................................................. 173

775-067: Development of Automotive DC/DC Converter based Centralised Architecture
Mohamed A. Shrid, Ahmad H. Kharaz, Amar Bousbaine, and Ahmed Faris .................................................. 179

775-074: Betweenness Centrality Metrics for Assessing Electrical Power Network Robustness against Fragmentation and Node Failure
Ken A. Hawick .................................................. 186

POLICIES, ECONOMICS, AND SMART GRID

775-010: Real-Time Optimal Demand Response for Frequency Regulation in Smart μGrid Environment
Seyyed Ali Pourmowwadi and Mohammad Hashemi Nehriri .................................................. 194

775-032: Intelligent Dynamic Charging Assignment for Increasing Efficiency in EV Driving
Kellie Erickson, Anett Schülke, Cédric Bodet, and Rafał Jablonowski .................................................. 201

775-044: Evaluation of the Impact of IPPs on the Greek Wholesale and Retail Electricity Markets
Pandelis N. Biskas, Christos K. Simoglou, Christoforos E. Zounas, and Anastasios G. Bakirtzis .................................................. 208

775-081: Electricity Market Equilibrium under Different CO2 Emission Allocation Policies
Javier Contreras, Natalia Alguacil, and Juan García .................................................. 216

775-103: An Improved Algorithm for Optimal PMU Measurement Placement
Bei Gou and Rajesh Kavasseri .................................................. 224

775-104: Investigation of Power Losses in Light Loaded Power Networks
Yasir A. Alturki .................................................. 227

ADDITIONAL PAPER

769-079: Real-Time Voltage Stability Monitoring for TNB Network

AUTHOR INDEX .................................................. 239
