ITiCSE’11
Proceedings of the 16th Annual Conference on Innovation and Technology in Computer Science

Sponsored by:
ACM SIGCSE

Supported by:
TU Darmstadt, Intel, BlackBerry, GK E-Learning, SoftwareAG, Carlo und Karin Giersch-Stiftung, and Sparkasse Darmstadt
# Table of Contents

ITiCSE 2011 Conference Organization .............................................................. xv

ITiCSE 2011 Working Groups .............................................................................. xvi

ITiCSE 2011 Reviewers ....................................................................................... xvii

ITiCSE 2011 Sponsor & Supporters ................................................................... xxi

Keynote Talks
- **A Bouquet of Measures to Promote Computer Science in Middle & High Schools** ...................................................... 1
  Ulrik Schroeder (RWTH Aachen University)
- **Technology for Teaching the Rest of Us** .................................................. 2
  Mark Guzdial (Georgia Institute of Technology)

**Session 1: Coding Skills**
- **Security Injections: Modules to Help Students Remember, Understand, and Apply Secure Coding Techniques** .................. 3
  Blair Taylor, Siddharth Kaza (Towson University)
- **The Design and Coding of Greedy Algorithms Revisited** ......................... 8
  J. Angel Velázquez-iturbide (Universidad Rey Juan Carlos)
- **Measuring Static Quality of Student Code** ............................................... 13
  Dennis Breuker, Jan Derriks (Amsterdam University of Applied Sciences / Hogeschool van Amsterdam), Jacob Brunekreef (Fontys Hogeschool)

**Session 2: Web Development**
- **Awakening Rip Van Winkle: Modernizing the Computer Science Web Curriculum** .............................................. 18
  Randy Connolly (Mount Royal University)
- **Experiences in Implementing a Studio Component into a Course for Novice Web Developers** ............................... 23
  Rebecca Grassie (Lakeland Community College)
- **A Tool to Support the Web Accessibility Evaluation Process for Novices** .............................................................. 28
  Elaine Pearson, Christopher Bailey, Steve Green (Teesside University)

**Session 3: Understanding OO**
- **Relationship Between Text and Action Conceptions of Programming: A Phenomenographic and Quantitative Perspective** 33
  Anna Eckerdal (Uppsala University), Mikko-Jussi Laakso (University of Turku), Mike Lopez (Manukau Institute of Technology), Amitrajit Sarkar (Christchurch Polytechnic Institute of Technology)
- **Automated Checks on UML Diagrams** ...................................................... 38
  Michael Striewe, Michael Goedicke (University of Duisburg-Essen)
- **AGUIAJ: A Tool for Interactive Experimentation of Objects** ....................... 43
  André L. Santos (University of Lisbon & (ISCTE-IUL))

**Session 4: Activities for Hardware Courses**
- **Intelligent Systems Development in a Non Engineering Curriculum** ............. 48
  Emily A. Brand, William L. Honig, Matthew Wojtowicz (Loyola University Chicago)
• Design of Innovative Integrated Circuits in Education ................................................................. 53
  André Schütter, Matthias Mielke, Rainer Bröck (University of Siegen)

• Preparing Students for Future Architectures with an Exploration of Multi- and Many-Core Performance ................................................................. 57
  Daniel J. Ernst (University of Wisconsin – Eau Claire)

Session 5: Attracting K-12 Students to CS

• A Study in Engaging Female Students in Computer Science Using Role Models ....................... 63
  Jonathan Black, Paul Curzon, Chrystie Myktiak, Peter W. McOwan (Queen Mary University of London)

• Kinesthetic Learning of Computing via “Off-Beat” Activities ....................................................... 68
  Ursula Wolz (The College of New Jersey), Michael Milazzu (g5four),
  Meredith Stone (The College of New Jersey)

• A Technology-Assisted Scavenger Hunt for Introducing K-12 Students to Sensor Networks .............. 73
  Sally K. Wahba, Yvon Feaster, Jason O. Hallstrom (Clemson University)

Session 6: Enhancing CS Lectures

• Does Lecture Capture Make a Difference for Students in Traditional Classrooms? ..................... 78
  Amber Settle, Lucia Dettori, Mary Jo Davidson (DePaul University)

• Impact of an e-Learning Platform on CSE Lectures ...................................................................... 83
  Guillaume Jourjon (NICTA), Salil Kanhere, Jun Yao (UNSW)

• Evaluating How Students Would Use a Collaborative Linked Learning Space ............................. 88
  Kai Michael Höver, Michael Hartle, Guido Rößling, Max Mühlhäuser (Technische Universität Darmstadt)

Session 7: Environments for Motivating Students

• Efficient and Playful Tools to Teach Unix to New Students .......................................................... 93
  Matthieu Moy (Grenoble-INP)

• Creativity Room 5555: Evoking Creativity in Game Design Amongst CS Students .................... 98
  Timo Göttel (University of Hamburg), Jonas Schild (University of Duisburg-Essen)

• Discovering Logic Through Comics .................................................................................................. 103
  Iliano Cervesalo (Carnegie Mellon University, Qatar)

Session 8: Tool Support for Upper-Level Courses

• Integrating Google Technology in Artificial Intelligence ................................................................. 108
  Elena Sánchez-Nielsen (Universidad de La Laguna), Stefan Klink (Karlsruhe Institute of Technology)

• Interactive Tools in the Graphics Classroom .................................................................................... 113
  Dino Schweitzer, Jeff Boleng, Lauren Schurff (United States Air Force Academy)

• Using the SCORE Software Package to Analyse Novice Computer Graphics Programming .............. 118
  Maximilian Wittmann, Matthew Bower, Manolya Kavakli-Thorne (Macquarie University)

Session 9: Integrating Web-Based Technologies into Courses

• Evaluating a Web-Based Information System for Managing Master of Science Summer Projects .............................................................................................................. 123
  Till Rebenich, Andrew M. Gravell, Thanassis Tiropoulos (University of Southampton)

• A Study of Video-Based Versus Text-Based Labs for a Management Information Systems Course ................................................................. 128
  Eric Breimer, Michelle Conway, Jami Cotlier, Robert Yoder (Siena College)
Session 10: Collaboration and Peer Instruction in CS1

- Effects of Team-Based Learning on a CS1 Course .......................................................... 133
  Patricia Lasserre, Carolyn Szostak (UBC Okanagan)

  Leo Porter, Cynthia Bailey Lee, Beth Simon (University of California, San Diego),
  Quintin Cutts (University of Glasgow), Daniel Zingaro (University of Toronto)

- CoMoTo – the Collaboration Modeling Toolkit ................................................................. 143
  Charlie Meyer, Cinda Heeren, Eric Shaffer, Jon Tedesco (University of Illinois at Urbana-Champaign)

Session 11: Free-Text Questions and Assessment

- A Marking Language for the Oto Assignment Marking Tool ......................................... 148
  Guy Tremblay, Paul Lessard (Université du Québec à Montréal)

- Supporting Student-Generated Free-Response Questions ............................................. 153
  Andrew Lluxton-Reilly, Paul Denny, Beryl Plimmer, Daniel Bertinshaw (The University of Auckland)

- Automated Assessment of Short Free-Text Responses in Computer Science using Latent Semantic Analysis ......................................................... 158
  Richard Klein, Angelo Kyrilov (University of the Witwatersrand),
  Mayya Tokman (University of California Merced)

Session 12: Introductory Programming

- WeScheme: The Browser Is Your Programming Environment ........................................ 163
  Danny Yoo (Worcester Polytechnic Institute), Emmanuel Schanzer (Harvard University),
  Shriram Krishnamurthi (Brown University), Kathi Fisler (Worcester Polytechnic Institute)

- Habits of Programming in Scratch ................................................................................ 168
  Orni Mcerbaum-Salant, Michal Armoni, Mordechai Ben-Ari (Weizmann Institute of Science)

- From Concrete to Abstract? Problem Domain in the Learning of Introductory Programming ................................................................. 173
  Osvaldo Luiz de Oliveira, Ana Maria Monteiro (Faculty of Campo Limpo Paulista),
  Norton Trevisan Romao (University of São Paulo)

Session 13: K-12 Approaches I

- Draw a Social Network .................................................................................................... 178
  Sarah Carruthers, Todd Milford, Timothy Pelton, Ulrike Stege (University of Victoria)

- CS Education Re-Kindles Creativity in Public Schools .................................................. 183
  Vicki Bennett, Kyu Han Koh, Alexander Repenning (University of Colorado, Boulder)

- A Pre-College Professional Development Program ....................................................... 188
  Stephen Cooper (Stanford University), Wanda Dana (Carnegie Mellon University),
  Dan Lewis (Santa Clara University), Pam Lawhead (University of Mississippi),
  Susan Rodger (Duke University), Madeleine Schep (Columbia College),
  RoxAnn Stalvey (College of Charleston)

Session 14: Visualization

- GUIGraph – Editing Live Object Diagrams for GUI Generation Enables New Pedagogy in CS1/2 ................................................................. 193
  Duane Buek (Otterbein University)

- Toward Replicating Handmade Algorithm Visualization Behaviors in a Digital Environment: A Pre-Study ......................................................... 198
  Ming-Han Lee, Guido Rößling (Technische Universität Darmstadt)

- Improving Compilers Education Through Symbol Tables Animations .............................. 203
  Jaime Urquiza-Fuentes, Francisco Manso, J. Angel Velázquez-Iturribe, Manuel Rubio-Sánchez
  (Rey Juan Carlos University)
Session 15: Facilitating Programming Instruction

- **Understanding the Syntax Barrier for Novices**..........................208
  Paul Denny, Andrew Luxton-Reilly, Ewan Tempera, Jacob Hendrickx (The University of Auckland)

- **Understanding Novice Programmer Difficulties Via Guided Learning**..................213
  Shuhaida Shuhidan, Margaret Hamilton, Daryl D'Souza (RMIT University)

- **Continual and Explicit Comparison to Promote Proactive Facilitation during Second Computer Language Learning**........218
  Matt Bower, Annabelle McIver (Macquarie University)

Session 16: Broadening the Perspective

- **Computational Thinking – What It Might Mean and What We Might Do About It**..........223
  Chenglie Hu (Carroll University)

- **Beyond Good and Evil Impacts: Rethinking the Social Issues Components in Our Computing Curricula**..........................228
  Randy Connolly (Mount Royal University)

- **Computing Student Practices of Cheating and Plagiarism: A Decade of Change**...........233
  Judy Sheard (Monash University), Martin Dick (RMIT University)

Session 17: K-12 Approaches II

- **“Computer Science and Nursery Rhymes” A Learning Path for the Middle School**.........238
  Doranna Di Vano (Scuola Media Statale “Via Petrarca”), Claudia Mirolo (University of Udine)

- **Experimental Evaluation of BeadLoom Game: How Adding Game Elements to an Educational Tool Improves Motivation and Learning**........243
  Acey Boyce, Antoine Campbell, Shaun Pickford, Dustin Culler, Tiffany Barnes (University of North Carolina at Charlotte)

- **Teaching CS Unplugged in the High School (with Limited Success)**......................248
  Yvon Feaster (Clemson University), Luke Segars (University of California, Berkeley), Sally K. Wahba, Jason O. Hallstrom (Clemson University)

Session 18: Peer-Assisted Learning

- **A Scheme for Improving ICT Units with Critically Low Student Satisfaction**........253
  Angela Carbone, Jessica Wong, Jason Ceddia (Monash University)

- **Combining Multiple Pedagogies to Boost Learning and Enthusiasm**......................258
  Lori Pollock, Terry Harvey (University of Delaware)

- **A Cooperative Learning-Based Strategy for Teaching Relational Algebra**................263
  Alexandra Martinez, Arturo Camacho (Universidad de Costa Rica)

Session 19: Engaging Students

- **Open Source Contribution as an Effective Software Engineering Class Project**...........268
  Robert Marmorstein (Longwood University)

- **Extreme Apprenticeship Method: Key Practices and Upward Scalability**................273
  Arto Vihavainen, Matti Paksula, Matti Luukkainen, Jaakko Kurhila (University of Helsinki)

- **The Academic Enhancement Program in Introductory CS: A Workshop Framework Description and Evaluation**........278
  Rylan Egan (Memorial University of Newfoundland), Diana Cukiernan, Donna McGee Thompson (Simon Fraser University)

Session 20: New Approaches in Undergraduate Instruction

- **Getting CS Undergraduates to Communicate Effectively**.............................283
  Andreas Karatsolis, Iliano Cervesato, Nael Abu-Ghazaleh, Yonina Cooper-Khaled Harras, Kemal Oflazer, Thierry Sans (Carnegie Mellon University)
• Undergraduate Research: A Case Study ........................................... 288
  Herman Koppelman, Betsy van Dijk, Gerrit van der Hoeven (University of Twente)

• Bringing Undergraduate Students Closer to a Real-World Information Retrieval Setting: Methodology and Resources ........................................... 293
  Julián Urbano, Mónica Marrero, Diego Martín, Jorge Morato (University Carlos III of Madrid)

Session 21: Automated Assessment

• AnimalSense: Combining Automated Exercise Evaluations with Algorithm Animations ........................................... 298
  Guido Rößling, Mihail Mihaylov (Technische Universität Darmstadt), Jerome Saltmarsh (Queensland University of Technology)

• Using Run Time Traces in Automated Programming Tutoring ........................................... 303
  Michael Striewe, Michael Goedicke (University of Duisburg-Essen)

• A Proposal for Automatic Evaluation in a Compiler Construction Course ........................................... 308
  Emilio Julio Lorenzo, Javier Vélez, Anselmo Peñas (UNED University)

Session 22: Attracting Girls and Women to CS

• Evaluation Framework Underpinning the Digital Divas Programme ........................................... 313
  Annemieke Craig (Deakin University), Julie Fisher (Monash University), Helen Forgasz (Monash University), Catherine Lang (Swinburne University of Technology)

• The Impact of IMPACT: Assessing Students’ Perceptions after a Day of Computer Exploration ........................................... 318
  Mary Anne L. Egan, Tim Lederman (Siena College)

• Female Students’ Experiences of Programming: It’s Not All Bad! ........................................... 323
  Reena Pau, Wendy Hall, Marcus Grace, John Woollard (University of Southampton)

Tips, Techniques & Courseware Session I: Ideas and Insights

• A Medical Motif for Teaching Computer Graphics in Context ........................................... 328
  James Wolfr (Indiana University South Bend)

• Courseware: Student Learning via FOSS Field Trips ........................................... 329
  Heidi J. C. Ellis (Western New England College), Gregory W. Hislop (Drexel University)

• Infandango: Automated Grading for Student Programming ........................................... 330
  Mike Hull, Dan Powell, Ewan Klein (University of Edinburgh)

• Scheduling and Student Performance ........................................... 331
  Clifford A. Shaffer, Stephen H. Edwards (Virginia Tech)

• Try a Little History ........................................... 332
  John Impagliazzo (Hofstra University)

• Best Practices in Teaching Mobile Application Development ........................................... 333
  Quasay H. Mahmoud (University of Guelph)

• A Mobile Web-Based Approach to Introductory Programming ........................................... 334
  Quasay H. Mahmoud (University of Guelph)

Tips, Techniques & Courseware Session II: Improving Computer Architecture Courses

• Two Kinesthetic Learning Activities: Turing Machines and Basic Computer Organization ........................................... 335
  Michael Goldweber (Xavier University)

• Stimulating Learning and Engagement: An Integrated System Simulator for Computer Architecture ........................................... 336
  Besim Mustafa (Edge Hill University)

• Teaching Computer Architecture with a Graphical PC Simulator ........................................... 337
  Michael Black (American University), Manoj Franklin (University of Maryland)
Tips, Techniques & Courseware Session III: Tools and APIs

- A Java Implementation of the Myro API for Using Personal Robots in CS1
  Douglas Harms (DePauw University)

- Changes to JFLAP to Increase Its Use in Courses
  Susan H. Rodger, Henry Qin, Jonathan Su (Duke University)

- Merlin-Mo, an Interactions Analysis System for Moodle
  Raquel Hijón-Nelm, J. Ángel Vélazquez-Iiturbi (Universidad Rey Juan Carlos)

Tips, Techniques & Courseware Session IV: Supporting Novice Programmers

- UWA Java Tools: Harnessing Software Metrics to Support Novice Programmers
  Rachel Cardell-Oliver, Patrick Doran Wu (The University of Western Australia)

- Using Greenfoot in Teaching Inheritance in CS1
  Tamar Vilner, Ela Zur, Shay Tavor (The Open University of Israel)

- Animation Projects in CS1 from Scheme to Java
  Mirela Djordjević (Manhattanville College)

Panel

- Outreach Programs to Promote Computer Science and ICT to High School and Middle School Students
  Mary Anne L. Egan (Siena College), Catherine Lang (Swinburne University of Technology),
  Reyyan Ayfer (Bilkent University), Annemarie Craig (Deakin University), Jane Chu Prey (Microsoft Research)

Posters

- Using Video Games to Teach Security
  Mario A. M. Guimarães, Huwida Said (Zayed University),
  Richard Austin (Southern Polytechnic State University)

- A System for Usable Unification of Interfaces of Learning Objects in M-Learning
  Eva García, Luis de Marcos, Antonio García, José Ramón Hilera (University of Alcalá)

- Best Practices for Peer Feedback in Interdisciplinary Research Groups
  Sebastian Harrach (Darmstadt University of Technology)

- Programming in Secondary Education: Benefits and Perspectives
  Michail N. Giannakos (Ionian University), Spyros Doukakis (University of the Aegean),
  Panagiotis Vlamos (Ionian University), Christos Koilias (Technological Educational Institution of Athens)

- Integrating Greenfoot into CS1 – A Case Study
  Tamar Vilner, Ela Zur, Shay Tavor (The Open University of Israel)

- GLMP for Automatic Assessment of DFS Algorithm Learning
  Gloria Sánchez-Torrubia, Carmen Torres-Blanc (Universidad Politécnica de Madrid),
  Gracían Trivino (European Centre of Soft Computing)

- An Innovative Teaching Tool Based on Semantic Tableaux for Verification and Debugging of Programs
  Rafael del Vado Vírveda, Fernando Pérez Morente (Universidad Complutense de Madrid)

- Moodle-Integrated Open Source Synchronous Teaching
  J. Mark Pullen, Nicholas K. Clark (George Mason University)

- Teaching with CEOHP
  Vicki Alstrum (Computing Educators Oral History Project), Deepa Muralidhar (North View High School),
  Mary Last (Computing Educators Oral History Project), Barbara Boucher Owens (Southwestern University)

- Facilitating Learning Dynamic Programming Through a Previous Introduction of Exhaustive Search
  Arturo Camacho, Alexandra Martínez (Universidad de Costa Rica)
• A Bioinformatics E-Learning Lab for Undergraduate Students .......................................................... 356
  Feng Lu, Hui Liu, Yi Jian, Yunhong Zhou (Huazhong University of Science & Technology),
  Zhenan Jiang (East China Normal University)

• A Model for Visualizing Sentence Complexity .......................................................... 357
  Stefanie A. Markham, Ying Zhu (Georgia State University)

• Do Educational Software Systems Provide Satisfactory Learning
  Opportunities for ‘Multi-Sensory Learning’ Methodology? .................................................. 358
  Peter Chan, Girija Krishnaswamy (Australian Catholic University)

• Adaptation of Educational Contents to Mobile Devices .................................................. 359
  Antonio García, Eva García, Luis de Marcos, José-Antonio Gutiérrez (University of Alcalá)

• A Comparison of Software Engineering Knowledge Gained
  from Student Participation in Humanitarian FOSS Projects .................................................. 360
  Heidi J. C. Ellis (Western New England University), Gregory W. Hislop (Drexel University),
  Ralph A. Morelli (Trinity College)

• CROKODIL – A Platform Supporting the Collaborative Management
  of Web Resources for Learning Purposes .......................................................... 361
  Mojisola Anjorin, Renato Domínguez García, Christoph Rensing (Darmstadt University of Technology)

• Is Iteration Really Easier to Master Than Recursion? An Investigation
  in a Functional-First CS1 Context .......................................................... 362
  Claudio Mirolo (University of Udine)

• Natural Language in Introductory Programming: An Experimental Study .................................. 363
  Osvaldo Luiz de Oliveira, Ana Maria Monteiro (Faculty of Campo Limpo Paulista),
  Norton Trevisan Roman (University of São Paulo)

• A First Step Mapping IMS Learning Design and Merlin-Mo ........................................ 365
  Raquel Hijón-Neira, J. Angel Velázquez-Turbide (Universidad Rey Juan Carlos)

• Using Student Blogs for Documentation in Software Development Projects .................................. 366
  Robert Law (Glasgow Caledonian University)

• How Educators Find Educational Resources Online .................................................. 367
  Monika Akbar, Weiguo Fan (Virginia Tech), Lillian Cassel (Villanova University),
  Lois Delcambre (Portland State University), Clifford A. Shaffer, Edward A. Fox, Yinlin Chen (Virginia Tech)

• A Contextualized Project-Based Approach for Improving Student Engagement
  and Learning in AI Courses .......................................................... 368
  Ingrid Russell (University of Hartford), Zdravko Markov (Central Connecticut State University),
  Joy Dagher (University of Hartford)

• Java2Sequence – A Tool for the Visualization of Object-Oriented
  Programs in Introductory Programming .......................................................... 369
  João Paulo Barros (Instituto Politécnico de Beja & UNINOVA – CTS),
  Luís Biscainha, Miguel Vitória (Instituto Politécnico de Beja)

• An Initial Look at Prospective Student Mentoring .................................................. 370
  Amber Sente, Sarah Pieczynski, Liz Friedman, Mary Jo Davidson (DePaul University)

• IR2gT: A Report Generation Tool for Institutional Repository ........................................ 371
  Jayan C. Kurian (RMIT International University), Ashly Markose (National University of Singapore),
  Blooma Mohan John (RMIT International University)

• An Update on the Use of Community-Based Non-Profit Organizations
  in Capstone Projects .......................................................... 372
  David K. Lange, Roger C. Ferguson, Paul M. Leidig (Grand Valley State University)

• Findings from an ACM Strategic Summit on Computing Education
  in Community Colleges .......................................................... 373
  Elisabeth K. Hawthorne (Union County College), Karl J. Klee (Alfred State College),
  Robert D. Campbell (CUNY Graduate Center)

• A Problem Solving Teaching Guide Based on a Procedure Intertwined
  with a Teaching Model .......................................................... 374
  Ronit Ben-Bassat Levy, J. Ángel Velázquez-Turbide (University of Rey Juan Carlos - Móstoles)
• A Normative Competence Structure Model for “Embedded Micro- and Nanosystems” Development ................................................................. 375
  André Schütter, Rainer Brück, Steffen Jaschke, Sigrid Schubert (University of Siegen), Dietmar Fey, Bruno Kleiner, Harald Schmidt (University of Erlangen-Nürnberg)

• Identifying the Predictors of Educational Webcasts’ Adoption ................................................................. 376
  Michail N. Giannakos, Panayiotis Vlamos (Ionion University)

• Investigating Cognitive Structures of Object Oriented Programming ................................................................. 377
  Peter Hubwieser, Andreas Mühling (Technische Universität München)

• The Beaver Contest – Attracting Youngsters to Study Computing ................................................................. 378
  Bruria Haberman
  (Holon Institute of Technology & Davidson Institute of Science Education, Weizmann Institute of Science)
  Avi Cohen (The Ministry of Education, Israel)
  Valentina Dagiene (Vilnius University)

• Computing for the Social Good: A Service Learning Project ................................................................. 379
  Michael Goldwebber (Xavier University)

• A Collaborative Linked Learning Space ................................................................. 380
  Kai Michael Höver, Michael Hartle, Guido Rößling (Technische Universität Darmstadt)

• STEM and ICT Instructional Worlds: The 3D Experience ................................................................. 381
  Katherine Ross, Yvon Fenster (Clemson University)

• Collaborating Across International Boundaries ... Using Twitter as a Tool in the Classroom ................................................................. 382
  Stefanie A. Markham, Saeid Belkasim (Georgia State University)

• Enhancing Learner Capability: Success of IT@School Project, Kerala, Region of India ................................................................. 383
  Girija Krishnaswamy (Australian Catholic University & Curtin University)
  V. Sasi Kumar (Free Software Foundation of India)

• Deconstructing VLEs to Create Customized PLEs ................................................................. 384
  Salvador Ros, Agustín C. Caminero, Antonio Rubles-Gómez, Roberto Hernández, Rafael Pastor,
  Timothy Read, Alberto Pesquera (Universidad Nacional de educación a Distancia), Raúl Muñoz (IBM)

• What Matters Most When Teaching CS1? ................................................................. 385
  Ana Paula Ambrosio (Universidade Federal do Ceará), Scheila W. Martins (University of Coimbra)

• Combining Memory Management and Filesystems in an Operating Systems Course ................................................................. 386
  Hans-Georg Ebner (University of Erlangen-Nürnberg)

• SyntaxTrain: Relieving the Pain of Learning Syntax ................................................................. 387
  Andreas Leon Aagaard Moth, Jørgen Villadsen (Technical University of Denmark),
  Mordechai Ben-Ari (Weizmann Institute of Science)

• The Impact of Memory Transfer Language (MTL) in Reducing Misconceptions in Teaching Programming to Novices ................................................................. 388
  Leonard J. C. Mselle (The University of Dodoma), Raphael Mmasy (Tanzania Commission for Science and Technology)

• Optimizing Collaborative Learning Processes by Using Recommendation Systems ................................................................. 389
  Sebastian Harrach, Mujisola Anjorin (Darmstadt University of Technology)

• The Use of Mediating Artifacts in Embedding Problem Solving Processes in an E-Learning Environment ................................................................. 390
  Orry Messer, Angelo Kyrilov (University of the Witwatersrand)

• Introducing Students to Computer Science with Programmes That Don’t Emphasise Programming ................................................................. 391
  Tim Bell (University of Canterbury), Paul Curzon (Queen Mary University of London),
  Quintin Cuts (University of Glasgow), Valentina Dagiene (Vilnius University),
  Bruria Haberman (Weizmann Institute of Science)

• Integrating Scholarly Articles Within E-Learning Courses: A Framework ................................................................. 392
  Bee Bee Chua, Danilo Valeros Bernardo II (University of Technology, Sydney)
• Supporting Peer Learning with Ad-Hoc Communities .................................................. 393
  Johannes Konert, Kristina Richter, Stefan Göbel, Ralf Steinmetz, Regina Bruder
  (Technische Universität Darmstadt)

• Exploring Flow in Novice Programming Environments ............................................. 394
  Mark Zurb, Janet Hughes (University of Dundee)

• Muddy Hill Games ...................................................................................................... 395
  Jessica Blevins, Andy Kearney, Eric Mullen, Emily Myers-Stanhope, Elizabeth Sweedyk
  (Harvey Mudd College)

Author Index .................................................................................................................... 397
