
Miami Beach, Florida, USA
17 – 19 August 2010
2010 18th Annual IEEE/ACM
International Symposium
on Modeling, Analysis
and Simulation of Computer
and Telecommunication
Systems

MASCOTS 2010

Table of Contents

Message from the General Chair ........................................... x
Message from the Program Chairs ......................................... xi
Conference Committees ......................................................... xii
Reviewers ........................................................................... xiv
Keynote 1 ........................................................................... xv
Keynote 2 ........................................................................... xvi

Session 1 - Best Paper Award Candidates I

EntomoModel: Understanding and Avoiding Performance Anomaly Manifestations ............................................. 3
  Christopher Stewart, Kai Shen, Arun Iyengar, and Jian Yin
Exploiting Concurrency to Improve Latency and throughput in a Hybrid Storage System ............................................. 14
  Xiaojian Wu and A.L. Narasimha Reddy
PAC: Pattern-driven Application Consolidation for Efficient Cloud Computing ......................................................... 24
  Zhenhuan Gong and Xiaohui Gu

Session 2 - Best Paper Award Candidates II

Predicting the Performance of Virtual Machine Migration ................................................................. 37
  Sherif Akoush, Ripduman Sohan, Andrew Rice, Andrew W. Moore, and Andy Hopper
Distributed Routing for Vehicular Ad Hoc Networks: Throughput-Delay Tradeoff ............................................... 47
  Ali Abedi, Majid Ghaderi, and Carey Williamson
DiffECC: Improving SSD Read Performance Using Differentiated Error Correction
Guanying Wu, Xubin He, Ningde Xie, and Tong Zhang

Session 3 - Storage I
PUD-LRU: An Erase-Efficient Write Buffer Management Algorithm for Flash
Jian Hu, Hong Jiang, Lei Tian, and Lei Xu
Effect of Replica Placement on the Reliability of Large-Scale Data Storage Systems
Vinodh Venkatesan, Illias Iliadis, Xiao-Yu Hu, Robert Haas, and Christina Fragouli
Sequential Prefetch Cache Sizing for Maximal Hit Rate
Swapnil Bhatia, Elizabeth Varki, and Arif Merchant

Session 4 - Networks I
RRDtrace: Long-term Raw Network Traffic Recording using Fixed-size Storage
Antonis Papadogiannakis, Michalis Polychronakis, and Evangelos P. Markatos
Profit Allocation in Coalitional VoD Service
Noriaki Kamiyama, Ryosichi Kawahara, and Haruhisa Hasegawa
Fair Allocation of Substrate Resources among Multiple Overlay Networks
Mehmet Demirci and Mostafa Ammar

Session 5 - Distributed Systems I
On Predictability of System Anomalies in Real World
Yongmin Tan and Xiaohui Gu
On the Relevance of Social Information to Opportunistic Forwarding
Abderrahmen Mtibaa, Martin May, and Mostafa Ammar
Autonomic Provisioning with Self-Adaptive Neural Fuzzy Control for End-to-end Delay Guarantee
Palden Lama and Xiaobo Zhou

Session 6 - Wireless Networks
Cluster-Based Correlated Data Gathering in Wireless Sensor Networks
Ali Dabirmoghaddam, Majid Ghaderi, and Carey Williamson
Expanding the Event Horizon in Parallelized Network Simulations
Georg Kunz, Olaf Landsiedel, Stefan Götz, Klaus Wehrle, James Gross, and Farshad Naghibi
Analytical Modelling and Message Delay Performance Evaluation of the IEEE 802.16 MAC Protocol
Luis F.M. de Moraes and Danielle Lopes F.G. Vieira

Session 7 - Parallel and Multicore Systems I
Efficient Discovery of Loop Nestsin Execution Traces
Qiang Xu, Jaspal Subhlok, and Nathaniel Hammen
Timing Accurate Functional-Level Hardware Simulation with Pull Model Data Flow
George F. Riley and Elizabeth Lynch
A Simulation Framework for the Analysis of the TLB Behavior in Virtualized Environments ................................................................. 211

Girish Venkatasubramanian, Renato J. Figueiredo, Ramesh Illikkal, and Donald Newell

Session 8 - Networks II

A Case for Robust Semi-Experiments .......................................................................................................................... 225

Himanshu Gupta, Vinay J. Ribeiro, and Anirban Mahanti

Performance of Quantized Congestion Notification in TCP Incast Scenarios of Data Centers .................................................. 235

Prajwal Devkota and A.L. Narasimha Reddy

Measurement-Based Analysis of Head-of-Line Blocking for SIP over TCP .............................................................. 244

Marco Happenhofer and Peter Reichl

Session 9 - Cloud Computing

Decision Model for Cloud Computing under SLA Constraints ..................................................................................... 257

Artur Andrzejak, Derrick Kondo, and Sangho Yi

Clasas: A Key-Store for the Cloud ......................................................................................................................... 267

S.J. Thomas Schwarz and Darrell D.E. Long

Profit-Aware Server Allocation for Green Internet Services .................................................................................. 277

Michele Mazzucco, Dmytro Dyachuk, and Marios Dikaiakos

Session 10 - Storage II

Frequency Based Chunking for Data De-Duplication ............................................................................................... 287

Guanlin Lu, Yu Jin, and David H.C. Du

Examining Energy Use in Heterogeneous Archival Storage Systems ...................................................................... 297

Ian F. Adams, Ethan L. Miller, and Mark W. Storer

Modeling the Run-time Behavior of Transactional Memory ................................................................................ 307

Zhengyu He and Bo Hong

Session 11 - Distributed Systems II

Autonomic Log/Restore for Advanced Optimistic Simulation Systems ............................................................... 319

Roberto Vitali, Alessandro Pellegrini, and Francesco Quaglia

OnTimeDetect: Dynamic Network Anomaly Notification in perfSONAR Deployments ........................................ 328

Prasad Calyam, Jiulu Pu, Weiping Mandrawa, and Ashok Krishnamurthy

Content Delivery Using Replicated Digital Fountains ......................................................................................... 338

Niklas Carlsson and Derek L. Eager

Session 12 - Parallel and Multicore Systems II

Barra: A Parallel Functional Simulator for GPGPU ................................................................................................... 351

Sylvain Collange, Marc Daumas, David Defour, and David Parello

Automatic Derivation of Performance Prediction Models for Load-balancing Properties Based on Goal-oriented Measurements ........................................................................................................................................ 361

Michael Hauck, Jens Happe, and Ralf H. Reussner

CantorSim: Simplifying Acceleration of Micro-architecture Simulations ........................................................................ 370

Zhibin Yu, Hai Jin, Jian Chen, and Lizy K. John
