"LET'S FACE CHAOS THROUGH NONLINEAR DYNAMICS"

8th International Summer School/Conference

Maribor, Slovenia 26 June – 10 July 2011

EDITORS

Marko Robnik
Valery G. Romanovski

CAMTP, University of Maribor, Maribor, Slovenia

SPONSORING ORGANIZATIONS

ARRS – Slovenian Research Agency
Ministry of Higher Education, Science and Technology of the Republic of Slovenia
University of Maribor
ELES – Elektro-Slovenija
GEN - Energija

AIP
American Institute of Physics

Melville, New York, 2012
AIP | CONFERENCE PROCEEDINGS 1468
Table of Contents

Foreword to the Proceedings of “Let’s Face Chaos through Nonlinear Dynamics” 8th International Summer School/Conference
Marko Robnik and Valery G. Romanovski

Organizing Committee

Particle and energy transport in quantum disordered and quasi-periodic chains connected to mesoscopic Fermi reservoirs
Shigeru Ajisaka, Felipe Barra, Carlos Mejia-Monasterio, and Tomaz Prosen

Integrability of a family of 3-dim polynomial systems of ODE’s
Tamasha M. Aldibekov, Maira Aldazharova, Georgios Papamikos, and Valery G. Romanovski

Dynamics of time-dependent conformally breathing billiards
Benjamin Batistić and Marko Robnik

Quantum wave package propagation through a potential step
Maxim Belov and George Krylov

New potentials in discrete Schrödinger theory
Lucia Birk, Sophia Roßkopf, and Andreas Ruffing

Time series analysis of turbulent and non-autonomous systems
Philip Clemson and Aneta Stefanovska

Knowing when to stop: How noise frees us from determinism
Predrag Cvitanović and Domenico Lippolis

Dynamics of heterogeneous populations of coupled oscillators
Hiroaki Daido

Water delivery in the early Solar System
Rudolf Dvorak, Siegfried Eggl, Áron Süli, Zsolt Sándor, Mattia Galiazzo, and Elke Pilat-Lohinger
Isochronicity of centers at a center manifold
Brigita Ferčec and Matej Mencinger 148

Chaotic examples in low-dimensional topology
Dennis J. Garity and Dušan Repovš 158

Order statistics and the analytic determination of Lyapunov spectra of some classes of high-dimensional billiard systems
Thomas Gilbert 166

Center and focus problem and Hopf bifurcation for planar polynomial systems
Maoan Han 176

Intensity distribution of non-linear scattering states
Timo Hartmann, Juan-Diego Urbina, Klaus Richter, and Peter Schlagheck 193

Delayed feedback control method for dynamical systems with chaotic saddles
Miki U. Kobayashi and Kazuyuki Aihara 207

A nonlinear dynamics approach to Bogoliubov excitations of Bose-Einstein condensates
M. Kreibich, H. Cartarius, J. Main, and G. Wunner 216

nec again on quantum propagator for the step potential
George Krylov and Maxim Belov 223

$\beta$-switched mode-locked regime in a compact Nd : GdVO$_4$ laser microchip with $\beta$ : YAG saturable absorber
L. G. Krylova and L. I. Burov 233

Statistical properties of complex systems -lognormal and related distributions-
Hiroto Kuninaka and Mitsugu Matsushita 241

Newtonian versus special-relativistic prediction for the mean trajectory of a low-speed scattering system
Shiuan-Ni Liang and Boon Leong Lan 252

The role of topological features of intercellular communication networks by the synchronization of cellular oscillators
R. Marković, M. Gosak, and M. Marhl 256
Periodic orbits and transport in mixed phase spaces
Kevin A. Mitchell 268

The transition to chaotic phase synchronization
E. Mosekilde, J. L. Laugesen, and Zh. T. Zhusubaliyev 276

Quantum chaos and random matrix theories
Marko Robnik and Benjamin Batistić 297

Correlations between beta-cells' calcium dynamics reveal differences in functional connectivity patterns in islets of Langerhans from pancreas tissue slices under low and high levels of glucose
Andraž Stožer, Marko Gosak, Dean Korosak, Kousuke Yakubo, Jure Dolenšek, Marko Marhl, and Marjan Slak Rupnik 332

Flooding of wave functions in multi-dimensional mixed systems and the possibility of experimental observation
Akiyuki Ishikawa, Atushi Tanaka, Yasutaka Hanada, and Akira Shudo 340

Heat transport in quantum harmonic chains with Redfield baths
Bojan Žunkovič and Tomaž Prosen 350

Time series analysis of molecular dynamics simulation using wavelet
Mikito Toda 367

Planet formation by concurrent collapse
Michael Wilkinson and Bernhard Mehlig 375

Simulation to chaos in a rotor
Rui Yan and Weinian Zhang 389

Author Index 401
