Selected Papers Authored and Co-Authored by Fred H. Kulhawy

All reproduced with permission

Geomechanical Model for Rock Foundation Settlement ...................................................... 1
Fred H. Kulhawy

Limiting Tip and Side Resistance: Fact or Fallacy? ............................................................ 18
Fred H. Kulhawy

Ground Water Influences on Foundation Side Resistance .................................................. 37
F. H. Kulhawy and J. F. Beech
From Proceedings, 9th European Conference on Soil Mechanics and

The Soil-Rock Boundary: What Is It and Where Is It? ......................................................... 41
Fred H. Kulhawy, Charles H. Trautmann, and Thomas D. O'Rourke
From Detection of and Construction at the Soil/Rock Interface (GSP 28),

On the Evaluation of Static Soil Properties ........................................................................ 56
Fred H. Kulhawy
From Stability and Performance of Slopes and Embankments II (GSP 31),

From Casagrande's “Calculated Risk” to Reliability-Based Design in Foundation
Engineering: The Sixth Arthur Casagrande Memorial Lecture ..................................... 77
Fred H. Kulhawy
From Civil Engineering Practice (Journal of the Boston Society of Civil
Engineers Section/ASCE), 11(2), 1996, 43-56.

What Is Foundation Failure? ............................................................................................... 91
Fred H. Kulhawy and Anwar Hirany
From Proceedings, International Conference on Foundation Failures,
Characterization of Geotechnical Variability ............................................................. 98
Kok-Kwang Phoon and Fred H. Kulhawy

Evaluation of Geotechnical Property Variability ....................................................... 111
Kok-Kwang Phoon and Fred H. Kulhawy

Observations on Some Shortcomings in Deep Foundation Analysis and Design .......... 126
Fred H. Kulhawy

On the Interpretation of Drilled Foundation Load Test Results .................................... 131
Anwar Hirany and Fred H. Kulhawy

Observations on Geotechnical Reliability-Based Design Development in North America ......................................................................................................................... 142
F. H. Kulhawy and K. K. Phoon

Multiple Resistance Factor Design for Shallow Transmission Line Structure Foundations ............................................................................................................................................ 160
Kok-Kwang Phoon, Fred H. Kulhawy, and Mircea D. Grigoriu

On the Uplift Behaviour of Spread Foundations ............................................................ 172
Fred H. Kulhawy, Harry E. Stewart, and Charles H. Trautmann

On the Axial Behavior of Drilled Foundations ............................................................... 180
Fred H. Kulhawy

Issues in Evaluating Capacity of Rock Socket Foundations .......................................... 198
F. H. Kulhawy and W. A. Prakoso

Uncertainty, Reliability, and Foundation Engineering: The 5th Peter Lumb Lecture .......... 209
Fred H. Kulhawy
Contributed Papers

Uncertainty and Risk

Screening Geotechnical Risks
Gregory Baecher and John T. Christian

Accounting for Certainty
Milton E. Harr

Engineering Geology: Fundamental Input or Random Variable?
Jeffrey R. Keaton

Ground Uncertainty Implications in the Application of the Observational Method to Underground Works: Comparative Examples
João Bilé Serra and Luís Miranda

Geotechnical Uncertainties and Reliability-Based Design
Tien H. Wu

Characterization of Soil Parameters

Hydrologic Properties of Final Cover Soils
Craig H. Benson and Tayfun Gurdal

Variability of Soil Properties and Reliability of Empirical Equations on Soil Settlement Predictions
Ömer Bilgin and Eman Mansour

Second-Moment Characterization of Undrained Shear Strengths from Different Test Procedures
Jianye Ching, Kok-Kwang Phoon, and Wen-Ting Lee

Soil Modulus Correlations
J. Michael Duncan and Andrew Bursey

Multivariate Model for Soil Parameters Based on Johnson Distributions
Kok-Kwang Phoon and Jianye Ching

Wetting Effect on CBR Properties of Compacted Fine-Grained Residual Soils
Widjojo A. Prakoso

Bayesian Characterization of Transformation Uncertainty for Strength and Stiffness of Sands
Marco Uzielli and Paul W. Mayne

Spatial Variability

A Simple Method to Assess the Effects of Soil Spatial Variability on the Performance of a Shallow Foundation
Yusuke Honjo and Yu Otake

Assessing Soil Correlation Distances and Fractal Behavior
Mark B. Jaksa

Evaluation of Common Interpolation Algorithms for Site Characterization
David Lacey, Burt Look, and David Williams
Scale of Fluctuation of Geotechnical Parameters Estimated From CPTu
and Laboratory Test Data ................................................................. 434
Site Onyejekwe and Louis Ge

Distinguishing between Data Uncertainty and Natural Variability in Virtual
Geotechnical Databases ................................................................. 444
J. David Rogers and Jae-Won Chung

Reliability Analysis
Reliability of Suction Caissons for Deep Water Floating Facilities ............... 456
Edward C. Clukey, Robert B. Gilbert, Knut H. Andersen, and Rune Dahlberg

Reliability-Based Design of Laterally Loaded Piles Considering Soil
Spatial Variability ........................................................................... 475
Haijian Fan and Robert Liang

Reliability Assessment of Diaphragm Wall Deflections in Soft Clays .............. 487
Anthony T. C. Goh, Feng Xuan, and Wengang Zhang

On Capacity of Pile Foundations ................................................................ 497
Mircea Grigoriu

Model Errors in Bearing Capacity of Vertically Loaded Foundations .......... 505
Masahiro Shirato, Tetsuya Kohno, and Shoichi Nakatani

Reliability Analysis of Long Multi-Segment Earth Slopes ......................... 520
Erik Vanmarcke and Yuki Otsubo

Updating Uncertain Soil Parameters by Maximum Likelihood Method
for Predicting Maximum Ground and Wall Movements in Braced Excavations .... 530
Lei Wang, Zhe Luo, and C. Hsein Juang

Stochastic Analysis of Hydraulic Hysteresis in Multi-Layer Unsaturated
Soil Covers under Random Flux Boundary Conditions .......................... 542
Chao Yang, Daichao Sheng, and John P. Carter

Reliability-Based Design
Estimation of Resistance Factors for Reliability-Based Design of Shallow
Foundations in Cohesionless Soils under Earthquake Loading ................... 555
Sami O. Akbas and Erhan Tekin

System Reliability-Based Load Resistance Factor Design (LRFD) for External
Seismic Stability of Reinforced Soil Walls ........................................ 570
B. Munwar Basha and G. L. Sivakumar Babu

LRFD Calibration of Metallic Reinforced Soil Walls .................................. 585
Richard J. Bathurst, Tony M. Allen, Yoshihisa Miyata, and Bingquan Huang

Effects of Spatial Variability on Reliability-Based Design of Drilled Shafts .... 602
Zijun Cao, Jingmei Wang, and Yu Wang

An Approach to Assess LRFD- from Load Test and Borehole Data
in and outside the Footprint of a Drilled Shaft ..................................... 617
Harald Klammler, Michael McVay, Michael Faroane, and David Horhota
