CONTENTS

ADVANCED MANUFACTURING PROCESSES

ESDA2012-82021 ................................................................. 1
Study on the Formability of Magnesium Alloy Parts Under Hot Forging Process
Su-Hai Hsiang, Yi-Cheng Hong, Huey-Lin Ho, and Shiuh-Kuang Yang

ESDA2012-82108 ................................................................. 9
Laser Sintering Process Analysis: Application to Chromium-Cobalt Alloys for Dental
Prosthesis Production
S. P. Faure, L. Mercier, P. Didier, R. Roux, J. F. Coulon, S. Garel, J. Trenit, H. Buard, and
F. Razan

ESDA2012-82166 ................................................................. 17
Towards a New Concept of In-Line Crankshaft Balancing by Contact Less Measurement:
Process for Selecting the Best Digitizing System
Alexandre Zuquete-Guarato, Charyar Mehdi-Souzani, Yann Quinsat, Claire Lartigue, and
Leila Sabri

ESDA2012-82199 ................................................................. 27
Knowledge-Based Automated Programming of Welding Robots for Lot-Size One Products
Christian Hillbrand and Gerald Frank

ESDA2012-82296 ................................................................. 37
Applications for a New Production Technology: Analysis of Linear Flow-Split Linear Guides
Ivan Karin, Nils Lommatzsch, Klaus Lipp, Volker Landersheim, Holger Hanselka, and
Andrea Bohn

ESDA2012-82299 ................................................................. 45
A Batch Tracing System for Thermochemical Finishing Processes Enables New Services for
Quality Management
Ruth Fleisch, Robert Schöch, and Christian Hillbrand

ESDA2012-82316 ................................................................. 53
A Multibody System Approach to Drill String Dynamics Modeling
Dmitry Pogorelov, Gennady Mikheev, Nikolay Lysikov, Lev Ring, Raju Gandikota, and
Nader Abedrabbo

ESDA2012-82410 ................................................................. 63
Design for Manufacture Using Functional Analysis and CAD Mould Simulation for Rapid
Prototyping and Rapid Tooling
Mihaela E. Lupeanu, Hadley Brooks, Allan E. W. Rennie, H. Kursat Celik, Corneliu Neagu,
and Ibrahim Akinci

ESDA2012-82443 ................................................................. 71
A Manufacturing System for Advanced Multi-Process Manufacturing Based on Step-NC
Matthieu Rauch and Jean-Yves Hascoet
ESDA2012-82530 ................................................................. 81
New Development in High Efficiency Deep Grinding
Andre D. L. Batako, Valery V. Kuzin, and Brian Rowe

ESDA2012-82534 ................................................................. 89
Simulation of a Finishing Operation: Milling of a Turbine Blade and Influence of Damping
Philippe Lorong, Gerard Coffignal, Anthony Texier, Etienne Balmes, and Mikhail Guskov

ESDA2012-82562 ................................................................. 99
Adaptable Fixturing Heads for Swarm Fixtures: Discussion of Two Designs
Serena Gagliardi, Xiong Li, Matteo Zoppi, Luis de Leonardo, and Rezia Molfino

ESDA2012-82563 ................................................................. 107
Bearings Influence on the Dynamic Behavior of HSM Spindle
David Noel, Mathieu Ritou, Sebastien Le Loch, and Benoit Furet

ESDA2012-82582 ................................................................. 115
Measurement and Comparison of Force Effort During Friction Stir Welding in a Parallel
Kinematic 5-Axis Milling Machine
Arun Prasath Manogaran, Guillaume Racineux, and Jean-Yves Hascoet

ESDA2012-82586 ................................................................. 123
Functionally Graded Material (FGM) Parts: From Design to the Manufacturing Simulation
Pierre Muller, Pascal Mongol, and Jean-Yves Hascoet

ESDA2012-82676 ................................................................. 133
The Use of Adaptive PCA-Based Condition Monitoring Methods in Machining Processes
Marco Grasso, Bianca Maria Colosimo, and Giovanni Moroni

ESDA2012-82702 ................................................................. 141
Vibration-Assisted Grinding of Mild and Hardened Steel: A Novel Design Vibrating Jig and
Process Performance
Vaios Tsiakoumis and Andre Batako

ESDA2012-82719 ................................................................. 147
Computer Aided Electroforming for Rapid Manufacturing Applications
Pedro M. Hernández Castellano, Ayoze Socas Sánchez, Antonio N. Benítez Vega,
Mario Monzón Verona, Fernando Ortega García, and Mª Dolores Marrero Alemán

ESDA2012-82764 ................................................................. 155
A Decision Tool for Green Manufacturing While Utilizing Additive Process
Ana L. Santos, Henrique A. Almeida, Helena Bártolo, and Paulo Bártolo

ESDA2012-82770 ................................................................. 163
Usability Testing of Ultra High-Strength Steels
Jouko A. Heikkala and Anu J. Väisänen

ESDA2012-82772 ................................................................. 175
An Innovation System for Building Manufacturing
Flávio Craveiro, João Meneses de Matos, Helena Bártolo, and Paulo Bártolo

Objective Assessment of Surgical Skills
Jenny A. Cifuentes Quintero, Minh Tu Pham, Flavio Prieto, Pierre Boulanger, and Richard Moreau

MULTISCALE MECHANIC OF BIOLOGICAL TISSUES
Towards Building a Multiscale Mechanical Model for the Prediction of Acute Subdural Hematomas
Mathieu Nierenberger, Daniel George, Daniel Baumgartner, Yves Rémond, Saïd Ahzi, Renée Wolfram, Jean-Luc Kahn, and Rania Abdel Rahman

On the Ability of Structural and Phenomenological Hyperelastic Models to Predict the Mechanical Behavior of Biological Tissues Submitted to Multiaxial Loadings
Mathieu Nierenberger, Yves Rémond, and Saïd Ahzi

Modeling of Diffuse Damage Near Micro Cracks in Human Cortical Bone
E. Budyn and T. Hoc

Study of the Effect of Mechanical Loading on Cell Cultures in Bone Tissue Engineering
Magali Cruel, Morad Bensidhoum, Laure Sudre, Guillaume Puel, Virginie Dumas, and Thierry Hoc

Computer Simulation-Based Modeling of the Pharmaceutical Intervention of Postmenopausal Osteoporosis by Denosumab
Stefan Scheiner, Peter Pivonka, David W. Smith, and Colin R. Dunstan

Preparing for Generation Z: The Hippocampus Experiment at Ecole Centrale de Nantes
Christine Evain, Simon Carolan, and Morgan Magnin

MarkUs: An Open-Source Web Application to Annotate Student Papers On-Line
Morgan Magnin, Nelle Varoquaux, Benjamin Vialle, Guillaume Moreau, Karen Reid, Mike Conley, and Severin Gehwolf

A CAD/Mechatronic Solar Panel Tracking Student Design Project
A. D. Spence, T. Kenyon, D. A. Sawula, L. Balan, and W. M. Mohammed
MULTIPHYSICS

ESDA2012-82050 ................................................................. 319
Energy-Consistent Finite Element Modelling of Ferromagnetic Hysteresis
  Christophe Geuzaine, Laurent Stainier, and François Henrotte

ESDA2012-82101 ................................................................. 321
Modelling of the Swelling of SiC-Based Refractory Lining Used in Waste-to-Energy Plants
  Tarek Merzouki, Eric Blond, Nicolas Schmitt, Thierry Cutard, Alain Gasser, and Emmanuel de Bilbao

ESDA2012-82137 ................................................................. 327
Multiscale Modelling of Electrical Contacts Using Domain Decomposition
  Piergiorgio Alotto, Massimo Guarnieri, and Federico Moro

ESDA2012-82142 ................................................................. 333
Gear Rattle Analysis Based on Wavelet Signal Decomposition
  R. Brancati, E. Rocca, S. Savino, and F. Farroni

ESDA2012-82253 ................................................................. 341
A Macroscopic Model of the Thermo-Chemo-Mechanical Behaviour of Mixed Ionic and
  Electronic Conductors
  O. Valentin, C. Gazeau, E. Blond, P. M. Geffroy, and N. Richet

ESDA2012-82284 ................................................................. 345
Experimental Characterization of a Permanent Magnet Magnetorheological Clutch for
  Automotive Applications
  Francesco Bucchi, Paola Forte, and Francesco Frendo

ESDA2012-82305 ................................................................. 357
Mechanical Behavior and Damage of Tridimensional Multilayered Ceramics-Tungsten
  Power Electronic Substrates
  Charlotte Robert, Sylvie Pommier, Stephane Lefebvre, Marion Ortali, and
  Michel Massiot

ESDA2012-82318 ................................................................. 367
Complementary Use of BG and EMR Formalisms for Multiphysics Systems
  Analysis and Control
  Zeineb Chikhaoui, Julien Gomand, François Malburet, and Pierre-Jean Barre

ESDA2012-82450 ................................................................. 375
Analysis of Monolithic Algorithmic Schemes for an Energy-Consistent Variational
  Formulation of a Coupled Thermo-Visco-Elastic Problem
  Charbel Bouery and Laurent Stainier

ESDA2012-82504 ................................................................. 381
Optimal Design of an Asymmetrical Sandwich Panel for Acoustical and
  Mechanical Properties
  Pierre Leite, Marc Thomas, Frank Simon, and Yves Bréchet
