Preface: Bayesian Inference and Maximum Entropy Methods in Science and Engineering
Philip Goyal, Adom Giffin, Kevin H. Knuth, and Edward Vrscay

Professor János Aczél

FOUNDATIONS

Axiomatization of maximum entropy without the Bayes rule
Alexis Akira Toda

Estimating the bias of a noisy coin
Christopher Ferrie and Robin Blume-Kohout

On principles of inductive inference
Ryszard Pawel Kostecki

From data to constraints
S. Mukhopadhyay, E. Parzen, and S. N. Lahiri

On ignorance priors and the principle of indifference
Jingfeng Wang and Rafael L. Bras

A note on antidata
Nissim Kaufmann

A Bayesian analysis of scale-invariant processes
Veronica Nieves, Jingfeng Wang, and Rafael L. Bras

Fractal-based measure approximation with entropy maximization and sparsity constraints
Davide La Torre and Edward R. Vrscay
Bayesian inference in the numerical solution of Laplace’s equation
Fábio Macêdo Mendes and Edson Alves da Costa Júnior 72

Modeling the world by minimizing relative entropy
Antoine A. J. van de Ven 80

On the notion of fair games and Bernoulli’s concept of moral expectation
Arthur Baraov 88

Quantum theory from the geometry of evolving probabilities
Marcel Reginatto and Michael J. W. Hall 96

Entropic dynamics and the quantum measurement problem
David T. Johnson and Ariel Caticha 104

Momentum and uncertainty relations in the entropic approach to quantum theory
Shahid Nawaz and Ariel Caticha 112

On a differential geometric viewpoint of Jaynes’ MaxEnt method and its quantum extension
S. A. Ali, C. Cafaro, A. Giffin, C. Lupo, and S. Mancini 120

Shannon’s measure of information and the thermodynamic entropy
Arieh Ben-Naim 129

METHODS

Bayesian computation in big spaces—Nested sampling and Galilean Monte Carlo
John Skilling 145

Cruising the simplex: Hamiltonian Monte Carlo and the Dirichlet distribution
Michael Betancourt 157

Adaptive Hamiltonian estimation using Bayesian experimental design
Christopher Ferrie, Christopher E. Granade, and D. G. Cory 165

Bayesian inference in kernel feature space
Kai Krajsek and Hanno Scharr 174

vi
Iteration free vector orientation using maximum relative entropy with observational priors
   Renaldas Urniezius and Adom Giffin 182

Maximum entropy principle and partial probability weighted moments
   Jian Deng, M. D. Pandey, and W. C. Xie 190

The full Bayesian significance test for symmetry in contingency tables
   Gustavo G. Bernardo, Marcelo S. Lauretto, and Julio M. Stern 198

Estimation and model selection in Dirichlet regression
   André P. Camargo, Julio M. Stern, and Marcelo S. Lauretto 206

Reliability analysis in series systems: An empirical comparison between Bayesian and classical estimators
   Agatha S. Rodrigues, Teresa Cristina M. Dias, Marcelo S. Lauretto, and Adriano Polpo 214

A novel hierarchical Bayesian method for SAR image reconstruction
   Sha Zhu, Ali Mohammad-Djafari, Xiang Li, and Hongqiang Wang 222

Maximum joint entropy and information-based collaboration of automated learning machines
   N. K. Malakar, K. H. Knuth, and D. J. Lary 230

New copulas obtained by maximizing Tsallis or Rényi entropies
   Doriano-Boris Pougaza and Ali Mohammad-Djafari 238

MaxEnt alternatives to Pearson family distributions
   Barrie J. Stokes 250

APPLICATIONS

Maximum entropy production—Full steam ahead
   Ralph D. Lorenz 263

Maximum entropy analysis of steady-state flow systems (and extremum entropy production principles)
   Robert K. Niven 270
