Wolfgang Osten
Editor

Fringe 2013

7th International Workshop on Advanced Optical Imaging and Metrology
## Contents

**Honorary Lecture and Key Note**

**Holography Viewed from the Perspective of the Light Field Camera**  
*Joseph W. Goodman*  
3

**Invisibility, Perfect Imaging and More – Where Optics Meets Magic**  
*Tomáš Tyc*  
17

**Topic 1: New Methods and Tools for the Generation, Acquisition, Processing, and Evaluation of Data in Optical Imaging and Metrology**

**Fourier Modal Method and Its Applications to Inverse Diffraction, Near-Field Imaging, and Nonlinear Optics**  
*Jari Turunen, Jani Tervo*  
25

**The Road towards Accurate Optical Width Measurements at the Industrial Level**  
*Bernd Bodermann, Rainer Köning, Detlef Bergmann, Wolfgang Häßler-Grohne, Jens Flügge, Harald Bosse*  
35

**Lowering the Cross Correlation between Different Shape Parameters of the Inverse Grating Problem in Coherent Fourier Scatterometry**  
*S. Roy, N. Kumar, S.F. Pereira, H.P. Urbach*  
43

**Fast Geometric Characterization of Gold Nanorod Ensembles Based on Inverse Scattering Spectroscopy**  
*Ninghan Xu, Benfeng Bai, Qiaofeng Tan, Guofan Jin*  
49

**Engineering Harmonic Content in Diffractive Optical Elements**  
*Ignacio Moreno, Jorge Albero, Jeffrey A. Davis, Don M. Cottrell*

</table>
Performance Evaluation of Phase Unwrapping Algorithms for Noisy Phase Measurements ........................................... 155
Samia Heshmat, Satoshi Tomioka, Shusuke Nishiyama

Fast Fourier Virtual Fields Method for Determination of Modulus Distributions from Full-Field Optical Strain Data ................................................................. 161
Truong Tho Nguyen, Jonathan M. Huntley, Ian Ashcroft, Pablo D. Ruiz, Fabrice Pierron

Multi-wavelength Doppler Phase Shift Holography and Interferometry ............................................................... 167
Toyohiko Yatagai

Characterization of the Sound Field Generated by an Ultrasonic Transducer in a Solid Medium by Rayleigh-Sommerfeld Back-Propagation of Bulk Acoustic Waves Measured with Double-Pulsed TV Holography ........................................ 173
Cristina Trillo, Ángel F. Doval, Lidia M. Fontán, José L. Fernández, Pablo Rodríguez-Gómez, J. Carlos López-Vázquez

Wavefront Reconstruction from Noisy Fringe Observations via Sparse Coding .......................................................... 179
Vladimir Katkovnik, José Bioucas-Dias, Hongxing Hao

Fast Adaptive Processing of Low Quality Fringe Patterns by Automated Selective Reconstruction and Enhanced Fast Empirical Mode Decomposition ........................................ 185
Krzysztof Patorski, Maciej Trusiak, Maciej Wielgus

Use of Generalized N-dimensional Lissajous Figures for Phase Retrieval from Sequences of Interferometric Images with Unknown Phase Shifts ............................................... 191
Armando Albertazzi, Analucia V. Fantin, Allison F. Maia, Daniel P. Willemann, Mauro E. Benedet, Matias Viotti

Quantitative Analysis of Static and Vibratory Displacements by Holographic Processing of Projected Fringes ..................... 197
Karl A. Stetson

Experimental Analysis of n-Butanol Solubilization in Seawater by Pure-Phase Digital Holography ........................................ 203
Pierre Slangen, Laurent Aprin, Frédéric Heymes, Pascal Picart

Spatiotemporal Phase-Shifting Method for Robust Phase Analysis of Noisy Fringe Pattern ........................................ 209
Shien Ri, Hiroshi Tsuda
Axial Decorrelation of Paraxial Wavefields: Theory and Experiment ...
Damien P. Kelly, Lysann Megel, Thomas Meinecke, Stefan Sinzinger

Phase Extraction by Spiral Phase Transform in Digital Shearography ............................ 217
Jiancheng Xu, Jianxin Gao

Real-Time Fringe Evaluation for Displacement Measurement by Exploiting Multi-core Capabilities of Modern Computers ................. 221
Alexander Schöch, Sabine Linz-Dittrich, Carlo Bach, Andreas Ettemeyer

Comprehensive Fringe Pattern Processing Using Continuous Wavelet Transform .................................................. 225
Krzysztof Pokorski, Krzysztof Patorski

Comparison of Unwrapping Strategies for a 3D Measurement System Based on a Tailored Free-Form Mirror for Fringe Generation .......... 229
Christian Bräuer-Burchardt, Stefan Heist, Peter Kühmstedt, Gunther Notni

High Resolution Wavefront Measurement with Phase Retrieval Using a Diffractive Overlapping Micro Lens Array ...................... 233
Xiyuan Liu, Karl-Heinz Brenner

Automated Defect Detection Algorithm Applied to Shearography in Composites ...................................................... 237
Jean-François Vandenrijt, Marc Georges

Design of a Chromatic Fringe Projector for 3D Object Reconstruction .......................................................... 241
Francoise Tomer, Jörg Seewig, Thomas Fahlbusch, Günter Beichert, Thomas Böttner

Esmerando Escoto, Joselito Muldera, Lean Dasallas, Elmer Estacio, Percival Almoro

A TVSOOPDE Model for Denoising Fringe Pattern in Electronic Speckle Pattern Interferometry .......................... 251
Si Yan, Xinjun Zhu, Chen Tang, Haiqing Yan

Phase Profiling Using Single Shot Digital Holography .................. 255
P.T. Samsheerali, Kedar Khare, Joby Joseph
Digital Speckle Correlations in Coherent Surface Metrology and Imaging .................................................. 257
Ichirou Yamaguchi

A Robust Method for Full Chromatic Error Compensation in Digital Color Holography ........................................ 263
Mathieu Leclercq, Pascal Picart

High-Accuracy Characterisation of Spheres Using PTB’s Sphere Interferometer with an Enhanced Stitching Procedure .......... 267
Guido Bartl, Michael Krystek, R. Arnold Nicolaus

Fiber Polarization Mode Excitation Applied to Confocal Microscopy ... 271
Christoph Zeh, Thomas Härtling

Multi-level Spiral Phase Filtering in Speckle Interferometry Using Spatial Light Modulators ............................................ 275
Alberto Aguilar, Abundio Dávila, Enrique Landgrave

Fractional Vortex Dipole Spatial Filtering ........................................ 279
Manoj Kumar Sharma, Joby Joseph, Paramasivam Senthilkumaran

Measuring the Complex Amplitude of Wave Fields by Means of Phase Retrieval Using Partially Coherent Illumination ................. 283
Mostafa Agour, Khaled Elshaffey, Christoph von Kopylow, Ralf B. Bergmann, Claas Falldorf

Some Characteristics of Doubly Scattered Speckle Fields .............. 289
Dayan Li, Damien P. Kelly, John T. Sheridan

Improving of Zero Order Fringe Detection in Full-Field Low Coherence Interferometry by Light Source Spectrum Shaping .......... 293
Anna Pakula, Leszek Salbut

Non Ripple-Effect Discrete Fourier Integration Method .................... 297
Juan Campos, Josep Nicolas, José Luis Martínez

Novel Analytical Method of Wavefront Tracing and Its Application in Ophthalmic Optics .................................................... 301
Stephan Trumm, Gregor Esser, Wolfgang Becken, Werner Müller

Imaging and Quantitative Microscopy in Turbid Microfluidic Channels by Digital Holography ........................................ 305
Vittorio Bianco, Melania Paturzo, Andrea Finizio, Pasquale Memmolo, Pietro Ferraro
Phase and Polarization Measurement of a Spatially Varying Linear Polarization Distribution .................................................. 309
Sergej Rothau, Vanusch Nercissian, Andreas Berger, Irina Harder, Klaus Mantel, Norbert Lindlein

Dynamic Fringe Analysis in Spectral Interferometry and Optical Coherence Tomography Based on Recurrence Computational Algorithms .................................................. 313
Igor P. Gurov, Maxim Volynsky

Filtering ESPI Fringe Images with Non-local Means Algorithm .............. 317
Maciej Wielgus, Krzysztof Patorski

Computational Simulation of the Light Propagation Process through Nonlinear Media .................................................. 321
Sergey Nalegaev, Nikolay Petrov, Victor Bespalov

Measurement of All Orthogonal Components of the Displacement Field in the Volume of Scattering Materials Using Tilt Scanning Interferometry .................................................. 325
Pablo D. Ruiz, Jonathan M. Huntley, Bona S.H. Burlison

Positional Accuracy of Optical Vortex Metrology (OVM) ................. 329
Vivien Beyer, Wei Wang, Andrew J. Moore

Fringe Processing Methods for Adaptive Interferometry .............. 333
János Kornis

Optimized Phase Retrieval Algorithm with Multiple Illuminations ...... 337
Ni Chen, Jiwoon Yeom, Byoungho Lee

White-Light Interferometer–Micro-Profile Measurement Based on Higher Steps Phase-Shifting Algorithm .................................................. 341
Ming-Hsing Shen, Wei-Chung Wang, Chi-Hung Hwang

Increasing Scatterometric Sensitivity by Simulation Based Optimization of Structure Design .................................................. 345
Valeriano Ferreras Paz, Karsten Frenner, Wolfgang Osten

Estimating the Accuracy of Different Parametric Freeform Surface Descriptions .................................................. 349
Johannes Schindler, Goran Bastian Baer, Christof Pruss, Wolfgang Osten

An Inverse Measurement Strategy to Determine Phase Errors Introduced by Rigorous Effects in CGH .................................................. 355
Sandy Peterhänzel, Christof Pruss, Wolfgang Osten
Rigorous Speckle Simulation Using Surface Integral Equations and Boundary Element Methods ........................................ 361
Liwei Fu, Karsten Frennei, Wolfgang Osten

Programmable Microscopy ............................................. 365
Malte Hasler, Tobias Haist, Wolfgang Osten

Phase Retrieval with Resolution Enhancement by Using Random-Phase Illumination ........................................ 369
Peng Gao, Giancarlo Pedrini, Wolfgang Osten

Illumination Optics in Phase Space .................................... 373
Denise Rausch, Alois Herkommer

Holographic Imaging of a 3D Object Hidden behind a Diffuser or around a Corner .............................................. 377
Alok Kumar Singh, Dinesh Narayana Naik, Giancarlo Pedrini, Mitsuo Takeda, Wolfgang Osten

Topic 2: Application-Driven Technologies in Optical Imaging and Metrology

Ultra High-Precision Wavefront Metrology Using EUV Low Brightness Source ................................................. 385
Katsura Otaki, Naoki Kohara, Katsumi Sugisaki, Yoshinori Ichikawa, Yucong Zhu, Katsuhiko Murakami, Chidane Ouchi, Seima Kato, Masanobu Hasegawa, Tokuyuki Honda, Mitsuo Takeda

Interferometric Homogeneity Test Using Adaptive Frequency Comb Illumination .............................................. 393
Klaus Mantel, Johannes Schwider

Wafer-Based Aberration Metrology for Lithographic Systems Using Overlay Measurements on Targets Imaged from Phase-Shift Gratings ........................................... 399
Sven van Haver, Wim M.J. Coene

ISO Definition of Resolution for Surface Topography Measuring Instruments .................................................... 405
Richard Leach, Claudiu Giusca, Andrew Henning, Ben Sherlock, Jeremy Coupland

Measurement Uncertainty of Optical Methods for the Measurement of the Geometrical Shape of Objects ................. 411
Pavel Pavliček
Random Phase Shift Interferometer for the Measurement of Spherical Surfaces ................................................................. 417
Hagen Broistedt, Rainer Tutsch

New Definition of the SI Unit Kilogram – Spherical Interferometry as the Limiting Factor .................................................. 423
R. Arnold Nicolaus

A Synchronized Stroboscopic Holography Setup for Traveling Wave Analysis on Biomechanical Structures .......................... 433
Daniel De Greef, Joris J.J. Dirckx

Polarization State Detection by Using Multiplexing Digital Holography ............................................................................... 439
Caojin Yuan, Jun Ma, Shaotong Feng

Non Diffractive Beam Configurations for Optical Trapping ................................................................................ 445
Stephan Stiirwald, Robert Schmitt

Biospeckle PIV and Applications .................................................... 451
Roberto Alves Braga, Graham William Horgan, Ellem Walleska N. da Fonseca, Rodrigo Reis Soares, Lucas Tiago Silva, Henrique Coelho Barbosa, Murilo Risso

The Connection between Rays and Waves ........................................ 457
Miguel A. Alonso

Object Depending Measurement Uncertainty of Confocal Sensors ..... 465
Florian Mauch, Wolfram Lyda, Wolfgang Osten

Survivability of MEMS Packages at High-g Loads .......................... 471
Ryszard J. Pryputniewicz

Novel Industry Ready Sensors for Shape Measurement Based on Multi Wavelength Digital Holography .............................. 479
Markus Fratz, Daniel Carl

Positioning Errors in Coherence Scanning Interferometers: Determination of Measurement Uncertainties with Novel Calibration Artifacts ........................................................................................................ 485
Sebastian Boedecker, Christian Rembe, Rolf Krüger-Sehm, André Felgner

Traceable Quasi-dynamic Stroboscopic Scanning White Light Interferometry ................................................................. 491
Ville Vili Heikkinen, Anton Nolvi, Tor Paulin, Jeremias Seppä, Ivan Kassamakov, Antti Lassila, Edward Häggström
Measurement of Temperature Profile around Heated Wire Using Digital Holography .................................................. 497
Varun Kumar, Manoj Kumar, Shobhna Sharma, Chandra Shakher

Experimental Study on the Absolute Measurement of Flats ............ 503
Wenchuan Zhao, Weihong Song, Gaofeng Wu, Yongqian Wu

Optical Measurements of Nonlinearity in the Middle Ear ............... 507
John Peacock, Rik Pintelon, Joris J.J. Dirckx

Efficient Optical Metrology for Industrial Inspection ...................... 511
Yongkai Yin, Xiang Peng, Dong He, Meng Wang

Three-Dimensional Measuring of Immersed Objects in Transparent Media .................................................................................. 515
Ramon Rodriguez-Vera, Jesús E. Pinto, Daniel D. Aguayo, Juan A. Rayas, Fernando Mendoza-Santoyo

Fault Detection by Shearography and Fringes Projection Techniques ... 519
Angel Georgiev Baldjiev, Ventseslav Christov Sainov

Measurement of Temperature and Temperature Profile of Axi-symmetric Butane Torch Burner Flame Using Digital Speckle Pattern Interferometry (DSPI) .................................................. 523
Manoj Kumar, Varun Kumar, Gufran Sayeed Khan, Chandra Shakher

High Speed Fringe Pattern Topography for Detection of the Arterial Pulse Wave in Vivo .................................................. 527
Adriaan Campo, Joris J.J. Dirckx

6D-Measurement System for the Position Determination of a Robot End-Effector .................................................. 531
Alexej Janz, Christian Pape, Eduard Reithmeier

Interference Microscopy for Clean Air – How Optical Metrology Is Improving Quality Control of Fuel Injection Systems .................. 535
Robert Sachs, Frank Stanzel

Extending the Capabilities of PTB’s Ultra-Precision Interferometer towards the Measurement of Piezoelectric Strain at High Temperatures .................................................................................. 539
Tatjana Quast, Guido Bartl, René Schödel

Spatial-Frequency Filtering of Images by Polymer-Dispersed Liquid Crystals .................................................. 543
Peter P. Maksimyak, Andrey Nehrych
Temperature Measurement of Diffusion and Pre-mixed Flames under the Influence of Magnetic Field Using Digital Holographic Interferometry ................................................................. 547
Chandra Shakher, Shobhna Sharma, Manoj Kumar, Varun Kumar, Shilpi Agarwal

Interference Measurement of Surfaces Roughness ............................... 551
Oleg V. Angelsky, Andrew P. Maksimyak, Peter P. Maksimyak

Holographic Three-Dimensional Tracking of Micro-objects Exploiting Their Morphological Properties ................................................................. 555
Pasquale Memmolo, Andrea Finizio, Melania Paturzo, Lisa Miccio, Maria Iannone, Maurizio Ventre, Paolo Antonio Netti, Pietro Ferraro

Measurements of Three-Dimensional Freeform and Aspheric Geometries ................................................................. 559
Denis Dontsov, Enrico Langlotz, Walter Schott

Comparison of Two Methods to Design Computer Generated Holograms of Discrete Points Objects ............................... 563
Pablo Marín, Ángel Lizana, Alba Peinado, Miguel Mora-Gonzalez, Juan Campos

Wide-Field, Low-Cost Mapping of Power Ultrasound Fields in Water by Time-Average Moiré Deflectometry ................................................................. 567
Lidia M. Fontán, José L. Fernández, Ángel F. Doval, José L. Meniño, Cristina Trillo, J. Carlos López-Vázquez

Model-Based Deflectometric Measurement of Transparent Objects .... 573
Marc Fischer, Marcus Petz, Rainer Tutsch

Digital Holographic Setup for Measurement of Fast Developing Phenomenon in Wide Area ................................................................. 577
Vít Lédl, Pavel Psota, Tomáš Vít, Roman Doleček

White Light Phase-Shifting Interference Microscopy for Quantitative Phase Imaging of Red Blood Cells ................................................................. 581
Dalip Singh Mehta, Vishal Srivastava

Instantaneous Impact Measurements of an Anodised Aluminium Surface Using a Birefringent Phase Sensitive High Speed Camera .... 585
Peter John Bryanston-Cross, Brenda H. Timmerman, Jo Nawsasra

Towards Grating Reconstruction in Coherent Fourier Scatterometry .... 591
Nitish Kumar, Sarathi Roy, Omar El Gawhary, Silvania F. Pereira, Wim M.J. Coene, H. Paul Urbach
Contrast Enhancement in 3D Microscopic Imaging of Microorganisms Immersed in a Liquid Medium .................................................. 595
Ahmad Faridian, Giancarlo Pedrini, Wolfgang Osten

3-Dimensional Quantification of Surface Shape and Acoustically-Induced Vibrations of TM by Digital Holography .... 599
Morteza Khaleghi, Cosme Furlong, Jeffrey Tao Cheng, John J. Rosowski

Topic 3: High Dynamic Range Solutions in Optical Imaging and Metrology

Nanoscale Precision Measurements of Magnetic and Electric Fields by a Magneto-optical Sensor .............................................. 605
Jörg Wrachtrup, Bernhard Grotz

Transverse Polarization Structure of an Optical Vortex Beam around the Unfolding Point in a Birefringent Crystal .................................................. 611
Maruthi Manoj Brundavanam, Yoko Miyamoto, Mitsuo Takeda, Ken’ichi Nakagawa

Ultra High Speed 3D Measurement with the Focus Variation Method .................................................. 617
Franz Helmli, Reinhard Danzl, Manfred Prantl, Markus Grabner

Topography Measurements of High Gradient and Reflective Micro-structures by Digital Holography ......................... 623
Michał Józwik, Tomasz Kozacki, Kamil Liżewski, Maciej Barański, Christophe Gorecki

Interference Technique for Experimental Observation of the Spin Flow .................................................. 629
Oleg V. Angelsky, Andrew P. Maksimyak, Peter P. Maksimyak, Claudia Yu Zenkova

High Dynamic Range Digital Holographic Method for Very Small Amplitude Measurement .............................................. 635
Pavel Psota, Vít Lédl, Roman Doleček

The Metrology of Optical Fields Using Nanomanipulation ......................... 641
Claudia Yuriivna Zenkova, Iryna Soltysh, Pavlo Angelsky

Interferometry with Stabilization of Wavelength within a Fixed Measuring Range .............................................. 645
Josef Lazar, Miroslava Holá, Jan Hrabina, Zdeněk Buchta, Ondřej Číp, Jindřich Oulehla
Speckle Noise Reduction in Michelson Digital Holography Using Known or Unknown Reference Linear Phases and Image Processing . . . 649
Tomi Pitkäaho, Thomas J. Naughton

Generalized Phase Unwrapping for Multi-Wavelength Interferometry ................................................................. 653
Konstantinos Falaggis, David P. Towers, Catherine E. Towers

Acousto-mechanical Response of the Human TM Characterized by High-Speed Digital Holographic Methods ................ 657
Ivo Dobrev, Cosine Furlong, Jeffrey Tao Cheng, John J. Rosowski

Topic 4: Hybrid Technologies in Optical Imaging and Metrology

Performance Limits for Computational Photography ......................... 663
Kaushik Mitra, Oliver Cossairt, Ashok Veeraraghavan

Problems and Solutions in Tomographic Analysis of Phase Biological Objects ......................................................... 671
Małgorzata Kujawinska, Björn Kemper, Arkadiusz Kus, Michal Dudek, Wojciech Krauze, Julianna Kostencka, Tomasz Kozacki

3D-Optical Interference Microscopy at the Lateral Resolution Limit . . . 677
Peter Lehmann, Jan Niehues, Stanislav Tereschenko

Coherent Pattern Projection for Highspeed 3D Shape Measurements . . 683
Martin Schaffer, Marcus Große, Bastian Harendt, Richard Kowarschik

Multiwavelength Ptychography ................................................. 689
Daniel Claus, John M. Rodenburg

Preliminary Comparison of DUV Scatterometry for CD and Edge Profile Metrology on EUV Masks ................................. 695
Johannes Endres, Bernd Bodermann, Gaoliang Dai, Matthias Wurm, Mark-Alexander Henn, Hermann Gross, Frank Scholze, Alexander Diener

Results of a Sensitivity Analysis for the Tilted-Wave Interferometer . . . 701
Ines Fortmeier, Manuel Stavridis, Axel Wiegmann, Michael Schulz, Goran Bastian Baer, Christof Pruss, Wolfgang Osten, Clemens Elster

Application of Combined GI/DSPI Technique in Displacement Measurements of Cylindrical Objects ............................ 707
Dariusz Łukaszewski, Leszek Salbut
Automated Multi-sensor Inspection of 3D Objects .......................... 711
Marc Gronle, Wolfram Lyda, Wolfgang Osten

Recording of 3D Spatial and Spectral Information of Self-luminous Objects Using a Mach-Zehnder Radial Shearing Interferometer ....... 715
Dinesh Narayana Naik, Giancarlo Pedrini, Mitsuo Takeda, Wolfgang Osten

Topic 5: New Optical Sensors, Imaging and Measurement Systems

Preservation of Cultural Heritage: The Bridge between Inspection and Conservation ............................................................... 721
Christoph Krekel, Niclas Hein, Heide Skowranek

Precise Optical Metrology Using Computational Shear Interferometry and an LCD Monitor as Light Source ..................................... 729
Claas Falldorf, Aleksandar Simic, Gerd Ehret, Michael Schulz, Christoph von Kopylow, Ralf B. Bergmann

Potentials of Endoscopic Fringe Projection – A Differentiation of Measuring Video-, Fiber- and Borescopy ........................................... 735
Christoph Ohrt, Andreas Pösch, Markus Kästner, Eduard Reithmeier

Digital Holographic Imaging Based on Shearing Interferometry ......... 741
Pascal Picart, Mokrane Malek

High-NA Interferometrical Stylus for Free Form Surface Measurement in Optical and Automotive Industry .............................. 747
Matthias Fleischer, Gerald Franz, Pawel Drabarek

The Value of Fringes: How Interferometry Made Money .................... 753
Chris L. Koliopoulos

Mid-infrared Interferometer Operating at 4.41 μm: Design, Fabrication and Application ................................................................. 761
Qun Yuan, Zhishan Gao, Rihong Zhu, Jun Ma

Dynamic Measurements by Interferometry Based on High-Speed Camera and Photodetector ......................................................... 767
Yu Fu, Min Guo, Huan Liu, Keyu Yan, Yingjun Xu

Shape Measurements of Fast Rotating Objects with Enhanced Speckle Correlation Coefficient .................................................... 773
Jürgen W. Czarske, Robert Kuschmierz, Philipp Günther

A Traceable Nanometre Sensor Based on FP Feedback Cavity .......... 779
Zhaoli Zeng, Shulian Zhang
Revelations in the Art of Fringe Counting: The State of the Art in Distance Measuring Interferometry .............................. 785
Peter J. de Groot, Vivek G. Badami

Novel Parabolic Mirror Microscope Illuminated with Cylindrical Vector Beams for Confocal and Tip Enhanced Super Resolution Imaging ........................................... 791
Kai Braun, Dai Zhang, Xiao Wang, Josip Mihaljevic, Alfred J. Meixner

Longitudinal-Differential Interferometry: Axial Phase Study of Light for Micro- and Nano-optical Problems ................................. 797
Myun-Sik Kim, Toralf Scharf, Hans Peter Herzig, Reinhard Voelkel

Digital Holographic Recording of a Diffusely Reflecting Object without Speckle Noise .................................................. 803
You Seok Kim, Taeguen Kim, Sung-soo Woo, Hoonjong Kang, Ting-Chung Poon, Changhe Zhou

Handheld 3D Scanning with Automatic Multi-view Registration Based on Optical and Inertial Pose Estimation ......................... 809
Christoph Munkelt, Bernhard Kleiner, Torfi Torhallsson, Peter Kühmstedt, Gunther Notni

Heterodyne Common-Path Interference Microscope with a Wavelength-Tunable Diode Source ........................................... 815
Shumpei Yukita, Yukihiro Ishii, Kosuke Kiyohara, Jun Chen, Eiji Tokunaga

Automatic 3D Imaging and Modelling System with Color Information for Cultural Heritage Digitization ............................. 821
Xiaoli Liu, Xiang Peng, Dong He, Xingming Liu, Ameng Li, Yongkai Yin, Jiwang Ye, Yabin Ding

Fabrication of Square-Lattice Crossed Gratings Based on Diffraction of a Reference Grating .............................................. 827
Lijiang Zeng, Lifeng Li

Using LED Illumination in Fringe Projection Profilometry with a Sinusoidal Phase Grating .................................................. 831
Elena Stoykova, Hoonjong Kang, Natalia Berberova, Branimir Ivanov, Sung-soo Woo

High-Speed 3D Shape Measurement Using an Array Projector ......... 835
Stefan Heist, Marcel Sieler, Peter Kühmstedt, Gunther Notni
Spectral Properties of Saturation Pressure Filled Iodine Absorption Cells ................................................................. 839
Jan Hrabina, Miroslava Holá, Josef Lazar, Martin Sarbort, Ondřej Číp

Spectroscopic Traceability Route for Variable Synthetic Wavelength Absolute Distance Interferometry .............................. 843
Günther Prellinger, Karl Meiners-Hagen, Florian Pollinger

System and Method for Cylindrical Error Measurement with Interferometry ................................................................. 847
Dongbao Ge, Junzheng Peng, Yingjie Yu, Mingyi Chen, Asundi Anand

Comparison of System Properties for Wave-Front Holographic Printers .................................................................................. 851
Hoonjong Kang, Elena Stoykova, Hiroshi Yoshikawa, Sunghee Hong, Youngmin Kim

Multidimensional Mueller Matrices Microscopy of Biological Crystal Networks Structure ......................................................... 855
Yuriy A. Ushenko, Alexander V. Dubolazov, Artem O. Karachevtsev, Mikhail Yu. Sakhnovskiy, Liliya I. Bizer, Olena B. Bodnar

Double-Ended Interferometer for Measuring Gauge Blocks without Wringing ............................................................................ 859
Katharina Rau, René Schödel

The New Sphere Interferometer for Diameter Determination of the Si-Spheres for a Redefinition of the Kilogram ......................... 863
Torsten Mai, Guido Bartl, R. Arnold Nicolaus, Andreas Peter

Thickness Measurement with Multi-wavelength THz Interferometry ... 867
Thi-Dinh Nguyen, J.D. Valera, Andrew J. Moore

An Innovative Multi-headed Camera Network: A Displacement-Relay Videometrics Method in Unstable Areas ........................................... 871
Yang Shang, Qifeng Yu, Yong Xu, Guangwen Jiang, Xiaolin Liu, Sihua Fu, Xianwei Zhu, Xiaochun Liu

Stereophotogrammetric Image Field Holography ................................. 875
Holger Babovsky, Markus Hanemann, Marcus Große, Armin Kießling, Richard Kowarschik

Broad Area Laser Diode Coherence Measurement and Modeling ...... 879
Henri Simo Partanen, Sandy Claudia Petershänsel, Christof Pruss, Wolfgang Osten, Jani Tervo, Jari Turunen
SLM-Based Fringe Projection Profilometry Under Coherent Illumination ................................................................. 883
Natalia Berbewa, Elena Stoykova, Hoonjong Kang, Joo-Sup Park,
Branimir Ivanov

New Sensor for Small Angle Deflectometry with Lateral Resolution in the Sub-millimetre Range ........................................... 887
Gerd Ehret, Susanne Quabis, Michael Schulz, Birk Andreas,
Ralf D. Geckeler

Displacement Interferometry within a Passive Fabry-Perot Cavity ...... 893
Miroslava Holá, Jan Hrabina, Antonín Fejfar, Jan Kočka, Jiří Stuchlík,
Ondřej Číp, Jindřich Oulehla, Josef Lazar

Flying Triangulation – Towards the 3D Movie Camera .................... 895
Florian Willomitzer, Svenja Ettl, Christian Faber, Gerd Häusler

3D Scanning System for In-Vivo Imaging of Human Body .................. 899
Miguel Ares, Santiago Royo, Jordi Vidal, Laia Campderrós,
David Panyella, Frederic Pérez, Sergio Vera, Miguel A. González Ballester

A Novel Form Measurement System for Precision Components Using Interferometric Sub-aperture Stitching ....................... 903
Sören Laubach, Gerd Ehret, Holger Knell, Peter Kühnhold,
Peter Lehmann

Quantitative Deflectometry Challenges Interferometry .................... 907
Evelyn Olesch, Christian Faber, Roman Krobot, Ralf Zuber,
Gerd Häusler

Looking beyond Smoke and Flames by Lensless Infrared Digital Holography .......................................................... 911
Vittorio Bianco, Melania Paturzo, Massimiliano Locatelli,
Eugenio Pugliese, Andrea Finizio, Anna Pelagotti, Pasquale Poggi,
Lisa Miccio, Riccardo Meucci, Pietro Ferraro

Simultaneous Temperature and Deformations Measurements Using Long-Wave Infrared Speckle Interferometry: A Novel Hybrid Technique for Industrial Nondestructive Testing ....................... 917
Marc Georges, Jean-François Vandenrijt, Cédric Thizy, Igor Alexeenko,
Giancarlo Pedrini, Jonathan Rochet, Birgit Vollheim, Iagoba Jorge,
Pablo Venegas, Ion Lopez, Wolfgang Osten

Digital Holographic Interferometry in the Long-Wave Infrared for the Testing of Large Aspheric Space Reflectors .......................... 921
Jean-François Vandenrijt, Cédric Thizy, Yvan Stockman,
Patrick Queeckers, Frank Dubois, Dominic Doyle, Marc Georges
VIS-NIR Full-Field Low Coherence Interferometer for Surface Layers Non-destructive Testing and Defects Detection .......................... 925
Leszek Salbut, Sławomir Tomczewski, Anna Pakula

Fringe Projection Based Real-Time Three-Dimensional Measurement System ................................................................. 929
Cong Liu, Zhenming Chen, Xiaoyuan He

In-Vivo Skin Roughness Measurement by Laser Speckle .............. 933
Tim K. Lee, Lioudmila Tchvialeva, Harvey Lui, Haishan Zeng, David I. McLean

Surface Reaction under Climate Impact: A Direct Holographic Visualisation of Assumed Processes ................................. 937
Vivi Tornari

Technology, Business, and Ethics in the Age of Open Access ......................................................... 943
Nadya Reingand, Yan Hankin

Design of a Hybrid Miniaturized Zoom Imaging System .............. 947
Simon Thiele, Marc Blattmann, Hans Zappe, Andreas Seifert, Alois Herkommer

Optical Methods for the Assessment of Transport and Age Induced Defects of Artwork ..................................................... 951
Michael Morawitz, Niclas Hein, Igor Alexeenko, Marc Wilke, Giancarlo Pedrini, Christoph Krekel, Wolfgang Osten

itom – An Open Source Measurement, Automation and Evaluation Software Suite ............................................................. 957
Marc Gronle, Christian Kohler, Marc Wilke, Wolfram Lyda, Heiko Bieger, Wolfgang Osten

Appendix ................................................................. 965

Author Index ............................................................. 971
