Woodhead Publishing Series in Food Science, Technology and Nutrition

Foreword by J. Hyman

Foreword by W. H. Noordman and E. M. Meijer

Part I The changing nature of innovation in the food and drink industry

1 Trends in the acquisition of external knowledge for innovation in the food industry

M. Acosta, D. Coronado and E. Ferrández, University of Cadiz, Spain

1.1 Introduction

1.2 Reasons for open innovation in the food industry

1.3 Measuring open innovation in the food industry

1.4 Sources and types of data

1.5 Results of the open-innovation study

1.6 Conclusions

1.7 Acknowledgements

1.8 References

1.9 Appendix: concordance between agri-food technological sectors and International Patent Classification (IPC)

2 The tension between traditional innovation strategies and openness: Lindt’s controlled open innovation approach

V. Lazzarotti and R. Manzini, Cattaneo University – LIUC, Italy

2.1 Introduction

2.2 Literature review

2.3 Research method for Lindt case study

2.4 Open and closed innovation at Lindt

© Woodhead Publishing Limited, 2013
Contents

2.5 Lindt's open-innovation approach in practice: the innovation project Noccior ........................................... 32
2.6 Results of controlled open innovation in the Lindt case .... 34
2.7 Conclusions ......................................................... 36
2.8 References ......................................................... 36

3 The role of open innovation in the industry convergence between foods and pharmaceuticals .............................................. 39
S. Bröring, University of Applied Sciences Osnabrück, Germany and Wageningen University and Research Centre, The Netherlands
3.1 Introduction ......................................................... 39
3.2 A brief literature review on industry convergence .............. 40
3.3 Convergence-related challenges and the role of open innovation ................................................................. 43
3.4 Evidence for industry convergence between foods and pharmaceuticals ......................................................... 47
3.5 Open innovation in order to cope with convergence in the neutraceuticals and functional foods (NFF) sector ............... 51
3.6 Conclusion ......................................................... 56
3.7 Future trends ....................................................... 58
3.8 References ......................................................... 59

4 Accelerating the innovation cycle through intermediation: the case of Kraft's melt-proof chocolate bars ................................................. 63
R. Wielens, NineSigma, Belgium
4.1 Introduction ......................................................... 63
4.2 From research to search in company innovation ............... 64
4.3 Key capabilities in open innovation ................................ 65
4.4 From idea-driven innovation to need-driven innovation ..... 68
4.5 Case study: melt-proof chocolate bars from Kraft ............ 68
4.6 Conclusions ......................................................... 70
4.7 Future trends ....................................................... 71
4.8 References ......................................................... 72

5 The impact of open innovation on innovation performance: the case of Spanish agri-food firms ................................................. 74
C. Bayona-Sáez, T. García-Marco and M. Sanchez-García,
Universidad Pública de Navarra, Spain and C. Cruz-Cazares,
University of Barcelona, Spain
5.1 Introduction: the agri-food sector and innovation ............... 74
5.2 How innovative are Spanish agri-food firms? ................. 77
5.3 Measuring open innovation in Spanish agri-food firms ...... 80
5.4 The effect of openness on the innovative performance of firms 85
5.5 Conclusions ......................................................... 91
5.6 References ......................................................... 93
Part II  Partners and networks for open innovation

6  Partnering with public research centres and private technical and scientific service providers for innovation: the case of Italian rice company, Riso Scotti  ................................................................. 97
   V. Lazzarotti and R. Manzini, Cattaneo University – LIUC, Italy
   6.1  Introduction ................................................................. 97
   6.2  The role of private technical and scientific service (TSS) providers: advantages and limitations ........................................... 99
   6.3  The role of universities and public research centres: advantages and limitations ................................................................. 100
   6.4  Riso Scotti case study .................................................. 101
   6.5  Conclusions and managerial implications ........................... 105
   6.6  References .................................................................. 107

7  Consumers as part of food and beverage industry innovation .... 109
   S. E. Kemp, Consultant, UK
   7.1  Introduction ................................................................. 109
   7.2  Understanding food and beverage consumers and their world ................................................................. 111
   7.3  Consumer-centric company culture for innovation  .......... 115
   7.4  Consumer-driven innovation process ............................ 117
   7.5  Consumers as co-creators ............................................. 127
   7.6  Conclusion .................................................................. 132
   7.7  Future trends ................................................................. 133
   7.8  Sources of further information and advice ....................... 134
   7.9  References .................................................................. 135

8  Co-creation of value with consumers as an innovation strategy in the food and beverage industry: the case of Molson Coors’ ‘talking can’ .................................................................................. 139
   M. Garcia Martinez, Kent Business School, University of Kent, UK
   8.1  Introduction ................................................................. 139
   8.2  Co-creation of value with consumers ............................ 141
   8.3  Research design .......................................................... 142
   8.4  Molson-Coors Brewing Company UK (MCBC-UK): the need for consumer-driven innovation ........................................... 142
   8.5  The discover style of open innovation ............................ 145
   8.6  The ‘talking can’: co-creating value with consumers ........ 146
   8.7  Discussion .................................................................. 149
   8.8  Conclusion .................................................................. 151
   8.9  References .................................................................. 151

9 Collaborative product innovation in the food service industry.  
Do too many cooks really spoil the broth? 154  
A. I. A. Costa, The Catholic University of Portugal, Portugal  
9.1 Introduction 154  
9.2 A review of open-innovation practices in the food industry 156  
9.3 Collaborative product innovation (CPI) in the food-service industry: the path of diffusion of sous vide cooking in the US 160  
9.4 Conclusions and future trends 170  
9.5 References 171  

10 Effectiveness of cluster organizations in facilitating open innovation in regional innovation systems: the case of Food Valley in the Netherlands 174  
S. W. F. Omta, Wageningen University and Research Centre, The Netherlands and F. T. J. M. Fortuin, Food Valley Organization, The Netherlands and Wageningen University and Research Centre, The Netherlands  
10.1 Introduction 174  
10.2 Theoretical background 175  
10.3 The Dutch agri-food sector and Food Valley Organization 177  
10.4 Conclusions 183  
10.5 Future trends 184  
10.6 Sources of further information and advice 184  
10.7 References 185  
10.8 Appendix 1: the four main functions of Food Valley, including fifteen services, activities and information sources 186  
10.9 Appendix 2: assessment of small to medium-sized enterprises and large companies of the importance of Food Valley functions 187  
10.10 Appendix 3: member company assessment of the importance of Food Valley functions by company type 188  

11 The importance of networks for knowledge exchange and innovation in the food industry 189  
B. Kühne, V. Lefebvre, C. Cochez and X. Gellynck, Ghent University, Belgium  
11.1 Introduction 189  
11.2 Knowledge exchange and innovation and the importance of networks 190  
11.3 Network methodology: a case study approach 195  
11.4 Results of the three Flemish case studies 198  
11.5 Conclusions and future trends 207  
11.6 References 208
15 Managing asymmetric relationships in open innovation: lessons from multinational companies and SMEs

D. Oughton, University of Cambridge, UK and L. Mortara and T. Minshall, IfM Centre for Technology Management, UK

15.1 Introduction: the importance of large and small company partnerships in the food industry

15.2 The difficulties of open innovation

15.3 Culture, complexity and communication problems

15.4 The importance for companies of focusing on risk, reward and balance

15.5 Overcoming obstacles to achieve successful company partnerships

15.6 Collaborations between companies: case studies

15.7 Conclusion

15.8 Acknowledgements

15.9 References

16 Challenges faced by multinational food and beverage corporations when forming strategic external networks for open innovation

L. Tolhurst and J. Brown, Oakland Innovation, UK

16.1 Introduction

16.2 Strategic external networks for open innovation

16.3 Research methodology

16.4 Findings

16.5 Discussion

16.6 Future trends

16.7 Conclusions and recommendations

16.8 References

Part IV Open innovation tools, process and managerial frameworks

17 The ‘want find get manage’ (WFGM) framework for open-innovation management and its use by Mars, Incorporated

M. Garcia Martinez, Kent Business School, University of Kent, UK

17.1 Introduction

17.2 History of open innovation at Mars, Incorporated

17.3 Mars’ open-innovation model

17.4 The open-innovation framework: ‘want find get manage’

17.5 Conclusions

17.6 References

18 Crowdsourcing: the potential of online communities as a tool for data analysis

M. Garcia Martinez and B. Walton, Kent Business School, University of Kent, UK

18.1 Introduction

18.2 Predictive modelling competitions

© Woodhead Publishing Limited, 2013
18.3 Design and management of predictive modelling competitions  
18.4 Case study: Kaggle  
18.5 Conclusions  
18.6 References  

19 The role of information systems in innovative food and beverage organizations  
J. G. Caudill, University of Tennessee, USA  
19.1 Introduction  
19.2 The role of technology in innovation  
19.3 Innovative technologies in agriculture and food production  
19.4 Technology's support of innovation  
19.5 Free tools for innovation  
19.6 Future trends  
19.7 Conclusion  
19.8 Sources of further information and advice  
19.9 References  

20 Effective organizational and managerial frameworks to support open innovation: overview and the case of Heinz  
V. Lazzarotti and R. Manzini, Cattaneo University – LIUC, Italy  
20.1 Introduction  
20.2 The need for organizational and management tools to support open innovation  
20.3 Case study: Heinz's strategy, business and organization  
20.4 Conclusions and managerial implications  
20.5 References  

21 Innovating with brains: the psychology of open innovation  
B. A. Sabel, University of Magdeburg Medical School, Germany and Institute of Automation, China, K. Sabel, Consulting-Berlin, Germany and J. T. Preston, TEM Capital and Continuum Energy Technologies, USA  
21.1 Introduction  
21.2 Innovation is all about psychology  
21.3 Phases of innovation  
21.4 The influence of soft factors on the success of innovation  
21.5 The psychology of the innovation team  
21.6 The innovative environment of academia  
21.7 Start-ups and small to medium-sized enterprises (SMEs): open innovation by default  
21.8 Predicting innovation success: the 'Preston' equation  
21.9 Future trends  
21.10 References
