## 1 The history of biomaterials used for breast augmentation  
W. Peters, University of Toronto, Canada  

1.1 Introduction  1  
1.2 Injectable materials  1  
1.3 Sponges  10  
1.4 Breast implants  16  
1.5 Other forms of texturing  23  
1.6 Inflatable implants  27  
1.7 Trilucent (*LipoMatrix*) implants – 1995 to 2000  33  
1.8 Acknowledgements  35  
1.9 References  35  

## 2 The development of breast implants  
G. P. Maxwell and A. Gabriel, Loma Linda University Medical Center, USA  

2.1 Introduction  40  
2.2 Breast implant evolution  41  
2.3 Alternative types of implant and safety aspects  44  
2.4 Future trends  47  
2.5 References  48  

## 3 The chemistry and physical properties of biomedical silicones  
M. A. Brook, McMaster University, Canada  

3.1 Introduction  52  
3.2 Properties of silicones  56  

© Woodhead Publishing Limited, 2012
Retrieval and analysis of breast implants emphasizing strength, durability, and failure mechanisms

H. J. Brandon, K. L. Jerina and C. J. Wolf, Washington University, USA and V. L. Young, BodyAesthetic Plastic Surgery and Skin Care Center, USA

7.1 Introduction
7.2 Silicone gel explants with longest implantation times
7.3 Shell properties of silicone gel implants as a function of implantation time
7.4 Lot-matched control study
7.5 Effect of implantation time on shell properties of saline implants
7.6 Breast implant rupture
7.7 Rupture rates and reoperation rates
7.8 References
