2012 IEEE 8th International Conference on Wireless and Mobile Computing, Networking and Communications

(WiMob 2012)

Barcelona, Spain
8 – 10 October 2012
2012 IEEE 8th International Conference on Wireless and Mobile Computing, Networking and Communications (WiMob)

WIRELESS SENSOR NETWORKS I

Minimum 2-connected distance-k p-dominating set in wireless sensor networks
Louisa Harutyunyan (Concordia University, Canada), Lata Narayanan (Concordia University, Canada) ......................................................... 1

CPWS: An Efficient Routing Protocol for RGB Sensor-based Fish Pond Monitoring System
Nidal Nasser (Alfaisal University, Saudi Arabia), Ahmad N K Zaman (University of Guelph, Canada), Lutful Karim (University de Moncton, Canada), Nargis Khan (Ryerson University, Canada) ........................................................................................................ 7

Quentin Lampin (Orange Labs, France), Dominique Barthel (Orange Labs, France), Isabelle Augé-Blum (CITI, INSA Lyon, France), Fabrice Valois (INSA Lyon, France) ........................................................................... 12

Optimized packet size for energy efficient delay-tolerant sensor networks
Károly Lendvai (Budapest University of Technology and Economics, Hungary), Ákos Milánkovich (Budapest University of Technology and Economics, Hungary), Sándor Imre (Technical University of Budapest, Hungary), Sándor Szabó (Budapest University of Technology and Economics, Hungary) .................................................................................. 19

Energy-Efficient Multicast Tree Construction Protocol for Real-Time Data Streaming in WSNs
Nedal Ababneh (University of Bahrain, Bahrain), Antonio M. Ortiz (WiSAR Lab, Ireland), Nick Francis Timmons (Letterkenny Institute of Technology, Ireland), Jim Morrison (WiSAR Lab - Letterkennt Insitute of Technology, Ireland) .................................................................................... 26

A Lightweight Inter-User Interference Mitigation Method in Body Sensor Networks
Wen Sun (National University of Singapore, Singapore), Yu Ge (Institute for Infocomm Research, Singapore), Wai-Choong Wong (National University of Singapore, Singapore) ...................................................... 34

HANDOFF MANAGEMENT

Cooperative end-to-end roaming through homogeneous and heterogeneous networks
Abdellatif Ezzouhairi (École Polytechnique de Montréal, Canada), Samuel Pierre (École Polytechnique de Montreal, Canada), Alejandro Quintero (École Polytechnique de Montreal, Canada)

O-PMIPv6: Efficient Handover with Route Optimization in Proxy Mobile IPv6 Domain
............................................................................................................................................. 47
Ahmad Rasem (Carleton University, Canada), Christian Makaya (Telcordia Technologies, USA), Marc St-Hilaire (Carleton University, Canada)

Achieving Efficient Network Resources Utilization in Bicasting Proxy Mobile IPv6
Lebajoa Mphatsi (University of Cape Town, South Africa), Olabisi Emmanuel Falowo (University of Cape Town, South Africa) ................................. 55

Host-based Distributed Mobility Management Support Protocol for IPv6 Mobile Networks
Jong-Hyouk Lee (TELECOM Bretagne, France), Jean-Marie Bonnin (Institut Mines Telecom / Telecom Bretagne, France), Xavier Lagrange (Institut Mines Telecom / Telecom Bretagne, France) ........................................ 61

MOSAIC: Stateless Mobility for HTTP-based Applications
Wonsang Song (Columbia University, USA), Georg Hampel (Bell Labs, Alcatel-Lucent, USA), Anil Rana (Bell Labs, USA), Thierry E Klein (Alcatel-Lucent, USA), Henning Schulzrinne (Columbia University, USA) ...................... 69

Using Data Mining and Fingerprinting Extension with Device Orientation Information for WLAN Efficient Indoor Location Estimation
David Sánchez (University of Las Palmas de Gran Canaria, Spain), Jose Quinteiro (Universidad de Las Palmas de Gran Canaria, Spain), Pablo Hernández-Morera (University of Las Palmas de Gran Canaria, Spain), Ernestina Martel-Jordán (University of Las Palmas de Gran Canaria, Spain) .............................................................. 77

OFDM and CDMA TECHNOLOGIES and SYSTEMS

Contention Resolution in Wireless LANs Using Frequency-Domain Backoff
Sheeraz A. Alvi (National University of Sciences and Technology, Pakistan), Adeel Baig (National University of Sciences and Technology, Pakistan) ................................................................. 84

An Adaptive Resource Allocation in OFDMA Multi-hop Relay Networks
Yue Zhao (Southwest Jiaotong University, P.R. China), Xuming Fang (Southwest Jiaotong University, P.R. China), Miao Pan (Texas Southern University, USA), Rongsheng Huang (Olympus Communication Technology of America, USA), Yuguang Fang (University of Florida, USA), Yu Chen (Southwest Jiaotong University, P.R. China) ........................................... 92

A real-time FPGA-based implementation of a high-performance MIMO-OFDM transceiver featuring a closed-loop communication scheme
Oriol Font-Bach (Centre Tecnològic de Telecomunicacions de Catalunya, Spain), Nikolaos Bartzoudis (CTTC, Spain), Antonio Pascual-Iserte (Universitat Politècnica de Catalunya, Spain), David López Bueno (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain) ........................................... 100

A New Side-Information Free PTS Scheme for PAPR Reduction in OFDM Systems
Sheng-Ju Ku (Tatung University, Taiwan), Chin-Liang Wang (National Tsing Hua University, Taiwan) ................................................................. 108
Performance Analysis of Pilot Arrangement for OFDM Systems over Time Varying Frequency Selective Channels
Begüm Korunur Engiz (Ondokuz Mayıs University, Turkey), Cetin Kurnaz (Ondokuz Mayıs University, Turkey), Hatice Sezgin (Ondokuz Mayıs University, Turkey) .................................................................................................................. 113

Computationally Efficient Modulation of Well-Localised Signals for OFDM
Dmitry Petrov (Magister Solutions Ltd., Finland), Pavel Gonchukov (University of Jyväskylä, Finland), Timo Hämäläinen (University of Jyväskylä, Finland) .................................................................................................................. 118

CONTEXT-AWARE SYSTEMS/VANETs

A Web Platform and a Methodology to promote a Collaborative Development of Context-Aware Systems
David Martin (CICtourGUNE, Spain), Carlos Lamsfus (CICtourGUNE, Spain), Aurkene Alzua (CICtourGUNE, Spain), Diego López-de-Ipiña (Deusto Institute of Technology - DeustoTech, University of Deusto, Spain) .................................................................................................................. 126

Decentralized Search and Retrieval for Mobile Networks using SMS
Isai Michel Lombera (University of California, Santa Barbara, USA), Louise E. Moser (University of California, Santa Barbara, USA), Michael Melliar-Smith (University of California, Santa Barbara, USA), Yung-Ting Chuang (University of California, Santa Barbara, USA) .................................................................................................................. 134

A Programming Model for Context-Aware Applications in Large-Scale Pervasive Systems
Sanjin Sehic (Vienna University of Technology, Austria), Fei Li (Vienna University of Technology, Austria), Stefan Nastic (Vienna University of Technology, Austria), Schahram Dustdar (Vienna University of Technology, Austria) .................................................................................................................. 142

A Multi-metric QoS-balancing Scheme for Gateway Selection in a Clustered Hybrid VANET network
Ghayet el mouna Zhioua (Sup'Com - TUNISIA, Tunisia), Houda Labiod (TELECOM ParisTech (ex: ENST), France), Nabil Tabbane (Sup'com, Tunisia), Sami Tabbane (Sup Telecom, Tunisia) .................................................................................................................. 150

Analysis of Information Relay Processing in Inter-Vehicle Communication: A novel visit
Ahmed Soua (Institut Telecom, France), Walid Ben-Ameur (Telecom SudParis, France), Hossam Afifi (Institut Telecom, France) .................................................................................................................. 157

Simulation-based evaluation of techniques for privacy protection in VANETs
Andreas Tomandl (University of Regensburg, Germany), Florian Scheuer (University of Regensburg, Germany), Hannes Federrath (University of Hamburg, Germany) .................................................................................................................. 165

WIRELESS SENSOR NETWORKS II

An Energy Efficient Tracking Algorithm in UWB-based Sensor Networks

173
Mingbo Dai (Politecnico Di Torino, Italy), Francesco Sottile (ISMB, Italy), Maurizio A. Spirito (ISMB, Italy), Roberto Garello (Politecnico di Torino, Italy)

Content centric and Load-balancing aware Dynamic Data Aggregation in Multihop Wireless Networks
Yichao Jin (Toshiba Research Europe Ltd, United Kingdom), Parag Kulkarni (Toshiba Research Europe Ltd., United Kingdom), Sedat Gormus (Toshiba Research Europe Ltd., United Kingdom), Mahesh Sooriyabandara (Toshiba Research Europe Limited, United Kingdom)................................. 179

A GRASP Based Algorithm For Efficient Cluster Formation in Wireless Sensor Networks
Victor Matos (Universidade Federal de Viçosa, Brazil), Jose Elias Claudio Arroyo (Universidade Federal de Vicosa, Brazil), André dos Santos (Universidade Federal de Viçosa, Brazil), Luciana Gonçalves (Universidade Federal de Viçosa, Brazil)................................. 187

Adding QoS Support For Timeliness To The Observe Extension Of CoAP
Alessandro Ludovici (Universitat Politecnica de Catalunya, Spain), Ernesto Garcia (Universitat Politècnica de Catalunya, Spain), Xavi Gimeno (Universitat Politècnica de Catalunya, Spain), Anna Calveras Augé (Universidad Politècnica de Catalunya, Spain)................................. 195

ASF: an Attack Simulation Framework for wireless sensor networks
Gianluca Dini (University of Pisa, Italy), Marco Tiloca (University of Pisa, Italy)................................. 203

MODULATION AND CODING

Interference-free regions with Han-Kobayashi Scheme for M-QAM and Scalar channels
Paresh Saxena (Universitat Autonoma de Barcelona, Spain), Maria-Angeles Vázquez-Castro (Universidad Autónoma de Barcelona, Spain)................................. 211

Interference Mitigation with Rate Splitting in Multi-Cell Wireless Networks
Guangxia Zhou (Intel Mobile Communications, Germany), Wen Xu (Intel, Germany), Gerhard Bauch (Universitaet der Bundeswehr Munich, Germany)................................. 219

Lattice Network Codes Based on Eisenstein Integers
Qifu T Sun (The Chinese University of Hong Kong, Hong Kong), Jinhong Yuan (University of New South Wales, Australia)................................. 225

Impact of intra-flow network coding on the relay channel performance: an analytical study
Anya Apavatjrut (Chiang Mai University, Thailand), Claire Goursaud (INSA-Lyon, France), Katia Jaffrès-Runser (University of Toulouse, France), Jean-Marie Gorce (INSA-Lyon, France)................................. 232

Impact of Rateless Codes on System Delay and Throughout for Network-coded Multi-source and Multi-destination Scenarios
................................. 240
Zheng Ma (Southwest Jiaotong University, P.R. China), Zhiguo Ding (Newcastle University, United Kingdom), Pingzhi Fan (Southwest Jiaotong University, P.R. China)

Joint Source/Channel Coding in 3D-JPEG2000 for Wireless 3D Region of Interest Transmission in 3D Medical Imaging Data
Victor Sanchez (Universitat Autonoma de Barcelona, Spain), Joan Serra-Sagrista (Universitat Autonoma de Barcelona, Spain)

ENERGY EFFICIENT PROTOCOLS for WIRELESS NETWORKS

Energy Efficient Network Data Transport through Adaptive Compression using the DEEP Platforms
Digvijay Singh (University of California, Los Angeles, USA), William Kaiser (University of California, Los Angeles, USA)

NIZE - A Near Field Communication Interface Enabling Zero Energy Standby for Everyday Electronic Devices
Norbert Druml (Graz University of Technology, Austria), Manuel Menghin (Graz University of Technology, Austria), Rejhan Basagic (Graz University of Technology, Austria), Christian Steger (Graz University of Technology, Austria), Reinhold Weiss (Graz University of Technology, Austria), Holger Bock (Infineon Technologies, Austria), Josef Haid (Infineon Technologies Austria AG, Austria)

Time-Knocking: A Novel Addressing Mechanism for Wake-up Receivers
Joaquim Oiler (Universitat Politecnica de Catalunya, Spain), Ilker Demirkol (Universitat Politecnica de Catalunya, Spain), Josep Paradells (UPC, Spain), Jordi Casademont (Technical University of Catalonia (UPC), Spain), Wendi Heinzelman (University of Rochester, USA)

WIRELESS MESH NETWORKS

The Interaction Between TCP Reordering Mechanisms and Multi-path Forwarding in Wireless Mesh Networks
Jonas Karlsson (Karlstad University, Sweden), Per Hurttig (Karlstad University, Sweden), Anna Brunstrom (Karlstad University, Sweden), Andreas J. Kassler (Karlstad University, Sweden), Giovanni Di Stasi (University of Naples Federico II, Italy)

An Interference-Aware Routing Metric for Multi-Radio Multi-Channel Wireless Mesh Networks
Amira Bezzina (University of Manouba, Tunisia), Mouna Ayari (University of La Manouba - Tunisia, Tunisia), Rami Langar (UPMC - University of Paris 6, France), Farouk Kamoun (SESAME University, Tunisia)

VLX: A Novel Virtual Localization Extension for Geographical Leash-based Secure Routing in Indoor Wireless Mesh Scenarios
Mohamad Sbeiti (Dortmund University of Technology, Germany), Jonas Hinker (Dortmund University of Technology, Germany), Christian Wietfeld (TU Dortmund University, Germany)
CELLULAR SYSTEMS I

On the Relay Placement Problem in a Multi-cell LTE-Advanced System with Co-channel Interference
Omar Abdallah Elgendy, O. A. Elgendy (Faculty of Engineering, Cairo University, Egypt), Mahmoud H. Ismail (Cairo University, Egypt), Khaled Elsayed (Cairo University, Egypt) ................................................................. 300

Dimensioning of the Shared Transport Network for Collocated Multiradio: LTE and HSDPA
Xi Li (University of Bremen, Germany), Ming Li (Hamburg University of Technology, Germany), Umar Toseef (University of Bremen, Germany), Dominik Dulas (Nokia Siemens Networks, Poland), Michal Nowacki (Nokia Siemens Networks, Germany), Andreas Timm-Giel (Hamburg University of Technology, Germany), Carmelita Goerg (University of Bremen, Germany), Radoslaw Ruchala (Nokia Siemens Networks, Poland) .................................................................................................................. 308

OPPORTUNISTIC NETWORKS and DTN

Context Sensing for Autonomic Forwarding in Opportunistic Networks
Elena Pagani (University of Milano, Italy), Gian Paolo Rossi (Università degli Studi di Milano, Italy) .................................................................................................................................. 316

Energy-Efficient Cooperative Download for Smartphone Users through Contact Time Estimation
Keiichi Yasumoto (Nara Institute of Science and Technology, Japan), Weihua Sun (Nara Institute of Science and Technology, Japan), Minoru Ito (Nara Institute of Science and Technology, Japan) .................................................................................................................. 324

DTN-Based Data Aggregation for Timely Information Collection in Disaster Areas
Jovilyn Therese B Fajardo (Nara Institute of Science and Technology, Japan), Keiichi Yasumoto (Nara Institute of Science and Technology, Japan), Naoki Shibata (Shiga University, Japan), Weihua Sun (Nara Institute of Science and Technology, Japan), Minoru Ito (Nara Institute of Science and Technology, Japan) .................................................................................................................. 333

Mistify: Augmenting Cloud Storage With Delay-Tolerant Cooperative Backup
Karthik Nilakant (University of Cambridge, United Kingdom), Jon Crowcroft (University of Cambridge, United Kingdom), Eiko Yoneki (University of Cambridge, United Kingdom) .................................................................................................................. 341

Dynamic Temporal Scalability: video adaptation in sparse Mobile Ad-Hoc Networks
Sergio Cabrero (University of Oviedo, Spain), Thomas Plagemann (University of Oslo, Norway), Xabier Garcia Pañeda (University of Oviedo, Spain), Roberto Garcia (University of Oviedo, Spain), David Melendi (University of Oviedo, Spain) .................................................................................................................. 349
ALGORITHMS and MODELS

Modeling Routing in Smartphones-Based Wireless Networks using Evolving Graphs
David Soler (Universitat Politècnica de València, Spain), José Albiach (Universitat Politècnica de València, Spain), Eulalia Martínez (Universitat Politècnica de València, Spain), Pietro Manzoni (Universidad Politécnica de Valencia, Spain) .......................................................... 357

Mitigating the Effect of Mobility on Cooperation in Wireless Ad Hoc Networks
Amr E. Hilal (Virginia Tech, USA), Allen B. MacKenzie (Virginia Tech, USA) .......................................................... 365

How to Reduce and Stabilize MPR sets in OLSR networks
Leonardo Maccari (University of Trento, Italy), Renato Lo Cigno (University of Trento, Italy) .......................................................... 373

Mean Degree of Ad Hoc Networks in Environments with Obstacles
Cédric Aboue-nze (University of Le Havre, France), Frédéric Guinand (Le Havre University, France) .......................................................... 381

On the Topology Characterization of Guifi.net
Llorenç Cerdà-Alabern (Universitat Politècnica de Catalunya, Spain) .......................................................... 389

On the Modeling of a Realistic Wireless Channel by means of a Hidden Markov Process
David Gómez (Universidad de Cantabria, Spain), Ramón Agüero (University of Cantabria, Spain), Marta Garcia-Arranz (University of Cantabria, Spain), Luis Muñoz (University of Cantabria, Spain) .......................................................... 397

COGNITIVE RADIO

Optimal Random Access and Random Spectrum Sensing for an Energy Harvesting Cognitive Radio
Ahmed El Shafie (Wireless Intelligent Networks Center (WINC), Nile University, Egypt), Ahmed Sultan (Alexandria University, Egypt) .......................................................... 403

Optimal Policy for Joint Spectrum Resource Management in Multi-Band Cognitive Radio Networks
Junichi Suga (Fujitsu Laboratories LTD., Japan), Tao Guo (University of Surrey, United Kingdom), Rahim Tafazolli (University of Surrey, United Kingdom) .......................................................... 411

Enhanced Protection of Hidden Primary Users through Filtering based on Suspect Channels Classification
Jose Marinho (Instituto Superior de Engenharia de Coimbra (ISEC), Portugal), Edmundo Monteiro (University of Coimbra, Portugal) .......................................................... 419

Heterogeneous torus Quorum-based Rendezvous in Cognitive Radio Ad Hoc Networks
Sylwia Antonina Romaszko (RWTH Aachen University, Germany), Petri Mähönen (RWTH Aachen University, Germany) .......................................................... 427
SECURITY, PRIVACY & LOCATION AWARE APPLICATIONS

Path Privacy Protection in Continuous Location-Based Services over Road Networks
Kai-Ting Yang (National Taiwan University of Science and Technology, Taiwan), Ge-Ming Chiu (National Taiwan University of Science and Technology, Taiwan), Huei-Jhih Lyu (National Taiwan University of Science and Technology, Taiwan), Ding-Jie Huang (National Taiwan University of Science and Technology, Taiwan), Wei-Chung Teng (National Taiwan University of Science and Technology, Taiwan)

Evaluating the threat of epidemic mobile malware
Christian Szongott (Leibniz Universität Hannover, Germany), Benjamin Henne (Leibniz Universität Hannover, Germany), Matthew Smith (Leibniz Universität Hannover, Germany)

Container Security Device Chain Network for Safe Railway Transportation
Younghwan Yoo (Pusan National University, Korea)

Authenticating a Mobile Device’s Location Using Voice Signatures
Jack Brassil (HP Laboratories, USA), Ravi Netravali (Columbia University, USA), Stuart Haber (HP Laboratories, USA), Pratyusa K Manadhata (Hewlett Packard, USA), Prasad Rao (Hewlett Packard, USA)

CELLULAR SYSTEMS II

PaGeO: Pareto-based Genetic Optimization for LTE Radio-over-Fiber Cellular Backhauling
Ahmed Haddad (Telecom ParisTech, France), Maurice Gagnaire (Telecom ParisTech (École Nationale Superiéure des Télécommunications), France)

Resource Allocation in Macrocell-Femtocell Network using Genetic Algorithm
Hanaa Marshoud (Khalifa University of Science, Technology & Research (KUSTAR), UAE), Hadi Otrok (Khalifa University of Science, Technology & Research (KUSTAR), UAE), Hassan Barada (Khalifa University of Science, Technology and Research, UAE), Rebeca Estrada (ETS, Canada), Abdallah Jarray (University of Ottawa, Canada), Zbigniew Dziong (École de technologie supérieure, University of Quebec, Canada)

Deployment and Interface Design Considerations for Radio Environment Maps
Siva Subramani (Toshiba Research Europe Limited, United Kingdom), Tim D Farnham (Toshiba Research Europe Ltd., United Kingdom), Mahesh Sooriyabandara (Toshiba Research Europe Limited, United Kingdom)

COOPERATIVE NETWORKS and MIMO CHANNELS

On the Impact of Power Allocation on Coalition Formation in Cooperative Wireless Networks
Power Allocation in Multi-node Cooperative Network in Rician Fading Channels
Mulugeta K Fikadu (University of Vaasa, Finland), Mohammed Salem Elmusrati (University of Vasa, Finland), Reino Virrankoski (University of Vaasa, Finland) ............................................................................................................................... 496

Adaptive Candidate Selection Scheme in QRM-MLD Algorithm for MIMO Detection
Wei Hou (The University of Electro-Communications, Japan), Tadashi Fujino (The University of Electro-Communications, Japan), Toshiharu Kojima (The University of Electro-Communications, Japan) ............................................................................................................................... 502

A Simple Model for Imperfect Channel State Information and Its Application for the Assessment of Interference Alignment
Danish Aziz (Alcatel-Lucent Bell Labs, Germany), Sevil Sentuerk (Alcatel-Lucent, Germany), Andreas Weber (Alcatel-Lucent, Germany), Thorsten Wild (Alcatel-Lucent Bell Labs, Germany) ............................................................................................................................... 507

PEMOS 2012: 2012 Third International Workshop on the Performance Enhancements in MIMO OFDM Systems

3rd International Workshop on the Performance Enhancements in MIMO-OFDM Systems

Resource Allocation Scheme for MIMO-OFDMA Systems with Proportional Fairness Constraints
Mohammed Ali (KFUPM, Saudi Arabia), Samir Al-Ghadhban (KFUPM, Saudi Arabia), Ashraf Mahmoud (KFUPM, Saudi Arabia) ............................................................................................................................... 512

Outage performance analysis and optimization of OFDM-based relaying protocols
Nassar Ksairi (HIAST, Syria) ............................................................................................................................... 517

Performance of Space Time Trellis Code Using Fading Channel
Muhammad Ehsan ul Haq (National University of Modern Languages, Pakistan) ............................................................................................................................... 523

3rd International Workshop on the Performance Enhancements in MIMO-OFDM Systems

Channel Estimation Using RF Signal Processor Based on OFDM System
Md. Abdul Latif Sarker (Chonbuk National University, Korea), Moon Ho Lee (Chonbuk National University, Korea) ............................................................................................................................... 528

An Improved Sphere Decoder for MIMO Systems
Goodwell Kapfunde (University of Hertfordshire, United Kingdom), Yichuang Sun (University of Hertfordshire, United Kingdom), Nandini Alinier (University of Hertfordshire, United Kingdom) ............................................................................................................................... 533
Robust adaptive detection in linearly precoded MIMO-OFDM systems with hard/soft decoding
Felip Riera-Palou (University of the Balearic Islands, Spain), Guillem Femenias (University of the Balearic Islands, Spain) .......................................................... 538

Enhanced Channel Estimation Technique in MIMO-OFDM System
Mohamed Ahmed (Khalifa University of Science, Technology and Research, UAE), Shihab Jimaa (Khalifa University, UAE), Ibrahim Abualhaol (Khalifa University, UAE) ........................................................................ 545

VECON 2012: 2012 Second International Workshop on Vehicular Communications and Networking

2nd International Workshop on Vehicular Communications and Networking

Optimum maneuvering under time constraints for high speed vehicles
Juan-Bautista Tomas-Gabarron (Polytechnic University of Cartagena, Spain), Esteban Egea-Lopez (Polytechnic University of Cartagena (UPCT), Spain), Joan Garcia-Haro (Technical University of Cartagena, Spain) .......................................................................................................................... 550

Enhancing Broadcast Vehicular Communications Using Beamforming Technique
Ahmed Soua (Institut Telecom, France), Walid Ben-Ameur (Telecom SudParis, France), Hossam Affifi (Institut Telecom, France) ...................................................................................................................... 557

Advances in the Analysis of Urban VANETs: Scalable Integration of RADII in a Network Simulator
Riccardo M. Scopigno (Istituto Superiore Mario Boella, Italy), Hector Agustin Cozzetti (Istituto Superiore Mario Boella, Italy), Luca Pilosu (Istituto Superiore Mario Boella, Italy), Francesco Fileppo (Istituto Superiore Mario Boella, Italy) .................................................................................................................. 563

Multi-objective OLSR optimization for VANETs
Jamal Toutouh (University of Malaga, Spain), Enrique Alba (University of Malaga, Spain) ................................................................................................................................. 571

2nd International Workshop on Vehicular Communications and Networking

EHealth Service Support In IPv6 Vehicular Networks
Sofiane Imadali (University of Paris-Sud 11, France), Athanasia Karanasiou (Vidavo, Greece), Alexandru Petrescu (Commissariat à l'Énergie Atomique, France), Ioannis Sifniadis (Vidavo, Greece), Véronique Vèque (University of Paris-Sud 11, France), Pantelis Angelidis (University of Western Macedonia, Greece) .................................................................................................................. 579

Field Trial Results on Uplink Joint Detection for Moving Relays
Michael Grieger (Technische Universität Dresden, Germany), Gerhard Fettweis (Technische Universität Dresden, Germany) .................................................................................................... 586

Distributed Clustering in Vehicular Networks ................................................................................................................................. 593
CNBuB'2012: 1st International Workshop on Community Networks and Bottom-up-Broadband (CNBuB 2012)

1st Workshop on Community Networks and Bottom-up-Broadband

On the Relevance of Using Affordable Tools for White Spaces Identification
Marco Zennaro (ICTP - The Abdus Salam International Centre for Theoretical Physics, Italy), Ermanno Pietrosemoli (International Centre for Theoretical Physics (ICTP), Italy), Antoine Bigomokero Bagula (University of Cape Town, South Africa), Sindiso Nleya (Computer Science Department, Zimbabwe)

Topology patterns of a community network: Guifi.net
Davide Vega (Universitat Politècnica de Catalunya, Spain), Llorenç Cerdà-Alabern (Universitat Politècnica de Catalunya, Spain), Leandro Navarro (Universitat Politècnica de Catalunya, Spain), Roc Meseguer (Universitat Politècnica de Catalunya, Spain)

Community-Lab: Architecture of a Community Networking Testbed for the Future Internet
Axel Neumann (Pangea, Spain), Ivan Vilata (Pangea, Spain), Xavier León (Universitat Politècnica de Catalunya, Spain), Pau Escrich (Guifi.net Foundation, Spain), Leandro Navarro (Universitat Politècnica de Catalunya, Spain), Ester López (Universitat Politècnica de Catalunya, Spain)

Characterizing the Multimedia Service Capacity of Wireless Mesh Networks for Rural Communities
Joaquin Chung (University of Panama, Panama), Grace González (University of Panama, Costa Rica), Ivan Armuelles (University of Panama, Panama), Tomás Robles (Technical University of Madrid, Spain), Ramon Alcarria (Universidad Politècnica de Madrid, Spain), Augusto Morales (Technical University of Madrid, Spain)

1st Workshop on Community Networks and Bottom-up-Broadband

Improved Community Network Node Design using a DLEP based Radio-to-Router Interface
Christoph Barz (Fraunhofer FKIE, Germany), Henning Rogge (Fraunhofer Inst. for Communication, Information Processing and Ergonomics FKIE, Germany)

Overhead Analysis of Embedded Wireless Testbeds
Nathan Samson (University of Antwerp, Belgium), Glenn Daneels (University of Antwerp, Belgium), Bart Braem (IBBT, Belgium), Chris Blondia (University of Antwerp, Belgium)

An evaluation of BMX6 for Community Wireless Networks
Axel Neumann (Pangea, Spain), Ester López (Universitat Politècnica de Catalunya, Spain), Leandro Navarro (Universitat Politècnica de Catalunya, Spain)

Improving Mesh-Agnostic Client Announcement in B.A.T.M.A.N.-Advanced
Antonio Quartulli (University of Trento, Italy), Renato Lo Cigno (University of Trento, Italy)

WMSN'2012: 1st International Workshop on Wireless Multimedia Sensor Networks (WMSN'12)

1st Workshop on Wireless Multimedia Sensor Networks

QoV: Assessing the Monitoring Quality in Visual Sensor Networks
Daniel G. Costa (State University of Feira de Santana, Brazil), Luiz Affonso Guedes (Federal University of Rio Grande do Norte, Brazil), Francisco Vasques (University of Porto, Portugal), Paulo Portugal (University of Porto, Portugal)

Packet Scheduling in Multi-Channel Layered-Video Streaming over Wireless Networks
Ronit Nossenson (Jerusalem College of Technology, Israel), Noam Amram (LiveU, Israel)

Fusion Techniques for Multi-hop Relay Wireless Sensor Networks
Joumana Farah (Holy-Spirit University of Kaslik, Lebanon), Anthony Beylerian (Holy-Spirit University of Kaslik, Lebanon), Charles Yaacoub (Holy-Spirit University of Kaslik, Lebanon), Ralph Stephan (Holy-Spirit University of Kaslik, Lebanon)

QoE-aware FEC Mechanism for Intrusion Detection in Multi-tier Wireless Multimedia Sensor Networks
Zhongliang Zhao (University of Bern, Switzerland), Torsten Ingo Braun (University of Bern, Switzerland), Denis Lima Rosário (Federal University of Para, Brazil), Eduardo Cerqueira (Federal University of Para, Brazil), Roger Immich (University of Coimbra, Portugal), Marilia Curado (University of Coimbra, Portugal)

Workshop on Wireless Multimedia Sensor Networks

Cross-Layer Caching Based Optimization for Wireless Multimedia Sensor Networks
Nestor Tiglao (INESC-ID/IST, Portugal), Antonio M. Grilo (INESC/IST, Portugal)

Detecting and Coding Region of Interests in Bi-Level Images for Data Reduction in Wireless Visual Sensor Network
Motion estimation on decoder side for low-complexity video encoding in wireless sensor networks
Johannes Karlsson (Umeå University, Sweden) ................................................................. 713

STWiMob'2012: 2012 Fifth International Workshop on Selected Topics in Mobile and Wireless Computing

5th International Workshop on Selected Topics in Mobile and Wireless Computing

A Combined Spectrum Sensing and Terminals Localization Technique for Cognitive Radio Networks
Wael Guibène (EURECOM, France) .................................................................................. 719

Signal Detection for Spread Spectrum Communication Systems with Gradient Algorithm
Samantha Sriyananda (University of Jyväskylä, Finland), Jyrki Joutsensalo (University of Jyvaskyla, Finland), Timo Hämäläinen (University of Jyväskylä, Finland) ........................................................................................................ 728

TOA Location Estimation based on Cognitive Radio Channel Occupancy Prediction
Robin Thomas (University of Pretoria, South Africa), Simon Barnes (University of Pretoria, South Africa), Bodhaswar TJ Maharaj (University of Pretoria, South Africa) .................................................................................. 733

Effect of Spatial Correlation on MMSE-Based Interference Alignment in a Multiuser MIMO MB-OFDM System
Chung Le (Wilhelm Leibniz University Hannover, Institute of Communications Technology, Germany), Emil Dimitrov (Leibniz Universität Hannover, Germany), Anggia Anggraini (University of Hannover, Germany), Jürgen Peissig (Leibniz Universität Hannover, Germany), Hans-Peter Kuchenbecker (University of Hannover, Institut fuer Allgemeine Nachrichtentechnik, Germany) .................................................................................. 739

Analyzing Randomly Placed Multiple Antennas for MIMO Wireless Communication
Thomas Janson (University of Freiburg, Germany), Christian Schindelhauer (University of Freiburg, Germany) .................................................................................. 745

5th International Workshop on Selected Topics in Mobile and Wireless Computing

Multicast Routing Protocol for Vehicular Delay-Tolerant Networks
Adriano Palma (INESC-ID, Instituto Superior Técnico, Technical University of Lisbon, Portugal), Paulo Pereira (INESC-ID, Portugal), Augusto J. D. Casaca (Instituto Superior Técnico in Lisbon, Portugal) .................................................................................. 753

A Hybrid Network for Maritime On-Board Communications
Liping Mu (Universtiy of Agder, Norway) ........................................................................ 761
Implementing Personal Home Controllers on Smartphones for Service-Oriented Home Network
Keisuke Tokuda (Kobe University, Japan), Shinsuke Matsumoto (Kobe University, Japan), Masahide Nakamura (Kobe University, Japan) ............................................. 769

Optimising file delivery in a maritime environment through inter-vessel connectivity predictions
Panayiotis Kolios (Cyprus University of Technology, Cyprus), Lambros Lambrinos (Cyprus University of Technology, Cyprus) ............................................. 777

Moving the Mobile Evolved Packet Core to the Cloud
James Kempf (Ericsson Research, USA), Bengt Johansson (Ericsson, Sweden), Sten Pettersson (Ericsson, Sweden), Harald Lüning (Ericsson, Sweden), Tord Nilsson (Ericsson, Sweden) ............................................. 784

Mobile Clouds: Comparative Study of Architectures and Formation Mechanisms
Hamidreza Bagheri (University of Oulu, Finland), Prasanth Karunakaran (University of Erlangen-Nuremberg, Germany), Kaveh Ghaboosi (Airvana, LLC., USA), Timo Bräysy (University of Oulu, Finland), Marcos D Katz (University of Oulu, Finland) ............................................. 792

5th International Workshop on Selected Topics in Mobile and Wireless Computing

The Effect of Symmetric Block Ciphers on WSN Performance and Behavior
Christos Antonopoulos (Technological Educational Institute of Messolonghi, Greece), Christos Petropoulos (Technological Educational Institute of Messolonghi, Greece), Konstantinos Antonopoulos (Technological Educational Institute of Messolonghi, Greece), Vasilios Triantafyllou (Technical University of Messology, Greece), Nikolaos Voros (Dept. of Telecommunication Systems and Networks, Greece) ............................................. 799

Secure Hotspot Authentication through a Near Field Communication Side-Channel
Alfredo Matos (Caixa Mágica Software, Portugal), Daniel Romão (Caixa Mágica Software, Portugal), Paulo Trezentos (Caixa Mágica Software Lda, Portugal) ............................................. 807

Cross-Layer adaptive power save control method for wireless local area networks
Hirokazu Kobayashi (Panasonic Corporation, Japan), Masaaki Harada (Panasonic Corporation, Japan), Satoshi Senga (Panasonic Corporation, Japan), Kazushige Yamada (Panasonic Corporation, Japan), Junichiro Soeda (Panasonic Corporation, Japan), Tsutomu Sekibe (Panasonic Corporation, Japan) ............................................. 815

Traffic Distribution and Network Capacity Analysis in Social Opportunistic Networks
Bambang Soelistijanto (University of Surrey, United Kingdom), Michael P. Howarth (University of Surrey, United Kingdom) ............................................. 823

Impact of Semantic-aware Radio Resource Management Schemes on Video Streaming Service
............................................. 831
Luis Guillermo Martinez Ballesteros (KTH Royal Institute of Technology, Sweden), Pietro Lungaro (Royal Institute of Technology (KTH), Sweden), Zary Segall (KTH Royal Institute of Technology, Sweden)

5th International Workshop on Selected Topics in Mobile and Wireless Computing

Real Time Radio Coverage Monitoring in Self-organizing Networks with User Feedback
Kejiong Li (Queen Mary, University of London, United Kingdom), Peng Jiang (Queen Mary University of London, United Kingdom), Eliane Bodanese (Queen Mary, University of London, United Kingdom), John Bigham (Queen Mary, University of London, United Kingdom) .................................................. 837

Physical-layer Intrusion Detection for Wireless Networks using Compressed Sensing
Alexandros Fragkiadakis (Institute of Computer Science, FORTH, Greece), Sofia Nikitaki (FORTH-ICS and University of Crete, Greece), Panagiotis Tsakalides (FORTH-ICS and University of Crete, Greece) ................................. 845

An Approach of Secure and Fashionable Recognition for Pervasive Face-to-Face Social Communications
Zheng Yan (Xidian University, P.R. China), Yu Chen (Swiss Federal Institute of Technology (EPFL), Switzerland), Peng Zhang (Xian University of Posts and Telecommunications, P.R. China) .......................................................... 853

A Deployable Scheme of CMT-SCTP with Off-the-Shelf Android Smartphones
Atsuo Tachibana (KDDI R&D Laboratories, Japan), Teruyuki Hasegawa (KDDI R&D Laboratories Inc., Japan) .............................................................................. 861

Correlated Movement Mobility Model and Constant Acceleration Model for EKF-Based Tracking Applications
Oktay Alkin (Southern Illinois University Edwardsville, USA), Binod Pant (Southern Illinois University Edwardsville, USA) .................................................. 869
