## Contents

1. **Foreword** ................................. v

2. **Preface** ................................. vii

1. **Dam removal: A history of decision points** ................................. 1
   Laura Wildman

2. **Engineering considerations for large dam removals** ................................. 11
   Thomas E. Hepler

3. **Assessing sedimentation issues within aging flood-control reservoirs** ................................. 25
   Sean J. Bennett, John A. Dunbar, Fred E. Rhoton, Peter M. Allen, Jerry M. Bigham,
   Gregg R. Davidson, and Daniel G. Wren

4. **Using ground-penetrating radar to determine the quantity of sediment stored behind the Merrimack Village Dam, Souhegan River, New Hampshire** ................................. 45
   David J. Santaniello, Noah P. Snyder, and Allen M. Gontz

5. **Prediction of sediment erosion after dam removal using a one-dimensional model** ................................. 59
   Blair Greimann

6. **Sediment management at small dam removal sites** ................................. 67
   James G. MacBroom and Roy Schiff

7. **Multiyear assessment of the sedimentological impacts of the removal of the Munroe Falls Dam on the middle Cuyahoga River, Ohio** ................................. 81
   John A. Peck and Nicholas R. Kasper

8. **Sediment impacts from the Savage Rapids Dam removal, Rogue River, Oregon** ................................. 93
   Jennifer A. Bountry, Yong G. Lai, and Timothy J. Randle

9. **Changes in biotic and habitat indices in response to dam removals in Ohio** ................................. 105
   Kenneth A. Krieger and Bill Zawiski

10. **Using airborne remote-sensing imagery to assess flow releases from a dam in order to maximize renaturalization of a regulated gravel-bed river** ................................. 117
    M.S. Lorang, F.R. Hauer, D.C. Whited, and P.L. Matson

11. **Assessing stream restoration potential of recreational enhancements on an urban stream, Springfield, Ohio** ................................. 133
    John Ritter, Kelly Shaw, Aaron Evelsizor, Katherine Minter, Chad Rigsby, and Kristen Shearer
12. Effects of multiple small stock-pond dams in a coastal watershed in central California: Implications for removing small dams for restoration .................................................. 149
   J.L. Florsheim, A. Chin, and A. Nichols

13. The shortcomings of “passive” urban river restoration after low-head dam removal, Ottawa River (northwestern Ohio, USA): What the sedimentary record can teach us ..... 161
   J.E. Evans, N. Harris, and L.D. Webb

14. The rise and fall of Mid-Atlantic streams: Millpond sedimentation, milldam breaching, channel incision, and stream bank erosion .................................................. 183
   Dorothy Merritts, Robert Walter, Michael Rahnis, Scott Cox, Jeffrey Hartranft, Chris Scheid, Noel Potter, Matthew Jenschke, Austin Reed, Derek Matuszewski, Laura Kratz, Lauren Manion, Andrea Shilling, and Katherine Datin
